The health status of black South Africans is generally low. Infant mortality is high (ten times that of white infants) and white life expectancy is 30% greater than that of blacks. There is one doctor to every 600 whites (about equal to the ratio in the U.S.) but only 1 doctor for every 40,000 blacks in the rural areas.

In summary, to us in the United States, apartheid is a system of racially biased laws which circumscribe nearly every facet of the daily lives of the South African blacks, limiting their economic liberties, and prohibiting any significant voice in the Government that controls their existence.

Is the Government acting to redress this situation?

It seems clear that the Government recognizes there is both internal and external criticism of its policy. It is seeking to give the impression that it is responding to such criticism by such actions as the following:

A President's Council consisting of Whites, Coloreds, and Asians (but no black Africans) has been established as a multiracial consultative body.

The budget for black education was increased 26% in 1979 and 37% in 1980 (per capita expenditures for whites remain nearly 10 times greater than those for blacks) and plans have been announced to phase in compulsory primary education for blacks in selected areas.

Budgeted expenditures for black housing have been increased.

"Petty apartheid"—the whole apparatus of segregation in the routine of daily life—has been partially relaxed.

Black labor unions have been recognized and most statutory job reservations have been abolished.

But despite such actions there has been little change in the basic structure of apartheid itself.

The weakness of the Government's program is twofold. The pace at which it addresses the presssing social and economic needs of the blacks is far too slow, and it fails to confront the issue of political participation. Nowhere does it begin to advance toward what former British Prime Minister Mr. Edward Heath has called the only ultimate solution: "The granting of full political rights to the non-white population of South Africa—a universal franchise at the national level."

III. ALTERNATIVE ROADS TO THE FUTURE

What will be the reaction to the Government's program?

Already one sees signs of a growing, though reluctant, acceptance among both South African blacks and outside observers that fundamental changes will come only through revolutionary violence:

The young blacks are increasingly chafing at inaction. An estimated 8,000 have left so far for military training abroad.

Many older blacks, sharing the impatience of the young, are resigning themselves to the inevitability of sabotage and guerrilla warfare as necessary stimulants to change.

The growing acceptance of violence as a tool of change has stimulated interest in radical ideologies, particularly Marxism.

The concentrated opposition of Africa states is increasing South Africa's diplomatic and ideological isolation.

The political and moral pressures on the West to further that isolation are increasing. President Shagari of Nigeria, for example, has said that Nigeria "would use any means" at its disposal, "including oil"—and Nigeria is the second largest supplier of crude oil to the United States—to persuade the U.S. to use its "powerful economic position to discourage and eventually destroy apartheid in South Africa."

The pressure on the West is beginning to lead to expressions of support. The EEC, for example, has issued a statement which says it "condemns apartheid without reservation" as "an evil system which misstates the fundamental rights of the majority of the citizens of South Africa." It concludes by stating that the EEC countries "are convinced that the apartheid system must end".

But the words of South Africans themselves describe the situation far more eloquently than any words of mine. The Study Commission took testimony from scores of them. Here is a sample of what they said:

From a black clerk who lives in Soweto:

"I live in a house with no electricity and with cold water from an outside tap. I see my wife in the Transkei but once or twice a year—she is refused permission to live in Johannesburg because she is a citizen of the Homelands. I was arrested for failing to carry my passbook. Although never charged with an offense, I was placed in solitary confinement. They wanted to know what I've been doing since the day I was born. They beat me. I don't forget that so easy."

From a white Afrikaner, a small builder, who lives in Johannesburg:

"Who can be certain of what's going to happen. We live with this feeling of uncertainty. I feel that in Africa today no matter where you live, you've got to have some sort of security against the blacks. I have guns and I know how to use them."

From a Malayan doctor practicing in a Colored township:

"The frustration is all over South Africa. And it's not just with the schooling and the educational standards. It's a frustration that goes right across the board. It's a question of knowing that when you've done your work; you've got to go back to those tenements. And even if you're in a job and have some ability, you know you are not going to rise above a certain level. Or if you do go beyond it you won't be paid what you should be paid. You know that your education is inferior. You know that when you go outside to get a bus, even in the pouring rain, you first have to check there is no sign that says the bus is for whites only. Basical-

ly it all boils down to that little piece of paper—your passbook—no matter what your standards or education. You are in a quagmire. You don't understand it and you just turn to violence—senseless violence. The black population is in a complete ferment. They are not going to take very much more of what has already been handed out to them."

From one of the few black managers:

"The generation that comes after us will not be concerned with any kind of negotiation. It will go for a takeover, the sort of thing that happened in Zimbabwe. The moderate guys are being lured into the militant camp and the militants will tell you 'Forget about negotiation.' I don't think the attitudes of the average white man are changing. If anything his attitudes are hardening because he feels threatened, in a class sense, by blacks. No black person will tell you that there's been any real change in this country. The educational system hasn't changed. The opportunities within companies haven't changed. And the changes that have been made are not initiated by the black people themselves. How could they be, when black people aren't represented in Parliament."

From a white lawyer of British descent.

"There's an element of overkill on both sides. But I am afraid things are never going to be such that you can get out of that overkill situation. I think time is against us. While I am totally against guerrilla activities and terrorism and sabotage, I don't know if these people have any alternatives."

Because the South African Government continues to refuse to make any fundamental change in its racial policies, a violent explosion appears inevitable.

As a foreigner I was hesitant to make such a statement until I found that my views are shared by many others both within and outside your own country. Recently, for example, Andre Brink, one of the most influential of Afrikaner writers, speaking of the hope of the blacks for political rights, said: [3]

"There was the sudden hope triggered by the liberation of Angola and Mozambique and Zimbabwe. Then the fall from grace of Vorster and the totally unexpected promises made by Prime Minister Botha, which of course haven't come to anything. We're at this stage of terrible frustration at the moment."

Brink was referring to speeches made by Botha in 1979 and 1980, which seemed to promise the dismantling of at least part of the structure of apartheid. But, because almost all the promised reforms have been abandoned. Brink sees a dark future. He writes:

"I tend by nature to go for a glimmering of optimism. For a decade I've taken the line that things are bad, but that there's a whole series of possible new developments just waiting to materialize. Now I'm slowly veering towards pessimism. Things have taken a turn for the worst, and last year was the worst I've ever known, even worst than 1976. There was a sort of turn in the historical current, a slow realization that nothing was going to happen. I've kept on believing that we could have a relatively peaceful change, but, the way things are now, change can only come through an explosion. And that's terribly, terribly sad. What depresses me most of all is that if the worst comes to the worst there'll be this totally unnecessary human waste."

[3] As quoted in The New York Times, June 13, 1982.

It is possible that the "explosion" when it occurs will be preceded or accompanied by Soviet penetration into the region—certainly both Mr. Edward Heath and the Study Commission on U.S. Policy Toward South Africa, consider that a probability rather than a possibility.

Mr. Heath, in a speech in this city in August of last year, pointed to the relentless geopolitical onslaught of the Soviet Union as one of the major forces shaping the international environment today. He drew attention to the recent tendency of Moscow to use proxy troops in areas far distant from the Soviet Union—for example, in Angola, Ethiopia, Mozambique, and South Yemen—which enabled it to gain direct military leverage over conflicts to which it would never dare to commit forces of its own. The use of such proxy forces is underpinned by the increasing strength and geographical reach of the Soviet Union's own military power.

The Prime Minister stated that in his opinion the frustration of the non-white population in South Africa, born of the system of apartheid and fanned by the emergence of black majority rule elsewhere in Africa, constitutes one of the greatest opportunities for Soviet advance in the world today. He foresaw Russia developing a stranglehold on the region as a whole and denying to the West both the strategically important sea route around South Africa's Cape of Good Hope [4] and her supplies of essential minerals.

The Study Commission in its Report wrote: "There are no easy solutions for South Africa. The choice is not between 'slow, peaceful change' and 'quick violent change' but between a slow, uneven, sporadically violent evolutionary process and a slow but much more violent, descent into civil war." Under today's conditions, it clearly viewed the latter as the more likely alternative.

And it believed, as did Mr. Heath, that the Soviet Union, directly or by proxy, would be fully engaged in such a civil war. The Commission recognized that today the blacks lack the means to mount any sustained military challenge to white authority:

In terms of organization, tactics, and resources, the internal revolution is still at an embryonic stage;

Physical repression by the government is severe, and can be increased further;

The African Frontline States (Angola, Botswana, Mozambique, Tanzania, Zambia and Zambabwe) are not only too weak to provide training and logistical support for guerrilla forces operating within South Africa, but are too weak as well to resist retaliatory strikes against them—South Africa has the military power today to strike hundreds of miles beyond its borders.

But it is only a question of time before this military balance will be reversed.

The counter-insurrency struggle in Namibia has demonstrated how a relatively small number of guerrillas can tie up substantial military forces. As the economic strength of the Frontline States increases—and it will—they will gain the resources to support such guerrilla forces. When that occurs we can expect Soviet-Cuban-East German support of the Frontline States to expand to whatever level is required to protect them against retaliation by South Africa. Whatever escalation South Africa undertakes will be matched in scale and technology by the external Communist powers.

The ultimate outcome of such a conflict, unless it were to be influenced by the introduction of Western military power, hardly seems in doubt.

What is in doubt is precisely when the mounting racial frustration in South Africa will finally explode.

Earlier, my own assessment was that it would occur within the next three to five years. Recent discussions, however, with African leaders outside of South Africa have convinced me that this time frame is unlikely.

These men all agree with Mr. Brink. They state emphatically that peaceful evolutionary change at an acceptable pace is simply no longer possible in South Africa. They believe that violence on an ascending scale is now inevitable. Most believe that the final confrontation will come within five to ten years—none foresee the present system of white political domination extending beyond our lifetime.

They base this prediction on their assessment that today government security measures in South Africa are so repressive and ruthless as to prevent any black leader from raising his head; and that the Frontline States are so weak as to be unable to serve as external bases for economic and military support.

They feel that during the next five to 10 years three critical developments will occur:

(1) The repression within South Africa will push the focus of the struggle outside its borders;

(2) The Soviet Union will move in to support the Frontline States as guerrilla havens; and

(3) The West will be unable to stand in strategic alliance with South Africa because to do so would be regarded as supporting a political system profoundly insulting to the basic human rights of the majority of its population, and hence, unacceptable to the peoples of the West.

In such a situation, the debate over the course to be followed by the West will increase the political tensions between Europe and the United States, and will lead to tensions and disunity between blacks and whites in the U.S.

If that is a description of where the "road" now being followed will lead, can one visualize a feasible alternative? I believe one can. Clearly a major element of such an alternative scenario is the program of economic reform supported by liberal South African business leaders.

These experienced executives have pointed out that it will be simply impossible for South Africa to achieve optimum rates of economic growth if the existing shortages of skilled personnel are allowed to persist into the future by the continuation of present policies—policies that deny most blacks access to the skills required, and deny those blacks possessing such skills the opportunity to apply them. They go on to say that as the necessary economic reforms are put in place they will ultimately lead to political reforms as well.

But I see little evidence to support the conclusion that one set of reforms will automatically follow the other. There has obviously been economic advance for the blacks in South Africa over the past 30 years. But very little political progress has resulted

[4] In 1981, some 2,300 ships travelled the Cape route each month. They delivered 57% of the oil imported by Western Europe and 20% of that imported by the US. Seventy percent of the strategic raw materials used by NATO was also transported via the Cape.

from it. And that was the experience in the United States as well. The economic advance of blacks there, in the two decades prior to 1960, was not accompanied by proportionate political gains.

So although a program of economic reform is highly desirable in itself, and certainly deserving of broader support from both South African and international business leaders, I do not think that it is likely to bring the necessary political reforms fast enough.

I believe that the political issue must be confronted squarely. The South African Government's view that separate, but unequal development, is not inherently discriminatory; and that political participation by all person, regardless of race or color, is totally unacceptable, must—I believe, change.

Now, of course, no outsider can dictate the form of an acceptable political alternative in South Africa. But it seems obvious that whatever the final formula may turn out to be, if it is to have any chance whatever of succeeding, it must be part of a negotiated settlement which will do two absolutely essential things:

It must assure the blacks full participation in genuine political power.

And it must protect the whites against a winner-take-all form of majority rule.

Some will object that rule by a black majority will lower the rate of economic and social advance in South Africa for blacks and whites alike. They point to the evidence that income per capita, literacy levels, and life expectancy are all higher, on average, for blacks in South Africa than in the nations of black Africa. They attribute the difference to the limited experience of blacks with self-rule and they predict the same impact of such rule on South Africa.

They are undoubtedly correct.

The colonial powers no more equipped the blacks in their colonies for self-government than South Africa has trained hers. When Zambia became independent there were 100 college graduates and 1,000 high-school graduates in the entire country. And here in South Africa white university graduates outnumber blacks 75 to 1—in proportion to population: 300 to 1.

But the fact remains: for the blacks, social and economic advance is not an adequate substitute for political power.

Now what should U.S. policy be in the present situation? It should be based on the recognition that black nationalism in South Africa is a struggle whose eventual success can at most only be delayed—and at immense cost—but clearly not permanently denied. Indefinite delay will only guarantee that at some point black resentment will erupt into widespread violence, supported by bases and arms outside the country.

The U.S. must make it clear to South African whites that in the face of such violence the U.S will not support them against the blacks.

But you may question, and some in my own country may question, that the U.S. attitude at the moment of crisis will be so firmly opposed to the policies of your government. Alan Pifer, in his Commemoration Day Lecture at this University, one year ago this month, touched on that issue. He pointed out:

"Whatever its seeming vicissitudes from one administration to another, official American policy toward South Africa is always subject ultimately to the prevailing convictions and attitudes toward racial equality and human rights that arise from our own national experience. This proposition leads to the view that American opposition to apartheid, however the later may be dressed up or rationalized, will be a permanent factor in setting bounds to the nature of the relationship between our two societies".

Pifer went on to say that neither strategic interests nor economic concerns will outweigh these considerations:

"It is the racial and human rights aspects of South Africa which will dominate American thinking and which in the final analysis, will always be decisive" in determining our national policy.

And the fact is that opposition in the United States to your government's racial policies has been increasing throughout the past decade:

Students and faculty on college and university campuses have protested against investment in American corporations doing business in South Africa.

Religious organizations have appeared at annual shareholders' meetings to challenge corporate policies respecting South Africa.

Legislation prohibiting new investment by American companies in South Africa, and requiring those that operate there to do so in accordance with American racial laws, has been introduced in the Congress.

So I entirely agree with Mr. Pifer. And I wish to repeat, as emphatically as I can, my belief that the United States will not support your government if it is confronted by military opposition from those who condemn apartheid—even if the withholding of U.S. support carries with it the risk that South Africa will fall within the Soviet sphere of influence.

I recognize that South Africa's official reaction to such a U.S. position might well be to terminate its exports of the four key minerals it now supplies the West; chromium, manganese, vanadium, and platinum. These materials are essential to Western industy and defense.

In anticipation of such retaliatory action by South Africa, the United States and the other Western nations should begin now to increase their stockpiles, to develop alternative sources of supply, and to prepare contingency plans to share such limited supplies as would be available. Such a program would minimize the impact on the West of South Africa's potential denial of these minerals.

IV. CONCLUSION

Let me, now, summarize and conclude the central points I have made this evening.

For more than two hundred years, from its beginning as an independent sovereign nation, the United States has been committed by its own moral and philosophical tradition to supporting the efforts of those individuals and societies around the world that struggle to achieve political freedom and civil liberty.

As a white American myself I recognize that my country's inconsistencies in applying this tradition to American Indians, and bo black Americans, have been shameful and inexcusable. But I am convinced that, if anything, these mistakes and failures have only strengthened the view of the overwhelming majority of Americans that racial injustice is socially destructive, morally unacceptable, and politically dangerous.

Now the truth is—as all of us in this audience are aware—that some of the most basic and fundamental forms of freedom and liberty continue to be denied to black Africans, and to other nonwhites, here in South Africa.

And it is becoming increasingly clear that the blacks will at some point in the future move forcefully to overturn the apartheid policies of the white minority.

When that confrontation comes and violence erupts, it is probable that the Soviet Union and its satellites will provide both economic and military support to the blacks.

The United States, on the other hand, will almost certainly not find it morally or politically possible to support the white South Africans in their efforts to prevent the blacks from achieving fundamental reforms.

The ensuing conflict will divide and fragment world opinion, and it is entirely possible—if not probable—that much of Southern Africa will fall within the Soviet sphere of influence.

What, then, is to be done?

At the very minimum, all of us—the whites of South Africa, certainly and all those peoples of the West who hope for a just and reasonable resolution of South Africa's problems—ought to draw a lesson from contemporary events in areas as diverse and distant as the Falkland Islands, and the Middle East.

And that lesson is this.

It is better to defuse mounting tension beforehand than to let it exploded into immeasurably more costly—and uncontainable—conflict afterwards.

The final battle lines have not yet been drawn here in South Africa. Fundamental political change, without prolonged large-scale violence, is still possible.

But time is running short, and the options are running out.

And if what is left of the 1980's does not witness real movement towards sharing of political power—and the new Constitutional proposals do not appear to provide for such power sharing—Then South Africa may, and I believe will, become as great a threat to the peace of the world in the 1990's as the Middle East is today.

The most underrated danger of human events is prolonged procrastination.

And the greatest tragedies of history have occurred not so much because of what was finally done, but because of what had earlier foolishly been left undone.

In the matter at hand, to fail to act wisely now is only to ensure having to act desperately later.

This potentially truly great African Republic does not need that, and surely does not want that.

Neither do its friends around the world.

In which number, both my country—and I personally—want to be counted.●

NATIONAL DRUNK AND DRUGGED DRIVING AWARENESS WEEK

● Mr. DURENBERGER. Mr. President, we have all heard the gruesome stories of drinking and driving—the deaths, the injuries, the appalling statistics. But like all tragedies in life, most of us never really perceive ourselves as victims. Drunk driving statistics are startling: 25,000 people will die in alcohol or drug related traffic accidents this year. Countless others will be incapacitated. Think about your family and friends—one out of every two people will, in the course of their

lifetimes, be involved in an alcohol or drug related automobile accident.

Newspaper articles and mass media campaigns can only serve to increase public awareness of the shocking statistics. Unfortunately, these statistics are just that—numbers on a page. They do not convey the loss and suffering and the individual stories behind each number. We will all continue to believe that if we are careful drivers we can avoid these accidents. How idealistic we humans are—and how unrealistic and wrong.

President Reagan has signed a joint resolution of Congress proclaiming December 12-18 as "National Drunk and Drugged Driving Awareness Week." The parties and festivities of the holiday season make this resolution extremely timely. I hope we can all keep these statistics in mind before we get behind the driver's wheel or offer our friends that last drink.●

DANCERS AGAINST CANCER

● Mr. HOLLINGS. Mr. President, I rise today to recognize the outstanding work of the Phi Sigma Delta Fraternity of the University of Maryland. For the 13th consecutive year, Phi Sigma Delta Fraternity and the University of Maryland cosponsored its "Dancers Against Cancer" dance marathon. This year, the 72-hour danceathon was held November 11-14 at the University's Ritchie Coliseum. Originated and sponsored by Phi Sigma Delta, the marathon benefits the American Cancer Society and is held each year in memory of Andrew Estroff, a fraternity brother who died of leukemia in 1976. Paradoxically, Andrew was appointed chairman of the marathon shortly before his illness was discovered.

Keeping to the cause Andrew committed himself to, the fraternity had made exceptional strides conquering this Nation's most dreaded killer disease. Now acclaimed as the world's largest college fundraiser, "Dancers Against Cancer" has raised over $620,000 in the 12-year existence. In the last 2 years alone, the marathon has raised $150,000.

Along with the considerable monetary increases with each marathon, Phi Sigma Delta Fraternity has initiated commensurate increases in other aspects of the event, including promotion and participation. Besides heavy support and endorsement from not only the president of the university, but also the President of the United States, "Dancers Against Cancer" has become a legitimate media spectacle. The fraternity has received substantial coverage from numerous newspapers and magazines, radio and television stations. This year, they had expanded coverage from all the media.

In addition, the marathon has become not only a truly campus-wide event at the Nation's third largest State university, but also an object of support from area businesses, national corporations, and other schools as well.

The marathon, in addition to raising money for a most worthy charity, stimulated great exhibitions of self-sacrifice, unity, and enthusiasm from all who are involved. If only for a relatively short period of time, the entire university and community joined together in pursuit of a common goal, to fight and soon defeat cancer.

Over 150 dancers participated this year. Each couple was sponsored by an organization which independently raised money in hopes of winning for itself one of the many prize incentives, and of sharing in the reward sought by all of us, the cure for cancer.

Mr. President, Phi Sigma Delta Fraternity should be commended for their efforts to assist in our fight against cancer. I know that my colleagues will join me in saluting this fraternity's noteworthy contributions to the American Cancer Society.●

THE FAILURE OF NUCLEAR WEAPONS FREEZE

● Mr. SYMMS. Mr. President, all Americans are in favor of peace and preventing nuclear war. There should be no controversy over the necessity to prevent nuclear war. The nuclear weapons freeze issue has been portrayed as a debate over peace and the prevention of the holocaust of nuclear war. This is a misformulation of the issue, however. Opponents of the nuclear weapons freeze are every bit as interested in preserving peace and preventing nuclear war as are the profreeze advocates. Antifreeze experts fully agree that peace and the prevention of nuclear war are important, indeed vital, American national security objectives. The disagreement arises over how best to achieve these objectives of peace and the prevention of nuclear war. Antifreeze experts believe, in contrast, that peace can best be preserved and nuclear war can best be prevented by a strong American national defense as an effective deterrence of Soviet nuclear attack and blackmail.

UNITED STATES-SOVIET AGREEMENT ON SOVIET SUPERIORITY

Both Soviet and American leaders agree on an important aspect of the freeze debate. Both Soviet and American leaders agree that the Soviet Union has already achieved strategic nuclear superiority over the United States. The following evidence of the United States-Soviet agreement on Soviet superiority is really indisputable.

First, there is no question that the Soviets have long had strategic superiority over the United States as their primary military objective. For example,"Kommunist," the Soviet Communist Party ideological journal stated in May 1972, just before SALT I was signed:

> The military-technology policy of the CPSU is directed toward creating and maintaining *"military superiority."* (Emphasis added.)

Second, the Soviets believe that they have in fact achieved strategic superiority over the United States. In 1977 Soviet Gen. H. Trofimenko noted:

> The change in the correlation of forces (that is the strategic nuclear balance) in the world *in favor of socialism.* (Emphasis added.)

The Soviet Defense Minister, the late Marshall Grechko, stated openly in March 1975:

> The correlation of forces (that is the strategic nuclear balance) has changed in favor of socialism, and to the detriment of imperialism.

The CPSU program of 1977 stated:

> On the basis of fundamental changes in the balance of forces in the world, a *profound restructuring* of the entire system of international relations is taking place.

In 1978, the Chief of the Soviet General Staff, Marshall Ogarkov, stated bluntly and ominously:

> Today the Soviet Union has military superiority over the United States.

A Soviet military journal,"Red Star," stated frankly in January 1980:

> With respect to the military balance, the correlation of forces has shifted—*once and for all and irrevocably* (Emphasis added.)

Thus Soviet leaders themselves acknowledge that they have achieved strategic and overall military superiority over the United States.

Most American defense experts and military leaders also agree with the Soviet leaders that the Soviet Union has achieved strategic and overall military superiority over the United States.

Gen. David Jones, former Chairman of the Joint Chiefs of Staff, stated in 1979 that:

> In some areas—the Soviets have already surpassed us, and we are concerned because their momentum will allow them to gain advantage over the United States in most of the static indicators of strategic force by the early 1980's . . . because of the leadtimes in modern weapons, this progressive shift in the military balance will continue into the mid-1980's, with or without SALT II—regardless of U.S. actions. Soviet strategic capability will increase relative to that of the United States through the mid-1980's.

In such key dynamic measures as survivability, the Soviets also have superiority. Admiral Hayward testified in 1979 that:

> With respect to essential equivalence, it is my view that without any question the Soviets will have a first strike capability over the next few years. If that is not a loss of essential equivalence, I do not know what is.

In addition, both President Reagan and Defense Secretary Weinberger confirmed this dangerous fact in the

Spring of 1982. President Reagan stated in a press conference of March 31, 1982:

The Soviet Union does have a definite margin of superiority—enough so that there is risk, and there is what I have called a window of vulnerability.

The next day, Defense Secretary Weinberger stated:

Unfortunately, it is true.

Soviet strategic force numerical advantages are as follows: 1.6 to 1 in strategic delivery vehicles; 3.7 to 1 in missile throwweight; 1 to 0.9 in strategic warheads; 4 to 1 in equivalent megatons; over 2 to 1 in prompt hard target kill potential; 600 to 0 in long range theater nuclear force missiles.

Thus top American leaders agree with the Soviets that the U.S.S.R. has achieved strategic and overall military superiority.

A nuclear weapons freeze would, according to the statements of both Soviet and American leaders, freeze the United States into a position of dangerous inferiority to the U.S.S.R.

Americans are overwhelmingly in favor of prevention of nuclear war and the reduciton of the role of nuclear weapons in foreign policy. Americans are for peace and the reduction of nuclear weaponry on both the United States and Soviet sides. The nuclear freeze proposals, however, have several defects as a means for achieving the above goals which we all share. The following factors are the main reasons I am against the nuclear freeze:

First, it would freeze the United States into a dangerous permanent status of strategic inferiority and vulnerability to the Soviet Union.

Second, it would reduce Soviet incentives to negotiate for real reductions in nuclear forces, because the huge Soviet strategic advantage would be preserved.

Third, it would not be verifiable or enforceable, because the terms are too general and imprecise and our national technical means of verification have been degraded.

Fourth, it could actually increase the Soviet temptation to engage in nuclear blackmail, and therefore it could actually increase both the role of nuclear weapons in world politics and the possibility of nuclear war.

Fifth, it would completely prevent the U.S. strategic modernization programs—the MX ICBM, the B-1B bomber, the Trident submarine and SLBM, and the air-launched cruise missile—needed to regain parity with the Soviets by the late 1980's.

We should also bear in mind that the nuclear freeze concept had its origins in the Kremlin. Soviet President Brezhnev began promoting the idea in January 1981 before the U.S. freeze movement got off the ground. As the above five factors suggest, this is because a freeze is so one-sidedly advantageous to the Soviet Union.

Many people do not realize this, but there really has not been an arms race since the early 1960's. The United States has engaged in extensive unilateral restraint of its strategic programs, while the Soviets have continued to build and build. Since 1977, the United States has actually reduced or deactivated 710 strategic delivery vehicles and 6,000 nuclear warheads, while the Soviets have been adding 1,000 new nuclear warheads to their forces each year since 1974. The Soviets have not reciprocated at all. Their huge strategic buildup began in 1960, and has continued relentlessly ever since, despite détente, Strategic Arms Limitations Treaties (SALT) and negotiations.

There have already been several U.S. unilateral or bilateral nuclear freezes since the early 1960's, and they have all gone unreciprocated by the Soviets.

In 1958, the United States and the Soviets agreed upon an unwritten moratorium on nuclear weapons testing in the atmosphere. In the fall of 1961, the Soviets suddenly and treacherously broke out of this moratorium with a dangerous series of high yield atmospheric nuclear weapons tests. So a weapons testing freeze has already been tried, and the Soviets violated it.

In 1964, the United States unilaterally froze production of highly enriched uranium for nuclear warheads. No new highly enriched uranium for nuclear warheads has been produced by the United States since 1964. The Soviets have completely failed to reciprocate this U.S. unilateral restraint, and in fact the Soviets have constructed several completely new plants for the production of additional highly enriched uranium since the U.S. unilateral freeze of 1964.

In 1967, the United States unilaterally froze the number of intercontinental ballistic missiles (ICBM's and submarine launched ballistic missiles (SLBM's that the United States had. The United States has added no additional or new ICBM's and SLBM's since 1967, and in fact has recently unilaterally deactivated 54 ICBM's and 160 SLBM's. The Soviets surpassed the United States levels of ICBM's and SLBM's in 1969, and kept on building until they had a total of 648 more than the United States by 1972. Now they have at least 844 more ICBM's and SLBM's than the United States.

In 1972, the United States and the Soviets signed the SALT I agreements. SALT I was portrayed as a freeze on United States and Soviet strategic forces. Since 1972, the Soviets have added over 6,000 new nuclear warheads, at a rate of 300 ICBM's and SLBM's and 1,000 warheads a year. The Soviet counterforce threat to the United States has grown by a factor of 5 since 1972. Thus there was no SALT I freeze.

In 1977, President Carter unilaterally canceled the U.S. B-1 bomber. In 1978, the United States unilaterally canceled the neutron warhead. Thus the United States unilaterally froze two new weapons systems. The Soviets did not respond. Indeed, former Defense Secretary Brown has stated that when the United States builds strategic weapons, the Soviets build, but when the United States stops building, the Soviets build. As Soviet SALT negotiator Shchukin stated in 1978 when asked why the U.S.S.R. fails to respond to the U.S. unilateral restraint, "We Soviets are neither philanthropists nor pacifists."

In March 1982 Soviet President Brezhenev announced a unilateral freeze on their deployment of SS-20 IRBM's. Three months later, the State Department announced that instead of freezing their SS-20's the Soviets had continued to construct additional SS-20's. Over 54 additional SS-20's have been deployed since Brezhnev's unilateral freeze statement.

Thus the facts are clear. There have aready been several U.S. unilateral and United States-Soviet bilateral freezes on nuclear weapons, and all have failed, due to Soviet failure to reciprocate.

Former President John F. Kennedy stated on March 2, 1963:

We know enough now about broken negotiations, secret preparations and the advantages gained—never to offer again an uninspected moratorium.

On November 8, 1961, John F. Kennedy stated:

The Soviet Union tested while we were at the table negotiating with them. If they fooled us once, it's our own fault; if they fool us twice, it's our fault.●

JOURNALISTS ARRESTED IN THE PHILIPPINES

● Mr. KENNEDY. Mr President, when Philippine President Ferdinand Marcos paid his state visit to the United States September 15-21, Senators CRANSTON, MOYNIHAN, PELL, and TSONGAS joined me in expressing concern that his reception here must not be misinterpreted as a sign that the United States condones repression and human rights violations in the Philippines. We urged the administration not to convey an impression of indifference, but rather to take advantage of the Marcos visit to demonstrate support for the people of the Philippines in their struggle for true democracy and human rights.

In light of that background, I am even more distressed by the course of events since President Marcos returned to the Philippines. On December 7, Jose Burgos, Jr., the editor and publisher of the English-language newspaper We Forum was arrested and the publication closed. A number of staff writers, columnists, and con-

tributors were also seized under Presidential order on extremely dubious charges of subversion and involvement in a conspiracy to overthrow the Government.

We Forum had become an outlet for writers of newspapers closed under martial law in the Philippines. Its closure make clear that serious repression persists in the Philippines, under the national security regulations following the cosmetic decision to lift martial law.

The Philippine authorities claim to have discovered evidence that We Forum had links with "subversive" groups—such as the democratic Movement for a Free Philippines. Their ludicrous charges include disrupting and overthrowing the Philippine Government by force, deceit, violence, and illegal means through false and libelous articles. The Government is also cracking down on church leaders and missionaries, again seeking to label them "subversive" elements in an increasingly repressive society.

In addition to Mr. Burgos and his staff, the charges include Joaquin "Chino" Roces, the retired publisher of the Manila Times, the leading newspaper before martial law. Because of his advanced age, Mr. Roces has been kept under house arrest instead of being jailed. He told the court that he did not wish to dignify the charges against him be defending himself.

Emboldened by his meetings with the Reagan administration and by support received during earlier visits of the Vice President and Secretary of State, President Marcos has returned to the Philippines and made a mockery of freedom of expression, throwing into arbitrary detention leading journalists whose crime had been to criticize his dictatorship.

I therefore call on the Government of the Philippines to release these and other political prisoners and to move forthrightly to protect freedom of expression and political participation. I hope that the Reagan administration will also make clear, at long last, our strong disapproval of the continuing pattern of basic human rights violations taking place in the Philippines. I request that the letter which Senators CRANSTON, MOYNIHAN, PELL, TSONGAS, and I sent to President Reagan last September be inserted at this point in the RECORD.

The letter follows:

U.S. SENATE,
Washington, D.C., September 13, 1982.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We are concerned that your decision to welcome President Marcos of the Philippines for a state visit to the United States will be misinterpreted as a sign that your Administration condones the repression of the Marcos Government in the Philippines and its continuing violations of basic human rights.

We share the warm feelings of friendship by the overwhelming majority of Americans for the Filipino people. Americans and Filipinos fought side-by-side with great courage in World War II, and our shared dedication to freedom and human rights led to full independence and democracy for the Philippines after the war.

Unfortunately, there is convincing evidence, confirmed by the Department of State, that the government of President Marcos has been far from faithful to these ideals. Martial law, imposed ten years ago this month, endured for nearly a decade, only to be replaced in January 1981 with equally repressive national security measures. Throughout this period, the Marcos Government has engaged in persistent persecution of the press, labor, church, students and business leaders. There have been numerous reports of arbitrary detention, torture and disappearances; current instances of these cruel practices are described this week in the U.S. press.

The visit of President Marcos is an opportunity for you and your Administration to demonstrate America's support for the brave citizens of the Philippines in their struggle for true democracy and against the serious violations of human rights by the Marcos Government. We believe that this message is an essential reflection of the fundamental values of our nation—and is necessary to neutralize the unfortunate impression of indifference to repression created by the visits to Manila last year by Vice President Bush and Secretary of State Haig.

We strongly agree that an important element of our national security is the stability of nations that are our allies. But our allies are ultimately the peoples in those countries. It is their pleas we must hear and their rights we must heed when their government becomes their oppressor instead of their protector. The security of the United States does not require our support for the repression of the Filipino people.

We hope, therefore, that you will make the Marcos visit an occasion to enhance the cause of human rights in the Philippines. This visit can be an important signal to all peoples who look to the United States for leadership and hope, but who all often see only the news reports of American officials embracing and toasting their oppressors.

Sincerely,
Claiborne Pell.
Alan Cranston.
Edward M. Kennedy.
Paul E. Tsongas.
Daniel Patrick Moynihan.●

WOMEN, SMOKING AND CANCER

● Mr. PELL. Mr. President, I wish to call to the attention of the Senate an excellent article on the increase of cancer among women who smoke cigarettes. It was written by a respected voice in medical research, Dr. William G. Cahan, an attending surgeon in thoracic service at Memorial Sloan-Kettering Cancer Center and emeritus professor of surgery at Cornell University Medical College.

Dr. Cahan alerts us to some alarming facts: among women, lung cancer deaths increased by 353 percent from 1950 to 1977, and deaths from larynx cancer increased by 333 percent. These increases directly parallel a dramatic increase in smoking by women in the past 30 years, and Dr. Cahan's discussion of the problem and his warning to all smokers deserve sober study. I ask that his article be reprinted in its entirety in the RECORD.

The article follows:

"YOU'VE COME THE WRONG WAY, BABY!"

(By William G. Cahan, M.D.)

Horrifying, indisputable fact: Woman's mortality and incidence (morbidity) rates for tobacco-induced cancers are rising precipitously.

Item: (1950–77), lung cancer deaths are up 353 percent [1 2] (nearly 1000 percent since 1930!)[3] and will soon pass those of the breast as the #1 cancer killer.[4]

Item: larynx cancer up 333 percent[1 2];

Item: bladder cancer up 54 percent[1 2];

Item: mouth[5] and pancreatic[6] cancers up and approaching the rate in males.

The rapid climb in these grim statistics fulfills the prophecies made a generation ago when women began smoking in earnest. Such predictions were based upon observations in male smokers that tobacco-related diseases including cancer, emphysema and cardiovascular problems (120,000 excess deaths/year)[7] usually require 20–40 years to develop.

These dramatic increases show little sign of diminishing and as there is a huge unheard-from reservoir of over 25 million female smokers,[7] they will probably continue for some time.

No other biological influences can account for this phenomenon although hard-line apologists interested in maintaining the habit claim that these statistics actually reflect women's rising employment and increased exposure to industrial fumes, exhausts and dust-ridden atomospheres. They also blame urban air pollution. These arguments are easily refuted, for women rarely work in industries notorious for being carcinogenic. There are few, if any, in uranium mining or exposed in the workplace to asbestos, polyvinylchloride, arsenic, chromium, nicker, coal, natural gas and graphite. Besides, tobacco-related diseases are occurring predominantly in smoking non-industrial workers such as stenographers, saleslades, executives, housewives, and bear little correlation with whether they dwell in rural or urban areas.[9]

Both sexes usually begin smoking in their teens and for combinations of the same reasons: peer-pressure, imitation, acceptance, social insecurity, rebelliousness, advertisements, and the aping of role models such as rock, TV or movie stars, teachers and/or parents. Very young girls have an additional incentive for they are persuaded that smoking makes them look older and therefore more attractive to older boys.

Once begun, the habit has been likened to an addiction and is usually very difficult to stop. Although convinced that smoking is unhealthy, smokers often justify continuing for a variety of cliché-ridden reasons ("I've smoked too long, it's too late to stop," "My boyfriend smokes so I like to keep him company," "We're all going to die of something anyway", etc.). Women, in particular, resist quitting for fear of gaining weight.

Any desire to quit is made more difficult by the many daily influences to which smokers are subjected, the cumulative effect of which is to create a climate (or en-

Footnotes at end.

vironment) conducive to perpetuating the habit.

For example, larger numbers of women than ever before are now employed. In meeting the demands of the competitive atmosphere of the marketplace, they claim that they need a simple, readily available method of reassurance and relaxation. Besides, smoking (and drinking) imparts a sense of "gender equality" and comaraderie with male associates.

Even more persuasive are cigarette advertisements and promotional strategies. Experts in these fields, ever mindful of the vast, lucrative female market, are constantly alert to trends that could be exploited to benefit their brands. Thus, by neatly fusing the increasing emphasis and awareness women place on appearance with their fear of being overweight, they suggest in their ads (often subliminally) that smokers are slim, sleek, sexy, and successful.

One of the better known advertising campaigns capitalizes on women's newly emancipated "self" and urges them to kick over the traces, free themselves from old-fashioned restraints and taboos—and smoke, "baby".

Some companies even go so far as to sponsor women's athletic events such as tennis tournaments, using this device to associate their brand with a "healthy, outdoorsy" activity, while deliberately ignoring the inconsistency that any participating players interested in fitness and stamina would not dare smoke and that tobacco use is incompatible with professional athletics.

These seductive measures and influences are patently synthetic, transparent and cynical. As a consequence, it puzzles those who admire and are impressed by the idealism, and accomplishments of the women's contemporary movement to observe how they, who are often in the forefront of concerns about health and good causes and who militantly resist being exploited, should have so readily embraced and persisted in such manmade lethal habits as tobacco (and alcohol).

This lemming-like movement began years ago, around WWII. At that time women were less aware of the tobacco/health connection which was not as clearly evident as it is at present. However, by now, they must certainly realize its many dangers and that they, in particular, have a great deal to lose: those who smoke heavily during pregnancy produce newborns who are smaller [10] or who have an increased chance of miscarriage; [11] on average, their children grow less and have reduced learning capacities; [12] in combination with the Pill, smoking markedly augments the chances of phlebitis and cardiovascular disease; [13,14] there has been a severalfold increase in fatal and non-fatal heart attacks in younger women who smoke as well as an increase in subarachnoid hemorrhages.[15] Their appearance suffers: chronically bloodshot eyes, stained teeth, and skin that wrinkles and ages prematurely; besides having an annoying, hacking "cigarette cough" and post-nasal drip, smokers often reek of stale tobacco on their breath and clothes, and their homes are ash-ridden, spotted by cigarette burns on furniture and rugs and more liable to accidental fires.

Over and beyond these hazards and unbecoming traits, women's instintive nature to protect children must be troubled by the enormous number of young people, girls now more than boys, who smoke (some estimate that each day several thousand children light up for the first time). Not only are more starting earlier than did their elders, (many as pre-teenagers from 8-12), but they are also smoking more heavily.[16] If, in addition, one considers that young growing tissues are more susceptible to carcinogens[22] than mature ones, this generation's children are headed on a collision course with cancer and other tobacco-induced diseases. Consequently, unless their smoking is curbed or a safe cigarette found, in 20-30 years they will fulfill the same dire predictions once made for their parents, except that many times the present epidemic numbers will be victims; moreover, these diseases will occur at an earlier age.

Dismal facts, these, but some hope is in sight for although millions still smoke and many take up the habit daily, statistics show that with the exception of older teenage girls (17-18), adults and children are beginning to quit.[17] This means that by dint of great effort, patience and funding on the part of dedicated and aroused individuals, public service organizations and Surgeons General, the anti-smoking message is getting across and there are 33 million ex-smokers in the United States.[18] As a result, an increased awareness of hazard and a rising feeling of indignation is replacing the old, resigned, complacent attitude. What was once considered as the "in", the "everybody does it", thing to do, is no longer fashionable. More frequently, one hears boasts about personal trumphs over the habit. Non-smokers are increasingly outspoken at social and business gatherings and openly express resentment at being passively exposed to the smoke exhalation of others ("Stop smoking, you're raping my lung!"). Restricted areas for smoking are being set aside in public places. Legislators are trying to change the present innocuous and "invisible" warning label on cigarette packages and advertisements to ones with stronger messages. The young are being exhorted by role models, athletes, lecturers and films. Slogans abound: "Smoking stinks!", "With a cigarette for a friend, you don't need an enemy", "Smoking is punishable by death!". Even cigarette manufacturers, recognizing the public's concern, are 90% committed to filters and vie with each other for lower tar/nicotine levels (their tacit, albeit reluctant, admission that cigarettes are harmful).

However promising these facts and figures may be, the bad news still far outweighs them, for a major threat of holocaustic proportions persists: 37 million Americans will die prematurely from smoking related causes unless effective measures are instituted without delay.

This clear, present and future danger cannot be diminished without a continuous, major effort by all segments of society including government, physicians, teachers and anti-smoking societies. It is an area in which women in particular can play an enormously effective role and although perhaps this is less melodramatic, it is unquestionably equal in importance to their current committments against alcohol and drug abuse in the young.

To do so, women must first understand that there is no "safe" cigarette no matter what the filters and low tar-nicotine levels suggest. Second, they should feel a sense of outrage at the way they and their children have been manipulated by the tobacco interests. Third, the main thrusts of their effort must be directed not just at their own habit but at preventing children from starting and encouraging them to quit. As anyone who has dealt with young smokers knows, this is no easy assignment. Nevertheless, women's persuasion will gain stature and force if the vast legions of smokers themselves give up the habit. Although for may this is a difficult decision, they can have recourse to many varied aids designed for this purpose: stop-smoking groups, hypnosis, acupuncture, "gimmicks' of all sorts such as staples in ears, elastic bands on wrists to be snapped instead of lighting up, water filters, water filters, nicotine gum, etc.).

For those who worry about weight gain, recent studies [20] show that one-third actually lose weight. These are people who start a general fitness program coincident with quitting and eat more sensibly and burn more calories by exercise. One-third neither gain nor lose, for their life style and eating habits remain unaltered. One-third gain weight for combinations of reasons, the dominant one being the subsititution of compulsive eating for compulsive smoking ("oral craving" in another form). In addition, as taste and smell improve so does their metabolism. However, this form of weight gain is reversible and once the tobacco habit is overcome, the difficult but not insurmountable task of dieting can be pursued.

In spite of good intentions, knowledge of the hazards, anti-smoking aids, tirads from family and friends and warnings from physicians, all too many women remain fixed in the habit. One often hears: "I've tried, God knows how many times, but it is impossible to stop".

Perhaps those who react this way may be encouraged to know that professionals who deal with smoke-cessation programs have found that the majority (70 percent) [21] are capable of quitting and do so by individually selected methods and time schedules. Some stop easily and forever following their physicians advice to do so; others stop and start many times before finally quitting; some quit using group therapy or by being inspired by the thought-provoking pause of the annual Great American Smokeout Day. Quite a few are influenced by a cancer tragedy in someone near and dear. Still many remain intransigent and seemingly in thrall to the habit. However, 9 out of 10 of the most inveterate smokers find themselves suddenly capable of quitting under one set of circumstances: when they first view the tell-tale shadow in their *own* lung x-ray or are faced with the loss of their vocal cords or bladder.

If only it were possible to transmit to stubborn smokers, the anguish that attends this catastrophic moment and the remorse felt when it is realized that this tragedy-in-the-making was self-induced and preventible; if they could only imagine the devastating impact of this news upon their family, friends and economic status, it might jolt them out of their complacency and feeble excuses. But unfortunately, as with forewarning children, persistent smokers do not believe they will become victims or will ever die.

One final point about quitting: Liberation—a "buzz" word these days, particularly in women—can take many forms. It has been used by many ex-smokers to describe the feeling that follows cessation of the habit: as if they were "reborn", or have "come alive", or "rejoined the living". No longer are they enslaved by frantic searches for cigarettes in purses or in one's home on weekends. Gone are the expense and demeaning complusion to buy several cartons at once (lest one be "caught short"); or to light up in public places, social gatherings, when using the telephone, drinking coffee, doing office work, etc. In its place a long

lost sense of well-being and fitness returns which, in no small way, is augmented by the shedding of the nagging feeling of guilt smokers usually have.

Time is short; a great deal of damage is being done[23]. The stakes and rewards are high for no other health measure has such a vast potential for improving the well-being of a nation. This is one that will take a great collective and individual efforts to resolve.

Women rise to challenges and as members of groups, movements and societies can insist that anti-smoking measures be frequently discussed and made part of their platform or program. As individuals, they can teach by example and support those organizations (Heart, Lung, Cancer) that have long been dedicated to eliminating the habit.

Such a conjoined effort ("Never underestimate the power of a woman") cannot fail to have an important impact and help create an environment more inimical to the habit in which even intrepid smokers will find support and encouragement: for quitting, like starting, can be infectious and spread, what is more, children reared in this atmosphere cannot help but be influenced by it and will thereby be spared the painful discovery of what it means to come the wrong way!

A TRIBUTE TO G. H. "MONK" WRIGHT

● Mr. HEFLIN. Mr. President, on Monday, November 8, 1982, Alabama lost one of its most outstanding public servants when G. H. "Monk" Wright passed away at the age of 84.

I am very sorry that Mr. Wright is no longer with us, for he was one of those rare individuals who put service to his community ahead of personal gain or advancement. It is because of people like him that towns and States become outstanding. Alabama, and his countless friends, will miss him.

Monk Wright was a lifelong resident of Auburn. He was born there in 1898, was educated there, and graduated in 1919 from Alabama Polytechnic Institute, which is now Auburn University.

Mr. Wright's public service began with his first term as mayor, starting in 1944. He would continue to serve as Auburn's mayor for the next 24 years, stepping down in 1968.

During his six terms as mayor, Mr. Wright made many city improvements, and became known for his good deeds on behalf of Auburn. He became known as "Mr. Auburn" for his long years of effective public service and community involvement.

Mr. Wright was an ardent supporter of his alma mater. He served as a member of the Auburn University Board of Trustees from 1951 until 1963. In addition, he attended almost every Auburn home football game from 1908 until his death.

Monk Wright was an example of a type of individual that the world needs more of—the type of individual who gives endlessly to his community, Alabama has lost a great man with his passing.

Mr. President, I ask that an article from the Auburn bulletin be printed in the RECORD.

The article follows:

[From the Auburn Bulletin, Nov. 10, 1982]

FORMER CITY MAYOR DIES; RITES TUESDAY

Funeral service for former Auburn Mayor G. H. (Monk) Wright was held Tuesday, Nov. 9 at 2 p.m. at the First Independent Methodist Church, Auburn. Burial was in the Auburn Memorial Park.

Wright, 84, of 320 East Thach, Auburn, died Monday, Nov. 8, 1982 at the East Alabama Medical Center.

For 18 years he served as Auburn Mayor and was a member of the Auburn University Board of Trustees from 1951-63. His term of mayor began in 1944 and he finished his service in that capacity in 1968. He owned his own insurance business, Monk Wright Insurance Agency.

Wright was born on June 14, 1898 in Auburn where he was reared and educated. A devout Auburn fan, he attended almost every home Auburn University football game since 1908.

Wright was graduated from Auburn High School in 1915 and he was graduated in 1919 from Alabama Polytechnic Institute (Auburn University).

Survivors include his wife, Louise M. Wright, Auburn; two sons, Lee County Circuit Court Judge G. H. Wright, Auburn; and John Wright, owner of Color Kwik Photo Studio in Auburn; one daughter, Mrs. Ann Joiner, Hilton Head, S.C. and seven grandchildren.

Frederick's Funeral Home was in charge of arrangements.●

AL FOX OF THE BIRMINGHAM NEWS RETIRES

● Mr. HEFLIN. Mr. President, one of the true blessings of our society lies in the existence of a free press. The news media, in many ways, contributes greatly to the very strength of our country.

Here in the Senate, as in all phases of public and private life, we are familiar with those members of the media who cover politics and politicians. We see them in the press galleries; watching the proceedings on the floor. We talk with them. We answer their questions. We read their stories. All the while, we realize that their job is a difficult one, and that, in their own way, they are also public servants, giving the public a view of their form of government.

Recently, the public of Alabama lost one of the truly fine members of the news media, when Al Fox, chief political reporter of the Birmingham News for 21 years, retired.

Al had become almost an institution in Alabama politics. He had covered the State legislature, the famous Selma to Montgomery march, the George Wallace campaigns—on both the State and national level, and every Presidential race for more than two decades.

He had been around the State capitol for so long, had paid such diligent attention to senate proceedings, and had become so respected by others on the political scene, that the real senators generally called him Senator Fox.

Al had joined the Birmingham News in 1961, after earlier stints with newspapers in Vicksburg, Miss., and Anniston and Gasden, Ala. He was an outstanding reporter not only because he took pride in his work, but also because he thought it important that the public be given a full and fair view of their Government.

For more than 20 years, Al Fox has been a leader among newspaper reporters in Alabama. He is to be congratulated upon his retirement, but, without a doubt, he will be sorely missed by all who knew him, as well as by all who read his stories.

I request that articles from the Birmingham News and the Montgomery Advertiser be printed in the RECORD.

The articles follow:

[From the Birmingham News, Nov. 21, 1982]

ASTUTE AL FOX WRITES FINIS TO LONG CAREER REPORTING ON POLITICS

(By Frank Sikora)

In an era when newsmen began sporting beards, mustaches and unshorn hair, he was the maverick, the rebel.

He looked like a Marine sergeant: burr haircut, stern visage, a growling voice. He usually had a cigarette burning; he never drank a cup of coffee—it was always two or three at a time.

But Al Fox, the veteran political reporter of *The Birmingham News*, was not nearly so bearlike as some thought him to be. When returning from an assignment, the first thing he would do was call his wife, Mary, to let her know he was back.

After 21 years *The News*, most of it covering politics in Alabama, Fox retired last week.

He had covered every political campaign since the early 1960s, much of it dogging the trail of George Wallace through the back country of this state to the far ends of the nation when Wallace sought the presidency.

"I was there when he made his famous 'segregation forever' speech," Fox recalls. "Sure, I covered that campaign. I covered those campaigns when they were still making six and seven stops a day, holding rallies at shopping centers and in front of courthouses.

"That's changed a great deal now. The pace has slowed down. In those days it was more exciting. Big crowds. The hillbilly bands. People waving the Confederate flag and the bands playing 'Dixie'."

In one of the few times Fox was not with Wallace on the campaign trail, Wallace was shot down by a would-be assassin while running for president in 1973. That tragedy in a Maryland parking lot crippled Wallace's legs—and his chances for national political office.

Fox became such an astute observer of politics he probably knew more than most legislators. Some of those lawmakers frequently sought his advice. Many others called him up to seek his counsel when running for office.

When Wallace was preparing to make his "stand in the schoolhouse door" at the University of Alabama in June 1963, Fox was on the scene.

The night before, he had heard the Ku Klux Klan was holding a rally in a rural site near Tuscaloosa.

He and a photographer slipped in on the outskirts of the crowd, which numbered several hundred.

"We were doing all right," he recalls, "until this great big burly Klansman caught a glimpse of the camera under the photographer's coat and says, 'Who the hell are you?' He began saying some ugly things and a bunch of them gathered around.

"Well, just about that time, Robert Shelton, the KKK imperial wizard, saw me and came up, says, 'Hey, Al, you come to see us burn a cross?' And I took a deep breath and nodded. So Shelton says, 'OK, you tell us when you're ready and we'll fire it up.' We were glad when that night was over."

He also covered the Selma-to-Montgomery march in 1965.

"It was hard to find a telephone in that rural area," he said, "so I found this store in Lowndes County that had a pay phone. So we went in there and told the man we wanted to rent it. Paid him $25 or so. I told him anyone could use it, but when I came in I wanted to have it cleared.

"So later that day I had to call The News and went in there. While I was on the phone I saw Rex Thomas of The Associated Press. So he was in a hurry and stood there waiting. Finally, I got done and he goes to use the phone.

"The store owner says to him, 'You can't use that unless you clear it with Mr. Fox.' So Thomas look at me and says, 'Can I use your phone, damn it?' So I laughed and told him to go ahead."

On election nights, Fox was an institution. He would come into the newsroom with three or four cups of coffee, sit down and start analyzing returns.

His telephone would ring endlessly. Candidates wanted to know how they stood in a certain race. One night he tired of it.

Turning to another reporter, he said, "If anyone else calls for me, tell 'em I ain't here. I can't get anything done."

With that, he went to another desk across the room. The phone rang again.

"Hey, Fox," called the reporter, "you got a call over here. What's your number over there?"

"Damn it," he snapped, "I told you I'm not here."

"What's your number?"

Fox was waving his arms furiously and shaking his head. By then the reporter got the number and transferred the call.

Fox picked it up.

"Yeah?" he growled.

Then he straightened up.

"Yes, sir," he said.

The caller was George Wallace.

Fox also covered others running for president besides Wallace; in fact, he has met every president since Truman.

There is a tape that was made as Fox interviewed Ronald Reagan during the 1980 campaign that shows Fox's single-mindedness when pursuing a story.

Reagan, running hard for the White House, had just delivered a speech to the Birmingham Jaycees.

Fox, riding in the back set of a limousine bearing Reagan to the Birmingham Airport, was reading from a set of written questions.

"One of the problems facing the steel industry today—" Fox began.

Suddenly, Reagan interrupted.

"Oh my God!" he exclaimed.

The president-to-be had glanced back at the trailing motorcade just as a Birmingham police officer lost control of his motorcycle and flipped over.

"Oh, he's all right, I guess," said Reagan, still peering out the back windshield. "He's on his feet . . ."

Silence from Fox.

"The motorcycle back there, one of our motorcycle policemen," continued Reagan.". . . I just turned in time to see the motorcycle rolling down the road, bouncing around. But he's on his feet . . . Oh, wow!"

Silence from Fox.

Reagan turned away from the window, shaken at what he had witnessed.

Fox, in the same monotone, continued his question: "—is the problem of foreign imports . . ."

A native of Tennessee, Fox served in the U.S. Navy in World War II and Korea, stayed in the Naval Reserve and retired as a commander.

He began his newspaper career in Vicksburg, Miss.—where he met Mary—and later was with *The Anniston Star* and *The Gasden Times*. He joined *The News* in 1961.

He is the father of two. Jennifer is a graduate of Troy State University and earned her master's degree from the University of Alabama in vocational rehabilitation. She works for the State of Alabama as a rehabilitation counselor.

Peck is a graduate of UA Law School. He passed the bar and now works in Washington with the staff of U.S. Sen. Howell Heflin.

This past election was Fox's last as chief political reporter for *The News*. He covered it in his usual style, showing up with so much coffee that one reporter marveled, "Fox must have a cast-iron stomach."

And it was refreshing to see that he also had been to the barber shop.

[From the Montgomery Advertiser, Nov. 17, 1982]

SENATOR FOX

Al Fox retired yesterday after 22 years as chief political reporter for *The Birmingham News*. It is probably his misfortune not to have died at the typewriter, because for the remainder of his life he will likely be plagued by well-meaning tormentors wanting to know why he doesn't write a book.

At the same time, come the next legislative session, there may be a handful of Capitol clerks who take his absence to mean that Mr. Fox was among those hapless souls who were defeated for re-election. Perhaps because of his seniority, or his diligent attention to Senate proceedings from the press table, or because legislators drew from his experienced observations, real senators generally called him Senator Fox.

In fact, Mr. Fox's by-line was so well-known that four years ago he received a telephone call from a young man who told the journalist he was thinking about running for the Senate. "How do I go about it?" he asked. Mr. Fox told him he needed to go down to party headquarters, pay his filing fee and start kissing every baby in sight. A few months later the fellow called again. It was the morning after the election. "Well," he told Senator Fox, "I won. Now what do I do?"

That particular senator was reelected earlier this month without opposition. As for this year's newcomers, they're on their own now.●

THE CHEMICAL FRONT

● Mr. GRASSLEY. Mr. President, although the Senate will be unable to finish its work this session on H.R. 5203, a bill to amend the Federal Insecticide, Fungicide and Rodenticide Act, I would like to take this opportunity to share with my colleagues an article that points to the need for pesticides to assure an abundant supply of health-giving food. This article, printed in the September issue of Custom Applicator, was written by Dr. E. E. Waller, executive director of the Midwest Agricultural Chemical Association representing chemical business throughout the Midwest. Dr. Waller makes a number of very important arguments that will be helpful to my colleagues during their future consideration of this legislation. The article follows:

THE CHEMICAL FRONT

THE BEST ARGUMENT FOR USING PESTICIDES IS BEATING HUNGER

"Why Pesticides? H-u-n-g-e-r."

This bumper sticker philosophy caught my eye on a recent trip, and in a virtual sea of bumper stickers, this particular one provided considerable food for thought.

The concise message on that automobile bumper was as clear as it was short, and it should remind us of the bottom line in our profession. In an increasingly volatile world where a growing population, traumatic events and rising expectations make pesticides and their proper application more and more important, we as the pesticide professionals play a vital role in alleviating hunger.

And yet, the swamp of information, misinformation and disinformation about our profession may not always provide a clear notion of the true importance of pesticides to the world's survival. What is obvious to us may not be so clear to the public unless each of us takes the responsibility of providing a practical education on our business to those with whom we share our business and personal lives.

If we are "too busy" or "too shy" to educate, if we decide to leave opinion making to the so-called experts, we should not be shocked when articulate proponents of negative or simplistic ideas suddenly cramp our business style or put a crimp on some aspect of crop protection operations.

We can take long strides toward helping people obtain the necessary input needed for wise decisions. All it takes is a little common sense, the use of facts instead of emotion, clarity, coordination with public relations activities of manufacturers and associations and a spirit of cooperation.

As we look over the national and international scenes, we note that the wise use of pesticides carries significant weight in the adequate production of food and fiber. Some current items of interest include:

INTERNATIONAL NUTRITION AND PESTICIDES

1We know the key role pesticides have performed in America's agricultural abundance. We have noted problems in Polish and Soviet agriculture when a creaky bureaucracy attempts to cope with an inadequate pesticide posture.

In the Middle East, following a speech in which the prime minister of Turkey stressed the importance of agriculture and its chemical inputs in a market enocomy, Turkish radio and television stations announced that 95 million lira worth of pesticides had been exported from Turkey to other Middle Eastern countries in the first five months of 1982.

A report from the United Arab Emirates quoted the minister of agriculture and fisheries as emphasizing the importance of national and international food security. He noted that a recent Islamic Conference on Food Security and Agricultural Development discussed plans to alleviate food shortages in poorer countries. One plan called for the control of pests and plant diseases.

DISTANT SHORES

The U.S. agriculture export market amounts to over $40 billion annually, so many of the crops you are spraying today could possibly be sold overseas tomorrow. This astonishing figure does not include other vital aspects of the American balance of payments, such as the export of agriculture chemicals, technology and that old American professional know-how and assistance.

OTHER KEY ISSUES

There are still many key issues that deserve our attention closer to home. They include inhibitions on spraying by local authority, adequate patent life (and protection of costly research) to encourage further technological advancement and "ag unity." While recognizing the importance of the world scene, we must not let it overshadow issues in the smallest village here.

We have a multitude of township, city, county, forestry, district, special zones, utility and railroad right-of-way and state levels of authority, and each is capable of affecting our jobs as pesticide professionals for the better—or the worse.

For example, on June 1 Minnesota changed its metropolitan Mosquito Control District from a voluntary district into a mandatory one (Chapter 579). According to an official state publication, the district can enter private property to control mosquitoes during an encephalitis outbreak.

Some 80,000 constituents recently returned questionnaires to a Midwestern senator, and some 61.4 percent indicated support for transfer of responsibility for a number of federal programs to state and local governments.

Some of the spirit of decentralization will affect the use of pesticides, so we must be alert to developments and be prepared to help with the decision-making process from the highest state office down to the smallest hamlet.

Patent protection and the ongoing perils of FIFRA consideration are complex, yet they are not only the concern of experts in the boardroom and in government halls. Each of us should look into this matter and think out what is needed to provide the incentive for the heavy research and development costs for future technological strides in pesticides.

We do not wish our dealers, applicators, farmers and consumers to find no light at the end of the tunnel some day if an avalanche of "disincentives" inhibits America's technological posture.

AG UNITY

In a recent hearing, an official commented that no representative of one of our commodity crops affected had bothered to show up. Fortunately, an articulate member of a pesticide group "pinch hit" for the absent individual and a possibly unfavorable action was avoided under traumatic and high pressure conditions.

A myriad of conflicts and problems resulting from lack of coordination can be alleviated by a simple innovation from South Dakota called "ag unity." This concept bands together groups ranging from soil conservation districts to fertilizer and agriculture chemicals associations to wheat producers to vocational agriculture teachers to sheep growers. The group's activities range from telephone information reports to television educational programs.

You can add many issues in great depth to those briefly outlined here as food for thought and additional study by all of us. In the words of a U.S. Department of Education official who recently announced a reduction of non-essential publications, "There's a need for information, but not for fancy layouts."

The need for plain, not fancy, information is there. Work together, and keep your eyes open for issues that need plain, understandable explanation.

Once you identify the issue and find a clear way to describe it, by all means tell it as it is. Who knows? Sharing your ideas may help the one previously undecided (or even negative) individual tip the decision balance in a vital issue affecting you and American agriculture.

The bottom line? As the freeway philosopher said: "Why pesticides? H-u-n-g-e-r."●

THE CENTENNIAL OF HAMILTON, ALA.

● Mr. HEFLIN. Mr. President, as the senior Senator from the State of Alabama, I am quite pleased and proud to congratulate the citizens of Hamilton, Ala., on their 100th anniversary on November 17, 1982, marking the date that the name of the Toll Gate Post Office was changed to Hamilton Post Office in honor of Captain Albert S. Hamilton.

Hamilton is situated on the Buttahatchee River, in central Marion County in northwest Alabama. The first pioneers came to this area via the Military Road to New Orleans. Andrew Jackson camped near Hamilton on his way to and from the Battle of New Orleans during the War of 1812. In fact, the Tomb of the Unknown Soldier of the War of 1812 is located just south of Hamilton. Early settlers included the Ragsdale, Terrell, Clark, Hall, MacFadden, and Crenshaw families.

In 1822, the Alabama Legislature made the site a tollgate for stagecoaches travelling the Military Road between Washington, D.C., and New Orleans. For this reason, the first name given to the settlement was "Toll Gate." In 1874, "The Toll Gate Farm" was sold to Capt. Albert J. Hamilton, a captain in the Civil War, who built a mill and a store. In 1882, Captain Hamilton donated 40 acres of land to the county on the condition that the county seat be moved from Pikeville. The county seat was so moved and on November 17, 1882, "Toll Gate" became "Hamilton."

The town flourished from the trade of cotton which grew in the fertile fields surrounding the town. Early builders of the town were Colonel Helvingston, General Gholson, Dr. M. H. Key, David Hubbard, and the Frazer, Fite, and Sargent families.

Today, the thriving community's economy no longer depends solely on agriculture, but has diversified to include industry and natural resources, such as timber, textiles, mobile homes, plastics, and ball bearings. This has enabled the town to become one of the major business centers in the area.

In celebration of this occasion, the J. C.'s sponsored a party and parade in downtown Hamilton on November 20, 1982. Other festivities included a beard contest, country music concert, a display of Captain Hamilton's belongings, photographs, and other relics of the town's history.

Mr. President, I commend the people of Hamilton on their 100th anniversa-

ry marking, not only an event in history, but also marking a spirit of pride and fortitude. It is truly a pleasure to represent the people of Hamilton in the U.S. Senate.●

CONCERNS REGARDING AMERICAN SCIENCE

● Mr. DODD. Mr. President, Dr. Edward Knapp was recently named by President Reagan to be Director of the National Science Foundation (NSF). He has been serving as Assistant Director for Mathematical and Physical Sciences of the NSF since September 1982.

Prior to his NSF post, Dr. Knapp was head of the Los Alamos National Laboratory's Accelerator Technology Division in Los Alamos, New Mex. During his tenure there he was involved in many pioneering scientific projects including controlled thermonuclear research and planning for the lab's proton accelerator. He specialized in accelerator physics and headed the research group that designed the accelerator structure for the facility. This work eventually led to the development of a compact electron accelerator used by many institutions for radiation therapy of cancer.

Dr. Knapp's scientific credentials are impressive and I have no doubt that he is familiar with the goals of the NSF.

Nonetheless, his nomination and some associated events coincide with evidence of a reduced Federal commitment to science. It may be useful at this point, therefore, to reflect upon the present administration's policies relating to science education and research.

The National Science Foundation was established as an independent agency of the executive branch of the Federal Government in 1950. Its charge is to promote advancements in science by providing support for scientific research and science education, and by cultivating the interchange of scientific information.

Unfortunately, in this administration, support for science education in the United States has declined drastically. For example, the previous administration's proposed budget for science education in 1982 was $111.9 million. The Reagan administration's 1982 revised budget request, however, was for only $9.9 million.

Until March 1982, the Science Education Directorate was one of seven directorates within the NSF. However, because of severe budget reductions, the directorate has been demoted to the Office of Scientific and Engineering Personnel and Education.

In addition, all funding for precollege and undergraduate science education support and research programs, which had traditionally been supported by this program, was eliminated. Science and engineering education is now limited to graduate fellowships only in the fiscal year 1983 Reagan budget request.

Mr. President, recent developments in science and technology throughout the world demand that emphasis on science education be increased, not decreased. It is axiomatic that only those nations having a scientifically literate society will be able to compete successfully in this new scientific technological era.

It is quite disconcerting to note that while other industrialized nations are increasing support and emphasis for science education at all levels in their schools, the U.S. support for science education is declining.

For example, approximately one-third of the Nation's 16,000 school districts require no more than 1 year of science for graduation. Even then, many courses are optional. By contrast, many industralized countries, such as the Soviet Union, West Germany, and Japan, provide a program of specialized courses, including biology, chemistry, and physics, which begin in the 6th grade and continue through the 12th and are required of all students.

Educational leaders must not allow the gap in knowledge of basic science between American students and other students to widen. The emphasis and support given to science education is not an academic question with no relevance outside the classroom. On the contrary, the successful interweaving of science education and scientific research has given the United States an advantage in many areas of practical scientific and technological achievement.

The decline in support for science edcuation is not the only science issue with which I am concerned. There is a second matter of equal importance, which, in my judgment, merits review.

I am somewhat apprehensive about the emerging emphasis on support of military science and research in the country. There is considerable evidence to suggest that the administration is indeed militarizing our science programs.

Several recent developments have led to this conclusion. For example, the fiscal year 1983 budget request for science R&D totals about $44 billion. However, the only real dollar increases are for military and space R&D.

In addition, the Department of Defense (DOD) is the only agency with a separate fund for the purchase of research equipment for university laboratories—the OMB canceled the NSF proposal for purchase of such equipment.

The military has an ample supply of funds designated for specific areas of science education and research in a time when student loans have been slashed, inflation has thwarted nonmilitary research, and science education programs within the NSF have been deleted. For example, the DOD awards are almost double that of the NSF for predoctoral chemistry students.

Dr. Margaret Burbidge, president of the American Association for the Advancement of Science, recently testified before the Senate Committee on Labor and Human Resources. She stated that the United States is currently investing about 50 percent—and this percentage is increasing—of its R&D funding in defense research. According to Dr. Burbidge, most of the increases in military research funding will go for weapons research.

I have thus far only briefly expressed my concerns in two areas—decline in support and militarization—that affect the quality of American science. There is yet a third area of concern, which, in my opinion, is of equal importance.

I am concerned about the politicalization of American science.

It is of paramount importance that the NSF, the Nation's largest source of nonmedical scientific research funds, continue to function as an independent agency promoting the advancement of science.

Mr. President, I believe there is reason to question the NSF's ability to function as an independent agency. I say this, Mr. President, particularly in regard to a perplexing event which occurred within the foundation during the early part of December.

That event, of which I am certain that you are aware, was Dr. Knapp's request for the resignation of three top NSF scientific administrators. These positions have traditionally been immune from the political process.

According to an article in the Washington Post on December 11, Dr. Knapp's request for these resignations was not based on any deficiency in performance on the part of these officials, but rather, was due to White House pressure. Dr. Knapp's defense for replacing these administrators was based on his desire to "make a team" while he was manager.

I think it appropriate at this time to reiterate the charge of the NSF; Support science education, science research, and insure a steady flow of scientists. These goals are of vital importance and should not be influenced by narrow political philosophies or partisan interests.

Such political philosophies and partisan interests are clearly reflected in the administration's strategy for arriving at levels of Federal support for R&D. According to the administration, the Federal role in support of R&D should be based on economic, rather than scientific needs.

In its 1982 Joint Economic Report, the Joint Economic Committee objected to the administration's R&D policy. According to the committee, the administration's R&D policy appears "to have been merely a byproduct of the decision to reduce overall Government spending" without consideration for the needs of the scientific community.

In my judgment, Mr. President, this is shortsighted and unlikely to give the American people the maximum benefit for their research dollars.

Dr. Vannevar Bush, FDR's Director of the Office of Scientific R&D during World War II, perhaps defined best the importance of science when he wrote ". . . without scientific progress no amount of achievement in other directions can insure our health, prosperity, and security as a nation in the modern world."

I urge Dr. Knapp to stay the course for scientific progress during his administration by taking a strong leadership role in reinforcing our national commitment to excellence in science. I extend to him my sincere congratulations on being named National Science Foundation Director and offer him my support.

Mr. President, I ask that the article "The Militarization of American Science", by Dan Greenberg, be printed in the RECORD.

THE MILITARIZATION OF AMERICAN SCIENCE

(By Daniel S. Greenberg)

WASHINGTON.—Now that so many politicians profess to see that research laboratories and high-tech industry are the wealth of the future, they ought to be aware of the bizarre distribution of the vast sums the federal government pours into research and development.

When they do, they will realize that the most prominent feature of federal R&D policy is multi-billions for defense and damn the fields of research essential for prosperity and health.

National security has always absorbed a big chunk of federal R&D spending, usually 40 to 50 percent, but, until recently, its share did not detract from research on cancer, energy and many other civilian programs.

The big change, starting late in the Carter administration and accelerating under President Reagan, gave defense the top priority for growth, while virtually all other fields have been standing still or losing ground to inflation.

In 1980, defense research spending totaled $13 billion, or some 40 percent of the federal total. This year, it is going up to an unprecedented $24 billion or 61 percent of Washington's R&D outlays. The percentages take on additional significance when it is realized that our major economic competitors spend very little of their government funds on military R&D.

Japan devotes less than 5 percent to weapons research while Germany puts in 12 percent. Of ominous note is that economically devastated Great Britain is the only industrialized nation that matches our share of government spending on military research.

While this has brought a bonanza for U.S. defense scientists in and out of government, times have been lean for many other fields of research that depend heavily on government support. Consider basic research in the health sciences. In 1980, government agencies provided $1.9 billion for this kind of research: two annual budgets later, the sum in almost unchanged—$2 billion, which works out to a decline when inflation is taken into account.

The slowdown in Washington's spending on health research translates directly into a slowdown in developing treatments for serious ills. The effects are as simple as that.

Among the projects stalled, for lack of $5 million a year, is a long-sought population study that might give clues to the origins of asthma. Another laggard in the austere budgetary climate is arthritis research. Meanwhile, cancer research, not long ago the most favored field of scientific study, has been declining in its over-all scale of activities.

The money problems extends to agriculture, too, which has pretty well exhausted its stock of scientific tricks, as can be seen in the leveling off in recent years of acreage yields for many crops. The contrast with defense spending is striking. While federal funds for basic agricultural science will rise this year by only $31 million to a total of $323 million, defense spending on basic science will go up by $145 million to a total of $828 million.

One effect of the boom in defense spending for science is that universities now recognize that the richest purse for scientific growth is at the Pentagon. Defense, for example, is planning to provide academe with $150 million for laboratory equipment over the next five years, plus money for scarce graduate fellowships.

The National Science Foundation, the civilian agency that normally tends to these tasks, has just about kept pace with inflation in recent years. Defense, on the other hand, is going up this year by 20 percent in its support of university scientists.

The budget numbers are huge and bewildering, but what they amount to is the steady militarization of American science as the U.S. government comes close to giving the defense establishment two-thirds of the public funds for the acquisition and development of new knowledge.

It is difficult to see how that can be wholesome—economically, politically or scientifically.●

A TRIBUTE TO SAM W. PIPES

● Mr. HEFLIN. Mr. President, today I rise to recognize the recent passing of a fine Alabamian, Sam W. Pipes of Mobile.

Sam Pipes was a fine attorney and even finer person. He was extremely dedicated to his profession, his family, and his community. All will miss his contributions.

It was my pleasure to have been a friend of Sam's for many years. It was a true joy for me to watch his legal work, both as a fellow practitioner and later as a judge.

Sam was a true legal scholar in the areas of real estate and oil and gas law, having authored several articles in each field. Despite this, perhaps his most lasting contribution to the law was in a leaderhip role.

Sam Pipes has been a leader in almost every legal organization in Alabama. In 1959, he served as president of the Mobile Bar Assocation. From 1966-68, he was president of the University of Alabama Law School Foundation. In 1968-69, he served his fellow attorneys as president of the Alabama State Bar Association. Two years after that, in 1971, he was president of the Farrah Order of Jurisprudence, Sam also served terms as chairman of the building fund drive of the University of Alabama Law School Foundation, and of the Alabama State Bar Committee on Congestion in Appellate Courts.

Even with all these other involvements, Sam still found time to be an active member of the Episcopal Church. He also was active in Boy Scouts for many years, and served as general councel of the Mobile Area Boy Scouts.

Sam Pipes was truly a fine Alabamian. He will be missed by all whose lives he touched.

Mr. President, I ask that an article from *the Mobile Register* be inserted in the RECORD.

The article follows:

[From the Mobile Register, Oct. 29, 1982]

MOBILE ATTORNEY SAM W. PIPES DIES

Sam W. Pipes, 66, a prominent Mobile attorney, died Thursday at a local hospital after a lengthy illness.

Pipes, who was a native Mobilian, practiced law here since 1938, after graduating from the University of Alabama Law School.

He was past president of the Alabama State Bar Association (1968-69); past president of the Mobile Bar Association (1959); past president of the University of Alabama Law School Foundation (1966-1968); and past president of the Farrah Order of Juris Prudence (1971). He served as a special justice on the Alabama Supreme Court in 1971.

Pipes was a fellow in the American College of Trial Lawyers and in the American Bar Foundation.

He was a past chairman of the Building Fund Drive, University of Alabama Law School Foundation, and past chairman of the Committee on Congestion in Appellate Courts—Alabama State Bar. He was on numerous committees for the Alabama Bar Association.

Pipes authored several articles, including, "A Survey of Alabama Oil and Gas Law," "Differing Legal Consequencies of the Oil and Gas Lease," "Sale of Real Estate," and "Representing the Land Owner in Natural Resources Development."

Pipes was a lecturer at the University of Alabama Continuing Legal Education Division and was a member of the Mobile Bar Association, Alabama State Bar Association, American Bar Association, National Association of Railway Trial Counsel, International Bar Association, Mid-Continent Oil and Gas Association, Maritime Law Association, Alabama Law Institute Council, and World Association of Lawyers. He was a former general counsel of the Mobile Area Boy Scouts and was active in scouting for many years.

Pipes was a director of the Commercial Guaranty Bank, Title Insurance Company, and the University of Alabama Law School Foundation.

He also was a member of the Athelstan Club, Lakewood Golf Club and numerous mystic societies.

He was a senior partner in the law firm of Lyons, Pipes and Cook, and a member of the All Saints Episcopal Church.

Survivors include his wife, Maude Pipes; a brother, Ford Pipes; a son, Wes Pipes; a daughter, Mrs. Prather Brooke; and his mother, Miriam Pipes, all of Mobile; and other relatives.

Funeral services will be at All Saints Episcopal Church at 3 p.m. Friday. Visitation will be from 2 p.m. to 3 p.m. Friday in the Walter K. Smith Room at the church. Burial will be in Pine Crest Cemetery. Radney Funeral Home is in charge of arrangements.

The family asks that memorials be sent to All Saints Episcopal Church in Mobile or St. James Episcopal Church in Fairhope.●

SOIL CONSERVATION

● Mr. JEPSEN. Mr. President, by request, I am today submitting for printing in the RECORD a set of amendments to Public Law 83-566, the Organic Act governing the small watershed program of the Soil Conservation Service.

These amendments have been prepared by the National Wildlife Federation and reflect the views of many environmental organizations around the Nation regarding the need for reforms in this program and the direction these reforms should take.

I would like to point out that I am not endorsing all or any of these specific proposals. In fact, I have some serious questions about some.

However, in the interest of stimulating a timely discussion of the various issues relating to soil Conservation, I am having this draft legislation printed in the RECORD.

The National Wildlife Federation is to be commended for its interest.

The following is a section-by-section analysis explaining the provisions of the amendments.

Mr. President, I ask that the analysis be printed in the RECORD.

The analysis follows:

SECTION-BY-SECTION ANALYSIS OF AMENDMENTS

Amendments to the Watershed Protection and Flood Prevention Act of 1954, P.L. 83-566 (16 U.S.C. § 1001 et seq.), as amended.

A. Findings and Purposes: to be added to the existing "Congressional Declaration of Policy," Sec. 1 (16 U.S.C. § 1001)

The purpose of the amendments is to redirect the priorities of the Soil conservation Service's Small Watershed Program towards soil erosion reduction and away from flood control, to establish an equitable cost-sharing formula, and to provide for greater attentiveness to fish and wildlife mitigation.

B. Amending Section 2 (16 U.S.C. § 1002) Definitions

This section adds soil erosion control and sedimentation reduction to the definition of "works of improvement." Projects that require Congressional committee approval—those with federal contributions greater than $5,000,000 or that provide more than twenty-five hundred acre-feet of capacity—will only go to the Agriculture committees. Jurisdiction of the Public Works Committees is eliminated, consistent with the reduced emphasis on flood control in the program. It provides that at least 50% of the benefits of each project must be obtained from soil erosion control and/or sedimentation reduction. It provides that any project anticipated to cost more than $25,000,000 total must be authorized by an Act of Congress.

The section also adds a definition of "soil erosion control and sedimentation reduction." It specifically excludes soil erosion control beyond the rate at which soil is naturally replenished. This is done to curtail federal assistance to projects that are controlling soil erosion at a rate greater than would be replenished naturally, a practice that should not be a priority of the SCS.

Finally, the Section adds a definition of "land treatment measures," to direct an emphasis toward management practices such as no-till farming.

C. Amending *Section 4* (16 U.S.C. § 1004) Conditions for Federal Assistance

1. Current Subsection (2) is replaced by a new cost-sharing formula that removes administrative discretion. It provides that the local organization must pay 20% of the costs applicable to soil erosion control, 50% of the costs applicable to recreation and fish and wildlife enhancement, at least 35% of the costs allocable to flood damage reduction, irrigation, water quality management (including sedimentation reduction), and ground water recharge, and all of the costs applicable to agricultural drainage and municipal and industrial water supply. These levels are generally consistent with cost-sharing proposals recommended by the administration for Corps of Engineers water resource development projects. However, soil erosion control is specifically added to the cost-sharing subsection and given the highest priority by requiring the greatest percentage of federal cost assistance. The necessary non-Federal contributions must be concurrent with installation of the works of improvement.

Additionally, this subsection establishes that any land owners receiving increased land values greater than 10% of the total flood control benefits will pay 50% of the flood control costs allocated to them.

Finally, the restriction in the present law on the types of water quality management that will receive federal assistance has been removed to allow, in part, the SCS to use the small watershed program to implement the non-point source plans and techniques developed under Section 208 of the Clean Water Act.

2. New Subsections (7) & (8) are added to provide that the public shall have access to and use of new recreational and fish and wildlife improvements paid for with P.L. 83-566 funds. The language would also require as a binding condition for federal assistance that land treatment measures identified in the watershed plan be implemented.

3. Finally, this section adds a sentence to the end of Section 4 that states that no construction can be initiated on a work of improvement until conditions are fulfilled.

D. Amending Section 12, as added by Sec. 3 of P.L. 85-624 (16 U.S.C. § 1008) Fish and Wildlife Consultation, Terms and Conditions

Current Section 12 is replaced by language requiring consultation with the U.S. Fish and Wildlife Service and state fish and wildlife agencies on every project authorized under P.L. 83-566. It requires mandatory incorporation of terms or conditions established by the U.S. Fish and Wildlife and State fish and wildlife agencies, working in cooperation with biologists from the Soil Conservation Service, in watershed plans to prevent loss of wildlife habitat. It further provides that the Secretary of Agriculture shall study whether certain categories of projects should be exempted from this requirement and shall report his recommendations back to Congress within 3 years.

E. Adding New Section 13 Enforcement

New Section 13 adds an enforcement provision that provides that any person can sue to enforce P.L. 83-566 contracts between the federal government and local organizations or sue the Secretary for failure to perform a non-discretionary duty. It requires a 60-day notice and waiting period before suit can be filed. It further establishes the forum for such suits and provides for the award of costs and attorney fees where appropriate. Finally, it adds a disclaimer that ensures that this provision will not restrict any legal rights to seek other relief.

F. Adding New Section 14 Public Access Study

New Section 14 provides that the Secretary shall study whether full public access should be provided to all water impoundments and adjacent lands with recreation-related potential that are part of works of improvement authorized by P.L. 83-566, and report his recommendations to Congress within one year. (This differs from the new Subsection 4(7) added in Section (c), which requires full public access to those new projects with an identifiable component of recreation and fish and wildlife development costs that are provided, in part, by the Federal government.) New Section 14 is a study of all projects built with federal assistance to see if public access to lands and waters with recreation-related potential should be required, in the public interest, even if there has been no specific, identified federal assistance to the development of recreation or fish and wildlife improvements.

G. Adding New Section 15 Allocation Formula and Priorities

In allocating funds to projects, this section requires that the Secretary develop an allocation formula to put those projects that yield the greatest total benefits in soil erosion control on a priority basis, making allowance for the preservation of prime and unique farmland. The Secretary is directed also to give allowance to the effort made by state and local governments to develop and assist their own programs for soil erosion control. This is to endure that states with an active and effective program are not penalized by loss of assistance, and the areas of worst negligence are not necessarily rewarded.

H. Adding New Section 16: Completion of Projects

This section expresses the intent of Congress that works of improvement should be substantially installed within six years of the approval of the watershed work plan. This is intended to provide guidance to the Secretary, Congressional appropriations committees, and local project sponsors to encourage the timely completion of approved projects. However, the failure of Congress to appropriate sufficient funds within six years would not preclude project completion.

I. Adding New Section 17: Post-Construction Evaluation

The Secretary is directed to select five completed projects in each of the next three years and report to Congress with an evaluation. Projects are to be evaluated for con-

sistency with their watershed work plan in installation and operation, and for effectiveness as measured in terms of national economic development, environmental quality, regional economic development, and other social effects.

J. Adding New Section 18: Deauthorization

Section 18 provides a statutory deauthorization process to strengthen and simplify the procedures currently found in SCS's own rules. State Conservationists are to prepare a list each year of projects which have not received federal funds for six years and send the list to the Chief and to interested agencies and persons. Projects that required Congressional action for approval shall become deauthorized 90 days after notice to the appropriate Congressional committees unless either committee adopts a resolution opposing deauthorization. Projects that only required administrative approval shall become deauthorized 90 days after the Chief was given publication in the Federal Register unless removed from the deauthorization list by the Secretary or the Governor of the State in which the project is located. State Conservationists may begin the deauthorization process for inactive projects at any time earlier than six years with agreement by the local sponsor.

K. Appropriations—Cost Ceilings for Three Years

This section authorizes $155,000,000 for the fiscal year 1984, $195,000,000 for the fiscal year 1985, and $235,000,000 for fiscal year 1986. The reduced priority assigned to costly flood control works should produce some initial reduction in Federal outlays. As the objectives of the small watershed program become more closely oriented toward critical erosion control and sedimentation reduction needs, the program will warrant a somewhat greater commitment of Federal funds.

AMENDMENTS TO PUBLIC LAW 83-566 SCS SMALL WATERSHED PROGRAM

A. Findings and Purposes

"(1) The Congress finds that soil erosion and sedimentation are a critical national problem and that the Federal government, along with the States and local communities, should direct greater attention to reducing soil erosion and sedimentation damages. Therefore, it is the policy of Congress that reducing soil erosion and sedimentation problems should be the foremost priority of the Small Watershed Program. Improvements for other purposes have, in the past, consumed an extensive portion of the funds authorized for the Small Watershed Program, flood prevention in particular. While flood damage reduction programs have provided valuable protection to lives and property, they should be primarily administered by agencies whose primary purpose is flood damage reduction. The Soil Conservation Service is directed, by these amendments, to emphasize soil erosion control and sedimentation reduction in administering the funds authorized by Congress for the Watershed Protection Program.

"(2) Congress further recognizes that identifiable beneficiaries of water resource development projects should pay their full share of costs, including, to the extent possible, environmental externalities, since efficient use of natural resources is furthered by realistic pricing and cost-sharing for water resource development projects. Mitigation for significant adverse effects of these projects on wildlife habitats must also be an integral part of every Soil Conservation Service watershed project implemented under the authority of P.L. 83-566."

B. Sec. 2 of Public Law 83-566 (16 U.S.C. § 1002), as amended, is amended to read:

"For the purposes of this chapter the following terms shall mean:

The "Secretary"—the Secretary of Agriculture of the United States.

"Works of Improvement"—any undertaking for soil erosion control and sedimentation reduction, alone or in conjunction with

(1) flood damage reduction (including structural and non-structural measures),

(2) the conservation, development, utilization, and disposal of surface water and groundwater, or

(3) the conservation and proper utilization of land, in watershed or subwatershed areas not exceeding two hundred and fifty thousand acres and not including any single structure which provides more than twelve thousand five hundred acre-feet of flood water detention capacity, and more than twenty-five thousand acre-feet of total capacity. No appropriation shall be made for any plan involving an estimated Federal contribution to construction costs in excess of $5,000.000, or which includes any structure which provides more than twenty-five hundred acre-feet of total capacity unless such plan has been approved by resolutions adopted by the Committee on Agriculture, Nutrition and Forestry of the Senate and the Committee on Agriculture of the House of Representatives: Provided, that any project with an anticipated total project cost of more than $25,000,000 must be authorized by an Act of Congress. Any work of improvement must contain benefits directly related to soil erosion control and sedimentation reduction that account for at least 50 percent of the total benefits of such project. A number of Subwatersheds when they are component parts of a local sponsoring organizations so desire.

"Soil erosion control and sedimentation reduction"—Soil erosion control means any undertaking to decrease the removal of soil by wind, gully, streambank, floodplain, scour, sheet, or rill erosion towards a rate, but no further, at scour, sheet, or rill erosion towards a rate, but no further, at which soil removed is naturally replenished. Sedimentation reduction means any undertaking to decrease deposition of soils in channel beds, lakes, reservoirs, wetlands, and over streambanks, when such deposition is the result of accelerated soil erosion.

"Local organization"—any State, political subdivision thereof, soil or water conservation district, flood prevention or control district, or combination thereof, or any other agency having authority under state law to carry out, maintain, and operate the works of improvement; or any irrigation or reservoir company, water users' association, or similar organization having such authority and not being operated for profit that may be approved by the Secretary; or any Indian tribe or tribal organization, as defined in Section 4506 of Title 25, having authority under Federal, State, or Indian tribal law to carry out, maintain, and operate the works of improvement.

"Land treatment measures"—include, but are not limited to

(1) management practices such as no-till or conservation farming, contour farming, terracing, crop rotation, and strip cropping and

(2) temporary and permanent vegetative plantings and establishments such as grass, trees, windbreaks, shrubs, and cover crops."

C. Section 4 of Public Law 83-566 (16 U.S.C. § 1004), as amended, is amended as follows:

1. Subsection (2) is deleted and replaced by the following:

"(2) assume, of the costs of installing any works of improvement, and which must be paid concurrent with the installation period,

(a) 20 percent of the costs applicable to soil erosion control;

(b) not less than 35 percent of the costs applicable to

(i) flood damage reduction and features relating thereto,

(ii) water quality management, including sedimentation reduction,

(iii) irrigation, and

(iv) ground water recharge;

(c) 50 percent of the costs applicable to fish and wildlife enhancement and recreational development; and

(d) all of the cost of installing any portion of such works applicable to other purposes, including agricultural drainage and water storage for municipal or industrial water supply;

the remainder of such costs shall be borne by the Federal government and paid for by the Secretary out of funds appropriated for the purposes of this chapter: Provided, That prior to initiating construction of any works of improvement authorized by this chapter and that can be anticipated to provide flood control benefits, more than 10 percent of which are produced by an increase in anticipated land values to a single landowner, the Secretary shall enter into an agreement with such owner or owners that provides that such owner or owners will contribute, either prior to construction or when such benefits are realized, 50 percent of that portion of the project's costs allocated to the owner's benefits;"

2. After subsection (6) add the following new subsections:

"(7) provide for public access to and use of recreational and fish and wildlife improvements when the costs of such improvements are borne, in part, by the Federal government under P.L. 83-566; and

(8) enter into a binding agreement with the Secretary, as part of the agreement for Federal assistance in the installation of works of improvement, that shall require the implementation of such land treatment measures as may be incorporated in the watershed plan."

3. The following sentence is added at the end of Section 4 (16 U.S.C. § 1004):

"No construction shall be initiated on a work of improvement until the conditions of this section are fulfilled."

D. Sec. 12 of Public Law 83-566, as added by Sec. 3 of Public Law 85-624 (16 U.S.C. § 1008), is deleted completely and replaced by the following:

"In making the determination to approve the furnishing of assistance to a local organization for works of improvement as provided in Section 3 (16 U.S.C. § 1003), the Secretary shall consult with the United States Fish and Wildlife Service and the state agency exercising authority over the fish and wildlife resources of the state in which the works of improvement will be located, in the manner provided by the Fish and Wildlife Coordination Act (16 U.S.C. § 661, et seq.), and shall include in any such approval such reasonable terms or the State agency, after consulting with fish and wildlife biologists of the Soil Conservation Service, determine are appropriate to prevent loss of, or damage to, such resources: *Pro-*

vided, That the Secretary shall initiate a study to determine whether certain categories of projects should be exempted from this requirement, because they are found not to threaten fish and wildlife resources, and report back to Congress his recommendation within three years from the date of enactment."

E. Public Law 83-566, as amended, is amended by adding the following section, to be designated Sec. 13:

"Sec. 13 (a) Except as provided in subsection (b) of this section, any adversely affected or aggrieved person may commence a civil action on his own behalf—

(1) against any person (including (i) the United States, and (ii) any other governmental instrumentality or agency to the extent permitted by the eleventh amendment to the Constitution) who is alleged to be in violation of any term, condition, or provision of any contract entered into under Public Law 83-566 (16 U.S.C. § 1001, et seq.) and all Acts amendatory or supplementary thereto, or

(2) against the Secretary where there is alleged a failure of the Secretary to perform any act or duty under Public Law 83-566 (16 U.S.C. § 1001, et seq.), and all Acts amendatory or supplementary thereto which are not discretionary with the Secretary.

The district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce such contract terms, conditions, or provisions, or to order the Secretary to perform such act or duty, as the case may be.

(b) No action shall be commenced—

(1) under subsection (a)(1) of this section—

(A) prior to sixty days after the plaintiff has given notice of the alleged violation (i) to the Secretary, (ii) to the State in which the alleged violation occurs, and (iii) to any alleged violator of the contract terms, conditions or provisions, or

(B) if the Secretary has commenced and is diligently prosecuting a civil or criminal action in a court of the United States or a State to require compliance with the contract terms, conditions and provisions, but in any such action in a court of the United States any person may intervene as a matter of right.

(2) under subsection (a)(2) of this section prior to sixty days after the plaintiff has given notice of such action to the Secretary.

Notice under this subsection shall be given in such manner as the Secretary may prescribe by regulation.

(c)(1) Any action respecting an alleged violation of a contract term, condition, or provision relating to a particular work of improvement or respecting an alleged failure of the Secretary to perform a nondiscretionary act or duty relating to a particular work of improvement shall be brought only in a judicial district in which such work of improvement or portion thereof is located.

(2) In any action under this section, the Secretary, if not a party, may intervene as a matter of right.

(d) The court, in issuing any final order in any action brought pursuant to this section, may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate. The court may, if a temporary restraining order or preliminary injunction is sought, require the filing of a bond or equivalent security in accordance with the Federal Rules of Civil Procedure.

"(e) Nothing in this Act shall be construed to restrict any right which any person (or class of persons) may have under any statute or (Federal or State) common law to seek enforcement of any contract terms, conditions, or provisions, or to seek any other relief at law or equity (including relief against the Secretary or a State agency)."

F. Public Law 83-566, as amended, is amended by adding the following, to be designated Sec. 14:

"Sec. 14. The Secretary shall study and report, within one year from the date of enactment, to the appropriate committees of the Senate and House of Representatives on the feasibility, the desirability, and the public interest involved in requiring that full public access be provided to any or all water impoundments and adjacent lands with potential for public recreation in any work of improvement when the costs of such improvement are borne, in part, by the Federal government under P.L. 83-566."

G. Public Law 83-566, as amended, is amended by adding the following, to be designated Sec. 15:

"Sec. 15. In allocating funds to implement particular works of improvement, the Secretary shall develop an allocation formula whereby those works of improvement which will yield the greatest total benefits in soil erosion control and sedimentation reduction will be funded on a priority basis, with appropriate allowance as determined by the Secretary for the preservation of prime and unique farmland and the regulatory effort made by state and local governments to control soil erosion."

H. Public Law 83-566, as amended, is amended by adding the following, to be designated Sec. 16:

"Sec. 16. It is the intent of Congress that the installation of watershed project features shall be substantially complete within six years from the date of administrative or Congressional approval of the watershed work plan."

I. Public Law 83-566, as amended, is amended by adding the following, to be designated Sec. 17:

"Sec. 17. During fiscal years 1984, 1985, and 1986, the Secretary shall select at least five completed projects during each of those three years and report to the appropriate Congressional committees his evaluation of the installation and operation in terms of its consistency with the watershed work plan and its effectiveness as measured by national economic development, environmental quality, regional economic development, and other social effects."

J. Public Law 83-566, as amended, is amended by adding the following to be designated Sec. 18:

"Sec. 18. (a) By February 1, each calendar year, the State Conservationist shall prepare a list of those watershed projects for which he is responsible and which have been authorized for installation for at least six years, and to which no federal funds have been obligated for the six previous years. The State Conservationist will notify the Secretary, the Chief of the Soil Conservation Service, and concerned State and other agencies, which had been notified that any project was approved for installation of works of improvement, of the proposed deauthorization of the project.

"(b) If authorization of funding by the Secretary for the project was subject to approval by resolution of committees of Congress, the Chief shall give notice of the proposed deauthorization to the appropriate committees ninety days before final deauthorization. The deauthorization shall become final unless either of the appropriate committees of the House of Representatives or the Senate adopts a resolution stating that such project shall continue to be authorized.

"(c) If the authorization for funding of the project was approved administratively, the Chief shall publish notice of the deauthorization of such project in the Federal Register ninety days before final deauthorization, and shall receive and consider comments. The deauthorization shall become final unless either the Secretary or the Governor of the State for which the project is approved make written request to take the project off the deauthorization list.

"(d) State Conservationists may elect to initiate deauthorization review sooner where it is unlikely that planned works of improvement will be installed and sponsors concur in the deauthorization.

K. There are hereby authorized to be appropriated for Watershed and Flood Prevention Operations:

"(1) $155,000,000 for the fiscal year 1984,

"(2) $195,000,000 for the fiscal year 1985, and

"(3) $235,000,000 for the fiscal year 1986."●

ALABAMA'S BOB HOPE, DIRECTOR OF THE STATE DOCKS

● Mr. HEFLIN. Mr. President, I was very pleased to recently learn that Alabama's Governor-elect, George Wallace, in the first major cabinet appointment of his upcoming administration, has announced that Robert Hope will be retained as director of the Alabama State Docks.

At a time when Alabama is suffering from critically high unemployment, it was very important for a signal to be sent that the excellent management of the operations of the Port of Mobile will be continued. With the planned completion of the Tennessee-Tombigbee Waterway, and other dock development projects, keeping Bob Hope as docks director was a necessity if Alabama was to take full and complete advantage of the opportunities presented by these projects.

Bob Hope was first named director of the State docks in 1976. That appointment broke a long tradition of politicizing the position through the patronage appointment of political supporters.

The State docks are far too crucial a part of Alabama's economy, both present and future, for their direction to be entrusted to anyone not familiar with their operation. Having joined the staff of the State docks in 1952, Bob Hope is far too crucial a manager to lose. Through his experience, he has 30 years of familiarity with past operations, present trends, and future development.

In his 6 years as top man at the State docks, Bob has led the docks to many new records in the areas of earnings and tonnage. He has led the construction of a new multimillion-dollar, coal-handling facility, and has been active on the international level of

world trade and port operations, as he has worked to keep Mobile abreast of new trends.

I certainly feel that the appointment of Bob Hope as director of Alabama's State docks is a strong step toward an even stronger future for Alabama's ports and waterways. I commend Governor Wallace on this outstanding appointment, and Bob Hope on the honor paid him by his reappointment.

Mr. President, I ask that an article from the Mobile Register be printed in the RECORD.

The article follows:

HOPE TO KEEP DOCKS DIRECTOR POST

(By Bill Sellers and George Werneth)

Gov.-elect George C. Wallace, in the first major move of his upcoming fourth administration, told the Mobile Register Tuesday he will retain Robert Hope as director of the Alabama State Docks.

The announcement, unusual for Wallace who has a tradition of procrastination on such major appointments, was obviously aimed at ending speculation that a political patronage appointee might be named to replace Hope, who has been a career civil servant at the State Docks.

"We have the utmost confidence in Bob Hope and never seriously contemplated replacing him with anyone not familiar with the docks operation," Wallace was quoted as saying by his chief aide, Elvin Stanton.

Stanton added: "The governor recognizes that stability in management is necessary to retain confidence on the part of those who are making Alabama's port city a major part of both their present and future plans."

He noted that Hope is intimately familiar with all the planning details for completion of the Tennessee-Tombigbee Waterway and other development projects "and the new administration has the utmost confidence in his ability to take full advantage of these opportunities for the people of Mobile and the State of Alabama."

In Mobile, Hope said he was "very pleased by this expression of confidence" since it signalled a continuity of management which "is very important in the highly competitive field of docks operations."

There had been reports since Wallace's Nov. 2 election victory over Republican Emory Folmar that some strong Wallace supporter—most frequently mentioned was former County Commissioner Jeff Mims—might be named as docks director in a patronage move with Hope to continue as chief of operations.

Criticism from shippers and other Mobile business and civic leaders over any such return to politicizing the State Docks was apparently felt in the Montgomery transition headquarters of Wallace, leading to the unusually early announcement of the first major Wallace cabinet appointment.

However, it was Wallace who more than six years ago broke tradition by naming Hope with nearly three decades of experience as top man at the State Docks rather than appointing a staunch political supporter such as he and other governors had done since the facility was first opened.

Hope is active on the international level of world trade and port operations He is serving his second term as president of the Mobile Area Chamber of Commerce.

A native Mobilian, he graduated from Murphy High School and the University of Alabama and served in the Merchant Marines and U.S. Army before joining the State Docks staff in 1952.

He has the longest tenure of any director since the State Docks was opened nearly 50 years ago and is the first operations boss of the far-flung operation to come up from the ranks.

Although he has, been holding the political appointment of docks director since 1978, subject to the whim of the state chief executive, Hope has also retained the Civil Service position of general manager—and speculation over a political appointee to head the docks had emphasized that Hope would still be running the day-to-day operations under his protected status.

Wallace indicated he would allow Hope to keep his Civil Service status by not requiring him to choose between the two top jobs.

Under Hope, all State Docks records on earnings and tonnage have been broken many times over and business has been tapped from unprecedented sources as he and other state officials as well as trade delegations have travelled the world promoting the Port of Moblie.

One of his major accomplishments has been construction of a multi-million dollar coal handling facility which facilitates the flow of Alabama mine exports to foreign shores.

Even as new facilities have been opened, new expansion and modernization programs have been coming off the drawing boards to keep the Mobile port competitive and capable of handling Alabama's export-import requirements.

Hope's appointment will be subject to what is expected to be routine approval of the Alabama Senate when it convenes in January.●

BIRMINGHAM'S NATIONAL VETERANS DAY

● Mr. HEFLIN. Mr. President, some 35 years ago, in Birmingham, Ala., a day was established to honor the veterans of all wars in which the United States has been engaged. Until that time, Armistice Day recognized only the veterans of World War I.

From that day in 1947 until the present time, Birmingham's celebration of National Veterans Day has become a model ceremony, upon which other cities throughout America regularly rely for advice and guidance concerning their local programs. In fact, it is interesting to note that Birmingham began their observances of Veterans Day some 7 years before Congress voted to change Armistice Day to an official, nationally recognized Veterans Day.

Why was Birmingham the birthplace of National Veterans Day? Why have its observances become so well known and widely respected? The reason, largely, has been a citizen of Birmingham by the name of Raymond Weeks.

Raymond, who was recently awarded the Presidential Citizens Medal by President Reagan, is known and recognized as the "Father of National Veterans Day." He has now been the director of the Birmingham National Veterans Day programs for each of the 36 observances, and I am glad to report that neither he nor Birmingham's Veterans Day celebrations show signs of slowing down.

On Veterans Day in 1954, the first celebration after official recognition by Congress, the National Veterans Award was established for presentation annually to an American citizen who has distinguished himself as a veteran. The award is presented at a banquet held in Birmingham each year on the evening prior to Veterans Day.

Through the years, this award has been presented to many distinguished Americans. Among the past recipients are Gen. Omar N. Bradley, for his continuing contributions to the defense of his country and freedom throughout the world; Brig. Gen. Charles Lindbergh, for all of the contributions he made to the field of aviation, beginning with his famous flight from New York to Paris in 1927; Gen. William C. Westmoreland, for outstanding service to his country; Neil A. Armstrong, for his scientific feat of successfully landing on the moon; Adm. Thomas Moorer, former Chairman of the Joint Chiefs of Staff. As a Member of the U.S. Senate, I am very pleased to also note that, among other recipients of this distinguished award, in 1958 we see the name of the then-Governor of South Carolina, the Honorable ERNEST F. HOLLINGS.

This year, that award was presented to the famous and distinguished Adm. Hyman Rickover, in recognition of his role in the development of nuclear power, and its military and economic uses.

Other special guests at this year's celebration included the Secretary of the Navy, the Honorable John F. Lehman, the Commander in Chief of the U.S. Army Readiness Command, Gen. Donn A. Starry, and the National Commander in Chief of the Veterans of Foreign Wars of the United States, James R. Currieo.

Birmingham has certainly accomplished a great deal with its National Veterans Day observances. Through the hard work of Raymond Weeks and other dedicated citizens, a proper and fitting tribute has come to honor all American veterans of all American wars.

As a veteran, I am honored to be involved, even in a small way, with this celebration. I am also very pleased to be able to recognize it in this small way.

Mr. President, I ask that an article from the Birmingham News be included at this point in the RECORD.

The article follows:

[From the Birmingham News, Nov. 11, 1982]

"ALREADY MORE THAN FULLY PAID," RICKOVER SAYS

(By Don Driver)

When Adm. Hyman Rickover entered the National Veterans Award dinner Wednesday night, the band launched into "Anchors Aweigh" and the 82-year-old father of the U.S. nuclear Navy picked up the step and jaunted onto the dais.

They were playing his song.

The crusty Rickover, who retired from the Navy last January after 63 years of active

duty, joined an honor roll of past dignitaries by becoming the 29th recipient of the National Veterans Award in recognition of his "outstanding leadership and service to the nation in the development of nuclear power for defense and peaceful uses."

"This is an unexpected pleasure, I didn't expect to get any award. I've already been more than fully paid for anything I did while in the Navy," Rickover said after being presented the award by Sen. Howell Heflin in Boutwell Municipal Auditorium as part of the 36th annual National Veterans Day program in Birmingham.

"I'm grateful for having been able to serve my country and I remain her devoted servant," he added.

After his acceptance speech, Rickover fielded questions from the audience and related stories of his family's immigration to the U.S. from Poland near the turn of the century, his childhood in Chicago and his career in the Navy.

He appeared to enjoy recalling how he was assigned a former women's restroom for an office while working on nuclear ship propulsion for the Navy after World War II.

"That's where the Navy's nuclear submarine program started—in a women's restroom," he said.

Rickover pioneered the nation's progress toward military and economic uses of nuclear power, playing a major role in the development of the atomic bomb and nuclear powered submarines. He also led the scientific, technical and industrial team that developed and constructed the first nuclear powered electric utility station in the U.S.

Rickover's active military career began in 1922 upon graduation from the Naval Academy. He spent the next five years on sea duty, eventually returning for post-graduate school. He served on submarines from 1929 to 1933, and during World War II served as head of the electrical station at the Bureau of Ships, receiving the Legion of Merit for his accomplishments.

In 1946 he was assigned to the Manhattan Project at Oak Ridge, Tenn., where he received a letter of commendation and an Oak Leaf cluster for his "outstanding service in connection with the development of the atomic bomb."

He later worked on nuclear ship propulsion and from 1949 to 1952 was director of the Navy's Nuclear Power Division. In 1955 the Nautilus, the world's first nuclear powered submarine, put to sea and Rickover later received the Congressional Medal in 1959 for his role in the production of nuclear powered ships.

He also received the Distinguished Service Medal for his accomplishments while serving as head of the Naval Nuclear Propulsion Program from 1955 to 1961.

He attained the statutory retirement age in 1962 but continued his service due to President John Kennedy's determination that he should remain on active duty.

In 1980 he received the Presidential Medal of Freedom, the nation's highest civilian honor, for his contributions to world peace, security and national interest.

While answering questions during the award dinner Wednesday night, Rickover said he first became interested in submarines after realizing how close German underwater craft had been to crippling England during World War I. He taught himself German just so he could read a book written by the German submarine force commander.

Rickover said he later became interested in nuclear power shortly after World War II.

"I decided, after having just learned about the atomic bomb, that I wanted to be a part of that effort—the peaceful part," he said.

Asked about his life before entering the Navy, Rickover described how his family accompanied his mother to the U.S. to join his father, who had immigrated earlier.

His father was late in meeting them in New York and they ran afoul of a law stating that new immigrants had to be claimed within nine days of arrival. They were saved by a friend from Poland who recognized his mother.

"At the last day we were saved. Think of how much trouble the U.S. Navy would not have been caused if that man had not recognized my mother," Rickover quipped.

Former recipients of the National Veterans Award include Gen. Mathew B. Ridgeway, Gen. Omar N. Bradley, Charles A. Lindbergh, astronaut Neil A. Armstrong and Gen. William C. Westmoreland.●

GENERAL REVENUE SHARING

● Mr. SASSER. Mr. President, reauthorization of the general revenue sharing program should, in my view, be the first order of priority for the 98th Congress. Otherwise, this valuable fiscal assistance to local governments will expire next September.

Programs run by local governments have already taken a disproportionate share of the budget reductions made in the 97th Congress. That is why general revenue sharing, with its flexible character, is so important to retain as a supplement to Federal assistance programs which cities and counties must now run with reduced funding.

Since the inception of the general revenue sharing program in 1972, Tennessee local governments have received more than $700 million in local general revenue sharing funds. Local officials have used these funds to provide for a wide variety of essential public services including police and fire protection, highway maintenance and education.

Mayor William N. Morris, Jr. of Shelby County wrote me the following letter concerning the important role that revenue sharing funds play in the budget of the government he administers. I submit for the Record Mayor Morris' letter.

The letter follows:

SHELBY COUNTY GOVERNMENT,
Memphis, Tenn., October 27, 1982.

Senator JAMES SASSER,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR SASSER: Shelby County urges you to support reenactment of General Revenue Sharing at least at current funding levels in the fiscal year 1984 budget.

As you know, the General Revenue Sharing program has been the least costly to administer and the most effective in solving local problems than any other intergovernment partnership program of the national government.

Shelby County believes that track record of General Revenue Sharing deserves reenactment commitments from national officials prior to the elections on November 2, 1982. In addition, we believe this commitment should include a continuation of General Revenue Sharing as a part of a potential New Federalism program or as a free standing program should a New Federalism program not be enacted.

Your continuing support for the General Revenue Sharing program, as the best example of what a real intergovernmental arrangement should be, is deeply appreciated.

Best wishes for the future.

Sincerely,

WILLIAM N. MORRIS, Jr.,
Mayor of Shelby County.

Mr. SASSER. Mayor Richard Fulton of Nashville, Tenn. also wrote me regarding the renewal of general revenue sharing. Mayor Fulton speaks on behalf of city governments across the Nation since he is the president-elect of the U.S. Conference of Mayors. I submit for the RECORD excerpts from Richard Fulton's letter.

The letter follows:

METROPOLITAN GOVERNMENT OF
NASHVILLE AND DAVIDSON COUNTY,
Nashville, Tenn., August 24, 1982.

Hon. JAMES R. SASSER,
Russell Senate Office Building,
Washington, D.C.

DEAR JIM: One of the most important issues facing the Congress next year will be the renewal of the General Revenue Sharing Program. General Revenue Sharing (GRS) is the only federal program that helps all communities, large and small, under a distribution formula that is widely regarded as fair to all. It is the most important form of federal assistance to cities for it provides assured funding which enables local officials to plan ahead; there is a minimum of red tape and burdensome regulations; and, most important, it permits discretion to use the funds to meet high-priority local needs.

This year the Metropolitan Government will receive $9.4 million in GRS funds. While only comprising 2.5 percent of the total operating budget, the use of these funds has ranged from supporting countywide fire protection to supplementing police and emergancy ambulance personnel salaries to providing direct relief to the indigent and handicapped.

Although important to all cities, GRS is particularly important to small cities, generally those of less than 25,000 population. According to a National League of Cities' survey, GRS payments comprise about 14 percent of small cities' budgets. Moreover, for many of these cities, GRS is their only source of federal assistance.

I appreciate your time and attention to this matter, and look forward to working with you in the future.

Sincerely,

RICHARD H. FULTON,
Mayor of Nashville.

Mr. SASSER. Finally, the National League of Cities recently asked member cities to respond to a questionnaire on the importance of revenue sharing to them. I shall submit an article from the Nation's Cities Weekly of November 22, 1982, highlighting the responses NLC received from this survey for the RECORD following my remarks. The title of the article is "Cities Response to NLC Survey Shows Dramatic Need For Revenue Sharing."

In sum, general revenue sharing is vital to cities and towns across the Nation. Despite the reliance that so many local governments place on these funds to supplement their operating budgets, the program remains vulnerable due to lack of full-scale administration support. Senator DURENBERGER is to be commended for preparing this legislation, which I am pleased to cosponsor, to reauthorize funding of the revenue-sharing program for another 3 years at its present funding level of $4.6 billion annually.

This is a program with a 10-year track record which proves its usefulness. The price tag is not high considering that, due to GRS's low overhead costs, nearly every dollar actually goes into local services.

Senator DURENBERGER is today announcing that a large bipartisan group of Senators join him as original cosponsors of this bill to renew general revenue sharing. We will be introducing this bill on January 3, 1983, the first day of the 98th Congress. We know that this will send a strong message to President Reagan that we will oppose any effort to abolish or dismantle this most effective Federal aid program.

[From Nation's Cities Weekly, Nov. 22, 1982]

CITIES' RESPONSE TO NLC SURVEY SHOWS DRAMATIC NEED FOR REVENUE SHARING

(By Francis Viscount)

A vivid picture of the essential need for the continuation of general revenue sharing is emerging from NLC's survey of its direct member cities on the importance of general revenue sharing to their fiscal condition.

An analysis of data collected from 494 cities, provided the following picture of the impact on cities of the $4.6 billion-a-year federal aid program:

GRS receipts provide an average of 6.26 percent of the total of locally raised revenues, but as much as 10 percent or more in some small cities.

To replace a loss of GRS funds, property taxes would have to increase about 25 percent in most cities, but as much as 45 percent in cities under 10,000 population. In the largest cities, over 100,000 population, property taxes would have to go up about 15 percent.

If cities were faced with a loss of revenue sharing funds, few would try to make it up by increasing taxes. The most likely repercussions would be a combination of cuts in capital and operating budgets along with some effort to raise a portion of the lost revenue, but a substantial percentage of larger cities would respond strictly through budget cuts.

Layoffs, ranging from several to several hundred, appeared likely in city work forces if revenue sharing funds were lost.'

"This kind of information paints a vivid image of the crucial importance of general revenue sharing for cities," said Alan Beals, NLC executive director.

"While we feel there is a strong reservoir of support in Congress to continue this program, the dismal consequences of losing revenue sharing are useful in driving home the fact that its future cannot be dealt with lightly," Beals said.

Cities are already experiencing extraordinary fiscal stress due to the compounding factors of a prolonged recession, substantial reductions in federal aid to local governments and the variety of tax and expenditure limitations imposed by both the voters and state legislators.

This combination of factors has caused local government to begin making real reductions in spending, after taking into account inflation, and absolute reductions in the number of employees.

For the first time in over three decades local government, and state government, are behaving pro-cyclically and contributing to the length and severity of the recession. The spector of the loss of general revenue sharing magnify all these trends.

Local governments have had the variety of responses to fiscal distress greatly reduced in the recent past. Because of the recession local revenues are down. Because of the cutbacks in state and federal governments, grants from them have been reduced. Because of the continuing deterioration of infrastructure, capital budgets can no longer be reduced.

Therefore, the continued fiscal stress of cities, and the possible loss of revenue sharing, will force even more severe cuts in the public services which cities provide.

NLC has sent surveys to its more than 1,000 direct member cities and currently has received back approximately one-half. In the initial analysis of the returns, these cities reporting were broken down into population groups. These groups were under 10,000, 10,000 to 50,000, 50,000 to 250,000, 250,000 to 500,00 and over 500,000.

Source: NLC.

Three major questions were put to the cities. How important is general revenue sharing to you; what do you use general revenue sharing for; and what will you do if general revenue sharing were ended?

To determine how important general revenue sharing was to cities three different questions were asked, what share of locally raised revenues is general revenue sharing, how much would your property tax have to be increased to compensate for the loss of general revenue sharing; and is general revenue sharing you only federal grant.

General revenue sharing represents approximately 6.26 percent of locally raised revenues, exclusive of other federal grants and intergovernmental aid from the states. For the majority of cities, it represented between 1 and 10 percent of the locally raised revenue.

Significantly, however, for smaller cities, general revenue sharing for many of them represented over 10 percent of their locally raised revenue. For the smallest cities, one quarter of them had general revenue sharing equal to over 10 percent of their locally raised revenue.

Often it has been asserted that cities would be able to tap property tax to make up for the loss of general reveune sharing. However, the answers to our survey indicate clearly that property tax rates could not be raised at anywhere near the amounts necessary to compensate.

For the small cities the average rate increase would be 45 percent.

For the larger groups of cities the rates would have to be raised approximately a quarter and for the very largest cities the rates would have to be raised over 15 percent. It is unlikely that such rate increases would be feasible politically.

General revenue sharing is particularly important for smaller cities.

For cities under 10,000, 63 percent indicated it was the only grant they received. For cities under 50,000, 41 percent indicated it was the only grant received.

The significance of general revenue sharing dropped off rapidly as the populations increased to 250,000, and only 6 percent of the cities reporting indicated that it was their only federal grant. For cities over 250,000 none reported GRS as their only grant.

As city size increased, fewer cities used revenue sharing for capital projects only.

Also, as city size increased, more cities used general revenue sharing exclusively for operating programs.

Other than for the very largest cities, approximately 40 percent of cities reporting indicated that they split general revenue sharing between operating and capital activities. This is a clear indication of the value of the flexibility built into general revenue sharing.

The major capital uses for general revenue sharing show, although there were some unique applications, economic development, street repairs, mass transit, most of the spending was for basic public infrastructure. Under this category would come land acquisitions, public building construction and renovation and the purchase of major equipment.

Under the major operations funded with general revenue sharing, the flexibility of use is more evident. A number of cities funded dial-a-ride and alternative local transit programs.

Many cities supplemented their public health and emergency medical services with general revenue sharing. Recreation programs, surprisingly, were mentioned by a fair number of cities but were not the dominant factor that some critics of the program have suspected.

Senior citizen programs and various social services programs, including funding public service agencies, were an important use of revenue sharing funds.

However, the fiscal stress that dominate local public finance has forced the cities to allocate the funds to the core municipal functions of public safety, administration, planning, sanitation, and transportation.

The consequences of terminating GRS are unpleasant.

In many ways they should not shock the reader of the survey report, because these are consequences cities face because of the severity of fiscal stress they are experiencing.

Under the range of broad options which are available to cities, increasing revenues as a sole option was indicated by only 11 percent of the cities reporting.

Most of the smaller cities indicated increasing taxes, while in some of the large cities they would increase fees.

By far the most significant response would be to cut capital and operating expenditures.

Twenty-eight percent of the cities indicated they would reduce capital to compensate for the loss of GRS and 13 percent would compensate solely with reducing operating expenditures.

Forty-three percent of the cities reporting indicated they would do a combination of increasing revenue and cutting spending. However, a few cities indicated they would try to use reserves and increase debt, however, these cannot be permanent solutions to the reductions in GRS.

When pressed further, 28% of cities reporting indicated they would have to lay off employees, with almost half of the cities between 250,000 and 500,000 indicating that would have to be the course they would have to take.

The average number of layoffs indicated grows rapidly with city size, and reflects the fact that larger cities receive substantially larger dollar amounts of general revenue sharing.

The results of the survey indicates the importance of revenue sharing and very difficult actions cities would have to take to compensate for the loss of these funds.

Revenue sharing has become in many ways the glue that holds the precarious fiscal situation in many cities together.

Existing resistence to higher taxes would insure that important services would have to be reduced, capital spending for infrastructure postponed and municipal employees laid off.

These initial findings further dramatize how GRS is important to all cities and the need for NLC and its direct member cities to redouble their efforts to insure enactment of the program.

REVENUE SHARING

● Mr. PRYOR. Mr. President, I am very pleased to announce my support and cosponsorship of legislation that will be introduced early next year by Senators DURENBURGER, SASSER, and others to reauthorize the general revenue sharing program.

General revenue sharing was created by the State and Local Fiscal Assistance Act of 1972 (Public Law 92-512) and was subsequently extended for 4 years in 1976 by the State and local fiscal assistance amendments (Public Law 94-488). Once again in 1980, with the enactment of the State and Local Fiscal Assistance Act Amendments of 1980 (Public Law 96-604), the general revenue sharing program was reauthorized for 3 more years. However, authorization of this program will expire on September 30, 1983, unless it is reauthorized. I believe the general revenue sharing program has been a tremendously important program providing State and local governments with valuable general-purpose fiscal assistance. In fact, passage of revenue sharing marked a fundamental change in intergovernmental relations.

Continuation of the general revenue sharing program is extremely important both in terms of fiscal impact and budgetary planning stability to State and local governments. As the program has withstood the test of time and been reauthorized many local governments have increased their use of the programs. In fact, according to a recent National League of Cities survey, over 40 percent of all small cities now receive no other Federal aid, and 80 percent of cities surveyed said they would be forced to cut services next year if the program were reduced or eliminated. In addition, 50 percent of such small cities said they felt they would be forced to raise taxes if revenue sharing is not continued.

The success of the revenue sharing program in the State of Arkansas is widely acclaimed. The total amount of general revenue sharing program funds received by all municipalities in the State of Arkansas was $43,441,575 in fiscal year 1981, $48,184,041 in fiscal year 1982, and will be approximately $46,413,653 in fiscal year 1983 if the program is reauthorized. I just recently received a very persuasive letter from Mr. John Frazer, the mayor of Warren, Ark., in support of reauthorization of revenue sharing. I ask that a copy of this letter be printed in the RECORD following my remarks.

Mr. President, I have been a consistent supporter of the revenue sharing program and I strongly support continuation of the program. The legislation, which I have agreed to cosponsor, will be introduced on the first day of the 98th Congress to reauthorize the general revenue sharing program. It will be a simple reauthorization for 3 years at the current level of funding of $4.6 billion and will employ the same allocation formulas as the present program. I urge my colleagues to join me in calling for early hearings in the 98th Congress on this issue and in supporting the continuation of this vital program.

The letter follows:

THE CITY OF WARREN,
Warren, Ark., December 10, 1982.

Hon. DAVID PRYOR,
U.S. Senate, Russell Building,
Washington, D.C.

DEAR SENATOR: As the end of 1982 draws near, the attention of local governments turn to 1983 and annual budgets. The City of Warren is no exception. Realizing the many difficult problems to be faced by The Congress in 1983, it is the desire of the City of Warren to go on record early in favor of the continuation of the General Revenue Sharing Program.

You need not be informed that Revenue Sharing, as currently authorized, will expire at the conclusion of this federal fiscal year and with the tough decisions required to solve our economic problems, many will spot an easy target in Revenue Sharing to eliminate.

To demonstrate the essence of the Revenue Sharing question as it affects the City of Warren and I know most other municipalities, Revenue Sharing covers a full 15% of Warren's operating budget. In past years, the City of Warren utilized RS to make capital expenditures. Now RS is essential to maintain basic City services like police and fire protection. Rising costs have created this situation.

I realize that all levels of government must be more efficient and stick to basics. Most communities are doing just that. We're not broke but remove RS and a drastic financial condition will exist. Frills to be maintained are not the question, protection of life and property is.

Please support the continuation of General Revenue Sharing to local governments for the benefit of all our citizens. If you have questions concerning RS and the City of Warren, feel free to contact me.

Sincerely,

JOHN B. FRAZER,
Mayor.●

RECESS UNTIL 2 P.M., DECEMBER 19, 1982

Mr. BAKER. Madam President, I see no Senator now seeking recognition. I move, in accordance with the order just entered, that the Senate stand in recess until the hour of 2 p.m. today.

The motion was agreed to; and at 2:55 a.m., the Senate recessed until Sunday, December 19, 1982, at 2 p.m.

EXTENSIONS OF REMARKS

ADMINISTRATION OFFICIALS SUGGEST ILLEGAL REBATES ACCEPTABLE

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. FLORIO. Mr. Speaker, I must call the attention of the House to three articles which appeared on the front page of today's Washington Post. Officials of this administration, in the name of free enterprise and reform, are encouraging conduct which violates all traditional notions of integrity.

A Commissioner of the Interstate Commerce Commission suggests that illegal rebates are acceptable. Officials of the Legal Services Corporation, designed to serve the needs of the poor, drained the meager resources of the corporation for their personal gain. The Department of Justice refuses to pursue EPA Administrator Anne Gorsuch for contempt of Congress as required by law.

I urge my colleagues to review these articles.

[From the Washington Post, Dec. 18, 1982]

TRUCKING BRIBES JUST "DISCOUNTS," ICC OFFICIAL SAYS

(By Howard Kurtz and Douglas B. Feaver)

One of President Reagan's appointees to the Interstate Commerce Commission said in a private meeting that the agency should not worry about kickbacks in the trucking industry because such bribes "are probably one of the clearest instances of the free market at work."

Commissioner Frederic Andre told his ICC colleagues in the Oct. 20 closed-door meeting that he sees nothing wrong with trucking companies conspiring to set monopoly prices, according to a confidential transcript obtained by The Washington Post. He also said there was no reason for the ICC to stop a convicted felon from operating a trucking firm while in prison.

He said that bribes in the trucking business were just "discounts," or "rebates."

Andre, 49, a transportation consultant from Indiana, who joined the commission last March, made the comments during a strategy session called to map out the ICC's future enforcement policies. The ICC has been debating what role it should play in overseeing trucking practices as Congress proceeds to free the industry substantially from decades of regulation.

Andre, a onetime truck driver who later became chief deputy commissioner of the Indiana Bureau of Motor Vehicles, also served on Reagan's transition team for transportation issues. He did not respond to repeated requests for comment yesterday. ICC spokesman Robert Dahlgren would say only that "the transcript stands on its own."

According to the transcript, Andre said the trucking industry has developed into a cartel with a "subculture" of unique rules and traditions that defies federal regulation. The government should not interfere if a trucker pays a kickback to a shipping manager to hire his company to haul freight along a particular route, he said.

"Bribes among principals are probably one of the clearest instances of the free market at work," said Andre a strong advocate of deregulation.

"Well, I can't agree with you about that," said Chairman Rees H. Taylor Jr., also a Reagan appointee.

"Well, they are just discounts," Andre responded. ". . . A bribe is a rebate, is it not? . . . It is an attempt to get around the rigidities imposed on the market by a government cartel."

"That is just like saying that murder eliminates hunger, you know," Commissioner J. J. Simmons said.

Andre contended that existing laws against fraud are sufficient to allow local prosecutors, to pursue bribery cases "without having a special ICC cop coming along and having special jurisdiction."

Chairman Taylor responded that local officials "just absolutely ignore" such violations, but Andre said this is because "they have been preempted by federal police, which is the ICC police."

Andre said the ICC should follow the same approach with a form of extortion called "lumping," in which someone is not allowed to load his truck without paying off a carrier or shipper. Taylor said this practice, sometimes enforced by gunfire, is "rampant" in New York, New Jersey, Chicago, Los Angeles and San Francisco.

Maybe we should get entirely out of worrying about lumping . . . ," Andre said.

Commissioner Heather Gradison, also a Reagan appointee, said yesterday that Andre's comments came in "a discussion between commissioners about philosophy. Each member would throw out one extreme [ideal] or another . . . . That was just Fred talking. What you've gotten hold of is Fred Andre's philosophy, not the commission's philosophy."

Two other ICC sources said that Andre is viewed as an extremist and that he is not taken seriously by the other commissioners. "Some of his ideas are off the wall," one source said.

According to the transcript, Andre does see one clear-cut role for the ICC, in defending the special antitrust immunity that truckers have enjoyed since the 1940s. Congress is in the process of phasing out this immunity, which allows competing truckers to set common rates or carve up territory without being accused of price-fixing.

I think the greatest function that the ICC performs . . . is that it grants antitrust immunity to surface transportation," Andre said. He said this helped protect truckers "from the latter-day McCarthyites that populate the [Justice Department's] Antitrust Division."

Scoffing at "British neoclassical" theories about price-fixing, Andre said: "No one has yet proven that a monopoly price that came about as a result purely of market activity has ever been socially onerous."

Andre also brushed aside suggestions that a convicted felon should be denied a trucking license.

"This might be a perfectly legitimate thing," he said. "I think murderers in jail, there is no reason why—if the general cultural laws of this country permit them to run trucking companies—they are in jail because they are a physical danger to other people, but that does not mean their mind is utterly corrupt as far as running a surface transportation business is concerned."

"Think of all the businessmen . . . who still run their companies from jail," Andre said ". . . Why should we have a higher standard, of all things, in surface transportation?"

Taylor said he hoped everyone's comments would remain secret, but added, " I have no illusions, after having been here for a year and a half, about keeping anything confidential around here."

RECOVERY OF FEES PAID LEGAL OFFICIALS DEMANDED

(By Mary Thornton, Washington Post Staff Writer)

Republican Harold S. Sawyer (R-Mich.), furious about large consulting fees collected by President Reagan's appointees to the board of the Legal Services Corp., yesterday informed the president that he will ask federal prosecutors to recover the money on the grounds that it was paid illegally.

Referring to the $156,000 collected by the 11 appointees during the first 11 months of 1982, Sawyer said in a letter, "the conduct of your recess appointees . . . is an embarrassment to us and is becoming a political liability to you. We are alarmed by the growing public perception of the administration's and our party's lack of sensitivity for the poor and elderly. . . ."

Pointing to the $25,028 collected by board chairman William Harvey and the more than $19,000 paid to member William Olson, Sawyer said, "We cannot expect pro bono volunteerism from attorneys . . . when this administration allows the Legal Services board members to make a profit on the backs of a program designed to help out poor and elderly. It appears to be the application of a 'suck up' as opposed to a 'trickle down' theory."

Sawyer added that a congressional delegation would like to meet with Reagan "regarding the removal of the board, the repayment of the consulting fees, the removal of the corporate president, the nullification of his contract, and the selection and confirmation of qualified [board] members."

Reagan said Wednesday that he would ask the Office of Management and Budget to conduct an investigation after a House Judiciary oversight subcommittee on which Sawyer serves discovered that the board was collecting consulting fees at more than twice the rate of any previous board in history.

Meanwhile, the Senate also moved yesterday to control the board by adding a rider to the continuing resolution that would cut back not only on consulting fees but also on the fringe benefits approved by the board earlier this week for Indianapolis lawyer Donald Bogard, the new Legal Services president.

Board members say the contract was negotiated directly by Harvey, a former law

---

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

professor of Bogard, without the participation of the other board members, even though the board had appointed a committee to handle the negotiations.

The Senate rider would nullify a provision in the contract providing paid membership in the private club of Bogard's choice and would severely limit another provision of the contract—a special one-year severance agreement that would authorize Bogard to collect his full $75,500 salary along with benefits and expenses.

In addition, the rider would allow board members to collect their $29-an-hour consulting fee only for the time they are actually attending official board meetings.

Harvey, for example, does not like to fly, and has collected the consulting fee for his driving time to and from Indianapolis.

While the controversy over its expenses continued, the board met yesterday and approved funding for the Legal Services field offices for the coming year at the 1982 level.

In an often contentious meeting, Harvey attempted to move forward on votes while an angry legal services advocate—shouting to be heard— read Sawyer's letter into the record. Harvey offered no response.

Board members led by Howard Dana, a Portland, Maine, lawyer who ran Reagan's 1980 campaign in Maine, turned back attempts by Harvey and Olsen to virtually eliminate class-action lawsuits by Legal Services lawyers and defeated proposed rules to make it easier to cut off funding for programs that may be ideologically out of tune with the administration.

Maryland Attorney General Stephen Sachs was met by cheers from the legal services advocates in the audience when he said, "Poverty ought not weigh at all—and certainly not heavily—on the scales of justice. . . . Your proposals"—to require that every member of a class grant permission before a class-action suit can be filed, and that class actions cannot lead to the expenditure of government funds—"are . . . nothing other than an attempt to gut the class-action concept. Your requirements are impossible to meet."

Finally, Harold DeMoss, a Houston lawyer who is affiliated with the more moderate segment of the board, pushed through a resolution to ask Congress for a 6.7 percent increase in the budget for the 1984 fiscal year.

Legal Services has been operating since 1981 with a budget 25 percent below the 1980 level.

Nine of the 11 members of the board will cease to function as members as soon as Congress adjourns. Reagan withdrew his formal nominations of all nine last week when he received word that the Senate planned to reject Harvey and Olson. The board members are now serving in a recess capacity.

The other two were appointed in October and can serve until Congress adjourns next year.

Although conservatives have criticized previous boards as being overzealous, a number of Reagan board members have been criticized by both Republicans and Democrats.

"We've just exchanged our nuts for their nuts, and I think our nuts may be worse," said Rep. M. Caldwell Butler (R-Va.), a member of the House Judiciary oversight subcommittee that has been looking into the board's expense records.

Reagan has not indicated who any new board members might be.

PROSECUTION OF GORSUCH RULED OUT

ADMINISTRATION'S DECISION SETS UP SCRAP WITH HOUSE

(By Dale Russakoff, Washington Post Staff Writer)

In an escalating confrontation with Congress, the Reagan administration announced yesterday that it does not plan to prosecute Environmental Protection Agency Administrator Anne M. Gorsuch for contempt of Congress, as directed by the House of Representatives in a lopsided bipartisan vote Thursday.

Instead, Justice Department officials said yesterday, they have asked a U.S. District Court judge to declare the House action unconstitutional and an intrusion on executive privilege to withhold information from Congress.

The request came in a lawsuit filed by Justice Department attorneys and provoked an immediate and angry reaction from several House leaders, who accused the adminstration of "stonewalling" and flouting the law.

The House voted 259 to 105 to hold Gorsuch in contempt after she refused, under orders from President Reagan, to turn over to a House subcommittee certain legal documents on her agency's cleanup efforts at 160 of the nation's most dangerous hazardous-waste dumps.

Although the full House has never before held a Cabinet-level official in contempt, federal law says that the U.S. attorney for the District of Columbia has a "duty . . . to bring the matter before the grand jury." If tried and convicted, Gorsuch could be fined up to $1,000 and sentenced to up to a year in jail.

However, U.S. Attorney Stanley S. Harris joined Justice Department officals yesterday in filing suit against the House of Representatives in an effort to block prosecution of Gorsuch. Thus, the case against Gorsuch will not go to a grand jury until the civil dispute over the limits of executive privilege is resolved, Justice Department officials said.

"It is our position that prosecution is inappropriate and unlawful," said a high-ranking Justice Department official who briefed reporters on condition, that he not be identified. "It would be a terrible dereliction of office to prosecute under those circumstances."

The lawsuit uses several of the arguments Justice had invoked in advising Reagan and Gorsuch to defy the House subpoena for the EPA documents. It argues that the subpoena is too broad, that the subcommittee has not demonstrated a need for the documents and that the papers are too important to law enforcement efforts to be released.

The Justice Department official said the administration will turn over the documents if it loses the lawsuit, but he predicted that the case would be appealed, possibly to the Supreme Court, since this is the first time Congress has attempted to press criminal contempt charges on the issue of executive privilege.

Meanwhile, House leaders vowed to press forward with efforts to obtain the documents, reacting angrily to what they called an unprecedented legal situation—a lawsuit putting the United States of America against the House of Representatives of the United States of America.

House Speaker Thomas P (Tip) O'Neill Jr., yesterday forwarded the contempt citation to Harris for prosecution and, in a meeting with House Republican and Democratic leaders, called on House legal advisers to challenge the Justice Department lawsuit, according to two officials who were present.

"The Justice Department has placed itself in the unethical position of advising Mrs. Gorsuch to withhold the documents and, now, stonewalling their responsibilities under the law of the land," said Rep. Elliott H. Levitas, chairman of the House Public Works subcommittee that issued the subpoena to Gorsuch and brought the contempt citation against her.

Stanley Brand, general counsel of the clerk of the House, and Kirk O'Donnell, general counsel to the speaker, yesterday called the Justice Department arguments "defective" and "seriously flawed." They said the courts have often held that Congress cannot be sued for legislative acts.

The impasse grew from an investigation by Levitas' subcommittee into the EPA's enforcement of the 1980 federal law that mandated cleanup of the nation's most hazardous waste dumps. The law created a $1.6 billion fund—known as the Superfund—to finance cleanups and to finance prosecution of companies for illegal waste-dumping.

Levitas and other subcommittee members said they needed to review sensitive law enforcement records in order to know whether the agency was moving quickly enough to clean up the dumps. They also said they had information suggesting that EPA had not assessed high enough fines against several companies involved in illegal dumping.

However, EPA officials, under advice from the Justice Department, invoked executive privilege in refusing to turn over documents that they called "enforcement-sensitive." These papers, Gorsuch and others argued, came from open law enforcement files and could not be released without jeopardizing potential prosecutions.

That standoff led to the subpoena for all legal records on the 160 dumps designated by EPA as priorities for cleanup with the Superfund. Administration officials said the subpoena would require EPA to produce more than 780,000 pages of documents at a cost of about $223,000, a figure disputed by Levitas and other committee members.

Gorsuch said yesterday that the agency is withholding only a small fraction of its files, including legal memos outlining the strengths and weaknesses of the government's case against certain companies, lists of potential witnesses and enforcement strategy papers.

Nonetheless, both Republicans and Democrats view the administration's stance as interference with Congress' duty to see that its laws are carried out. Fifty-five Republicans joined 204 Democrats in voting for the contempt citation.●

SUPPORT OF PUBLIC EMPLOYEES' APPRECIATION DAY

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. PARRIS. Mr. Speaker, I rise in support of the resolution which would designate a day in January as Public Employees' Appreciation Day. As many of my colleagues know, January 16, 1983, will mark the 100th anniversary of the Pendleton Act which inaugurated a new career civil service.

To show my support and at the request of the Public Employees Roundtable, I introduced House Joint Resolution 592, designating January 16, 1983, as Public Employees' Appreciation Day. That measure attracted quite a number of cosponsors, both Republicans and Democrats, from many different parts of the country. For this reason, I am delighted that the House has this opportunity to consider the resolution before us now and I urge my colleagues to vote in support of it.

Public employee morale and productivity is at an alltime low. Our public employees have not received adequate recognition for the contributions they have made and the vital services they provide. The work of Federal employees affects many aspects of our lives. Secret Service agents, Federal Bureau of Investigations personnel, and drug enforcement agents strive daily to keep our Nation safe. Public employees at the National Institutes of Health work on cures for cancer and other diseases while NASA employees work on new technology for our space program.

Let us show our support for these dedicated workers by approving this resolution and presenting it to the President for his signature.●

KEN HOLLAND

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. PHILLIP BURTON. Mr. Speaker, I would like to join my colleagues today in paying tribute to our friend KEN HOLLAND who is retiring at the end of this term.

We will all miss the energy and spirit that was KEN's hallmark in his 8 years here as I'm sure his constituents will miss his able and powerful voice in Congress. His hard work on the Ways and Means Committee on their behalf is well known.

I extend him my best wishes for continued success in all his future endeavors.●

DEATH OF MICHIGAN SUPREME COURT JUSTICE BLAIR MOODY, JR.

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. HERTEL. Mr. Speaker, the recent death, of my friend Michigan Supreme Court Justice Blair Moody, Jr. was a tremendous loss to the people of Michigan. Detroit News columnist Pete Waldmeir's article about Blair explains that his death is very much a personal loss to the people of our State.

The column follows:

HOW COULD THIS HEART FAIL?

(By Pete Waldmeir)

My son, Pete, was on the phone early Friday evening. His voice was weary and dejected and before I could ask, he told me why.

"Blair Moody died of a heart attack," he said. "I just heard and I thought you ought to know. I feel so bad," he said, "for his wife, Mary Lou, and for his family. He was such a good person . . ."

Damn, I thought. Damn, damn. Why is it always the good guys? The decent people? There are so many jerks in this world and they all seem to live to be 100.

Yet people like Blair Moody Jr. can't make it past 54.

I wasn't a close friend of Blair Moody. I liked him and respected him, both as a person and as a judge. But he was one of those rare folks who could add something to your life just by being himself.

He was kind and compassionate, the sort of person that, if you were a parent, you would want your kid to grow up to be. Not Boy Scout-simple. Just a truly intelligent, reasoned, loving man whose smile was a real bonus because it could make you feel good.

I'm only a couple of years younger than Blair Jr. was, but it seems like I was an awful adolescent when I first met him in the city room of The Detroit News.

His father, Blair Sr., had been a Washington correspondent for this paper—a really high-powered job in the days before the TV tube took over the world—and I had read his old man and admired him since I was old enough to understand that there was a whole world outside the window of the Gratiot streetcar.

I was a copy boy in the late '40s and early '50s, one of a small cadre of messengers who carried stories in various stages of disrepair from one desk to another and sharpened pencils and ran for coffee for editors and reporters. In that job there was always a certain disdain for the summer temporary reporters.

I've seen Blair Moody Jr. a hundred times since our meeting in the city room the first summer he came in from Ann Arbor to work and each time we've met I've recalled to myself how gentlemanly he treated me; like I really meant something to him.

Blair Jr. moved on, of course, through law school, into private practice, then the Wayne circuit bench and finally the Michigan Supreme Court.

It seems strange now, but when Blair Sr. died in 1954 I felt some of the same despair and sorrow for young Blair that Pete bears for Blair Jr.'s family. But Pete knew Blair Jr. far better than I ever knew Blair's dad.

When Pete graduated from George Washington University law school he applied for a clerkship at the Michigan Supreme Court and spent two years working for Justice G. Mennen Williams. Soapy's office adjoins young Blair's and Pete was quickly welcomed into the extended family of both of them.

I don't know how much law he learned from either man; he'd have to tell you that. But I am grateful that he had the chance to know them both and, particularly, to grow as a man in the warmth of Blair Moody's friendship

It seems cruel irony that Blair Moody's heart gave out on him. It never failed anyone else.●

INTRODUCTORY STATEMENT

HON. THOMAS E. PETRI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. PETRI. Mr. Speaker, today I am pleased to introduce a bill which would correct many of the problems now facing multiemployer pension plans as a result of the Multiemployer Pension Plan Amendments Act of 1980. Without this relief the future for multiemployer plans and the essential pension benefits they provide to workers covered by such plans could be bleak.

Currently, more than 8 million American workers rely on multiemployer pension plans to provide their pension benefits. Typically, these employees work for small businessmen who could not provide pension coverage in a cost efficient manner were it not for the vehicle provided by multiemployer pension plans. Multiemployer plans provide many advantages to contributing employers and covered employees, not the least of which is increased security and financial stability resulting from the plan's broad contribution base of hundreds, or even thousands of employers. Multiemployer plans also are beneficial to unions because they provide a vehicle through which the unions can obtain the greatest benefits for their members. Multiemployer plans have provided an example of union-management cooperation which is of benefit to business, labor, workers, and to the economy of the United States.

In the 2 years since enactment of the 1980 Multiemployer Amendments Act multiemployer plans are subject to stresses which are the direct result of that act. The ability of the trustees of the plans to provide benefits are restricted because new employers avoid contributing to multiemployer plans resulting in gradual erosion of the plans' contribution base. The security of the current and future benefits for workers are thereby also eroded. Many plans find themselves embroiled in complex litigation further depriving participants of assets which could be used to improve benefits. Well managed plans are required to pay ever-increasing premiums to the Pension Benefit Guaranty Corporation because of the unwise and imprudent acts taken by trustees of poorly managed plans. The moneys spent for increased premiums cold better be used to increase the benefits paid to covered workers.

One of the key provisions of the 1980 Multiemployer Amendments Act was the establishment of "employer withdrawal liability." During the period after the enactment of the Employee Retirement Income Security

Act of 1974—ERISA—some employers were abandoning multiemployer plans both as a result of declining industries and to avoid any possible additional liability as a result of the plan termination provisions of ERISA. The broader application of employer withdrawal liability was intended to stem this growing tide and to assure that employers who left a multiemployer plan paid a share of accred unfunded vested benefits. Unfortunately, employers have found that this "share of withdrawal liability" can range as high as $20 million. These huge dollar amounts represent benefits which the plans have promised to workers, benefits they are obligated to pay at some future date, and benefits for which there are currently no funds available to pay.

Many employers contributing to multiemployer plans are being hit with enormous withdrawal liability solely as a result of normal, day-to-day business transactions, many of which are beyond their control.

Often, the withdrawal liability is sogreat that it threatens the continued economic viability of the business concern. Frequently, the liability far exceeds the total contributions made by the employer, and it is not unusual for the amount to exceed his entire net worth.

The 1980 Multiemployer Amendments Act also discourages participation by new employers in multiemployer plans. Small businesses, comprising the vast majority of multiemployer plan contributors, are justifiably reluctant to risk more than their entire net worth when they have little or no control over the amount of employer withdrawal liability they may be subjected to at some time in the future. They are instead searching for other retirement income alternatives for their workers or, worse yet from a public policy perspective, providing no pension protection. In any event, the vital lifeline for multiemployer plans—new contributing employers to replace those who go out of business or leave the plans—has been badly damaged, if not totally severed.

Mr. Speaker, the legislation I am introducting today is designed to reverse this situation and restore multiemployer pension plans to their status as one of the most efficient, secure retirement income systems available. In general, the bill, entitled the "Multiemployer Pension Plan Equity Act," is designed to correct those problems created by the 1980 amendments that threaten workers' pensions and disrupt the daily operation of America's small businesses. It is important to note at the outset that this bill not only maintains the Pension Benefit Guaranty Corporation insurance system, but strengthens it. In addition, adequate safeguards have been maintained to prevent a mass rush of employers leaving multiemployer plans. Withdrawal liability will still serve as a deterrent to employers wishing to leave poorly funded plans.

The cornerstone of this bill is a provision which would require that a multiemployer plan be well-funded before any past service benefit increase or past service credit is granted. A wellfunded or fullyfunded plan in and of itself provides the best protection for the pensions of covered employees. This bill requires that a certain level of plan assets in relation to vested benefits be maintained.

Our bill is also directed at encouraging better funding of multiemployer plans as well as strengthening the PBGC insurance system by implementing a risk-related premium system. Currently, all plans covered by the Pension benefit guaranty corporation's—PBGC's—multiemployer plan termination insurance pay the same annual premium, $1.40 per participant. This flat rate does not vary regardless of potential risk of loss to PBGC, so that well-funded plans pay the same premium as do poorly funded plans. ERISA authorizes PBGC to implement a risk-related premium, but the Corporation has yet to do so.

In this regard, this bill contains a provision to vary the rate of the premium paid to PBGC in accordance with the funding level of the plan. The better funded a plan is, the less risk to PBGC and the lower will be the annual premium. The more poorly funded, the higher the premium. The potential for the reduced PBGC premium should serve as a further inducement to improve plan funding and thereby reduce the level of unfunded vested benefits.

Another important goal of this bill is to reduce the impact of employer withdrawal liability under unusual situations or situations which are totally beyond the control of the employer. Eliminating liability in these instances will reduce much of the anxiety currently felt by employers who are considering joining multiemployer plans. Under our proposal, various events which would be considered employer withdrawals under the 1980 Multiemployer Amendments Act would be exempted. These include a cessation of contributions caused by a natural disaster, and the untimely death of a small businessman. Thus the most gregarious examples of withdrawal liability imposition would be eliminated.

A fourth provision of the bill would improve the current rules relating to sales of assets. The current unworkable requirements may prevent a sale or merger of a company thereby resulting in the closing of the company and the loss of jobs. These requirements are replaced by provisions which impose no withdrawal liability on the seller—primary or secondary—if certain safeguards are present.

The current statutory provisions regarding dispute resolution are also improved by streamlining the procedure and reducing the time requirements until the plan and the withdrawing employer will receive a decision of an impartial arbitrator. It will also specify that no withdrawal liability payments are due until after an impartial arbitrator's decision.

Finally, the bill would provide some technical improvements to prevent the assessment of withdrawal liability when a plan is fully funded.

Mr. Speaker, the principles reflected in this bill are supported by the trustees of the Graphic Arts International Union, Supplemental Retirement and Disability Fund. Thirty management and union trustees from throughout the United States and Canada. This is the only bill introduced by union and management which is directed toward solving the problem of all multiemployer pension plans in all of the industries in the United States. This bill, in some respects, is similar to H.R. 7233 introduced by Representative HOLLAND in the 2d session of the 97th Congress. We hope that many more unions and employers will soon be adding their support for this bill.

The bill represents an effort to ensure the renewed growth of multiemployer plans and to protect the safety of millions of workers' retirement income. I ask that my colleagues give this matter their serious consideration. Mr. Speaker, I ask unanimous consent that the text of the bill be printed at the conclusion of my remarks.●

HENRY REUSS

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 7, 1982

● Mr. PHILLIP BURTON. Mr. Speaker, one of the finest gentlemen and most knowledgeable Members of the House is leaving us at the end of this session, HENRY REUSS of Wisconsin. He has been a friend and a colleague whose advice on financial and economic matters I often sought and always respected.

HENRY served as chairman of the House Banking Committee from 1975 to 1980, where his innovative and farsighted leadership was widely acknowledged. He has always stood fast against the giant financial interests in this Nation, championing the cause of the workng people, minorities, and poor. As chairman of the Joint Economic Committee, Henry has served the past 2 years as a major spokesman against the disastrous economic policies of the Reagan administration.

I will miss HENRY'S wisdom and knowledge. I will miss his friendship. Congress will miss him as it grapples with this Nation's difficult economic problems.●

STATES RAID NONGOVERNMENT OIL COMPANY OVERCHARGE PAYMENTS TO ESCROW ACCOUNT ESTABLISHED TO PAY OVERCHARGED CUSTOMERS

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. DINGELL. Mr. Speaker, through the efforts of my Subcommittee on Oversight and Investigations and that of subcommittee chairman YATES, the Department of Energy is reluctantly pursuing old violations by oil companies of DOE regulations aimed at protecting consumers from oil price gouging. The violations occurred between 1973 and 1981 as a result, the DOE has collected through settlements many millions of dollars. To date, major refiner settlements alone have resulted in refunds of over $280.8 million to overcharged customers. Additionally, approximately $500 million, including interest, has been deposited in special escrow or suspense accounts administered by DOE and established in 1980.

That money is not Federal money. It belongs to the overcharged customers. But despite efforts and prodding by our subcommittees, the DOE has thus far failed to utilize its regulations and procedures to distribute these funds to such consumers as municipalities, small businesses, school districts, farmers, and other citizens. Now the States want to raid these funds for "energy purposes"—whatever that means.

Yesterday, the other body adopted, as part of the continuing resolution, the following amendment authorizing such a raid:

At the end of Title I, insert the following new section:

"Sec. . (a) From the amounts held in escrow on the date of the enactment of this Act as a result of alleged petroleum pricing and allocation violations, the Secretary of Energy is directed to exercise his remedial authority under the Emergency Petroleum Allocation Act of 1983 to disburse immediately $200,000,000 to the Governors or Chief Executive Officers of the States.

"(b) The Secretary of Energy shall make disbursements under this section based on the ratio, calculated by the Secretary, which—

"(1) the consumption within each State of price-controlled refined petroleum products (other than refinery feedstocks) during the period from September 1, 1973 until January 28, 1981 bears to

"(2) the consumption within all States of such products during that period.

"(c) The disbursements made under this section shall be available for energy programs of the States, including, but not limited to, low income energy assistance and related weatherization activities.

"(d) As used in this section, the term 'States' means the several States, the District of Columbia, Puerto Rico, and the territories and possessions of the United States.

"(e) In addition, the Secretary of Energy shall distribute to the Governors or Chief Executive Officers of the States as promptly as is practicably feasible, all other amounts, collected or hereafter collected as a result of alleged petroleum pricing and allocation violations, which are attributable to direct or indirect injuries, to ultimate consumers or to otherwise unidentifiable parties, and which are not necessary to satisfy the claims of identifiable injured claimants who can demonstrate specific injury."

What is wrong with this amendment? Everything.

First, the funds to be distributed to the States are not Federal funds. They are held in trust for the benefit of overcharged customers. To the extent the funds are depleted through this amendment, the customers are shortchanged once again.

Second, the formula for distribution of the funds would result in an estimated average distribution of 1.96 percent of the funds, with California getting over $19 million. Many States, like Idaho, Montana, Wyoming, Vermont, North Dakota, Rhode Island, Delaware, New Hampshire, and Nevada, get less than $1 million. In short, it is gasoline-use tilted and benefits the heavy driving States. It excludes heating oil use from the formula, which will impact those States concerned with providing aid for low-income fuel assistance during a cold winter.

Third, the money will be distributed "to the Governors or Chief Executives of the States." There are no guidelines for this distribution. This would be done outside of established State grant programs. It is like a block grant for energy—no strings, no controls. Indeed, the State legislatures would be circumvented. The Governors would have a pot of money. They could dissipate much of it for administrative costs.

Fourth, the money is for "energy programs of the States, including, but not limited to, low-income energy assistance and related weatherization activities."

What does this mean? Well, it means that the Governor could use the money for energy supply, including non-oil-related energy supply activities, such as natural gas development and nuclear programs, payment of the State energy office costs, including salaries, State university energy R&D, and many other activities, which are totally unrelated to the source of the funds; namely, oil pricing overcharges of consumers. There is clearly no assurance that any funds would be used for low-income fuel assistance, weatherization, or conservation which I consider far more worthwhile purposes and more akin to the source of the funds.

Fifth, this is not a one-shot approach. The amendment, which I understand OMB opposes, but which DOE had a hand in drafting, would encourage DOE to make further oil pricing settlements for distribution to the Governors with no congressional review or supervision.

Mr. Speaker, these funds, according to the CBC, are nonbudget funds. They would not be a Government outlay. I can only assume that the purpose of the amendment is to funnel money, with no controls, to the States in a manner that would not show up in the budget. I cannot support such a gift to the States, and I have so indicated in a letter to Chairman Whitten as follows:

As you know, I supported efforts by your Committee in passing this resolution with funds appropriated from general revenues for weatherization, State EPCA and ECPA conservation grants, and low income energy assistance. Such funding through appropriations from the general fund is essential and should be a part of the budget. Supporting those needed programs through raids on DOE non-government escrow accounts is an attempt to circumvent the budget and should be avoided.

I propose that the House can resolve this matter simply by providing this funding through general revenues and only for specifically authorized programs. The result will be the same and will not require any legislation in an appropriation act. This is, in fact, the approach taken in the House-passed resolution, as I have noted above. The House position should be maintained.

Even though I am opposed to efforts like this to circumvent my legislative committee, I can conceive of the possibility of using some of the escrow funds for a one-shot distribution to the States, consistent with authorized DOE programs, for uses that would help people this winter, but not for a broad range of energy programs. Such a program would have to overcome all of the concerns I mentioned above and be acceptable to Chairman Yates. I will work with Chairman Yates to this end.

AL COOPER—A JOB WELL DONE

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. STARK. Mr. Speaker, the end of the year will bring a loss to the city of San Leandro, Calif., when E. B. "Al" Cooper, the executive vice president of the community's chamber of commerce retires.

Al has earned his retirement—but he will be sorely missed by the business community and all the citizens of the city he has done so much to help.

Al Cooper has spent over 21 years in the retail business and has been active in chamber of commerce work for more than a quarter of a century. Since 1974, Al has been a driving force in the San Leandro Chamber of Commerce, helping the community in its efforts to develop a sound business and job base, create new jobs along the city's East Bay waterfront, and in general, make San Leandro one of the great, liveable communities of America.

Prior to coming to San Leandro, Al worked for 3 years for the California Chamber of Commerce as field secretary, and 14 years as executive vice president for the Merced Chamber of Commerce. In addition, Al has been a leader in the State and region in insuring the vitality and coordination of various chamber groups. He served as a State delegate and director of the American Chamber of Commerce Executives; he was president of the Valley Association of Chamber of Commerce Executives, and of the Central and Northern California Association of Chamber of Commerce Executives, as well as president of the California Association of Chamber Executives. Recently, Al received the prestigious Russell E. Pettit Award of the California Chamber of Commerce Executives' Association.

Al's contributions to San Leandro are innumerable. He has been a leading force in making the city a home and a community for all who live and work there.

We all wish him the best of retirements and congratulations on a job well-done.●

IN SUPPORT OF AN AMENDMENT INCREASING PENALTIES FOR NONVERIFICATION OF DOCUMENTS

HON. BALTASAR CORRADA

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

● Mr. CORRADA. Mr. Speaker, H.R. 7357 as reported by the Judiciary Committee establishes civil and criminal penalties for any employer or entity who knowingly hires, recruits, or refers for employment an alien not authorized to work in the United States. It also requires employers of four or more employees to have all prospective employees show them as a condition of hiring: first, a U.S. passport; or second, a social security card, U.S. birth certificate, or some other proof of U.S. nationality at birth; and a federally issued alien ID, a State-issued driver's license, a similar State-issued ID, or any other ID that the Attorney General deems reliable.

However, failure to comply with the ID verification requirements would subject an employer to a citation for a first offense and a maximum penalty of only $500 for each violation thereafter. These penalties for nonverification of an employee's work eligibility documentation are not only weak but also inconsistent with the penalties established for hiring undocumented aliens which are:

First, first offense—citation and warning of possible penalties;

Second, second offense—$1,000 civil fine for each unauthorized alien; and

Third, third offense—$2,000 civil fine for each unauthorized alien; and

Fourth, fourth and subsequent offenses—$3,000 fine and/or imprisonment for not more than 1 year for each unauthorized alien. The Attorney General may bring civil action—including seeking an injunction—against pattern and practice violators.

My amendment, which was accepted by the Education and Labor Committee, would increase penalties for employers who fail to verify that prospective imployees are eligible to be employed to: first, citation for a first offense; second, $500 fine for a second offense; third, $1,000 fine for a third offense; fourth, $1,500 fine for subsequent offenses; and fifth, authority for the Justice Department to take court action to deal with pattern and practice violations.

I would like to point out that my amendment is consistent with the enforcement aspects of this section as reported by the Judiciary Committee. In counting the violations, the first offense, as well as subsequent offenses, could still include various violations of verification practices as long as they arise under a single proceeding or adjudication. In addition, the employer could only be penalized for violations committed after the enactment of this act.●

CONGRESSMAN RICHARD WHITE RETIRES

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Friday, December 17, 1982

● Mr. WON PAT. Mr. Speaker, it is with pride that I rise to join in this salute to a man who is widely recognized as a great Member of this body, Congressman RICHARD C. WHITE of Texas. While he would never personally ask for this praise, I doubt that there is one among us today who is more deserving of this honor than is Congressman DICK WHITE.

For many years, Congressman DICK WHITE has been my friend and adviser. More recently, he has been my colleague on the House Armed Services Committee. But equally important is the friendship Congressman WHITE has held for the people of Guam since 1944. in that year he came ashore on Guam since 1944. In that year he came ashore on Guam to help liberate the island from the hands of the Japanese Army. DICK WHITE fought long and hard in that battle and came away with more than memories of a bitter conflict. He remembered the loyalty of the Guamanian people to the United States and what he saw and experienced never left him or failed to impress on him the importance of Guam to this Nation.

Congressman WHITE renewed his interest in Guam in the 89th Congress when he introduced legislation to establish a National War in the Pacific Park on Guam. He did this again and again until it finally became public law in the 94th Congress. I remember well his desire to see that those who fought and died in the Pacific war for freedom should be remembered with this park and his dreams are now coming true thanks to his dedication, drive, and friendship.

Congressman Dick White stood by my side again when this body passed legislation to establish my own job—that of the Delegate from Guam. And in the 10 years since I first came to the House, I have always found Congressman WHITE to be ready and willing to do his best for my people. His has been a true friendship, devoid of any desire for favors. He has done what he could for Guam because he wanted to and I doubt any of us could ask more of a friend.

I think that it is important that the record also show that we are led in this salute to our dear friend by yet another Texan and veteran of that battle for Guam: Congressman JACK BROOKS. Both of these former marines typify the outstanding qualities which led the corps to victory after victory in the Pacific Theater and today they stand at the top of their profession in terms of success and in the respect they have earned from their colleagues for a job well done.

In the past few years I have been honored to serve with Congressman WHITE on the House Armed Services Committee. He has proven to be one of our most articulate spokesmen for a strong national defense and largely because of his efforts we today have a military defense force second to none.

Recently, DICK WHITE made the decision to retire from this hectic life. I can understand his reasons for wanting to spend more time with his family. But I will certainly regret his departure from this body. DICK WHITE has been far more than just a colleague. He has been a friend and supporter and this is a commodity which is always in short supply anywhere.

I wish DICK the happiest of times in the future. May he find fulfillment in his life whatever he may choose to do. I know that his countless friends here

on the Hill will certainly share my deep sense of loss when he has gone. I can only say that I hope he will keep in touch with all of us and I look forward to seeing him again in the future. Best wishes, DICK, and from the people of Guam and myself, good luck. Thank you.●

DON CLAUSEN

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. PHILLIP BURTON. Mr. Speaker, I am pleased to have the opportunity to pay tribute to DON CLAUSEN.

Throughout his 19 years of service, DON has been a hard working and dedicated legislator—his record in support of the U.S. insular areas has been outstanding. I have had the pleasure of serving with him on the Interior Committee where he has been a valuable ally on many key environmental issues. His hard work has benefited his constituents, our State of California, and the Nation.

DON has been a good friend and a valued colleague. I extend to him my sincere best wishes for the future.●

SMITHSONIAN HONORS REV. WILLIAM HERBERT BREWSTER

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. FORD of Tennessee. Mr. Speaker, it is a pleasure for me to bring to the attention of my colleagues the outstanding accomplishments and achievements of my distinguished lifelong friend from Memphis, Tenn., Rev. William Herbert Brewster, as he is honored this weekend by the Smithsonian Institution as a part of its black American culture program.

Reverend Brewster is the much beloved pastor of the East Trigg Baptist Church in Memphis. He has pastored this church for over 50 years, and is truly a pioneer of black American Gospel music.

Reverend Brewster is one of the most prolific and influential composers of Gospel music of our time. He has written over 200 compositions and one song entitled: "Move on Up a Little Higher" was the first black American Gospel song to sell more than 1 million copies. I am indeed proud to be his friend and be associated with such a dedicated and talented man.

God has created only a few silver-tongued giants in our universe, and Reverend Brewster is certainly one of them. The following articles which appeared in this week's Washington Post, paid special tribute to Rev. William Herbert Brewster and his outstanding work with Gospel music. I am happy to share the following kind remarks with you today, and I ask my colleagues to join with me in honoring this great man from Tennessee's Ninth Congressional District which I represent.

SACRED MUSIC: SINGING THE GOSPEL

(By Richard Harrington)

The Rev. William Herbert Brewster is much beloved in the gospel world for his 200 compositions, which include such staples as "Move on Up a Little Higher," "Surely," "How Far Am I From Canaan," "How I Got Over" and "Lord I Tried." Brewster, 81 and pastor at East Trigg Baptist Church in Memphis for more than 50 years, is a true pioneer of black American Scared music; he will be honored with a three-day retrospective and colloquium at the Smithsonian starting tonight. Sunday afternoon's program will focus on one of his unique achievements, gospel drama, an updating and popularization of the classic passion play.

"The gospel drama is like a gospel sermon," Brewster says in his rich bass-baritone cadence. "It is an effort to spread the good news and glad tidings of salvation through Jesus Christ through people who act out certain stories written directly from the Bible. It's a theological movement in the same vein as preaching and the singing of the Gospel. I found in my early ministry that so much of knowledge comes through the eyes of people: You can show them what you can't tell them."

Brewster's dramas melded black culture and oral expressions over very modern original music: Historian Tony Heilbut noted that "his lyrics have always been the most ambitious in gospel, blending a conscious literary sensibility with the most vivid, immediate folk imagery." "In the preaching of the Gospel, faith comes by hearing," Brewster explains. "Hearing is the direct aid to the message of the Gospel. The dramatization of the Gospel is the same method that Christ used in relating a parable or telling a story of something that had passed. Our effort is to put the Gospel squarely before the people.

"It was particularly appealing to youngsters and to the older people—many of them in my early ministry could not read and write and they did not have ministers who were prepared to give the basics of the Gospel as the ministers are today. And so it caught fire and people wanted it and I continued to do it and it drew tremendous crowds and there were people converted to Christianity, sometimes during the performance.

"We also had phrases in it that appealed to the moral thinking of people. A lot of young people had gone astray, but as they looked upon the performance, they saw what they would not take time to read. You know, the Bible isn't exactly a funny storybook and a lot of people don't take the time to read or research. Through this method, we've been able to stir up a lot of interest in the Bible as the word of God, we have been able to give to the people what the Bible said directly. This is the purpose of a gospel drama."

Brewster, who taught Aretha Franklin's father, the Rev. C. L. Franklin, and whose Memphis services were regularly attended by a young Elvis Presley, was also something of a political activist, his motto being, "out of the Amen corner onto the Street corner." He proudly points out that his gospel dramas started in the early '40s, "before this integration period," as he calls it. "Way back in the old days, there were many, many laws and facets of government that were cruel and inhuman to black people. There were no freedom fighters and freedom rioters as were later developed, so we took the Bible stories and dramatized them from a truthful standpoint, took the history of the nations and the races, and out of that proved to the people that racial inferiority was a balloon that could be punctured by truth itself, and that all men *are* created equal.

"We sought to prove also that black people had made their contributions and that the old empires were hermetic in their origin, the building of great cities and establishment of great governments and the great religions were started by people of color. This was the process of our crusades in those days, when we didn't have the ear of the media. We demonstrated how important it is to know the background of people, not what they are always today, but what they have been, so that they can recapture those great powers of civilization with the aid of present-day improvement that they didn't have back in those days. That was the real purpose of my beginning the gospel dramas; the word Gospel, of course, means God's story and we wanted to get that story over, and to get it over, we had to go to the platform with it."

Brewster's first gospel drama, "From Auction Block to Glory," was performed in 1941 at the National Baptist Convention and has been described as a watershed in black American religious culture. Since then, the dramas have been performed in churches and auditoriums, at conventions; they also have inspired dramatic clubs in hundreds of churches.

"Sowing In Tears, Reaping In Joy," which will be performed Sunday afternoon at Baird Auditorium, is a double feature written for matinee and evening programs; each portion is a complete story, described sermon-style by Brewster: "They that sow to the wind, reap the whirlwind'—of course that is the nations, ancient and modern, that forget God, that defy righteousness in their national standards. They disappeared for the most part and reaped as they had sown—seeds of sorrow, deprivation, depression and oppression. Many of those thrones were toppled, their scepters were broken, their crowns were crushed and, now they are part of incinerated dust. That's the purpose of the first section—it's insane to reap that kind of a harvest!

" 'Reaping in Joy' is built upon the suffering and deprivation of black people and other people in the world, nations and individuals. They had days of sorrow, troubles and trials heaped upon them, many of them for no other reason than that they were black. But if anything is to be obtained worthwhile, it is our philosophy that your're going to have to suffer for it. You can't expect it on a silver platter, you can't expect to have a claim without being willing to pay the price, whatever it takes. Keep it in the lines of righteousness and we believe that in the end it will bring forth an abudant harvest in which all people can rejoice, especially people of good will."

The weekend is part of the Smithsonian's Program in Black American Culture.

"Move on up a Little Higher," performed by Mahalia Jackson and written by the Rev. William Herbert Brewster, was the first

black American gospel song to sell more than a million copies. Brewster, pastor of East Trigg Baptist Church in Memphis for more than half a century, is one of the most prolific and influential composers of gospel music, with songs such as "How I Got Over," "How Far Am I From Canaan" and "Surely God Is Able." He will be honored this weekend with a retrospective and colloquium at the Smithsonian (concerts on Friday and Saturday at 8 p.m. with Sweet Honey in the Rock and gospel drama "Sowing in Tears, Reaping in Joy" on Sunday at 3 p.m., all at Baird Auditorium).

MOVE ON UP A LITTLE HIGHER

One of these mornings (soon one morning)
I'm gonna lay down my cross and get my crown
One of these evenings (late one evening)
I'm going home to live on high (to live on high)
Just as soon as I get over Jordan, lay down my heavy burden
Put on my robe in glory, sing and tell the story

How I've come over hill and mountain
Up to the crystal fountain
There with all God's sons and daughters
I'm going to drink their healing waters
I'm going to live on forever
I'm going to live up in glory
After a while (yes after a while)

I'm going out sightseeing in Beulah
Walk around the altar, march and never tire
Sing and never falter
I'm gonna move on up a little higher

I'm gonna move on up a little higher
Meet Abraham and Isaac
Move on up a little higher
Meet the prophet Daniel
Move on up a little higher
Meet brother Paul and Silas
Move on up a little higher
Meet my friends and kindred
Move on up a little higher
Meet that lily of the valley
Meet that sweet rose of Sharon
'Twill always be (howdy howdy) [Repeat three times]
And never goodbye (and never goodbye)
Will you be there (Yes I will be there)
Will you be there when the angel calls the roll
(Yes, calls the roll)
Will you be there waiting (I'll be waiting)
I'll be waiting round the altar
I'll be waiting at the beautiful golden gate
(That beautiful golden gate)
I'll be waiting right there with you.●

LEO ZEFERETTI

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. PHILLIP BURTON. Mr. Speaker, I rise today with a great sense of regret to bid farewell to my good friend from New York, LEO ZEFERETTI. Surely, this was one of the most unfortunate casualties of the 1982 elections. Regrettably, the Democratic members of the New York delegation did not fare as well in the reapportionment process as did ours in California.

It was my great privilege to serve with LEO on the Education and Labor Committee where he stood firmly in support of this country's working people and its disadvantaged citizens. On Merchant Marine and Fisheries his ceaseless efforts to uphold the strength and vitality of our maritime industry are well known.

His many other contributions to this body and to his constituents cannot be fully measured. I am sure he will continue his able service to this Nation as he had before he joined us 8 years ago. Nonetheless, I will miss his experience and wisdom in the next session.●

CONGRESSWOMAN MILLICENT FENWICK

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mrs. SNOWE. Mr. Speaker, Shakespeare wrote that we deliver in life "as many farewells as be stars in heaven." It would be fortunate indeed for all of us if the repetition of the act made saying goodbye easier; alas, this is not the case. For when it comes to saying farewell to those of special importance to us, no amount of previous experience can soothe the sorrow we feel.

I rise today, Mr. Speaker, to say farewell to such a person. During my two terms in Congress, MILLICENT FENWICK has been more than a colleague. She has been an adviser and a friend, a role model and an inspiration. She has been a bright star and a rare gem in this body, and we will miss her terribly, as will the people of her State of New Jersey.

Since her election to Congress in 1974, MILLICENT has proven herself an able legislator and a champion of truth, decency, and humanitarianism in government. Her agenda has been one of promoting social justice, of practicing fiscal austerity, of untying the regulatory knot and of speaking for the cause of freedom throughout the world. To so many of us, she has been the ideal Representative—uninterested in personal gain, devoted to the needs of her constituents and possessing of a vision which enables her to see far beyond the readily apparent to the heart of a matter.

MILLICENT FENWICK's world is ruled by a quality found sadly lacking in so much of the dizzying procession of life in modern times. Simply put, she is a person of conscience. Her ideals have served to humble so many of us, to force us to stop and consider the true mission of this Nation and its people. As a fellow Member of that rare breed known as Congresswoman, I am eternally grateful for her counsel and her example. I am convinced that my proximity to her over the past 4 years has made a better person of me, and I only hope that I, too, may someday inspire similar respect in others.

Of course, MILLICENT's departure from our ranks did not come unexpectedly. Earlier this year, she embarked upon a campaign for membership in the other body, feeling that a U.S. Senator speaks with a louder voice, a more appropriate forum for her special message and for her unfinished work in Washington. For reasons that remain a mystery to me, the voters of her State denied her this special opportunity. But I think that the tone and the focus of her campaign speaks volumes of the type of person she is. She refused contributions from political action committees because of a firm conviction that the people, not the PAC's, are the ultimate masters of any public servant. She met the issues of the campaign squarely and brought dignity and purpose to the electoral process of her State.

At a time when the word politician often invokes negative connotations in the minds of many of our citizens, MILLICENT showed in her work here and in her campaigns that the profession can and should be an honorable one—indeed, that it must be an honorable one if our institutions in Washington are to retain their credibility. That she was unsuccessful in her quest this year bears no reflection on this achievement. Many factors and circumstances determine the outcome of an election, but MILLICENT FENWICK stayed true to her course and provided yet another reason to stand in awe of her as a person and a leader.

I'll miss MILLICENT's wise counsel and warm friendship. But time nor distance can take away the qualities she has left with me and this body, and the impact she has made on the American political scene.●

TRIBUTE TO MILLICENT FENWICK

HON. JOHNATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. BINGHAM. Mr. Speaker, I consider it a rare privilege to have had the opportunity to get to know the gentlelady from New Jersey, Mrs. FENWICK, these last 8 years.

There are so many things that I admire about MILLICENT that it is impossible to list them all. Most immediately striking, perhaps, is her graciousness to every one she meets. She always showed respect for the witnesses that came before our Foreign Affairs Committee, a quality all too rare on the Hill. As one who speaks French, some Spanish, and a little Italian, I found it a pleasure to hear MILLICENT greet visiting dignitaries from those three countries in their native tongues, with virtually no accent. I envy MILLICENT her memory

for poetry; the ability to recite poetry at length is a very special talent.

Coming down to more mundane matters, it was a pleasure to have MILLICENT serve as a member of the Subcommittee on International Economic Policy and Trade, which I have had the honor to chair. She was extraordinarily conscientious in her attendance at subcommittee meetings, even during her recent campaign for the U.S. Senate, and she returned to the subcommittee after her defeat at the polls, showing no scars, evidencing no bitterness, displaying a kind of old-fashioned gallantry that is most admirable.

MILLICENT and I differed quite often on domestic issues, but rarely on foreign policy matters. We worked together on a number of issues, including the question of whether the United States should continue to export items of potential military use to a country such as Iraq, whose support for terrorism has not diminished.

Probably MILLICENT FENWICK'S outstanding legislative accomplishment was the creation of the so-called Helsinki Commission, to oversee the extent to which the various countries party to the Helsinki Final Act were living up to their commitments, a Commission that has done extraordinarily useful work, with Mrs. FENWICK as an invaluable member.

And just this past week it was the Fenwick amendment to the domestic content bill which mitigated the bad long-term effects of that bill by making clear that the United States should remain bound by its treaty obligations, an amendment which passed by one vote.

Of all MILLICENT FENWICK'S qualities, the one I admire most is the degree to which she cares about the issues, especially issues affecting people, issues such as injustice and hunger. One has only to listen to her talk, even for a few minutes, to know how deeply she cares.

My wife June and I wish for MILLICENT all the best in whatever she undertakes. Whatever that may be, we know she is not about to disappear from the national scene.●

CONGRESSMAN RICHARD C. WHITE

HON. EARL HUTTO

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 17, 1982

● Mr. HUTTO. Mr. Speaker, it is a privilege to join with my colleagues to commend Congressman DICK WHITE for his outstanding service to his Texas constituency and to the people of our great Nation. The conclusion of the 97th Congress will bring to an end the illustrious and exemplary congressional career of DICK WHITE.

I am thankful for the opportunity I have had to serve with DICK on the Armed Services Committee, and am very grateful for the assistance and wise counsel he has given in my 4 years in Congress.

DICK WHITE'S 18 years of service in the House of Representatives have been highlighted by the tremendous contributions he made to the military capability and defense of our country. His service as chairman of the Military Personnel and Compensation Subcommittee resulted in improved people-related programs and enhanced morale and effectiveness in our defense forces. As a result of his dedicated efforts, the military service provides a better quality of life, and a great deal of thanks is due DICK WHITE.

As chairman of the Subcommittee on Investigations, he has had a significant hand in improving our defense capability. He headed a delegation visit last spring to the Middle East where we inspected possible sites for use by our Rapid Deployment Force. In addition, we visited our troops serving with the Multinational Observer Force in the Sinai. Due to DICK'S direct involvement, mail service, billeting, and mess facilities were improved expeditiously.

I consider it a high privilege to have had the opportunity to serve with DICK WHITE. It is with a great deal of respect and appreciation for DICK, and in praise and thanksgiving for this outstanding American, that I pay tribute and ask God's blessing on him and his family.

SALUTE TO MARGARET HECKLER

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

● Mr. ROE. Mr. Speaker, I would like to take this opportunity to commend and congratulate Representative MARGARET HECKLER for her 16 years of outstanding service to the people of the 10th District of Massachusetts and the Nation.

PEG has rightfully earned the reputation of being a dedicated, hard-working Member of this body who has been vividly outspoken on major issues of deep concern to all Americans.

She has clearly been the recognized leader in Congress in the tough fight to secure passage of the equal rights amendment. PEG has championed that ERA cause from the time it first passed the House in 1972 and I am confident she will be at the forefront in any future effort to win approval for this most worthwhile measure.

PEG has also become a hero to thousands of our Nation's Vietnam veterans. As a member of the Veterans' Affairs Committee, she pressed for 7 years and finally won approval of legislation that provides psychiatric counseling for Vietnam veterans.

While PEG HECKLER will not be serving in this Congress next year, I am sure her voice will continue to be heard loud and clear on the key issues of the day from other podiums. In that effort, I wish her the best of luck and success.●

CONFERENCE REPORT ENDANGERS SHIPBUILDING INDUSTRY

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. LONG of Maryland. Mr. Speaker, the American private shipbuilding industry, a major component of our Nation's industrial base, is jeopardized by the conference report on the fiscal year 1983 maritime authorization bill.

This conference report contains a Senate amendment, strongly supported by the Reagan administration, permitting U.S.-ship operators to build vessels in foreign shipyards while continuing to be eligible to recieve operating differential subsidies. Ship operators, free of the law to build vessels in American yards as a requirement for an operating subsidy, will rush to foreign yards such as Korea and Japan, where low construction costs are made available by host nation subsidies.

America's shipbuilding industry is facing its most severe economic slump since the Great Depression. Merchant ship construction has declined over 80 percent since 1972. Over the last 10 years, employment in U.S. shipyards has already declined by 50,000. Dozens of associated industries, such as steel, will suffer as a result of the adoption of this conference report, which will exacerbate an already unacceptably high unemployment rate. In my own district, the Bethlehem Steel Sparrows Point Shipyard is surviving only due to my efforts to gain congressional approval of a $380 million contract for conversion of three cargo ships for our Rapid Deployment Force.

I call upon my colleagues to reject this conference report if the House leadership schedules it for consideration during the final days of the 97th Congress and return to a strong private shipbuilding industry creating jobs here at home rather than exporting them abroad.●

CLAIR BURGENER

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. PHILLIP BURTON. Mr. Speaker, I join my colleagues in paying tribute to an old friend and fellow Member from California, CLAIR BURGENER, who will be leaving us at the end of the 97th Congress.

In addition to working together as Members of the California delegation, I have had the pleasure of serving with CLAIR on the House delegation to the North Atlantic Assembly.

CLAIR has served the 43d Congressional District with distinction for the past 10 years. He has been a dedicated and effective legislator and he will be missed by those of us who have had the privilege of working with him. I wish CLAIR a happy and healthy retirement.●

LABOR IN THE SOUTH, 1944

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. PEPPER. Mr. Speaker, Dr. Philip A. Grant, Jr. of Pace University, Paca Plaza, N.Y., has prepared a historical and scholarly paper he delivered in Atlanta, Ga., at the Conference on Southern Labor History at Georgia State University, which gives an interesting and factual account of the adoption of the "Right-to-Work" law in Florida during 1944 and the political trends prevailing at that time.

To all who read this paper I commend its well-written and scholarly contents concerning the history of labor in the South of 1944 and ask that it be incorporated in the appendix of this CONGRESSIONAL RECORD immediately following my remarks.

"THE ADOPTION OF THE 1944 'RIGHT-TO-WORK' LAW IN FLORIDA"

During the thirty-eight years between 1944 and 1982 twenty of the fifty states have enacted so-called "Right-to-Work" measures, prohibiting union membership as a condition for employment. Seven of these states have sanctioned "Right-to-Work" by adopting amendments to their constitutions. The other six states attaching "Right-to-Work" to their constitutions are Arkansas (1944), Arizona (1946), Nebraska (1946), South Dakota (1946), Kansas (1958), and Mississippi (1980). "Right-to-Work" constitutional amendments were rejected by the voters of California (1958), Colorado (1958), Idaho (1958), Ohio (1958), Washington (1958), Olkahoma (1964), and Missouri (1978). The purpose of this paper will be to analyze the circumstances under which Florida in 1944 became the first state to embrace "Right-to-Work".

The Florida "Right-to-Work" Amendment was submitted to the state's voters in the form of a referendum in the general election of November 7, 1944. When all the precincts were tabulated and the official result certified, "Right-to-Work" had carried fifty-seven of the state's sixty-seven counties. The precise vote was as follows: Affirmative—147,860 (54.4 percent); Negative—122,770 (45.6 percent).

To a remarkable extent the fate of the "Right-to-Work" Referendum was determined by th longstanding animosity between Florida's urban and rural areas. The maximum amount of opposition to the referendum was confined to four of Florida's major urban counties containing the cities of Miami, Jacksonville, Tampa, and Pensacola.

Although these counties furnished only 38.5 percent of Florida's population, they provided nearly fifty percent of the negative votes. Fifty-five of the remaining sixty-three counties were primarily rural in complexion and all but six of these political units voted in favor of "Right-to-Work". Unlike the industrial states of the Northeast and Midwest, the decisive votes in Florida election found in the rural counties.

One of the paramount factors affecting Florida politics in 1944 was conservative Democratic oposition to the policies of President Franklin D. Roosevelt. During Roosevelt's second and third administrations most Democratic congressmen from Florida had frequently opposed the President on domestic issues. Indeed the intensity of conservative disenchantment with Roosevelt was quite evident at the 1944 Democratic National Convention in Chicago. Florida was one of the few states refusing to participate in a unanimous vote for Roosevelt's renomination to a fourth term. Four Florida delegates to the convention asserted their independence by casting their votes for Senator Harry F. Byrd of Virginia, probably the most rigidly conservative member of Congress and a veteran political figure who has been unwavering in his distaste for legislation favorable to organized labor. It was reasonable to assume that at least some Florida Democratic leaders were embittered by the well-publicized influence of the Congress of Industrial Organizations (CIO) in facilitating the adoption of a distinctly pro-labor plank in the party's official platform and in denying the vie- vice-presidential nomination to an avowed conservative, former Senator James F. Byrnes of South Carolina. Even more alarming to some Florida Democrats was the extent to which the CIO Political Action Committee (PAC) mobilized its resources behind the candidacies of Roosevelt and other liberal Democrats in the summer and fall of 1944.

An excellent example of the profound ideological split between liberal and conservative Democrats in Florida was reflected in the unusually spirited content for the 1944 Democratic gubernatorial nomination. The rival candidates in that year were Congressman Robert L. ("Lex") Green of Starke and former Congressman Millard F. Caldwell of Milton. Green, who had served in the House since 1925, had firmly endorsed Roosevelt's programs on Capitol Hill and had compiled an unblemished record of support for measures advocated by organized labor. Caldwell in the late nineteen thirties had become closely identified with the congressional coalition uniting Southern Democrats and Republicans and had cast negative votes on several bills and resolutions affecting the welfare of the labor movement. When Caldwell outpolled Green by more than forty-one thousand votes in the May 24 run-off primary, it became obvious that Florida Democrats had by a convincing margin chosen to nominate an individual whose views were uniformly hostile to organized labor.

There was also a close correlation between the result of the "Right-to-Work" vote and the outcome of the Democratic senatorial primary between the liberal incumbent, Claude Pepper, and the conservative challenger, J. Ollie Edwards. Pepper proved to be a formidable candidate in the four major urban counties which had rejected the "Right-to-Work" Referendum. In these counties Pepper outpolled Edwards 61,148–47,029, a margin which certainly helped him win the Democratic senatorial nomination. The "Right-to-Work" Referendum in these counties was defeated 60,277–48,103. The respective proportions were 56.1 percent for Pepper and 55.6 percent against "Right-to-Work", thereby indicating that sentiment in these four key populous counties was virtually identical on the senatorial contest and the referendum. An analysis of the statewide totals, however, suggested that Pepper, noted for his espousal of labor and social welfare causes, was experiencing a substantial decline in popularity.

In addition to the political strength mustered by the conservative wing of Florida's Democratic Party in 1944 was a Republican Party which had experienced impressive numerical growth. Between 1932 and 1944 the Republican presidential vote in Florida had increased from 69,170 to 143,212 (107.3 percent). The 1944 Republican ballots tabulated in Florida considerably exceeded the aggregate Republican total from the nearby southern states of South Carolina, Georgia, Alabama, and Mississippi. Although Florida had the smallest population of any southern state and accounted for only 5.9 percent of the region's inhabitants, it produced 12 percent of all 1944 Republican votes in the South. Twelve counties, where the Republican presidential proportion averaged 43.9 percent, voted collectively 45,083–30,578 (59.9 percent) for the referendum. Thus, the most solidly Republican of Florida's sixty-seven political units contributed nearly sixty percent of the majority by which the "Right-to-Work" proposal prevailed.

Augmenting the bloc of votes accumulated in Florida's twelve most Republican counties were the election results from twenty-two rural counties in the northern part of the state. These counties, extending in an arc from Santa Rosa in the panhandle to Nassau at the Georgia boundary along the Atlantic Ocean, voted 18,891–8,171 (69.8 percent) in favor of the "Right-to-Work" Referendum. All of the twenty-two counties were sparsely populated and in nearly every respect were much more characteristic of the Deep South than most other sections of Florida. The 27,062 ballots from these counties were approximately sixteen thousand less than the number recorded in populous Dade County. Nevertheless, they provided a 10,720 majority for "Right-to-Work". These votes derived from conservative northern Florida, when combined with the official figures from the state's twelve most Republican counties, added up to a decisive margin of 25,225 for the "Right-to-Work" Referendum.

In 1944 the bulk of American union members were concentrated in a cluster of industrial states, extending from Massachusetts in the northeast to Missouri in the southwest, containing over half the American people and nearly all the country's metropolitan areas within their boundaries.

Florida, unlike the states where unionization flourished, was sparsely populated and geographically isolated from the nation's textile factories, steel mills, automobile plants, and coal mines.

An analysis of the composition of the Florida labor force suggested that relatively few workers would be motivated to affiliate with the major AFL or CIO unions. The conspicuous absence of the steel industry, the garment industry, the automobile industry, and coal mining certainly distinguished Florida from most of the states in the Northeast and Midwest. According to the Census of 1940, only 82,750 (10.5 percent) of Florida's workers were engaged in manufacturing or mining. A substantially higher proportion (14.8 percent) of Florida's workers were involved in agricultural employment, thereby indicating an almost complete reversal of the prevailing situation in northeastern and midwestern states. Had Florida been more industrial and less agricultural in its 1944 economic orientation, the outcome of the "Right-to-Work" Referendum might have been different. Instead Florida was a state where organized labor really lacked a constituency.

In approving the 1944 "Right to Work" Referendum Florida was endorsing a labor-management principle which eventually prevailed throughout the entire South. Indeed eleven of the twenty states which opted in favor of "Right-to-Work" measures were located in the South. The twenty states in which "Right-to-Work" has been mandated either by statute or constitutional amendment at the present time have an aggregate population of approximately seventy-five million, of which more than sixty-one million are concentrated in the South. Thus, nearly five of six million Americans governed by "Right-to-Work" are residents of southern states. Interestingly, congressmen from Florida and other southern states were virtually unanimous in supporting the Labor Management Relations (Taft-Hartley) Act of 1947, which provided federal sanctions to "Right-to-Work", and were in the forefront of the opposition to the 1965 attempt to repeal the "Right-to-Work" section of that law.

Although the people of Florida in November 1944 had the opportunity of voting both in the presidential election contest and for or against the "Right-to-Work" Referendum, there was an appallingly low degree of voter participation in the general election of that year. Only 482,592 of Florida's 1,897,414 citizens (25.4 percent) voted for a presidential candidate in 1944. An appreciably smaller number of 270,630 cast votes on whether to approve or reject the "Right-to-Work" Referendum. The fact that only 56.2 percent of those actually voting decided to render a judgment on "Right-to-Work" probably warranted the conclusion that tens of thousands of Floridians were either indifferent or confused on the issue. Less than fifteen percent of the state's residents were recorded on "Right-to-Work" and less than eight percent voted in the affirmative. The referendum's ultimate margin of victory was 25,090, accounting for only 1.4 percent of Florida's population. While it was true that "Right-to-Work" was approved by a slight majority of those voting in 1944, it would be an exaggeration to argue that there was enormous popular support manifested in behalf of the referendum.

Unfortunately, the Bureau of Labor Statistics did not begin compiling figures on union membership in each state until 1959. During the subsequent twenty years Florida remained one of the least unionized states in the nation. By the time of the census of 1960 the total number of Florida workers affiliated with the AFL/CIO was 150,000. This constituted only 1.1 percent of the nationwide AFL-CIO membership in a year when Florida had approximately 2.8 percent of the population of the United States. Three other States Massachusetts, Indiana, and Missouri, in 1960 had populations roughly comparable to that of Florida. In these states AFL-CIO membership averaged slightly less than 470,000. Although AFL-CIO strength in Florida increased form 150,000 to 333,000 between 1960 and 1978, in the latter year only 13.2 percent of Florida's employees were affiliated with labor unions and Florida's union proportion ranked forty-eighth among the fifty states of the nation.

The adoption of the 1944 "Right-to-Work" Amendment in Florida constituted the first genuine expression of opinion on a labor-management issue by the voters of an individual state. In later years several additional states both throughout the South and in other parts of the nation would follow Florida's example and approve "Right-to-Work" measures. The Congress would also legislate on a variety of labor-management questions, passing such restrictive proposals as the Case Mediation Bill of 1946, the Taft-Hartley Act of 1947, and the Landrum-Griffin Act of 1959. Indeed during the two decades after 1944 organized labor was frequnently on the defensive both on Capitol Hill and in the state capitols. The decision of the Florida electorate to embrace "Right-to-Work" was perhaps the first inkling that the future approach to labor-management relations in the so-called "Sunbelt" states would be fundamentally different from the prevailing attitudes of the older industrial states to the north. The Florida "Right-to-Work" Amendment of 1944 was one of the many fascinating developments in the labor history of the twentieth century South.●

SHIRLEY CHISHOLM

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. PHILLIP BURTON. Mr. Speaker, I rise today to pay tribute to a good friend and colleague, SHIRLEY CHISHOLM. I feel considerable regret and sadness about her retirement from the House.

I feel this sadness not only because SHIRLEY and I agree on so many issues, but also because of the strength of her convictions and her willingness to act and speak in support of her convictions. Her presence in the Congress has benefited many. My colleagues and I have had the benefit of working with SHIRLEY, a dedicated and talented legislator, for 14 years. She has been a forceful advocate for the poor and other disadvantaged persons and she will be sorely missed.

Although SHIRLEY is leaving the House, she will continue to stand as an outstanding model and strong inspiration to women, especially minority women, who aspire to elected office.

I extend to her my best wishes for continued success in her future endeavors, which I know will include further public services to this Nation.●

TRIBUTE TO HON. SHIRLEY CHISHOLM

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. BINGHAM. Mr. Speaker, it has been a pleasure and a privilege to serve with my colleague from New York, SHIRLEY CHISHOLM, for the last 14 years.

I remember so well the dramatic episode when Mrs. CHISHOLM, as a freshman Member, demanded and obtained the kind of committee assignment she was entitled to. There, I thought to myself, is "a spunky lady." And I have never had occasion to change my view.

And then we had the excitement of watching SHIRLEY embark on a Presidential campaign, traveling all over the country to sound her clarion call for justice for our less-fortunate citizens. At first, she was not taken seriously, but before long everyone realized that here was a true national figure, and she succeeded in dramatizing the issues she was talking about.

Others have described Mrs. CHISHOLM's legislative achievements, and I will not try to repeat them. Suffice it to say, that SHIRLEY CHISHOLM has made an impact on this House which will long be remembered.

My wife June and I wish for SHIRLEY and her husband all the best for whatever she undertakes to do in the future. It will, we are sure, be significant.●

EDUCATION AND COMPUTERS—THE NEED FOR ACTION IN THE 98TH CONGRESS

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. STARK. Mr. Speaker, I would like to include in the RECORD at this point an article from the National Journal of December 18, 1982, concerning my legislation to encourage corporate donation of computers to schools.

It is a very well-written, thoughtful piece which gives both the pros and cons of my proposal. I hope that my colleagues and others will be able to read this article before the start of the 98th Congress, so that next year we may make necessary changes to insure the enactment of incentives to help accelerate the education of our Nation's

children in the high-technology fields of the future.

The article follows:

A SETBACK FOR A COMPUTER COMPANY—CONGRESS SAYS NO APPLE FOR THE STUDENT

(By Richard Corrigan)

Legislation to provide a special tax break to Apple Computer Inc. and other computer firms that donate computers to schools has become derailed.

Johnny's school won't get a free computer next year because some Scrooges in the Senate iced a bill that would help computer manufacturers give their machines to every elementary and secondary school in the nation.

That's one way to assess the non-passage of the Computer Equipment Contribution Act (HR 5573).

Another way to describe the stalled bill is to call it just another special-interest scheme that deserves to be spurned. From this perspective, the legislation would simply give its major sponsor, Apple Computer Inc., a marketing edge over its competitors, with Uncle Sam picking up most of the cost by allowing a special tax break for donated computers.

Whichever way it's portrayed, the bill zipped through the House in September and then moved through the Senate Finance Committee, but it short-circuited before it could reach the Senate floor during the abbreviated lame-duck session.

The fizzling of the legislative campaign represents an unusual setback for Apple Computer, a six-year-old corporate upstart that launched an industry by inaugurating mass production and sales of personal computers.

Apple has been stunningly successful at selling computers in the marketplace, with sales soaring to $583 million and profits to $61 million in the year ending on Sept. 24, but not at giving them away through Congress. The company's attention-grabbing offer—to donate a computer to every school in the country if granted a change in the tax code—eventually encountered sharp resistance on several fronts.

And by the time the legislation came out of the Finance Committee, it had been amended so drastically that Apple Computer said it was unacceptable in that form.

APPLE V. TREASURY

"We feel strongly that Congress would be crazy not to take us up on this," Apple's chairman, Steven P. Jobs, told a House subcommittee in June.

Jobs was testifying in a friendly arena, the Ways and Means Subcommittee on Select Revenue Measures chaired by Rep. Fortney H. (Pete) Stark, D-Calif. Stark, after meeting Jobs on a West Coast plane trip, had agreed to sponsor legislation to carry out the offer of the California-based company.

By the time of the hearing, Stark claimed 75 bipartisan co-sponsors for his bill. A companion bill had been introduced in the Senate by John C. Danforth, R-Mo., a member of the Finance Committee.

Jobs, in his prepared statement, addressed some of the early objections that had been raised about the legislation.

Even with the liberalized tax treatment the company was seeking, he said, Apple would incur substantial extra costs in meeting its pledge "to contribute tens of thousands of computers" to the nation's schools.

Under the bill as then written, he said, donations would cost the company at least $100 per computer, or $1 million for every 10,000 units, in after-tax expenses. The direct and indirect cost could amount to $10 million, equal to about a fifth of the company's projected earnings, Jobs said.

Jobs did not say how much it costs his company to produce a computer—for example, the popular Apple II, the model likely to be donated to schools. He testified, however, that the retail value of the deal would be about $250 million, or $2,500 for each of 100,000 computers and standard accessories.

His statement also indicated that the actual production costs of the 100,000 computers, for the computer industry as a whole, would be roughly $30 million, or $300 per computer. The federal government, he said, would pick up about 92 per cent of the industry's direct production costs.

"Some have argued that HR 5573 is really a marketing scheme paid for by the government," his statement said. "If this were true, and the bill were in fact a bonanza for computer companies, why hasn't our competition jumped on the bandwagon?" He said that his company would welcome participation in the program by other firms but that most had shied away because of the expense.

Jobs conceded that Apple might gain a marketing edge when school children were ready to buy their own computers. (The company says its Apple II is the world's top selling computer and that the education market accounts for a fifth of its sales.) But the important point, he said, is that the bill would be good for the nation.

"We are now in the midst of a revolution that is of the same magnitude and power as the industrial revolution of the 19th century," he said, and the computer is in the middle of it. America's children will have to gain "computer literacy" in this changing technological society, he said, saying the United States has dropped behind the Soviet Union, Germany and Japan in scientific education.

Passage of the legislation would especially help poorer school districts that have been hurt most by budget cuts, Jobs said. "Students in such districts face a clear competitive disadvantage" in tomorrow's job market against computer-trained children from affluent schools, he said.

The Treasury Department expressed strong opposition to the bill at Stark's hearing. John E. Chapoton, assistant secretary for tax policy, said the bill would shift most of the cost from the corporate donor to the federal government.

"There would virtually be no charity in charitable giving" in that situation, Chapoton said, "and we think that runs counter to a very sound policy of making the donor bear a significant portion of the cost any time there is a charitable gift."

Under current law, Chapoton said, a company that donates an item of equipment may deduct its actual cost of producing the item. Stark's bill would allow a company donating a computer to a school to deduct the cost or production plus half the difference between that cost and the item's fair market value, up to a maximum of double the production cost.

For example. Chapoton said, if it cost a firm $1,000 to make an item that could be sold to a distributor for $3,000, the company could deduct its $1,000 cost plus half the added $2,000, for a total deduction of $2,000. For a company subject to the standard corporate tax rate of 46 per cent, the deduction would produce a tax saving of $920, making the donation nearly cost-free.

Treasury also objected to language in the bill that would have tripled a company's maximum charitable donations to 30 per cent of taxable income during the one-year life of the program.

CONGRESSIONAL ACTION

But undeterred by Treasury's objections, the subcommittee approved the bill in July and the full Ways and Means Committee later endorsed it, 20-3.

The Congressional Budget Office estimated the cost of the bill, in lost tax receipts, at $15 million in fiscal 1983 and $21 million in fiscal 1984.

The committee's Sept. 17 report on the bill noted that "the principal intended beneficiary of the bill is Apple Computer Inc.," but it said other donors could also qualify for the added deductions.

The bill went to the House floor under suspension of the rules on Sept. 22 and passed by a lopsided vote, 323-62. Next, the Finance Committee ordered the bill reported by voice vote on Oct. 1, but after making extensive changes in the House language.

At the committee drafting session, Treasury's Chapoton said the Administration had changed its mind and now favored the bill. There was no explanation, but the Administration's blessing was not enough to protect the bill from amendment.

The committee limited the maximum deduction to one-and-a-half rather than two times the donor firm's production cost. It also gave the company a choice of claiming a one-time deduction in 1983, 1984 or 1985 rather than limiting the program to 1983 alone, as the House had done.

The Senate panel extended the program to give other computer firms a better opportunity to participate in any one of three years, rather than giving Apple a clear shot at the program in 1983. This changed the projected revenue loss to $62 million over four years, rather than the House estimate of $35 million over two years.

The committee also empowered the Treasury Department to issue regulations to assure that computers would be distributed to schools equitably, by region and by income level.

The Senate committee also removed a legal waiver that was in the House version, saying it did not intend to excuse a company from complying with the U.S. Court of Claims ruling (*Singer Co.* v. *U.S.*) that a charitable deduction could not be claimed for a promotional tactic. The Ways and Means report, in a footnote, said it intended computer gifts to be treated as charitable donations regardless of the *Singer* decision.

The Finance Committee also tacked onto its version of the bill an unrelated item concerning bank debts. That was enough to arouse the opposition of Sen. Howard M. Metzenbaum, who put a hold on the bill to prevent Senate floor action in the last days of the regular session.

After the lame-duck session opened on Nov. 29, Finance Committee chairman Robert Dole, described by several sources as never very keen about the computer bill, also put a hold on it.

Doles move, according to Senate sources, came after education groups had begun expressing concerns about the legislation.

EDUCATORS' QUALMS

Representatives of the nation's schools have generally been reluctant to oppose the computer bill because that would mean turning down free computers they otherwise might not get. "It wouldn't look very good for the education lobby to say, 'We're against this bill,'" a lobbyist said.

Nevertheless, some education specialists say the bill has flaws that should be fixed. Some also say they wish it had been considered as part of a policy package by the usual education panels of Congress, rather than as a special tax bill under the jurisdiction of the tax committees.

"I initially felt very positive about it until I started reading the fine print," said Thomas Rosica, executive director for federal programs for Philadelphia's school system.

Having a computer in a school is of little use unless the school also has trained people to operate it and programming accessories, or software, to tap the machine's capabilities, he said.

"If you're in a fairly impoverished school district, it's not much help to you," Rosica said. "Unless you've got the funding, this 'windfall' is not a windfall."

Bruce Hunter, legislative specialist at the American Association of School Administrators, said, "We don't want to look a gift horse in the mouth," but "one computer as an instructional tool is nothing."

Hunter said computers could best be used if a school first decides what kind of training it wants to offer, picks and software for the task and then selects the hardware to operate the programs. "The Apple bill starts the process backward," he said, "with the machine coming first."

But not all education groups express criticism of the bill.

"I think Apple is getting a bad rap," said Scott Thompson, executive director of the National Association of Secondary School Principals. Thompson said he didn't think the bill would give Apple Computer an advantage because most high schools already have at least one computer and so have already made their selection.

The offer of new computers would allow schools to augment their current systems or get their first computer, he said. "It's not that big a deal," he said. "It's not like we were bringing in laser discs or some really advanced technology."

APPLE'S REACTION

David Beaver, an assistant to Apply chairman Jobs, said the company has steadily cut its estimate of how many computers it might give away as the legislation has been revised.

Apple at first spoke of giving a computer "to every school in the country," Beaver said, a total of some 103,000 public and private elementary and secondary schools.

The figure was trimmed to 75,000 to 80,000 under the Stark bill, to 40,000 to 50,000 under the House-passed version and 22,000 under the Finance Committee bill, Beaver said.

And even that last estimate assumes that some changes would be made in the Senate committee bill. Beaver said the company could not accept the Senate language on the Singer case because that would leave the company open to challenge on its charitable donations. "We would be taking an extreme risk with our stockholders' money," he said.

Beaver conceded that educators had a valid point in asking about training and service for donated computers. Apple, in its sales literature, stresses the importance of buying from a reputable local dealer, and the company has tried to restrict sales by mail-order houses.

Yet in the case of free computers for schools, Beaver said "it's the best we can do . . . We don't feel that we are in a position to give training." He said the company came up with its donation plan after receiving thousands of requests from schools for free computers.

In light of all the obstacles to passage of the bill in the lameduck session, Beaver said Apple might try again in the 98th Congress and would work with education organizations to try to ease their concerns.

Washington attorney Eric R. Fox, representing Apple, said time had run out in the lame-duck session.

NEXT YEAR?

Bruce S. Post, a staff member of the Senate Labor and Human Resources Subcommittee on Education, Arts and Humanities, said a revised version of the bill might be agreed upon next year.

"If this is an enduring commitment, three months isn't going to make much difference" to Apple, he said.

But an aide to Danforth, the Senate sponsor, said that passage of a tax break might be even more difficult in 1983 because of mounting worries over budget deficits.

Aside from the arguments over the tax deduction, the computer bill seemed to get caught in a large debate about the federal government's rightful role in education.

The Administration, after first opposing it, swung around to back the bill at a time when it was trying to reduce federal education grants and dismantle the Education Department. It evidently saw the bill as a vehicle for promoting private-sector aid to the schools.

Some elements of the education lobby, on the other hand, evidently sought to delay the bill so that it could be included in a big education-aid package to be considered by the 98th Congress.

Michael Edwards, a legislative specialist with the National Education Association—which took no formal position on the computer bill—said, "Whether this bill is passed or not, the federal government is still going to have to recognize its responsibilities to help the public schools meet the challenges of a rapidly advancing technology."

The education community now has very little understanding of computers, said Dan Watt, technical editor of Popular Computing, a McGraw-Hill Inc. monthly magazine. Many children know far more about computers than their teachers do, he said.

But this legislation at least offers a way to put more computers into schools and get teachers acquainted with their capabilities, he said.

"That's why we support this bill," Watt said, "not because we love the idea of giving computer companies a tax break. We see it as one of the few avenues for getting the federal government to make any kind of commitment. The question is whether we are educating kids for the society they're growing into. Our society has turned its back on this issue, and it's going to come back to haunt us in the next generation."●

JAMES BLANCHARD

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. PHILLIP BURTON. Mr. Speaker, I rise to pay tribute today to a departing colleague, JAMES BLANCHARD. JIM will be sorely missed by those who have worked with him during his 8 years in Congress.

JIM has been a hard-working and dedicated legislator, earning the position of chairman of the Banking Subcommittee on Economic Stabilization. His outstanding work for his constituents and for the State of Michigan has led to his being elected to the State's highest office.

I wish JIM the best of luck as he takes on his new responsibility as Governor. I am confident that he will carry on his good work for the people of the State of Michigan.●

FUNDING OF FUTURE POWER DEMAND IMPORTANT

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. BROYHILL. Mr. Speaker, recently, Mr. Bill Lee, chairman of Duke Power Co., headquartered in Charlotte, N.C., made this shocking statement about his company's ability to meet power demands and needs in Duke's service area:

Unless adequate funding can be developed, there will not be enough electricity to meet the economic growth demands of Duke's service area during the 1990's.

I have examined the facts that have led to this sad state of affairs and have concluded that Bill Lee is absolutely correct. An even sadder and tragic part of this saga is that Duke is far better off financially than is most of the electric utility industry.

Simpy put, the whole problem is wrapped up in the inability of utilities to recover capital and operating costs.

The publisher of the Charlotte Observer, Mr. Rolfe Neill, has described the problem and the facts far better than I can.

I wish to call to the attention of my colleagues two fine articles recently published in the Charlotte (N.C.) Observer, authored by Mr. Neill.

[From the Charlotte Observer, Nov. 14 and 21, 1982]

DUKE TAKES A PUNCH

Can you solve this riddle:

Your company is rated the most efficient in its field. Your product—required in large quantities in every household, office and factory—is priced among the lowest in the nation. Your service is outstanding. Yet, customers and public officials are hostile. Why?

Maybe you don't have the answer but surely have guessed the name: Duke Power Co. The firm, even after repeated rate raises, is a bargain for its users and a state treasure which is in jeopardy.

Every Carolinian has two stakes in the issue over Duke's future.

1. Your personal power bill.

2. The economic expansion to provide the jobs on which future prosperity depends.

For years, Americans paid no attention to Social Security—didn't even understand how the system operates—while the dry rot ate the underpinnings. Politicians, a majori-

ty of whom lack guts, assured us nothing was wrong. Now, we are paying the unnecessary price as America divides itself, even father against son, as we edge toward generational war.

ANTI-UTILITY RACE

With a governor's race coming up, at least one candidate, known for demogoguery, is likely to run on an anti-utility platform.

No wisdom is required to know that people are angry over escalating electric bills. But some statesmanship is required to explain that the increases are justified and, when viewed in the context of other prices, are reasonable. Defending unpleasant truths is not an over-subscribed job.

Simply put, legislative and regulatory actions of the last five months have impaired Duke's ability to raise money to build the plants to supply the power we demand. There's plenty today but shortages are foreseen in the 1990s. Since new plant construction requires nine to 13 years, we are already in the 1990s as far as Duke's future is concerned.

Most folks don't realize that Duke executives have stopped talking glowingly about the Carolina's industrial years to come. Duke dismantled its dozen-man industry-hunting department in 1974. Chairman Bill Lee is no longer sought by civic boosters to brag about Duke's efficiency and low rates because when the critical question is asked—How about future power supply?—he says the unthinkable:

NOT ENOUGH

"Unless adequate funding can be developed, there will not be enough electricity to meet the economic growth demands of Duke's service area during the 1990s."

This month's big powwow in Charlotte for industry and office locators from around the nation ommitted Lee from the program because his was not a message sponsors wanted to broadcast to potential relocatees.

Earlier, we had in hand a prospect that caused developers to salivate. The plant would cost $250 million and provide 1,000 jobs. Think about those jobs in a state with 8.7% unemployment. Think about all the sales and propery taxes such a facility would generate, not to mention the millions upon millions in wages.

Sorry, fellows, Lee had to tell them, we can't guarantee adequate power. Our state lost out. That plant is going elsewhere. As Lee later said:

GOT ENOUGH?

"The one question most frequently asked of us by current industrial prospects is, 'What about the long-term adequacy and reliability of electric supply?' Note, they are asking about availability, not price."

The legislature made two utility changes in its short session in June. First, it reduced Duke's ability to recover increased fuel costs from three times yearly to twice. Secondly, it shifted from mandatory to optional the requirement that interest on money borrowed to finance utility work under construction be included in current customer bills, leaving the decision to state regulators.

During the June 14-21 week that happened, Duke Power's stock prices dropped 8.4% while the Dow utility average went down only 2.8%. Large holders of Duke stock—pension funds, bank trust departments and others—perceived a change in the regulatory atmosphere in our state. Many dumped their holdings because they thought Duke was entering more perilous financial waters. They were correct.

A SHOCKER

Subsequently, the N.C. Utilities Commission shocked Carolina Power & Light in Eastern North Carolina by permitting only 1% of a large rate hike it sought. Then Duke got less (but far more than CP&L) than Duke asked for and also cancelled two nuclear units. Stock prices dropped again.

What's going on? Investors have concluded our state is shifting from reasonable utility regulation to less reasonable. This has significant consequences, not only for Duke and other utilities, but for you, too.

In 1975, Duke Power's new downtown office building looked drably unfinished in its ashen concrete skin and I asked why they didn't paint the structure.

"Can't afford to," an executive replied. Surely, he was joking. Whoever heard of a billion-dollar corporation that couldn't afford a few hundred thousand dollars for cosmetics?

You are reading about one that can't: Duke, the company that brings you some of the cheapest electricity in America. We must come to understand what is going on inside that firm—and in governmental power centers in Raleigh—as utility rates become more of a public-policy issue.

Duke faced a financial emergency in 1974 when earnings were inadequate to attract buyers of the IOU's called bonds. Desperate for cash, Duke sold equipment and buildings and rented them back. The firm sold unsecured notes at the then unheard-of-rate of 13%.

Known nationwide for managerial efficiency and very low rates, Duke executives earned another No. 1 title in 1974 that they didn't seek: the utility paying the highest rate for borrowed money.

MONEY, MONEY, MONEY

Money is what an electric company is all about. The appetite for cash is nearly as great as for coal, the chief fuel to make electricity. Cash demands are caused by the high cost of plant building. New generating plants are required because an expanding population, even after conservation efforts, needs more electricity.

The cash crunch continues, aggravated by two legislative changes made this year, followed by a less friendly N.C. Public Utilities Commission ruling.

"Friendly" is a relative term. The commission's job is to protect the electric user from predatory pricing by the monopoly, Duke, and from poor management. Equally, the commission must allow Duke a rate of return sufficient to attract new capital on reasonable terms.

The commission seemingly is doing fine by the public but less well by Duke. As figures prove, however, the public ultimately loses when the financial balance tilts against the utility for very long.

There are alternatives, of course. You could be limited in how much hot water you can heat, or at what hours or for how long you can turn on the oven, TV or air conditioning. Or Duke rates could be subsidized from your state taxes. Or new industry could be told to stay away.

Many are surprised to learn that Duke is telling industrial prospects the company cannot guarantee future electric supply.

DUKE'S RESPONSIBILITIES

This is a stunner from a New South blue-ribbon state seeking more jobs for its young people. We cannot afford not to build needed power plants.

Has Duke met its responsibilities to the public? Consider the record:

Consistently voted the most efficient U.S. utility.

Has rates among the nation's lowest.

Judged to have the "most aggressive" load management effort (conservation) in America. Duke seeks to eliminate six future plants costing more than $10 billion through this program.

Despite these consistent achievements, Duke's stock does poorly. Why? The marketplace is unsentimental in assessing value and investors don't feel Duke earns enough money. The utilities commission sets the maximum rate allowed Duke on its investment. Since 1970, Duke has never earned the allowed rate.

YOU ULTIMATELY PAY

Why? Because insufficient rate hikes are granted. This deters investors and drives up the interest rate Duke pays on borrowed money. You, the electric user, pay those interest costs.

When the Great Market rally ignited Aug. 17. Duke Power Co. common stock was selling for $22.25 a share. Since that date, all stocks gained an average of 23.5%. Duke's advance was zero, closing last Friday at $21.37. By comparison, Knight Ridder, owner of this newspaper, saw its stock go from $29.50 to $46 in the same period, a 52% advance.

Since founding the company in 1904, investors have put $2.4 billion into Duke. Its "book value"—total shares outstanding divided into $2.4 billion—is $24.93 a share. Duke needs $800 million a year for each of the next three years to finance continuing construction. Traditionally, it would seek about $400 million of that annually through issuance of additional common stock, preferred stock and bonds.

Duke must sell common stock for greater than $24.93 a share or it will dilute the value of the holdings of existing shareholders. Yet, the marketplace is only willing to pay $21.37 a share as of last Friday for Duke stock.

THERE'S A LIMIT

Why not issue more bonds? Bond rating agencies, whose word is law with investors keep strict watch on company credit worthiness. "Earnings per share" is one of the key elements in credit risk measure. As Duke earnings falter, relatively, and more shares are issued, earnings per share are reduced. This lowers credit worthiness and raises interest rates on future bonds. Bond ratings can descend to a point where the securities are unmarketable which is what happened to Duke in 1974.

What's Duke doing about all this? The company has redoubled efforts on efficiency and conservation. Its executives continue in the Central Prison style 1920's offices they occupy of South Church Street, certainly the painest corporate work space in Charlotte.

And Chairman Bill Lee has taken to the road to tell the Duke facts of life to the 170 members of the General Assembly. Already, he's contacted about 70 in face-to-face meetings. Lee lays it all out. He plans to see them all.

GOOD-BAD POLITICS

These are the legislators, stung by voter complaints about greatly increased power bills, who voted in June to make regulatory life tougher for Duke before the PUC. Good short-term polilitics, perhaps, but bad for the long-term electric future of this state. A sell-off of Duke Power stock followed.

Duke is an under-appreciated bargain in North Carolina. No one proposes surrendering to them. But we do need to acknowledge their remarkable operating performance and insure that our politicians are not panicked by emotional voter wrath into making bad judgements.

Let the public debate begin. Facts are the weapons. Well-informed decision making is the desired result.●

JACK BRINKLEY

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. PHILLIP BURTON. Mr. Speaker, I join my colleagues in paying tribute to JACK BRINKLEY, who will be leaving us at the end of the 97th Congress.

JACK, we all know, is a dedicated and highly competent Member of Congress. More importantly, I have found him to be a person of the utmost personal integrity.

JACK did a great service to the city of San Francisco earlier this year. In his capacity as chairman of the Military Installations and Facilities Subcommittee, JACK prevented the passage of an unwise amendment that would have allowed the sale of the Presidio, a military installation in San Francisco. JACK's good work will prevent this area of great natural beauty from becoming a maze of shopping centers, office buildings, and condominiums.

JACK will be deeply missed by those of us who have had the privilege of working with him and by the constituents who have had the benefit of his representation. I wish JACK a happy and healthy retirement.●

TRIBUTE TO THE HONORABLE TOBY MOFFETT

HON. FRANK GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

● Mr. GUARINI. Mr. Speaker, I join my colleagues in paying a special and well-deserved tribute to my dear friend from Connecticut, TOBY MOFFETT. TOBY has my respect as one of the most thoughtful and articulate Members of this body. Over the 8 years he has been in the House, TOBY has established himself as an outstanding Congressman and as a wise and concerned representative of the people of his district.

Always a leader, TOBY had spent several years before coming to Congress in the vanguard of citizens action groups and proconsumer movements. After his election in 1974, TOBY quickly developed his reputation here for an extensive knowledge of consumer issues and energy policy. His rapid rise through the ranks brought him to the chairmanship of the Environment, Energy, and Natural Resources Subcommittee of the Government Operations Committee, where he has been an able and outspoken advocate of consumer protection laws, environmental protection, and a strong Government role in keeping energy costs down. Through his activist role in these important issues, TOBY has proven himself as an aggressive, energetic, people-oriented legislator. TOBY's penchant for creative methods of solving problems, coupled with a "Yankee" sensibility which makes these ideas workable, is his trademark.

TOBY MOFFETT is a bright star who will be sorely missed. He is a man who stands for fairness and justice; because of his commitment to these values, I am sure we shall be hearing more from TOBY MOFFETT. Best of luck to you TOBY, in your new ventures.●

MARGARET HECKLER

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 16, 1982

● Mr. CLINGER. Mr. Speaker, Congresswoman HECKLER has been an intelligent and energetic Member in this body who will be missed in the future.

Since her election to the House of Representatives in 1966, Congresswoman HECKLER has played an active role in women's rights and consumer issues while also effectively representing a diverse district stretching from suburban Boston to the textile and industrial region of Fall River.

As the female Member of Congress with the most tenure, I believe PEG has served as a model for other women who will follow in her footsteps. I am sorry to see Congresswoman HECKLER leave, but I wish her the best of luck in her future endeavors.●

FIRST MONTH OF ANDROPOV

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. McDONALD. Mr. Speaker, exactly 4 weeks after former Chairman of the KGB, Yuriy Andropov, took over as new General Secretary of the Central Committee of CPSU to become the supreme power in the Soviet Union, the 16 former ministers of NATO issued a communique after a conference in Brussels. In this joint statement, they were seeking a better climate for international relations and expressed hope that the attitudes of the new Soviet leadership "will allow cooperation in rebuilding international trust."

Secretary of State George P. Schultz on his part added in a statement after the conference that "the United States is ready for a dialogue" with the new Soviet General Secretary.

Yuriy Andropov answered these invitations "to tango," both in words and in deeds during his first month in office.

Back in 1977, Andropov said in one of his speeches, as follows:

> Leaning on the stronger than ever foundation, the Communist Party embarked upon the implementation of plans which will lead to new successes in Communist expansion, to further strengthening of peace and of position of socialism in the world.

In the first plenary session of the Central Committee presided by newly selected General Secretary Andropov on November 12, 1982, this theme of "further Communist expansion" was elaborated further. The session was under the great impact of the KGB. The main speech at the session was made by Yuriy Andropov, and the former Chairman of the KGB for Azerbaydzhan Republic, Gaydar A. Aliyev, has been elevated to the top offices as full member of the Politburo and First Deputy Prime Minister of the Soviet Government.

In his speech, Andropov addressed himself directly to the people of the world bypassing all channels and governments. He said:

> Now, as never before people have come to the forefront of the stage. They obtained a voice that nobody will be able to squash. By active and purposeful measures, they can now eliminate the threat of nuclear war, safeguard peace and, thus, save life on our planet. The Soviet Communist Party and Government will do everything to make it so. Communist, Socialists and Social Democrats and all other forces aiming at the preservation of peace must cooperate in this effort.

Several days later, new Chairman of the KGB, General Vitaliy V. Fedorchuk, addressed the session of the Supreme Soviet speaking about the new law proposal on "strengthening the bordor defenses of the Soviet Union." This law will considerably enhance the budget of the KGB which includes border guard troops and other security forces. It is obvious that in recent years; the scope of operations of the security forces has expanded considerably in connection with new responsibilities and new areas of activities in Africa, Asia, Poland, Latin America, and in particular, in Afghanistan.

Soviet presence in Afghanistan has been recently boosted by an addition of about 20,000 troops, primarily internal security units. According to Michael Barry, author and correspondent who traveled into the Afghanistan interior with underground guerrilla groups in September, these new Soviet security troops were used in several operations against the Afghan fighters and the civilian population. In one in-

stance, 105 civilians were burned to ashes in a mountain cave about 40 miles south of Kabul.

This was a typical KGB operation just as were many other atrocities committed by the Soviet units in Afghanistan in recent months. There is an obvious need to increase the KGB budget in connection with this expanded use of security units inside and outside of the Soviet Union and in view of the continuous growth of Soviet intelligence operations in the free world.

Recent conviction for 10 years in prison of Prof. Hugh Hambleton in London is a good point in case. For about 30 years, the Canadian-born professor was acting in different offices of NATO in Paris, London, and Brussels passing "thousands and thousands of documents" to Soviet intelligence operatives.

Hambleton attended a special KGB school to learn his espionage skills and tricks. An unusual device for decoding tonal messages received on radio waves was produced at the trial. It was the first time such a device had ever been seen by the intelligence experts of the West. Hambleton expressed his "feelings of regret" at the trial, but even then he skillfully avoided giving any names of his coconspirators in France or London. In recognition of his services, he was given a rank of KGB colonel and dined with Andropov himself in 1977.

While Hambleton was on trial, a new large spy case was uncovered in London involving Soviet Navy Capt. Anatoliy P. Zotov who was in the process of setting up an entire spy network in Great Britain. Captain Zotov, a naval attaché in the Soviet Embassy in London at that time, has been asked to leave Britain in 3 days. There was no connection established between the cases of Zotov, Hambleton, and Geoffrey Prime who was sentenced to a 35-year prison term for a similar crime 3 weeks before. The saturation of Soviet spy activity in the West, however, has been, thus, dramatically illustrated.

The investigation of the assassination attempt against Pope John Paul II in Rome, in the meantime, has grown into an international, high-level confrontation. Italy recalled from Bulgaria its Ambassador Carlo Rossi Arnaud for urgent consultations in view of the direct implication of the Bulgarian authorities in the May 13, 1981, shooting. The Italian investigators arrested Sergey Ivanov Antonov, chief of the Bulgarian airline office in Rome, on November 25 and implicated two other Bulgarians, J. Kolev Vassilyev, former secretary of the Embassy, and Teodor Ayvazov, a cashier of the Embassy. Four Turks in addition to the terrorist, Mehmet Ali Agca, who carried out the shooting, are known now to have been involved in conspiracy in addition to the Bulgarians.

Bulgarian authorities detained Bekir Celenk, the Turkish national wanted by Italy, who according to the Turkish press was in the center of the plot; however, they refused to extradite him to Italy for further investigation.

The public prosecutor of Rome, Ilario Martella, who is in charge of this investigation, is working under the overall theroretical assumption that the assassination attempt was coordinated and masterminded by the Bulgarian Secret Service on behalf of the KGB. At first Ali Agca claimed that he acted alone, but when the promise of his Bulgarian "contractors" of arranging his escape from prison in 6 to 8 months did not materialize, Agca started "singing like a canary." He said two Bulgarians, Ivanov Antonov and Ayvazov, accompanied him to St. Peter Square 48 hours before the shooting to study the position.

He also said that he was promised and partially paid $1.2 million, that Bekir Celenk was his original contact with the Bulgarians, and that the Bulgarians escorted him on May 13 to the square. The case widened further when Luigi Scricciolo, who was arrested in February 1981 on charges of being involved in the kidnaping of Gen. James Dozier, admitted that he was spying for Bulgaria since 1976 and that some of the offices of the Bugarian airline Balkan-Air are used as a nerve center of the espionage ring for Italy.

According to Prosecutor Ilavio Martella, Luigi Scricciolo admitted that in addition to Pope John Paul II, the Bulgarians planned to kill Lech Walesa, the leader of the Polish Free-Trade Union Solidarity during his visit to Rome.

Former head of the Bulgarian Secret Service, Col. Stefan Sverdlev, who defected to the West in 1979 and now lives in Muchich, Germany, made a statement on December 10 that the Bulgarian secret services were obviously involved in the attempt on the Pope's life but that they "did it on the instructions of the KGB of the Soviet Union" as much as, he continued, "Bulgarian agents are responsible to the KGB for international operations."

All these complicated and expansive activities at home and abroad call for additional allocation of funds to the KGB which will be provided by the new law "on strengthening of border defenses" presented to the Supreme Soviet by KGB Chief Fedorchuk.

On the domestic arena, the new Andropov-Aliyev team called for tougher actions against corruption and crime and for imposition of stricter discipline over the party and on the Soviet people.

Aliyev's anticorruption campaign in 1969-70 and in 5 subsequent years has been singled out as an example to follow. In 3 weeks following the November 22 plenary session of the Central Committee regional party devoted to analysis of the decisions of the plenary session, meetings were held in all 15 republics of the Soviet Union.

In all those meetings, except in Azerbaydzhan, sharp ciriticism has been expressed about the managerial, administrative, and personal practices of the past. Statements were made about wide-spread corruption, pilfering of resources and funds, lax habits among both managers and workers, and growing crime in the streets.

The expectation of some Western observers, that the economic problems of the Soviet Union will force the new Andropov administration to relax the strict rules of centralized planning, have been fully answered by the new decisions and actions of the last month.

The large-scale changes in personnel assignments and the punishment of the people responsible for corruption and mismanagement will follow soon. Some of the steps were taken already in recent weeks. Other similar moves are anticipated in Moscow and other places throughout the country. Aliyev, in his 6-year cleanup action of Azerbaydzhan, demoted, purged, shifted, or arrested not less than 1,800 officials, all of them in responsible party or administration positions. He himself took over—after serving 25 years in the KGB—as First Secretary of the Central Committee of Azerbaydzhan. He relinquished this position now in favor of his friend K. M. Bagirov on November 30 since he, Aliyyev, moved permanently to Moscow as a full member of the Politburo and as First Deputy Prime Minister.

The Politburo membership has now been reduced to 12 from 14 in the beginning of 1982. Yuriy Andropov apparently now controls three portfolios—General Secretary, replacing Brezhnev who died on November 10; Secretary Suslov's slot, who died on January 25; and his own overall top responsibility for security services, KGB and other agencies. As General Secretary, he presides over the Defense Committee overseeing armed forces and defense industries. Gaydar Aliyev replaced A. P. Kirilenko. Similar shifts took place in the Secretariat with the number of Secretaries reduced from 10 to 9 replacing the departed "troika" of Brezhnev, Suslov, and Kirilenko by Andropov and Nikolay Ryzhkov. Some other changes in subordinate agencies have been already announced.

BOB MOLLOHAN

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. PHILLIP BURTON. Mr. Speaker, I join my colleagues today in paying tribute to BOB MOLLOHAN. I regret that he has decided to retire—but I am pleased that the Mollohan tradition will continue with the election of his son Alan in West Virginia's First District.

Those of us who have worked with BOB appreciate his dedicated work in this body. BOB's work on the House Administration Committee has benefited all the Members of the House. In addition to his hard work here, BOB has worked tirelessly for his constituents, the residents of the First Congressional District of West Virginia.

I join my colleagues in congratulating BOB on a job well done. I wish him a long, healthy, and happy retirement.●

HOUSE OF REPRESENTATIVES—*Sunday, December 19, 1982*

The House met at 4 p.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

How beautiful upon the mountains are the feet of him who brings good tidings, who publishes peace, who brings good tidings of good, who publishes salvation, who says to Zion, "Your God reigns."—Isaiah 52: 7

In all the times of trial and tensions we recognize, O God, that there also exist Your good tidings of peace. May Your word of good will toward all people surround us and sustain us as we seek to serve people of this Nation. Bless those who give of their time and talents in such full measure, who help keep alive the bright light of this holy season. In Your name we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7356) entitled "An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes."

The message also announced that the Seante agrees to the amendments of the House to the amendments of the Senate numbered 10, 36, 40, 42, 43, 46, 48, 58, 62, 74, 76, 84, 87, 88, 90, 96, 97, 98, 100, 102, 104, 111, 112, 116, 122, 123, 136, 137, 141, 153, 154, 155, and 156 to the above-entitled bill.

The message also announced that the Senate further insists upon its amendment to the bill (H.R. 3963) entitled "An Act to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated.".

The message also announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 5161. An act to designate certain lands in the Monongahela National Forest, West Virginia, as wilderness; and to designate management of certain lands for uses other than wilderness.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER. The Chair lays before the House the following communication:

WASHINGTON, D.C.,
December 19, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, the Clerk received, at 3:22 p.m. on Sunday, December 19, 1982, the following message from the Secretary of the Senate: That the Senate passed with amendments H.J. Res. 631 and requested a conference thereon.

In accordance with action taken by the House on Saturday, December 18, 1982, the Clerk has notified the Senate that the House disagreed to the amendments of the Senate to H.J. Res. 631 and agreed to a conference thereon.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

MAKING IN ORDER CONSIDERATION OF CONFERENCE REPORT AND AMENDMENTS IN DISAGREEMENT ON HOUSE JOINT RESOLUTION 631, MAKING FURTHER CONTINUING APPROPRIATIONS, 1983

Mr. WRIGHT. Mr Speaker, I ask unanimous consent that it shall be in order, any rule of the House to the contrary notwithstanding, to consider the conference report and amendments in disagreement on House Joint Resolution 631 subject to the availability of said conference report and amendments in disagreement for at least 1 hour, that all points of order be waived against the conference report and amendments in disagreement, and that said conference report and amendments in disagreement be considered as having been read when called up for consideration.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

ODE TO A VETO

(Mr. JACOBS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JACOBS. Mr. Speaker, the Christmas season has brought out the poet in me and I have penned a verse entitled "Ode to a Veto":

ODE TO A VETO

Words for Ebenezer Reag
From the ghost of Caribbean passed
Think of your own poor
Include them in the cast

CONFERENCE REPORT ON S. 2623, TRIBALLY CONTROLLED COMMUNITY COLLEGE ASSISTANCE ACT AMENDMENTS

Mr. PERKINS submitted the following conference report and statement on the Senate bill (S. 2623) to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 97-979)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2623) to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

SECTION 1. The matter preceding title I of the Tribally Controlled Community College Assistance Act of 1978 (92 Stat. 1325) (hereafter in this Act referred to as the "Act") is amended—

(1) by striking out "DEFINITIONS" and inserting in lieu thereof the following:

"DEFINITIONS

"SEC. 2. (a) for purposes of this Act, the term—";

(2) by striking out "and is eligible to receive services from the Secretary of the Interior" in paragraph (1);

(3) by inserting before the semicolon at the end of paragraph (5) thereof the following: "and the reference to Secretary in clause (5)(A) of such section shall be deemed to refer to the Secretary of the Interior"; and

(4) by striking out paragraph (7) and inserting in lieu thereof the following:

"(7) 'Indian student count' means a number equal to the total number of Indian students enrolled in each tribally controlled community college, determined in a manner consistent with subsection (b) of this section on the basis of the quotient of the sum of the credit hours of all Indian students so enrolled, divided by twelve.

"(b) For the purpose of determining the Indian student count pursuant to paragraph (7) of subsection (a), such number shall be calculated on the basis of the registrations of Indian students as in effect at the conclusion of the third week of each academic term. Credits earned in classes offered

during a summer term shall be counted toward the computation of the Indian student count in the succeeding fall term. Indian students earning credits in any continuing education program of a tribally controlled community college shall be included in determining the sum of all credit hours. For such purposes, credits earned in a continuing education program shall be converted to a credit-hour basis in accordance with the tribally controlled community college's system for providing credit for participation in such program.".

SEC. 2. Section 101 of the Act is amended—

(1) by inserting "as a fulfillment of a continuing trust responsibility of the Federal Government as it relates to education for Indian students and" after "colleges"; and

(2) by inserting immediately before the period at the end thereof the following: ", and to allow for the improvement and expansion of the physiccl resources of such institutions".

SEC. 3. (a) Section 102 of the Act is amended—

(1) by striking out "is authorized to" in subsection (a) and inserting in lieu thereof "shall, subject to appropriations,"; and

(2) by striking out "to defray the expense of activities related to education programs for Indian students" in subsection (b) and inserting in lieu thereof "to defray, at the determination of the tribally controlled community college, expenditures for academic, educational, and administrative purposes and for the operation and maintenance of the college".

(b) Section 106(a) of the Act is amended by inserting after the second sentence the following new sentence: "Such application shall include a description of recordkeeping procedures for the expenditure of funds received under this Act which will allow the Secretary to audit and monitor programs conducted with such funds.".

SEC. 4. (a) The Act is amended—

(1) by redesignating sections 104 through 114 as sections 105 through 115, respectively; and

(2) by inserting after section 103 the following new section:

"PLANNING GRANTS

"SEC. 104. (a) The Secretary shall establish a program in accordance with this section to make grants to tribes and tribal entities to conduct planning activities for the purposes of developing proposals for the establishment of tribally controlled community colleges, or to determine the need and potential for the establishment of such colleges.

"(b) The Secretary shall establish, by regulation, procedures for the submission and review of applications for grants under this section.

"(c) From the amount appropriated to carry out this title for any fiscal year (exclusive of sums appropriated for section 105), the Secretary shall reserve (and expend) an amount necessary to make grants to five applicants under this section of not more than $15,000 each, or an amount necessary to make grants in that amount to each of the approved applicants, if less than five apply and are approved.".

(b) The Act is further amended—

(1) by striking out "section 106" in section 106 (as redesignated by subsection (a)(1)) and inserting in lieu thereof "section 107";

(2) by striking out "section 105" in section 107 (as so redesignated) and inserting in lieu thereof "section 106"; and

(3) by striking out "section 106(a)" in section 111 (as so redesignated) and inserting in lieu thereof "section 107(a)".

SEC. 5. Section 105 of the Act (as redesignated by section 4(a)(1)) is amended—

(1) by inserting "from a tribally controlled community college which is receiving funds under section 108" after "upon request" in the first sentence thereof; and

(2) by striking out "to tribally controlled community colleges" in such sentence.

SEC. 6. (a) Section 106 of the Act (as redesignated by section 4(a)(1) of this Act) is amended—

(1) by striking out "FEASIBILITY" in the heading of such section and inserting in lieu thereof "ELIGIBILITY";

(2) by striking out "feasibility" each place it appears in such section and inserting in lieu thereof "eligibility";

(3) by striking out "Assistant Secretary of Education of the Department of Health, Education, and Welfare" in subsection (a) and inserting in lieu thereof "Secretary of Education";

(4) by inserting at the end of subsection (b) the following new sentence: "Such a positive determination shall be effective for the fiscal year succeeding the fiscal year in which such determination is made."; and

(5) by striking out "10 per centum" in subsection (c)(2) and inserting in lieu thereof "5 per centum".

(b) Section 107 of the Act (as redesignated by section 4(a)(1) of this Act) is amended—

(1) by striking out "feasibility" in subsection (a) and inserting in lieu thereof "eligibility", and

(2) by striking out "Assistant Secretary of Education of the Department of Health, Education, and Welfare" in subsection (b) and inserting in lieu thereof "Secretary of Education".

SEC. 7. Section 108(a) of the Act (as redesignated by section 4(a)(1) of this Act) is amended to read as follows:

"SEC. 108. (a) Except as provided in section 111, the Secretary shall, subject to appropriations, grant for each academic year to each tribally controlled community college having an application approved by him an amount equal to the product of—

"(1) the Indian student count at such college during such academic year, as determined by the Secretary in accordance with section 2(a)(7) of this Act; and

"(2)(A) $4,000 for fiscal year 1983,

"(B) $4,000 for fiscal year 1984,

"(C) $5,025 for fiscal year 1985,

"(D) $5,415 for fiscal year 1986, and

"(E) $5,820 for fiscal year 1987,

except that no grant shall exceed the total cost of the education program provided by such college.".

SEC. 8. Section 109 of the Act (as redesignated by section 4(a)(1) of this Act) is amended—

(1) by inserting "(a)" immediately after the section designation; and

(2) by adding at the end thereof the following new subsections:

"(b)(1) The amount of any grant for which tribally controlled community colleges are eligible under section 108 shall not be altered because of funds allocated to any such colleges from funds appropriated under the Act of November 2, 1921 (42 Stat. 208; 25 U.S.C. 13).

"(2) No tribally controlled community college shall be denied funds appropriated under such Act of November 2, 1921, because of the funds it receives under this Act.

"(c) For the purposes of section 312(2)(A)(i) and 322(a)(2)(A)(i) of the Higher Education Act of 1965, any Indian student who receives a student assistance grant from the Bureau of Indian Affairs for postsecondary education shall be deemed to have received such assistance under subpart 1 of part A of title IV of such Act.".

SEC. 9. (a) Section 110 of the Act (as redesignated by section 4(a)(1) of this Act) is amended to read as follows:

"APPROPRIATION AUTHORIZATION

"SEC. 110. (a)(1) There is authorized to be appropriated, for carrying out section 105, $3,200,000 for each of the fiscal years 1985, 1986, and 1987.

"(2) There is authorized to be appropriated for carrying out section 107, $30,000,000 for each of such fiscal years.

"(3) There are authorized to be appropriated such sums as may be necessary to carry out sections 112(b) and 113 for each of such fiscal years.

"(b)(1) For the purpose of affording adequate notice of funding available under this Act, amounts appropriated in an appropriation Act for any fiscal year to carry out this Act shall become available for obligation on July 1 of that fiscal year and shall remain available until September 30 of the succeeding fiscal year.

"(2) In order to effect a transition to the forward funding method of timing appropriation action described in paragraph (1), there are authorized to be appropriated, in an appropriation Act or Acts for the same fiscal year, two separate appropriations to carry out this Act, the first of which shall not be subject to paragraph (1).".

SEC. 10. Section 111 of the Act (as redesignated by section 4(a)(1) of this Act) is amended by redesignating subsection (b) as subsection (c) and by striking out subsection (a) and inserting in lieu thereof the following:

"SEC. 111. (a)(1) If the sums appropriated for any fiscal year pursuant to section 110(a)(2) for grants under section 107 are not sufficient to pay in full the total amount which approved applicants are eligible to receive under such section for such fiscal year—

"(A) the Secretary shall first allocate to each such applicant which received funds under section 107 for the preceding fiscal year an amount equal to the product of (i) the per capita payment for the preceding fiscal year, and (ii) such applicant's Indian student count for the current fiscal year;

"(B) the Secretary shall next allocate an amount equal to the product described in subparagraph (A) to applicants who did not receive funds under such section for the preceding fiscal year, in the order in which such applicants have qualified for assistance in accordance with such section, and no amount shall be allocated to a later qualified applicant until each earlier qualified applicant is allocated an amount equal to such product; and

"(C) if additional funds remain after making the allocations required by subparagraphs (A) and (B) the Secretary shall allocate such funds by ratably increasing the amounts of the grant determined under such subparagraphs.

"(2) For purposes of paragraph (1) of this subsection, the term 'per capita payment' for any fiscal year shall be determined by dividing the amount available for grants to tribally controlled community colleges under section 107 for such fiscal year by the sum of the Indian student counts of such colleges for such fiscal year. The Secretary shall, on the basis of the most satisfactory data available, compute the Indian student count for any fiscal year for which such

count was not used for the purpose of making allocations under this title.

"(b)(1) If the sums appropriated for any fiscal year for grants under section 107 are not sufficient to pay in full the total amount of the grants determined pursuant to subsection (a)(1)(A) the amount which applicants described in such subsection are eligible to receive under section 107 for such fiscal year shall be ratably reduced.

"(2) If any additional funds become available for making payments under section 107 for any fiscal year to which subsection (a) or paragraph (1) of this subsection applies, such additional amounts shall be allocated by first increasing grants reduced under paragraph (1) of this subsection on the same basis as they were reduced and by then allocating the remainder in accordance with subsection (a). Sums appropriated in excess of the amount necessary to pay in full the total amounts for which applicants are eligible under section 107 shall be allocated by ratably increasing such total amounts.

"(3) References in this subsection and subsection (a) to section 107 shall, with respect to fiscal year 1982, be deemed to refer to section 106 as in effect at the beginning of such fiscal year.".

SEC. 11. Section 112 of the Act (as redesignated by section 4(a)(1) of this Act) is amended to read as follows:

"REPORT ON FACILITIES

"SEC. 112. (a) The Administrator of General Services shall provide for the conduct of a study of facilities available for use by tribally controlled community colleges. Such study shall consider the condition of currently existing Bureau of Indian Affairs facilities which are vacant or underutilized and shall consider available alternatives for renovation, alteration, repair, and reconstruction of such facilities (including renovation, alteration, repair, and reconstruction necessary to bring such facilities into compliance with local building codes). Such study shall also identify the need for new construction. A report on the results of such study shall be submitted to the Congress not later than September 30, 1984. Such report shall also include an identification of property (1) on which structurally sound buildings suitable for use as educational facilities are located, and (2) which is available for use by tribally controlled community colleges under section 202(a)(2) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 483(a)(2)) and under the Act of August 6, 1956 (70 Stat. 1057; 25 U.S.C. 443a).

"(b) The Administrator of General Services, in consultation with the Bureau of Indian Affairs, shall initiate a program to conduct necessary renovations, alterations, repairs, and reconstruction identified pursuant to subsection (a) of this section.

"(c) For the purposes of this section, the term 'reconstruction' has the meaning provided in the first sentence of subparagraph (B) of section 742(2) of the Higher Education Act of 1965 (20 U.S.C. 1132e-1(2)(B)).".

SEC. 12. Section 113 of the Act (as redesignated by section 4(a)(1) of this Act) is amended to read as follows:

"CONSTRUCTION OF NEW FACILITIES

"SEC. 113. (a) With respect to any tribally controlled community college for which the report of the Administrator of General Services under section 112(a) of this Act identifies a need for new construction, the Secretary shall, subject to appropriations and on the basis of an application submitted in accordance with such requirements as the Secretary may prescribe by regulation, provide grants for such construction in accordance with this section.

"(b) In order to be eligible for a grant under this section, a tribally controlled community college (1) must be a current recipient of grants under section 105 or 107, and (2) must be accredited by a nationally recognized accrediting agency listed by the Secretary of Education pursuant to the last sentence of section 1201(a) of the Higher Education Act of 1965 (20 U.S.C. 1141(a)), except that such requirement may be waived if the Secretary determines that there is a reasonable expectation that such college will be fully accredited within eighteen months. In any case where such a waiver is granted, grants under this section shall be available only for planning and development of proposals for construction.

"(c)(1) Except as provided in paragraph (2), grants for construction under this section shall not exceed 80 per centum of the cost of such construction, except that no tribally controlled community college shall be required to expend more than $400,000 in fulfillment of the remaining 20 per centum. For the purpose of providing its required portion of the cost of such construction, a tribally controlled community college may use funds provided under the Act of November 2, 1921 (25 U.S.C. 13), popularly referred to as the Snyder Act.

"(2) The Secretary may waive, in whole or in part, the requirements of paragraph (1) in the case of any tribally controlled community college which demonstrates that neither such college nor the tribal government with which it is affiliated have sufficient resources to comply with such requirements. The Secretary shall base a decision on whether to grant such a waiver solely on the basis of the following factors: (A) tribal population; (B) potential student population; (C) the rate of unemployment among tribal members; (D) tribal financial resources; and (E) other factors alleged by the college to have a bearing on the availability of resources for compliance with the requirements of paragraph (1) and which may include the educational attainment of tribal members.

"(d) If, within twenty years after completion of construction of a facility which has been constructed in whole or in part with a grant made available under this section—

"(1) the applicant ceases or fails to be a public or nonprofit institution,

"(2) the facility ceases to be used by the applicant as an academic facility, unless the Secretary determines that there is good cause for releasing the institution from this obligation, and

"(3) the tribe with which the applicant is affiliated fails to use the facility for a public purpose approved by the tribal government in furtherance of the general welfare of the community served by the tribal government, the United States shall be entitled to recover from such applicant (or its successor in title or possession) and amount which bears the same ratio to the value of the facility at the time as the amount of the grant under this section bore to the cost of the facility constructed with the aid of such grant. Such value shall be determined by agreement of the parties or by action brought in the United States district court for the district in which such facility is located.

"(e) No construction assisted with funds under this section shall be used for religious worship or a sectarian activity or for a school or department of divinity.

"(f) For the purposes of this section, the Secretary shall have the authority granted to the Secretary of Education pursuant to section 732(b) of the Higher Education Act of 1965 (20 U.S.C. 1132d-1) with respect to construction under title VII of such Act.

"(g) For the purposes of this section—

"(1) the term 'construction' includes reconstruction or renovation (as such terms are defined in the first sentence of subparagraph (B) of section 742(2) of the Higher Education Act of 1965 (20 U.S.C. 1132e-1(2)(B))); and

"(2) the term 'academic facilities' has the meaning provided such term under section 742(1) of the Higher Education Act of 1965 (20 U.S.C. 1132-1(1)).".

SEC. 13. The Act is further amended by adding at the end thereof the following new title.

"TITLE III—TRIBALLY CONTROLLED COMMUNITY COLLEGE ENDOWMENT PROGRAM

"PURPOSE

"SEC. 301. It is the purpose of this title to provide grants for the encouragement of endowment funds for the operation and improvement of tribally controlled community colleges.

"ESTABLISHMENT OF PROGRAM; PROGRAM AGREEMENTS

"SEC. 302. (a) From the amount appropriated pursuant to section 306, the Secretary shall establish a program of making endowment grants to tribally controlled community colleges which are current recipients of assistance under section 107 of this Act or under section 3 of the Navajo Community College Act. No such college shall be ineligible for such a grant for a fiscal year by reason of the receipt of such a grant for a preceding fiscal year.

"(b) No grant for the establishment of an endowment fund by a tribally controlled community college shall be made unless such college enters into an agreement with the Secretary which—

"(1) provides for the establishment and maintenance of a trust fund at a federally insured banking or savings institution;

"(2) provides for the deposit in such trust fund of—

"(A) any Federal capital contributions made from funds appropriated under section 306;

"(B) a capital contribution by such college in an amount equal to the amount of each Federal capital contribution; and

"(C) any earnings of the funds so deposited;

"(3) provides that such funds will be deposited in such a manner as to insure the accumulation of interest thereon at a rate not less than that generally available for similar funds deposited at the same banking or savings institution for the same period or periods of time;

"(4) provides that, if at any time such college withdraws any capital contribution made by that college, an equal amount of Federal capital contribution shall be withdrawn and returned to the Secretary for reallocation to other colleges;

"(5) provides that no part of the net earnings of such trust fund will inure to the benefit of any private person; and

"(6) includes such other provisions as may be necessary to protect the financial interest of the United States and promote the purpose of this title and as are agreed to by the Secretary and the college, including a description of recordkeeping procedures for the expenditure of accumulated interest which will allow the Secretary to audit and

monitor programs and activities conducted with such interest.

"USE OF FUNDS

"SEC. 303. Interest deposited, pursuant to section 302(b)(2)(C), in the trust fund of any tribally controlled community college may be periodically withdrawn and used, at the discretion of such college, to defray any expenses associated with the operations of such college, including expense of operation and maintenance, administration, academic and support personnel, community and student services programs, and technical assistance.

"COMPLIANCE WITH MATCHING REQUIREMENT

"SEC. 304. For the purpose of complying with the contribution requirement of section 302(b)(2)(B), a tribally controlled community college may use funds which are available from any private or tribal source.

"ALLOCATION OF FUNDS

"SEC. 305. (a) From the amount appropriated pursuant to section 306, the Secretary shall allocate to each tribally controlled community college which is eligible for an endowment grant under this title an amount for a Federal capital contribution equal to the amount which such college demonstrates has been placed within the control of, or irrevocably committed to the use of, the college and is available for deposit as a capital contribution of that college in accordance with section 302(b)(2)(B), except that the maximum amount which may be so allocated to any such college for any fiscal year shall not exceed $350,000.

"(b) If for any fiscal year the amount appropriated pursuant to section 306 is not sufficient to allocate to each tribally controlled community college an amount equal to the amount demonstrated by such college pursuant to subsection (a), then the amount of the allocation to each such college shall be ratably reduced.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 306. (a) There is authorized to the appropriated $5,000,000 for each of the fiscal years 1985, 1986, and 1987 to carry out this title.

"(b) Any funds appropriated pursuant to subsection (a) are authorized to remain available until expended.".

SEC. 14. (a) In promulgating any regulations to implement the amendments made by this Act, the Secretary of the Interior shall consult with tribally controlled community colleges.

(b) Any such regulations and any other regulations promulgated pursuant to the Act shall be subject to section 431 of the General Education Provisions Act, and the requirements of such section applicable to the Secretary of Education shall apply to the Secretary of the Interior with respect to such regulations.

(c) If any provision of this Act or the applicability thereof to any person or circumstance is held invalid, the remainder of this Act and the application of such provision to other persons or circumstances shall not be affected thereby.

And the House agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2623) to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

(1) The Senate bill and the House amendment contain provisions renumbering a previously unnumbered section. The House recedes.

(2) The House amendment strikes out language in section 2 of the Tribally Controlled Community College Assistance Act of 1978 "and is eligible to receive services from the Secretary of the Interior" in the definition of Indian. The Senate bill has no such provision. The Senate recedes. The conferees intend that the determination of tribal membership be left to the tribe, which is consistent with the policy of self-determination. As the House report makes clear, the conferees intend that the definition of Indian for the purposes of this program shall apply only to those qualified by the tribe to participate fully in tribal affairs. There should be no separate tribal definition of membership for the purposes of this program alone. The conferees intend to reach several problems of definition caused by the Bureau's restrictive interpretations; i.e. restrictions to one-quarter blood quantum. The conferees intend to retain the limitation of this Act to federally recognized tribal entities and members and also intend to have benefits extended to tribal members without restrictions as to blood quantum.

(3) The House amendment amends Section 101 of the Act to make clear that this program is carried out pursuant to the trust responsibility. The Senate bill has no similar provision. The Senate recedes. The conferees are aware that the Administration has expressed substantial concern over this provision in the bill, going so far as to threaten a potential veto if it is included. However, the conferees believe that in the area of the education of Indian people, Federal policy should be clear and unequivocal.

However, the conferees are not unmindful of the concerns of the Administration, at least as they have been publicly stated. Though the concerns of the Administration have been set out in several ways in several forums, they have always remained substantially the same. They are most clearly and completely stated in the letter dated August 18, 1982, addressed to the Senate Select Committee Chairman and included in the Senate Report at page 17. The conferees agree with the Administration that "tribal needs vary" and that "the Federal response to them should vary". That is the purpose of this legislation, and the thrust of these amendments. The conferees agree that requiring the Federal government to provide services regardless of need would not be "good government".

However, that is not what the inclusion of the clarification of the trust responsibility does. This responsibility, which arises from the government-to-government relationship (and is not, as the Administration letter implies, separate from it) already exists. Its specific citation in this legislation does not, in any way, shape or form, imply or specifically authorize or mandate "an absolute responsibility to provide" funding for a community college regardless of the other strictures in the bill. The inclusion of the "trust" language (which traditionally has carried with it the understanding of fiscal support to the dependent by the guardian) is not meant to extend Federal policy regarding Indian education, and it is not to be interpreted as any extension of policy. The phrase was included to clarify an existing policy. The inclusion of this very general "trust responsibility" language should in no way be construed to mean the United States is liable to fund Indian education, other than those programs authorized and funded by appropriate Acts of Congress.

Tribally Controlled Community Colleges are to be funded pursuant to the terms of this Act and the regulations promulgated pursuant to it. That means that these schools receive funding only after meeting all of the requirements established with respect to need (the conferees assume that the use of the term "real need" in the Administration's letter is not intended to indicate that the Secretary intends to use an extra-legal unstated test). The inclusion of language clarifying the policy basis for this program in no way alters its requirements. In truth, the conferees are in complete agreement on this point and no other interpretation is accurate or warranted.

To again restate their position, the inclusion of this language is for clarification only, to recognize a state of affairs which the conferees agree already exists. It pertains to the policy rationale for this program and its administration and does not create, alter, extend or amend the current rights and responsibilities of either the schools or the administering entity.

By making this lengthy and detailed explanation, the conferees hope that they have resolved the concerns of the Administration and that the inclusion of this provision will cause no further problem. Certainly, the conferees believe they have answered and met all of the stated concerns.

(4) The House amendment expands the authorized expenditures to include operation and maintenance, including administrative, academic, community and student service programs and technical assistance. The Senate bill expands the definition to all purposes mentioned in the House bill except community and student services and technical assistance. The House recedes. The conferees intend that the purposes stated in

this provision are not to be construed so narrowly as to exclude direction of limited amounts of funds to community and student services programs and technical assistance designed to maximize the effectiveness and reach of the postsecondary education program of the colleges. The conferees further intend that the terms of this provision be interpreted so as to increase, rather than decrease, the flexibility of these institutions in meeting the postsecondary educational needs of the communities that they serve.

(5) The Senate bill and the House amendment make technical amendments to Section 105 of the Act (as redesignated). The House recedes.

(6) The Senate bill redesignates, in Section 106 of the Act (as redesignated) "Assistant Secretary of Education of the Department of Health, Education and Welfare" as the "Secretary of Education". The House has no similar provision. The House recedes.

(7) The Senate bill redesignates, in Section 107 of the Act (as redesignated) "Assistant Secretary of Education of the Department of Health, Education and Welfare" as the "Secretary of Education". The House has no similar provision. The House recedes.

(8) The House amendment prevents the offset of funds received under this Act by the Secretary of the Interior in cases where the tribe has allocated "Snyder Act" funds to the college. The Senate language differs, but intends to achieve the same objective. The House recedes. The conferees intend that this provision assure that a tribe's allocation of "Snyder Act" funds to its community college will not result in an offset of funds for the college under this Act. The conferees note that such an offset was attempted by the Secretary on several occasions. The conferees want to make it clear that such action by the Secretary is not within the letter or the intent of this Act. A tribe's decision to allocate a portion of its "Snyder Act" funds is acknowledged to be a commitment of additional support and should not be obstructed.

The conferees also intend that Public Law 471 funds may not be used to offset "Snyder Act" funds.

(9) The House amendment amends Section 110(b) of the current Act to effect forward funding. The Senate bill contains similar language. The House recedes with an amendment. The amendment clarifies the forward funding provision in both bills. The amendment is to bring this program into conformity with other education programs.

(10) The House amendment amends Section 110(c) of the current Act to allow funds to remain available for use until expended, unless otherwise provided in appropriations legislation. The Senate bill amends Section 110(b) of the current Act so that funds would become available on July 1 of the year in which they are appropriated and remain available until September 30 of the succeeding year. The House recedes with an amendment. The amendment provides that funds appropriated to carry out the Act shall become available for obligation on July 1 of that fiscal year and shall remain available until September 30 of the succeeding fiscal year.

(11) The House amendment amends Section 111(a)(1)(A) of the current Act to allocate grant funds first to schools participating under the program in the preceding fiscal year. The Senate bill includes those schools which were eligible but unfunded in the preceding fiscal year in the initial allocation of funds. The Senate recedes.

(12) The House amendment amends Section 111(a)(1)(B) of the current Act to allocate funds next to qualified applicants who were not funded in the preceding fiscal year, in the order in which they qualified as eligible for this program under Section 106(b) [as redesignated by Section 4(a)(1)]. The Senate bill allocates funds next to applicants other than those funded under Section 111(a)(1)(B) of the Act (as amended). The Senate recedes.

(13) The Senate bill and the House amendment contain similar provisions regarding a report by the General Services Administration on facilities. The House recedes.

(14) The Senate bill contains an authorization for new construction. Funds would be made available for fiscal years 1985, 1986, and 1987 on a matching basis. The bill provides for the waiver of the tribal portion, and other provisions dealing with the use of facilities funded under this section. The House amendment has no similar provision. The House recedes. The conferees specifically intend that the use of endowment funds for construction and maintenance of facilities be permitted.

(15) The Senate bill establishes a new Title III—endowment program. Endowment funds are authorized at a level of $5 million per year for fiscal years 1985, 1986, and 1987. Colleges participating in programs authorized under either Title I or Title II of the Tribally Controlled Community Colleges Act of 1978 are eligible for up to $350,000 per year on a one-to-one Federal-tribal matching basis. Funds are to be invested in a federally insured account, with the interest earned available to the institution. This provision is designed to assist the colleges in utilizing private sources of funding and in establishing stable independent funding mechanisms. The House amendment contains no similar provisions. The House recedes. The conferees intend that the schools be able to use funds they receive under the "Snyder Act" to meet their matching percentage.

(16) The House amendment provides that any regulations promulgated pursuant to this program will be subject to the provisions of Section 431 of the General Education Provisions Act. The Senate bill contains no similar provision. The Senate recedes with an amendment. The conferees wish to make it very plain that while the provisions of Section 431 will apply, the Congressional Committees to which the references in that Section will apply are the Committee on Education and Labor of the House and the Select Committee on Indian Affairs of the Senate.

IMMIGRATION REFORM AND CONTROL ACT OF 1982

(Mr. BENNETT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. BENNETT. Mr. Speaker, I have listened with close attention to this debate. I knew at the outset that there would not be enough time for this measure to be enacted in 1982, considering how late it came to the floor. Yet this debate has set the stage for prompt enactment in 1983. Legislation in this field is truly urgently needed.

Although there are great local needs caused by this national problem of unrestricted illegal immigration, unfairly hurting a State like Florida for failure of national assumption of national responsibilities by the Federal Government, and although there are ethnic sensibilities that make some solutions difficult, the paramount national responsibility clearly requires a national law to meet the unmet national challenge to face the high incidence of illegal immigration at a time when there is high unemployment in our country, difficult economic times and unmet social and welfare needs for our own citizens.

One thing that has impressed me in this debate is the sincerity of some in arguing that people who look like and speak like illegal aliens may find it awkward to be challenged when they are American citizens seeking employment. This together with the objection some have to identification cards has been presented as an obstacle to any realistic solution. Prior to the debate I had guessed that such arguments were largely the result of pressure from people sympathetic to illegal aliens and to unrestricted immigration; however the debate showed that one could feel, like most Americans, that we must reduce the inflow of illegal aliens who are taking needed jobs and pushing welfare costs upward to impractical levels, and one could still feel that a nonalien identification card could be a point of sensitivity for some legal Americans. Perhaps the answer may be in not allowing illegal aliens to be holders of ordinary social security cards and creating a rebutable presumption that one who does not have such a card should show by some other means, like a birth certificate or naturalization papers that he is not an illegal alien. In any event it would seem that something reasonable could be worked out.

Mr. Speaker, when President Carter asked me to come to the White House with others to discuss the immigration problem shortly after an idealistic speech he made on the subject, and which was misinterpreted, I urged him to seize the American ships and other illegal shipping that were illegally operating and making the violation of

our immigration laws possible. I pointed out that there are probably more than a billion of orientals and others who have purely economic reasons for desiring to come to our country and that we could not possibly absorb such numbers. His prompt decision to seize the illegal shipping was the most effective thing done to minimize the threat of even greater numbers of illegal aliens coming. Vigorous leadership like President Carter displayed in this instance is what is needed today both from the executive and legislative branches of our Government.

Mr. Speaker, I have just received a letter from Gov. Bob Graham of Florida who is chairman of the National Governors' Association Task Force on Immigration and Refugee Issues, which I incorporate at the end of my remarks. Clearly Congress must act promptly and fairly to meet the challenge of illegal aliens coming into our country. Governor Graham wrote me as of December 16:

STATE OF FLORIDA,
December 16, 1982.

Hon. CHARLES BENNETT,
U.S. Representative, Rayburn House Office Building, Washington, D.C.

DEAR CHARLIE: It is my understanding that the House is scheduled to begin consideration this week of H.R. 7357, the Immigration Reform and Control Act.

Florida's experience with the Mariel boat lift has clearly demonstrated the need for immigration reform. Most important in this regard are the provisions of the bill reforming asylum and exclusion processes. Because existing processes were designed to deal with small numbers of asylum applicants, the system was unable to deal with the large influx of Cubans and Haitians. It is vital that these processes be changed. I believe H.R. 7357 would improve the current asylum and exclusion processes. I understand, however, that Representative McCollum will offer an amendment to help relieve the backlog of appeals in federal District and Circuit Courts, and I support his amendment as an additional improvement over both current law and H.R. 7357 as reported by the Judiciary Committee.

I am concerned about the amnesty provisions in the bill. I believe that providing mass amnesty for 3 to 6 million illegal aliens without knowing whether the new enforcement provisions in the bill will work sends the wrong message to persons in other countries. Therefore, I support striking the amnesty provisions.

If amnesty is not struck, I believe that Representative Scheuer or Representative Coelho's amendment to delay amnesty until after a certification that the enforcement provisions of the bill are working is a reasonable alternative.

Finally, I would like to address the issue of state and local reimbursement of costs associated with the legalization program. As I am sure you are aware, under the House Judiciary Committee bill, legalized aliens are made ineligible for federal program benefits. The Committee, recognizing that this provision would shift all of the costs of legalization to state and local governments, adopted an amendment to reimburse these costs for a limited period of time. On the floor Representative Lungren will offer a block grant substitute to the Committee's provision. I urge you to vote against his amendment.

If the Federal Government decides to legalize 3 to 6 million persons, it should not shift the costs associated with that decision to states and localities. Representative Lungren's amendment would place states and localities in a much more vulnerable position fiscally than the current Committee language.

Representative Sensenbrenner will offer an amendment if the amnesty provisions are struck to safeguard the reimbursement provisions of the bill when it goes to conference. I support his amendment and have communicated my support both as Governor of Florida and as Chairman of the National Governors' Association's Task Force of Immigration and Refugee Issues.

If you have any questions, please contact Sandra Gammie in the Florida Washington Office at 624-7841.

With warm regards,
Sincerely,

BOB GRAHAM,
Governor.●

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BENNETT, on H.R. 7357, Immigration Reform and Control Act of 1982, in the Committee on the Whole on Saturday, December 18, just prior to Committee rising.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 1340. An act to provide for the use and distribution of Clallam judgment funds in docket numbered 134 before the Indian Claims Commission, and for other purposes;

S. 2611. An act to amend the Peace Corps Act; and

S. 3073. An act to provide for the distribution within the U.S. Information Agency film entitled "Dumas Malone: A Journey With Mr. Jefferson."

RECESS

The SPEAKER. Pursuant to the order of the House of December 17, 1982, the Chair declares the House in recess.

The House will be in recess until 12 o'clock noon tomorrow, Monday, December 20, 1982.

Accordingly (at 4 o'clock and 5 minutes p.m.), the House stood in recess until 12 o'clock noon, Monday, December 20, 1982.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. PERKINS: Committee of conference. Conference report on S. 2623 (Rept. No. 97-979). Ordered to be printed.

SENATE—*Sunday, December 19, 1982*

(Legislative day of Sunday, December 19, 1982)

The Senate met at 2 p.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Almighty God, "from Whom, through Whom and to Whom are all things, to Whom be glory forever * * *" as the work of legislation begins today, we acknowledge Thy worthiness and our need to worship Thee. Thou art the source of all and the Lord of all. We honor Thee, we magnify Thee, we glorify Thee.

Praise ye the Lord. Praise God in His sanctuary; praise Him in the firmament of His power. Praise Him for His mighty acts; praise Him according to His excellent greatness. Praise Him with the sound of the trumpet; praise Him with the psaltery and harp. Praise Him with the timbrel and dance; praise Him with stringed instruments and organs. Praise Him upon the loud cymbals; praise Him upon the high sounding cymbals. Let everything that has breath praise the Lord. Praise ye the Lord.—Psalm 150.

Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

SENATE SCHEDULE

Mr. BAKER. Mr. President, there is a vote ordered on final passage of the continuing resolution at 2:15 p.m. today. I believe that would automatically foreshorten the time allocated to the two leaders under the standing order. But I would inquire of the minority leader if he would be in agreement to shorten that time to 5 minutes each and 5 minutes, or whatever time remains, for morning business.

Mr. ROBERT C. BYRD. That is agreeable.

Mr. BAKER. I make that request, Mr. President.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, generally speaking, the schedule of the Senate today will be as follows: Recognition of the two leaders, a very brief period for the transaction of routine morning business, and vote at 2:15 p.m., on final passage of the continuing resolution.

Thereafter, instead of resuming consideration of the highway bill, by unanimous consent the Senate has agreed that no action will be taken on the highway bill, H.R. 6211, between the ending of the continuing resolution vote, which will be about 2:30 p.m., and the cloture vote which is about 6 p.m.

Now, during that period, Mr. President, it is the hope of the leadership that we can do a few things. For instance, I know many Senators wish to try to take up and pass the nuclear waste bill, which appears to be well along the way to being worked out. It has reached us from the House and I think there is good reason to hope that we can pass it in the Senate. There is the PIK agriculture bill, which appears to be in a similar situation and can probably be disposed of in a reasonably brief period of time. I also hope that we can do a calendar call. There is an accumulation of much routine business that ought to be transacted by unanimous consent, without the requirement for a rollcall.

All of these things the leadership has in mind to try to do during that time interval between the end of the vote on the continuing resolution and before the vote on cloture on the highway bill.

Mr. President, when the vote on cloture occurs at 6 p.m. and if cloture is invoked, then we will proceed with the debate on the highway bill until we finish it. And it is the firm intention of the leadership on this side to try to finish that measure, and do so today.

Mr. President, unanimous consent has been granted to set aside the highway bill, however, even in a postcloture situation, in order to receive the conference report from the House of Representatives when and if it is received from the other body. The last information I have, however, is that we are not likely to have that conference report until well into the evening today.

Mr. President, it is my hope—and I say this with some fear and trepidation because I am notoriously poor at estimating these things—it is my hope that we can finish the highway bill, that we can finish the continuing resolution conference report, and dispose of the highway bill in both Houses of the Congress, and adjourn today. Now, Mr. President, we can do that. I am not predicting we will do that, but we can do that. And I urge Senators to consider that we ought to do that.

Mr. President, if I have any remaining time, I am prepared now to yield it to the minority leader or any other Senator who seeks recognition at this point.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

THE CONTINUING APPROPRIATIONS MUST BE PASSED

Mr. ROBERT C. BYRD. Mr. President, we Democrats have consistently felt that the Senate ought to get on with the business of passing the continuing resolution. We do not feel that the Government ought to be brought to a screeching halt tomorrow. We have cooperated in every way to facilitate the passage of the continuing resolution.

We were asked by the President to come back here after the election to pass appropriations bills, and we came back with the thought that that was what the business was going to be, namely, to pass appropriation bills and the continuing resolution and adjourn by December 17.

Now, of course, we have seen all kinds of other measures brought up, including the gas bill which will put another burden on the already overly burdened taxpayer. And so we on this side of the aisle, in the face of the fact that many of us do not support that tax measure, have sought to substitute a different method of paying for repairing the infrastructure. We have sought to substitute a method whereby the more wealthy citizens of this country would be deprived for 3 years of their 10 percent cut—the third year of the Kemp-Roth tax cut which will occur in July. And that delay would more than pay for the program of infrastructure that is laid out in connection with the gas tax. We Democrats offered the amendment and that was turned down on a party line vote.

Now, even though we lost that amendment, we have not sought to delay the passage of the gas tax bill. We have cooperated in every way. There has been no filibuster on this side. The filibuster has occurred on the other side of the aisle by a handful of Members. So I want to make it clear for the record, clear for the

press, and clear for the public, that the filibuster that has been engaged in and that will be engaged in is not a filibuster by Democrats, even though many of us do not agree with a gas tax, and do not think it ought to have been brought up during this post election session. We do not think it had to be brought up. Many of us think it could have been brought up early next year. It is not a jobs bill. But, nevertheless, we have not yet in any way interposed any obstruction to the passage of that legislation.

Just 3 days ago, I believe it was, we offered to pass it within 30 minutes without any further amendments on either side. We did that in order to expedite the passage of the continuing resolution, which is absolutely necessary if this Government is not going to be brought to a halt beginning tomorrow, with great cost to the taxpayers.

So I want to make it perfectly clear that there is no filibuster and there has not been any filibuster on this side of the aisle by Democrats with respect to the gas tax. That is on the other side of the aisle, and it is by a small minority on the other side of the aisle. I do not denigrate the reasons for the opposition to the bill by the minority that is doing the filibuster. But, I want to make it clear that this side of the aisle has not engaged in any filibuster, has sought to expedite passage of the gas bill—not because all of us necessarily support it, not because all of us necessarily believe that it ought to be passed, not because we necessarily believe that it should have been brought up in this postelection session, but, in order to expedite the action on the continuing resolution, we have tried to cooperate on the gas tax bill.

I am glad that we are going to be voting on the continuing resolution at 2:15. I support the majority leader in his unanimous-consent order that was agreed to last night, with my approval. I hope that we will get on with the business of passing the continuing resolution. I further hope the President will not veto this continuing resolution so that the Government will not come to a halt and people will not see their checks delayed. And it does cost taxpayers millions of dollars for the Government or any portion of the Government to shut down for a little while and then have to start up again.

As I understand it, unless this continuing resolution is passed, 85 percent of the functions of the Government will not be funded by tomorrow or Tuesday.

I simply want to urge the Senate to get on with the passage of the continuing resolution. I hope that we can have a conference report in the early evening. I hope the President will sign that conference report. In the meantime, I intend to support the invoking of cloture on the Baker substitute amendment on the infrastructure-gas bill. I do not want to see this thing dragged on and on and on and on forever. I hope we did not come here to stay until January 3 to act on legislation that is not imperative at this moment. The one important piece of legislation right now is the continuing resolution. I hope we will do everything we can to expedite action on that.

Mr. RANDOLPH addressed the Chair.

Mr. RANDOLPH. Mr. President, I request the opportunity to make comment. I would not want to delay.

Mr. BAKER. Mr. President, has morning business been ordered?

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER (Mr. BRADY). There will now be a period for the transaction of routine morning business.

Mr. BAKER. I ask unanimous consent that it extend not later than 2:15 p.m. and that Senators may speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RANDOLPH addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

SURFACE TRANSPORTATION ACT OF 1982

Mr. RANDOLPH. Mr. President, I have been working since May of this year to bring about the passage of a highway bill with the increased gas tax to pay for the highway redevelopment, and repair of the roads, and bridges of this country. It is said that there is not support for this highway and gas tax legislation. In my opinion, Mr. President, that is not true.

We have, across this country, more than 100 leading and important newspapers which have editorially endorsed the legislation. Notably, we could mention the New York Times and the Washington Post. They have endorsed the legislation—editorially, not by carrying stories about the progress or the delay on the legislation—but editorially because it is needed.

Also, it has been said by my colleague from North Carolina in the past few hours that there was no support, and he could not give it support, here in the Congress of the United States.

I remind my colleagues that on December 7 in the House of Representatives the highway gas tax legislation passed by a majority of 119 votes. That is indicative, Mr. President, of the strong support in the other body.

I recognize the differences of viewpoint. I understand those. And I do not find fault at any time with differences in votes that are cast by my colleagues.

I do not support this legislation because I want to support President Reagan. I do not support this legislation because I want to support the administration.

I support this legislation because it is important legislation, it is necessary legislation, with the deterioration of the roads and bridges of this country going on now. It is more than 25 years since we started construction of the Interstate System in 1956. Now certainly is the proper time for the passage of this legislation before this lameduck Congress goes home.

I hope that Members will realize that there are some of us who work on this subject matter, who worked to bring a bill to the Senate with a vote of approval of 16 to 0 in the Committee on Environment and Public Works. With the action of the House that I mentioned and across this country, there is strong support.

There has been no increase in the gas tax since 1959. There is the deterioration of our network of roads and bridges. Certainly, it is not a wrong time. If it can be enacted, it is the right time.

Mr. ROBERT C. BYRD. Will my colleague yield?

Mr. RANDOLPH. I yield.

Mr. ROBERT C. BYRD. I hope my colleague was not directing his remarks to me.

Mr. RANDOLPH. I was not.

Mr. ROBERT C. BYRD. At no time have I indicated that the infrastructure of this country should not be repaired. I simply said that we Democrats did offer an alternative for the payment of that, and that some of us over here are opposed to the gas tax. My colleague may support it, others may support it, and others may not. But I have said that this is not something that is so absolutely imperative that it could not wait until January 3 when the new Congress comes back to be acting upon it.

Mr. RANDOLPH. I thank my colleague.

Mr. BAKER. Mr. President, obviously there are differences of agreement on this subject, not only across the aisle but within the confines of our two parties. I do not doubt that. But, Mr. President, finally we have to get on. I hope the Senator will permit me to ask the Chair to execute the first provision of the unanimous-consent order which provides for a rollcall vote on final passage of the continuing resolution at this time.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

FURTHER CONTINUING APPROPRIATIONS, 1983

The PRESIDING OFFICER. The clerk will state the pending business.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 631) making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes.

The Senate resumed the consideration of the joint resolution.

TUBERCULOSIS CONTROL

Mrs. HAWKINS. Mr. President, I had planned to offer an amendment cosponsored by Senators MOYNIHAN, CRANSTON, SARBANES, DIXON, and RIEGLE, to the continuing resolution to authorize $10 million in fiscal year 1984 for tuberculosis control. As you know, the House continuing resolution provides $5 million in tuberculosis funding while the Senate version only provides $2 million. Obviously I would prefer appropriating the full authorized amount $10 million for fiscal year 1984. However, I have discussed the need for additional tuberculosis funding with Senator SCHMITT, the distinguished Chairman of the Labor, HHS, and Education appropriations and he has assured me that the Senate conferees will give every consideration to a higher level of funding than the amount that is currently in the Senate continuing resolution. In the interest of expiditing the passage of this legislation, I will not offer my amendment. I have every confidence that the Senator from New Mexico will accommodate my request for additional funding for tuberculosis and I hope that the House and Senate conferees will agree to the higher level of funding for this tuberculosis control program.

Mr. President, tuberculosis is no longer the "glamorous affliction" of poets and beautiful women—as it was considered in the 19th century. It is an extremely painful, lingering disease that can be controlled and cured only by drastic measures. We are experiencing an alarming rise in reported cases of this highly infectious disease. The national case rate of TB is now 11.9 per 100,000. Miami's case rate is 87 per 100,000, the highest rate for any major city since 1977. Honolulu, Hawaii, is suffering a tremendous epidemic of tuberculosis as well.

Unfortunately, recent block grant programs to get TB under control in this country have been disastrous. Now the appropriate committees have authorized a categorical tuberculosis control grant program instead of merging it into the preventive health block grant. Despite the special attention of the authorizing committees, however, the appropriations committees chose to not fund the programs in fiscal year 1982. Not until the urgent supplemental passed over the President's veto this year were funds appropriated for tuberculosis control; $1 million were appropriated out of the $9 million authorized for fiscal year 1982.

The $1 million in funding in the urgent supplemental represented a growing awareness of the need for Federal financial assistance for TB—or so I thought. Appropriating $1 million out of $9 million was based on the fact that only 1 month remained in the fiscal year, and it was not an erroneous appraisal of the Federal funding needed for this program—or so I hoped. My wishes and hopes were disappointed, though, when the Senate Appropriations Committee recommended granting only $2 million out of the $10 million authorized for TB control in 1983. This level of funding is even less than the $5 million appropriated by the House of Representatives.

Mr. President, I believe that these kinds of reductions in funding for preventive health programs are false savings. They may purport to save money right now, but wait until the bills pour in after Christmas. By not treating these highly infectious, life-threatening diseases before they spread, the Federal and State governments will incur much higher health costs in the long run.

Extensive research shows that deemphasizing tuberculosis control will have the following disastrous effects:

First, preventive treatment of those with tuberculosis would virtually cease because essentially all preventive treatment is conducted by public tuberculosis programs. Presently, about 25,000 person per year complete a course of preventive treatment, thereby preventing an estimated 25,000 cases of tuberculosis over the next 20 to 40 years—at savings of $4.7 million per year.

Second, investigation of contacts of persons with tuberculosis would virtually cease because nearly all contact investigation is conducted by public tuberculosis control programs. Contact investigation uncovers nearly 2,000 early cases of tuberculosis. As failure to identify these cases may result in 2 additional weeks of hospitalization per case, cutting the program would cost an additional $2.8 million per year.

Third, continued progress in the control of tuberculosis, as in shorter and more effective treatment programs, promises even more savings. The number of cases will decline, the number of treatment failures and relapses will decline and the prevention of short-course chemotherapy regimes will result in savings of over $10 million per year.

Fourth, supervision of patients with tuberculosis would then have to be provided entirely by the private sector. Nevertheless, the real burden of treating these patients would continue to be borne in large part by public funds because the percent of tuberculosis patients 65 or older is 29 percent in 1980 and will rise to 36 percent by 2000.

Mr. President, in 1980, State health departments reported spending approximately $9 million in the 314(d) Federal funds for tuberculosis control. States are authorized to spend some of their preventive health block grants on tuberculosis control, but no funding was transferred to this block grant for TB. Therefore, the State health officials will have to curtail—if not eliminate—other worthy health programs to deal with tuberculosis emergencies in their States.

The American Lung Association and the American Thoracic Society, with the support of the American Public Health Association, the Coalition for Health Funding, the Association of State and Territorial Health Officials, and the American College of Preventive Medicine, have all recommended project grants for the prevention and control of tuberculosis. We cannot just ignore their advice.

Mr. President, as the distinguished Senator from New Mexico is well aware, I have been advocating appropriating funding for this important health program for some time.

FUNDING FOR TUBERCULOSIS CONTROL

Mr. MOYNIHAN. Mr. President, I rise today to urge the Congress to provide adequate funding for tuberculosis control by the Centers for Disease Control.

When Americans hear the disease tuberculosis mentioned these days, I imagine they have visions of people suffering in the ghettos of a Dickens novel or perhaps are reminded of a poem by Lord Byron. Possibly some people think of tuberculosis victims camped out on tenement rooftops in the dead of winter, following once accepted medical procedure, hoping that the cold would kill the disease in their lungs; or think of the more privileged victims, residing in elegant sanatoriums. But, tuberculosis is not a disease that ended with the 19th century. Nor is it confined to the pages of literature. Tuberculosis is a disease that continues to affect many thousands of citizens throughout our country. The Public Health Service has published a pamphlet on tuberculosis that provides an excellent description of the disease and the problems it presents. Mr. President, I ask unanimous consent that this pamphlet be placed in the RECORD, following my remarks.

Efforts by health officials around the United States contributed to a decline in the number of new cases of tuberculosis every year from the early 1950's to 1978. For the last 3 years, however, there has been no substantial decline in the number of new cases. In 1981, 27,373 new cases were reported and 1,780 persons died from tuberculosis. The case rate in large cities was 24.0 per 100,000 persons,

more than twice the national case rate of 11.9. New York annually reports the second largest number of cases of any State. In 2 of the last 3 years, New York City reported an increase in its case rate. The city reported 1,582 cases last year—the highest case total for any city in the country. Preliminary figures from the first 9 months of 1982, collected by the Centers for Disease Control, show another increase in New York City cases by about 8 percent.

Not only has the number of new cases failed to decline over the past few years, but a new and threatening problem has arisen: a strain of drug resistant tuberculosis. The first documented community outbreak of this strain of tuberculosis began several years ago in Mississippi. A second community outbreak has been discovered recently in Newburgh, N.Y. On the average, 9.4 percent of the tuberculosis cases reported in the United States are drug resistant. New York City reports 12.7 percent.

A particularly distressing fact about tuberculosis in the United States is the incidence among children. From 1976 through 1981 the incidence of tuberculosis among children did not decline. Los Angeles and New York City report the most cases of tuberculosis in children; New York City has reported increases in children for 3 of the last 4 years.

One factor that has helped to prevent a decline in the number of tuberculosis cases in the United States is the continuing entry of refugees, undocumented aliens, and other immigrants from high-incidence countries. Controlling tuberculosis has been made more difficult because of this, particularly in border and coastal cities. In 1981, 5.6 percent of new tuberculosis cases occurred in refugees; 13.5 percent of new cases occurred in Hispanic residents of the United States, many of whom are recently arrived.

The Centers for Disease Control are currently funding intense tuberculosis control and prevention activities in 12 high-incidence urban areas. These areas represent about 25 percent of the Nation's tuberculosis morbidity. This amendment will allow the continuation of these efforts and the expansion of the program to include an additional 20 to 25 State or local health departments.

Over 10 percent of the tuberculosis cases in the Nation are not being treated. Part of the reason for this lies with health departments in urban areas that lack adequate staff to provide directly observed therapy to infected individuals who are unwilling or unable to complete the course of medication that would make them noninfectious. This amendment will provide funds for the outreach staff that is needed.

The work that is being done—and will be done—by the Centers for Disease Control is relatively inexpensive and will have a significant impact on tuberculosis control in the United States. I urge the Senate conferees and my colleagues to accept the higher House level for this amendment.

There being no objection, the pamphlet was ordered to be printed in the RECORD, as follows:

TUBERCULOSIS

A century ago, tuberculosis was the leading cause of death in the United States. At that time, very little was known about how the disease was spread and how best to treat it. Tuberculosis patients were isolated from their families in sanatoriums, which represented the main thrust of the Nation's fight against this disease.

Through the efforts of researchers, physicians, and public health officials in the U.S., improvements in living conditions and the introduction of effective drug therapy have led to a dramatic and steady decline in tuberculosis deaths over the past 40 years. Today, most tuberculosis sanatoriums have closed their doors.

Because of this progress many people no longer recognize this disease as an urgent health problem. In 1979, however, 27,669 cases of tuberculosis were reported in the U.S., with 2,914 fatalities the previous year. Tuberculosis is the second leading cause of death from infectious disease in the United States and represents a massive economic burden to individuals and society.

Elsewhere in the world—especially in Asia and Africa—tuberculosis is an even more important cause of chronic disability and death. The World Health Organization estimates that there are between 10 and 12 million people in the world with active tuberculosis and another 50 to 100 million people this year who will be exposed to it. Worldwide, about 3 million die yearly from this disease.

TRANSMISSION

Tuberculosis is caused by rod-shaped organisms belonging to the mycobacteria family. In humans the major agent responsible for causing disease is Mycobacterium tuberculosis, the tubercle bacillus.

Tuberculosis is predominantly an airborne disease. The tubercle bacilli in contaminated droplets are coughed, sneezed, or otherwise put into the air by a person with active disease. These discharges in their original state are normally harmless to others because the large particles fall to the ground, are filtered out by the hairs in the nose, or are removed from the larger air passages by a protective device, the "bronchial cilia."

However, the dried residues of these contaminated droplets—known as "droplet nuclei"—may remain suspended in the air for a prolonged period of time, ready to be inhaled by a susceptible individual. This means that the area that an infectious person has occupied may remain potentially contagious even in his temporary absence. The nuclei are sufficiently small to bypass the natural defenses of an individual's upper respiratory passages and to reach the alveoli—the minute air sacs of the lungs located at the end of the "bronchial tree" (major air passages). This is where infection begins.

A single exposure to an infectious person usually does not result in infection in another individual. It normally takes prolonged exposure, such as occurs in classrooms among teachers and students or in the home environment among family members. Crowded living conditions are conducive to spread of infections. In fact, studies of epidemics in "closed environments"—such as urban ghettos, boarding schools, and penal institutions—show that one person with active disease can infect virtually all susceptible persons in his immediate surroundings.

Tuberculosis in humans can also be caused by Mycobacterium bovis, which normally infects cattle. As recently as 50 years ago, it was not unusual for children to become fatally ill or permanently deformed due to bovine tuberculosis contracted by drinking raw milk from infected cows. Pasteurization of milk and the testing of dairy herds for the disease has eliminated bovine tuberculosis as a serious public health problem in the United States. In other parts of the world, bovine tuberculosis in humans is still a serious problem.

PRIMARY INFECTION

After the tubercle bacilli are inhaled, they begin to multiply very slowly in the body. Some remain at the initial site of infection—the alveoli (or small air sacs of the lungs)—while others enter the nearby lymph nodes and bloodstream. Within a few days, the organisms are carried to most parts of the body.

During the first stage, white blood cells called phagocytes, attack and kill bacilli in the bloodstream. But bacilli outside the bloodstream, especially in the lungs, flourish and continue to grow. Two to ten weeks after initial infection, the individual develops "tuberculin hypersensitivity." This is simply an allergic reaction in which specific white blood cells, called lymphocytes, react to the tubercle bacillus or to its proteins, known as "tuberculins." These proteins are used in the so-called "tuberculin skin test" to detect infection in an individual. The response of the lymphocytes to tuberculin is involved in the development of a localized inflammation and the activation of a particular type of phagocyte, called a macrophage.

When the bacilli are engulfed by macrophages, they in turn, are surrounded by layers of other cells to form the characteristic mass of cells, or tubercle, which gives tuberculosis its name. This initial lesion is called a primary tubercle. Some of the bacilli in the macrophages die; others remain dormant for many years.

Once this allergic reaction is established in an individual, he will give a positive reaction to a tuberculin skin test. There are 15 million people in the United States who are "tuberculin positive reactors," according to the Center for Disease Control (CDC).

ACTIVE DISEASE

In more than 90 percent of the persons who are tuberculin positive reactors, the tubercle bacilli cause neither signs nor symptoms of illness. In those few positive reactors in whom the disease does become active, this event may occur immediately after the initial infection or, more commonly, many years later.

Primary tuberculosis can progress to active disease in several ways. In general, after the primary tubercle has healed, the lesion becomes calcified. If healing is imperfect or if the bacilli kill the cells containing them and multiply more rapidly than the host's defense can contain them, the bacilli spill out, become reengulfed by new macrophages, and start new tubercles as satellites

to the original ones. In the process, macrophages and other tissue and blood cells that are killed form a soft, caseous (cheese-like) mass that is discharged into an adjacent air passage, leaving a cavity in the lung. The formation of a cavity in the lung is the turning point for the individual as well as his close contacts. Astronomical numbers of disease-causing bacilli are released daily from a cavity into the air passages. Once there, they are expelled into the air in droplets, which can then infect a noninfected person. Thus, the chain of infection-disease-infection is perpetuated.

The most severe form of the disease occurs when the bacilli spread beyond the lungs to the other organs, such as the bones and kidneys. When this dissemination results in multiple tubercles in the lungs, liver, and other organs, a diagnosis of milary tuberculosis is made. Prompt treatment is necessary when infection of the lining membrane of the brain causes meningitis.

HIGH RISK GROUPS

In 1979, there were fewer than 28,000 persons with new, active cases of tuberculosis in the United States, according to the CDC. In most of these individuals, the disease is an activation of an earlier latent infection. However, a few thousand of the new active cases occur in persons who were previously negative tuberculin reactors but who contracted active disease as a result of a recent exposure to infectious patients. Several thousand persons who have previously been treated for tuberculosis also suffer relapses every year.

One of the most puzzling aspects of tuberculosis is why an infection occurs, subsides, and later flares up in some persons, but not in others. Efforts are being made to identify those groups of individuals who run a high risk of contracting tuberculosis. Most Americans already infected with M. tuberculosis are in the older age groups and most reported active disease occurs in persons over the age of 45, especially males. However, children and infants with their immature immune systems are especially vulnerable, and the disease often spreads more rapidly in them than in adults.

Socioeconomic factors, such as low income, substandard housing, crowded living conditions, and inadequate health services contribute to the spread of any infectious disease, including tuberculosis. In the United States, these conditions are particularly prevalent among the poor, regardless of race. A study of 55,000 American Indians in the Southwest showed that the incidence of tuberculosis in these tribes is eight times the natoinal rate. Migrant farm workers are also heavily affected.

Geographically, tuberculosis is more common in large cities, especially in the inner city ghetto areas. In the past 10 years, the case rate in cities with populations greater than 250,000 has been double that for the rest of the country.

Scientists speculate that tuberculosis can be reactivated when a person's immune system becomes impaired by disease or for other reasons. That may be why certain medical conditions are frequently associated with tuberculosis. These include diabetes, immune deficiency diseases, and chronic lung diseases, such as silicosis and asbestosis. Alcoholics also have an unusually high rate of tuberculosis.

SYMPTOMS AND DIAGNOSIS

The vast majority of persons with a primary tuberculous infection do not have any symptoms. Occasionally, there may be a slight fever, a skin reaction, or a general feeling of discomfort that marks the development of tuberculin hypersensitivity. These symptoms usually disappear, and the infection enters a dormant stage.

The active stage of tuberculosis is marked by an insidious onset—again with vague symptoms that may go unnoticed by the individual. These may include fatigue, nervous irritability, weight loss, fever, chilliness, night sweats, loss of appetite, or a "cold" that hangs on. Coughing is uncommon in early phases of the disease. Two severe symptoms—hemoptysis (spitting up of blood or blood-stained sputum) and chest pains—are surprisingly uncommon. Shortness of breath does not usually occur until the lungs are extensively damaged.

Physicians use several factors to diagnose tuberculosis, including a history of symptoms, physical signs, microscopic examinations of the patient's sputum, a chest X-ray, and a tuberculin test. The sputum of the patient is studied primarily to isolate the tubercle bacilli and also to distinguish Mycobacterium tuberculosis from other mycobacteria, some of which cause diseases that are difficult to differentiate from tuberculosis.

DETECTION OF INFECTION

Tuberculin test and chest X-rays

Close to 80 percent of the newly diagnosed tuberculosis patients in the United States first come to physicians or health workers because of symptoms. One of the major goals in controlling tuberculosis is to detect such people before they infect others. This is where the tuberculin skin test plays a valuable role.

Several tuberculin tests are available in the United States, but the Mantoux test is probably the most satisfactory and widely used. In this procedure, a physician injects between the layers of the skin the purified proteins (tuberculins) isolated from the tubercle bacilli. If the person has been infected with tubercle bacilli previously, an allergic reaction occurs within 48 to 72 hours, resulting in a hard, red, raised spot at the injection site. The size of the hardened area is significant. An area of 10 millimeters (about one-half inch) or greater in diameter indicates a positive reaction.

The tuberculin test can also be performed with multiple puncture techniques such as the tine test. The major use of this test is in large-scale screening programs.

Despite its usefulness, the tuberculin test has certain limitations. Most importantly, it makes no distinction between a person who is merely infected with tubercle bacilli and a person who has an active disease. If a physician finds a positive reaction, he may order a chest X-ray to find out if the person has an active disease.

False positive and false negative reactions sometimes occure in the tuberculin test. False postive reactions may occur in people infected with "atypical" mycobacteria, a group of closely related organisms that have certain properties in common with M. tuberculosis. False negative reactions occur under a variety of circumstances, including improper test methods or when the individual has an underlying disease, has been vaccinated recently with a live virus vaccine, or is on immunosuppressive drugs.

In the past, another major means of screening people for tuberculosis was the chest X-ray. Today, the incidence of tuberculosis has declined to the point where street corner X-raying is no longer widely used because too few cases are found to warrant the time, expense, and risk of multiple exposures to X-ray.

Some groups, however, should be X-rayed routinely to detect active disease. These include prison inmates, ghetto residents, contacts of infectious people, and immigrants from countries where the disease is prevalent. In addition, there are "danger" groups—people who are not ncessarily at a greater risk of having tuberculosis, but who are in a position to transmit it to others if they are infectious. These groups include adults working with children, such as school teachers and bus drivers, and health personnel (doctors, nurses, medical students, hospital employees).

Through a combination of selective tuberculin skin testing of children at the time of school entry and chest X-rays of high risk and danger groups, the vast majority of persons with active tuberculosis in America could be detected and treated. Then, the relentless cycle of infection-disease-infection could be broken.

TREATMENT OF ACTIVE DISEASE

The discovery of specific drugs to treat tuberculosis, beginning with the antibiotic streptomycin in 1944, marked a new era in controlling this disease. Prolonged bed rest in sanatoriums is no longer generally necessary. Although a patient may be treated in a hospital, he may be discharged safely—possibly within a few weeks—when organisms can no longer be easily detected in his sputum.

Even though a person's sputum may become free of organisms in a matter of weeks, drug treatment of tuberculosis should be continued for 18 months to 2 years. The drugs have little effect on dormant organisms, known as "microbial persisters." Therefore, an adequate drug level must be achieved to handle these persisters when they emerge from dormancy and start to multiply.

Another problem with drug therapy is the likelihood that some bacilli may be resistant to a particular drug. To reduce the possibility that these bacilli might survive a one-drug regimen, doctors usually prescribe combinations of two or more antituberculosis drugs.

Isoniazid, streptomycin, rifampin, ethambutol, and para-aminosalicylic acid are the primary medicines used in the treatment of tuberculosis. Of these, isoniazid is probably the best and most valuable of the currently available drugs. It is easy to administer (by mouth), it has few side effects, and it is inexpensive. The combination of isoniazid and one of the other drugs, such as ethambutol or rifampin, has had excellent results in the treatment of tuberculosis patients.

Today, the principal cause for failure of therapy is the failure of patients to take medications as prescribed or to take them for an adequate period of time. Scientists are now conducting trials that might lead to a shorter duration of treatment and still produce high rates of cure. Therapy using daily doses of isoniazid and rifampin for a minimum of 9 months have shown promise as an acceptable alternative for adults with uncomplicated tuberculosis. After an initial phase of chemotherapy, which ranges from 2 weeks to 2 months, therapy should be continued taking a daily or twice-weekly dose of isoniazid and rifampin. Patients should remain under surveillance for 12 months after completion of therapy.

The use of short course regimens is suitable for those patients with high-resistant organisms, for treatment of para-pulmonary tuberculosis or for pulmonary disease in patients with complicating medical problems.

The usefulness of these regimens in the retreatment of patients is also unproven thus far.

PREVENTION

Tuberculosis is largely a preventable disease. In the United States, prevention has focused on identifying infected individuals—especially those who run the highest risk of developing active disease—and treating them with drugs.

Chemoprophylaxis (the use of drugs to prevent disease) is primarily accomplished with isoniazid, which is taken daily for 1 year. A multiple drug regimen is not necessary in preventive treatment, since there are relatively few tubercle bacilli present in an infected person, in contrast to the hundreds of thousands of organisms in a person with active disease.

Every person who has a positive tuberculin skin test is at some risk of developing active disease. Public health officials highly recommend preventive therapy for six groups of individuals who run the highest risk of contracting active disease. They are household contacts—both tuberculin negative and positive—of persons with active disease; persons who have recently shown a conversion in their tuberculin skin test from negative to positive (indicating recent infection); persons with previously known tuberculosis, now inactive, who have not had adequate chemotherapy; positive tuberculin reactors with abnormal lung findings in their chest X-ray; positive tuberculin reactors less than 20 years old; and people with a positive tuberculin test who have certain underlying medical conditions (such as diabetes, leukemia, or Hodgkin's disease), who have had a gastrectomy, or who are receiving immunosuppressive drugs.

Persons undergoing chemoprophylaxis should be supervised by a physician because of the possibility of developing isoniazid-related liver disease. The risks are small, however, and seem to vary considerably, depending on a variety of factors, especially age. The risk is highest for those more than 35 years old.

Taken as directed by a physician, isoniazid is 90 percent effective in preventing development of active disease. One of the major problems, however, has been motivating people to continue taking the drug for the required length time.

BCG VACCINATION

Although isoniazid is preferred in the United States as a means of preventing tuberculosis, vaccination is widely used in many parts of the world.

In 1922, the first vaccine against tuberculosis, known as bacille Calmette-Guerin (BCG), was tested in man. This vaccine was prepared from a strain of Mycobacterium bovis by two French scientists, Albert Calmette and Camille Guerin, who were able to weaken the virulence of the original organisms over a period of many years. Today, all existing BCG vaccines are derived from this attenuated strain.

The rationale behind BCG vaccination is based on the finding that the response to a first infection with the tubercle bacillus differs from the response to a subsequent infection. The second infection is much more easily held in check by the body than the first infection—which often progresses directly to active tuberculosis—and so it appears that the host acquires some immunity from the primary infection.

The aim of BCG vaccination is to replace the potentially harmful natural primary infection with an innocuous, artificial primary infection. The hope is that this will enhance resistance to a subsequent virulent infection. The persons sought for BCG vaccination are those individuals who have never had a primary infection.

Chemoprophylaxis, on the other hand, is geared mainly to those individuals who have already been infected. Most individuals in the United States who develop tuberculosis have already had a primary infection. For this reason, a mass program of BCG vaccination has not been recommended by the Public Health Service in the United States.

BCG vaccination may be of major value in areas of the world, particularly developing countries, where the incidence of tuberculosis infection is still high. In one recent year, in 38 African and Asian countries, more than 31 million vaccinations were given, primarily to newborn infants and school children.

BCG vaccination has aroused a great deal of interest among researchers and physicians for its ability to stimulate protection against diseases other than tuberculosis. BCG vaccination is being used in therapy of certain kinds of cancer, such as acute myelogenous leukemia. however, much research remains to be done to learn how BCG induces such nonspecific protection.

THE NIAID RESEARCH PROGRAM

Tuberculosis research is carried out by scientists supported by NIAID grants and contracts, at universities, medical schools, and other institutions. NIAID grantees are intensively investigating the basic mechanisms involved in delayed hypersensitivity and the immune response to tubercle bacilli. For example, at the National Jewish Hospital and Research Center in Denver, Colorado, NIAID-supported researchers are studying the primary antigen-antibody reactions in tuberculosis. Knowledge gained in these studies may lead to an understanding of how the body tries to protect itself against an invasion of tubercle bacilli.

One of the major problems in tuberculosis research is the lack of precise knowledge concerning the identity and bilogical significance of tubercle bacilli antigens. It is known that mycobacterial lipids (fats) play an important role in stimulating cellular immunity in the body, the type of immunity responsible for combating tuberculosis bacteria. NIAID scientists and grantees have been trying to separate, isolate, and chemically define the structure of lipids in the mycobacterial cell wall. One outgrowth of their efforts has been the development of a new technique, microparticulate centrifugal chromatography, that offers a simple, rapid, and clean separation of closely similar compounds.

Delayed hypersensitivity in tuberculosis is a prototype for many kinds of cellular reactions, including transplant rejection. NIAID grantees are therefore trying to identify and understand each step in the series of complex events that result in this delayed-type reaction.

Because early efforts in tuberculosis research were hampered by a lack of standardized materials and methods, the U.S. Japan Tuberculosis Panel secured—through contracts—essential standardized materials to meet the needs of qualified investigators in the field. Under NIAID contract, the National Jewish Hospital and Research Center makes available cultures of more than 165 strains of biomedically important mycobacteria that are well characterized for biomedical characteristics and virulence. They also provide standard sets of antisera suitable for serotyping certain groups of mycobacteria.

The PRESIDING OFFICER. Under the previous order, the question is, Shall the joint resolution pass? The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

I further announce that, if present and voting, the Senator from Pennsylvania (Mr. HEINZ) would vote "yea."

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Washington (Mr. JACKSON), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) would vote "yea."

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PELL) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 63, nays 31, as follows:

[Rollcall Vote No. 455 Leg.]

YEAS—63

Abdnor	Ford	Melcher
Andrews	Garn	Metzenbaum
Baker	Glenn	Moynihan
Bentsen	Gorton	Murkowski
Biden	Hart	Packwood
Boschwitz	Hatch	Percy
Bradley	Hatfield	Quayle
Brady	Hawkins	Randolph
Bumpers	Hollings	Riegle
Burdick	Huddleston	Rudman
Byrd, Robert C.	Inouye	Sarbanes
Cannon	Jepsen	Schmitt
Chafee	Johnston	Simpson
Chiles	Kassebaum	Specter
Cochran	Kennedy	Stafford
Cohen	Leahy	Stennis
D'Amato	Long	Stevens
Danforth	Lugar	Thurmond
Dole	Mathias	Tower
Domenici	Mattingly	Tsongas
Durenberger	McClure	Weicker

NAYS—31

Armstrong	Exon	Nunn
Baucus	Grassley	Pressler
Boren	Hayakawa	Proxmire
Byrd, Harry F., Jr.	Heflin	Pryor
	Helms	Roth
DeConcini	Humphrey	Sasser
Denton	Kasten	Symms
Dixon	Laxalt	Wallop
Dodd	Levin	Warner
Eagleton	Mitchell	Zorinsky
East	Nickles	

NOT VOTING—6

Cranston	Heinz	Matsunaga
Goldwater	Jackson	Pell

So the joint resolution (H.J. Res. 631), as amended, was passed.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I move that the Senate insist on its amendments and request a conference with the House and the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to, and the Chair appointed Mr. HATFIELD, Mr. STEVENS, Mr. WEICKER, Mr. MCCLURE, Mr. GARN, Mr. SCHMITT, Mr. COCHRAN, Mr. ANDREWS, Mr. ABDNOR, Mr. KASTEN, Mr. D'AMATO, Mr. MATTINGLY, Mr. RUDMAN, Mr. SPECTER, Mr. PROXMIRE, Mr. STENNIS, Mr. INOUYE, Mr. HOLLINGS, Mr. EAGLETON, Mr. CHILES, Mr. JOHNSTON, Mr. HUDDLESTON, Mr. BURDICK, Mr. LEAHY, Mr. SASSER, Mr. DECONCINI, and Mr. BUMPERS, conferees on the part of the Senate.

Mr. BAKER. Mr. President, seldom have I been more enthusiastic in rising to complement the managers of the bill than I am on this occasion. I wish to extend my sincere congratulations to both the chairman of the Appropriations Committee and the ranking minority member, Senator PROXMIRE, for their good work and the diligence and patience in bringing this matter to a conclusion.

I add a special note of thanks for the sterling efforts by the distinguished junior Senator from North Carolina to make his views felt and to arrange the sequence of the proceedings of the Senate so that he had indeed, as he has had, an opportunity to make his valued views fully heard in the Senate and still permit us to proceed as we have just done.

Mr. President, this has been a monumental undertaking. The time spent in consideration of House Joint Resolution 631 as of 2:38 p.m. today is 41 hours and 40 minutes of the time of the Senate. There has been 33 rollcall votes, and we have not yet been able to count the number of amendments.

Mr. President, the conferees are making good progress. They were until this moment, of course, unofficial conferees, but they met in good faith this morning at 10, and they were received by their colleagues and counterparts in the House of Representatives and dealt with efficiently and I am told by the chairman of the committee that there is some hope that they will be able to finish their work tonight but that it is not possible in his view that the House of Representatives will receive the conference document for action until tomorrow.

That means that it will be some time tomorrow after the House acts befor the Senate can act on the conference report.

We will, of course, take up the conference report when we can get it.

Between now and 6 p.m., there are a number of matters that may come up. I will yield the floor in a moment. But at 6 p.m. there will be a cloture vote on the Baker substitute to the highway bill.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. BAKER. I yield.

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, there are a number of housekeeping items and other measures that could be taken care of by unanimous consent, I assume, during the day.

I would hope that we would utilize this time to do that. Otherwise, the majority leader and I will be around at 12:30 or 1:30 in the morning one day while everyone else has gone home.

Mr. BAKER. My lifetime quota of 12:30's and 1:30's is about to be exhausted.

Mr. ROBERT C. BYRD. Mine have long been exhausted.

Mr. BAKER. I agree absolutely.

I asked my cloakroom staff to have that file of routine matters, and I suggest to the minority leader if it is suitable to his schedule about half an hour from now or about 3:30 p.m. we try to get to them.

Mr. ROBERT C. BYRD. I would like to do that. I personally do not think there is anything of major importance that can be brought up this afternoon.

Mr. BAKER. Mr. President, let me hasten to readjust that. Let me say to my friend the minority leader that I am reminded by the Senator from Idaho that he wants as much time as he can on a couple of matters that he wishes to try to get up.

Mr. President, I suggest that we try to do this at 5 p.m. instead of 3:30 p.m.

Mr. ROBERT C. BYRD. When the majority leader yields the floor I wish to get the floor.

Mr. BAKER. I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, as I was about to say, I do not think that we should use this Sabbath afternoon in attempting to pass major legislation. I do not think there is going to be any major legislation passed this afternoon.

We have the continuing resolution, and that is the one imperative measure that we should pass and get out of here because that will keep this Government from coming to a halt and it will certainly keep a lot of recipients of checks—social security, veterans, military, and otherwise—from being delayed in receiving of their checks. That measure has now been passed by the Senate and, of course, we are going to vote on the cloture motion on the gas bill later today.

But as far as I am concerned I say again, while many of us on this side do not think that it is absolutely necessary during this lameduck session, that we pass that gas tax bill, we have cooperated in every way with the majority. We offered it to the majority on a silver platter 3 days ago: No further amendments on this side and on the Republican side and a vote within 30 minutes.

The majority caucused and rejected that offer and now we are having to stay around on Sunday, as a result, and go through all these cloture votes because of a filibuster on the gas tax bill that has not been joined in by anyone on this side. Even though some of us may not vote for the bill and may not support the gas tax—and we did offer an amendment that was an alternative to the gas tax that was offered and defeated—we Democrats have not joined in the filibuster.

Mr. JOHNSTON. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. That filibuster is being carried on by a small minority of the other side, and in the meantime I think we should limit our efforts to the continuing resolution, the cloture that is coming up, and minor bills on which unanimous consent can be given and we pass only noncontroversial bills.

Those bills of major controversy we know are not going to pass this afternoon. I do not know why we stay around here and work on those matters when they are obviously not going to pass.

Mr. JOHNSTON. Mr. President, will the Senator yield?

Mr. LONG. Mr. President, if the distinguished Senator will yield, may I say to the distinguished leader that I believe I agree with exactly what he is saying. I wish to make it clear.

I personally think those on this side of the aisle should vote for cloture if the majority leader moves for it, and especially those who favor the bill should vote for cloture. Those who reported it out of committee should vote for cloture, and we should get cloture on the bill, and some of us should stick around here to help make a quorum.

I think the primary burden falls on the majority leader's side of the aisle. But I would hope we do not think on our side of the aisle that we can vote against cloture and not lay ourselves open to the charge that we are cooperating by helping the filibuster to continue. In my judgment, if we do not vote for cloture we will be viewed, and I think rightly, as cooperating with that filibuster.

Now, I want to get out of here but, at the same time, I do think it is fair to ask that we pass these two bills, the highway bill that we had more or less agreed we were going to pass, as well as the continuing resolution. I hope we will make a real effort, at least to the extent of cooperating with the majority leadership to break this filibuster, if it can be broken.

Mr. ROBERT C. BYRD. There is nobody on this side of the aisle that I know of, who does not know we are going to cooperate with the majority leader in getting cloture today. Everybody knows we are going to vote for cloture today, and I promised him, and I am going to be good to my word, and he knows that, and we have talked that among ourselves, and he knows many of us Democrats are going to give him the votes needed on cloture today.

Mr. JOHNSTON. Mr. President, will the Sentor yield?

Mr. LONG. Mr. President, will the Senator yield? Having said that, I want to agree wholeheartedly with the leader that other than that we should not pass anything except by unanimous consent.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. I really think we should put things in perspective just for the moment. There is no order that any meaure will be brought up in this time period. That is not part of the unanimous-consent request. The only provision is that time will be available to do whatever the Senate will agree to do.

Now, Mr. President, I have not tried to force the Senate to take up other matters. I have said time and again we are going to pass, if I can possibly do it, we are going to pass, the continuing resolution and we are going to pass the highway bill, and I hope we can do these two things. But I am not trying to insist we do something else. That is up to the Senate. I know the Senator from Idaho wants to take up this measure. I know perhaps others do not, I have been told by some Members of this side of the aisle, and that is just a ball I am going to throw up in the air and see what happens, because at 6 o'clock, under the order, we are going to vote on cloture.

But there is one matter I really hope the minority leader and the Senator from Ohio will consider. I have not checked this. There are hundreds of amendments at the desk that could be called up after cloture is invoked on the highway bill that were filed on the Democratic side, and I would hope those Members will consider withdrawing those measures. Of course, as the minority leader knows, under the precedents he set, which I helped him to set, any Member can call up those amendments. So I agree, Mr. President, the minority leader has been cooperative. I accept his assurance to me that there is strong support on his side for cloture. He understands that I am going to try to pass the tax bill. I surmise that he is not going to vote for it, and I regret that, but neither one of us is going to try to impede the will of the Senate.

I am telling you now I have no desire to add to the agenda. I am simply providing this 3-hour timeframe in which Members can try to do whatever the Senate is willing to do.

Mr. METZENBAUM. Mr. President, will the minority leader yield?

Mr. ROBERT C. BYRD. I yield, with the understanding that I do not lose my right to the floor.

Mr. METZENBAUM. I ask the minority leader as well as the majority leader, is it not a fact that the minority leader has made the point that we are prepared to vote on cloture, which is to be voted on at 6 o'clock? The minority leader is prepared to vote on all those unanimous-consent measures agreed to on both sides of the aisle, housekeeping details, but that absent that this floor should not be open for anybody to grab the floor and make some of us hold the floor indefinitely until 6 o'clock, and particularly on a Sunday afternoon, and that it seems to me that that is not the proper legislation procedure.

I agree totally with the minority leader. Anything that has to come up by unanimous consent, housekeeping, fine. Then this body, as I see it, ought to be in recess because we are not going to get anything accomplished unless there is some reason we cannot be in recess or a quorum call.

Mr. BAKER. Mr. President, will the minority leader yield to me?

Mr. ROBERT C. BYRD. I yield with the understanding that I not lose the floor.

Mr. BAKER. I make that request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have been here and have heard the minority leader, when he was majority leader, point out to me that only one person has the responsibility for setting the schedule of the Senate, and that is one of the responsibilities of the majority. We set a unanimous-consent agreement early this morning that provides for this window.

No business is provided during that period, but I respectfully suggest to the Senator from Ohio it would not be appropriate at this time, it would not be fair, frankly to Members who have things they would like to do during that window to recess and to deprive them of that opportunity.

Once more I say I am not trying to force any issue. I am not trying to do that. I have not done that in the unanimous-consent agreement. What I am trying to do is to say that between now and 6 o'clock we will do whatever the Senate will agree to do.

Mr. LONG. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I have the floor, and I yield with the understanding that I not lose the floor.

Mr. LONG. I just want to remind——

Mr. ROBERT C. BYRD. I yield to the Senator for that purpose only and without losing my right to the floor, and I ask the Chair to protect that right.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. It seems to the Senator from Louisiana that it would be very unfair at this point, when everybody knows that you cannot pass anything over the objection of a single determined opponent, other than these two bills—it seems to me that at this point, it would be unfair to put any other Senator who is trying to help cooperate and get these two bills passed and get us out of here in position where he has got to stand up here and talk for 2 or 3 hours against any one of these other bills. He will be opposing a bill which everybody knows is not going to pass, and the only way for it to pass is if he runs up the white flag and gives up. He knows very well that at this point he has everything on his side. All he has to do is to speak for 3 hours, and I do not know anybody here who cannot make a 3-hour speech in the Senate of the United States. It takes that long just to warm up. [Laugher.]

If the leader wants to have an order that any Member who wants to can get up and say what a sad travesty it is if a particular bill is not passed, here he has brought the bill up to this point and the Senate should not adjourn until his bill has been passed and sent down and signed by the President or if need be, the veto overridden—if the leader wants to permit that, I would not object to that. I do not believe that Mr. METZENBAUM would ovject to that.

But we should not bring up a measure that cannot possible pass. I do not mind if Mr. MCCLURE wants to make a speech for his bill; that is all right. I just do not think we ought to force other people to speak on his bill.

Mr. McCLURE. Mr. President, will the distinguished minority leader yield for a moment without losing his right to the floor?

Mr. ROBERT C. BYRD. I yield.

Mr. McCLURE. I thank the Senator for yielding. I understand the concerns expressed by a number of people with respect to the procedure this afternoon. We have been struggling for weeks for an opportunity to consider a bill that has a great deal of interest to Members on both sides of the aisle. We have made a lot of accommodations with a lot of different Members on both sides of the aisle and in the other body to try to get that bill into a posture where it can be passed.

It is not on the Consent Calendar because there are a lot of people who have concerns about it, but we will never know whether or not we have resolved the problems that remain in

the minds of at least one or two unless we have the opportunity to bring it up under the format in which indeed it could be passed if they have no objection.

I have no illusions about the fact that we could force it to any kind of passage. If there is determined opposition it will fail. I know that. But it seems to me we ought not to at the outset be precluded from the opportunity of exploring whether there is consensus on the bill.

Mr. METZENBAUM. Mr. President, would the minority leader yield to me without losing his right to the floor?

Mr. ROBERT C. BYRD. Under the same conditions.

Mr. METZENBAUM. I am not addressing myself to the Senator from Idaho's particular measure, which is not of particular concern, but there are other Members to whom it has major concern.

My position is we ought not to be taking up any major legislation this afternoon unless there is unanimous consent. As a matter of fact, as the distinguished chairman of the Energy Committee knows, his measure does need unanimous consent to get to the floor because it has to lay over for 1 day, and it has not laid over for 1 day.

I just think when the majority leader is asking me to take down my amendments, which are postcloture amendments, and I have indicated even last night that I was very much prepared to consider doing just that but I wanted to be certain that a number of measures about which I have stong concerns have met their total death in this session, and we need not concern ourselves on a minute-by-minute basis.

Until I get that assurance, those amendments are going to remain in place. When I get that assurance, then the Senator from Ohio will be totally cooperative.

Mr. McCLURE. Will the Senator from West Virginia yield without losing his right to the floor?

Mr. ROBERT C. BYRD. Yes.

Mr. McCLURE. Let me say to the Senator from Ohio that if it is a matter of fact we can get to the consideration of the nuclear radioactive waste storage bill, I suspect you do not have to worry about anything else.

Mr. METZENBAUM. It is my understanding the Senator needs unanimous consent. And I have no objection if it is by unamimous consent to take up anything this afternoon.

Mr. McCLURE. I understand that. I hope we can get unanimous consent. I do not know that we cannot get unanimous consent, except, as indicated to me that there is a concern about the bill in the way they do not want to consent. They would vote against it. They might even argue against it, but they do not want to obstruct its passage.

Mr. METZENBAUM. My point is that no Member of this body, on Sunday afternoon at 3 p.m., should be forced to debate any particular measure other than the two measures that are of a major concern to this body.

Mr. McCLURE. I understand. But I do not want to say either that on a matter of this kind, Members would be precluded of the opportunity to discuss a matter of this kind even though it might be involved in the kind of debate that resolves some issue by way of colloquy, by way of legislative history, by way of minor amendment, if that is what they should be, that do not make major changes.

The junior Senator from Louisiana has worked his heart out in aiding me to get to this point. The Senator from Washington (Mr. JACKSON), who is unavoidably not here today, is equally interested. The senior Senator from Mississippi (Mr. COCHRAN) is vitally interested in this bill.

We had a meeting with the Governors' representatives last night in which they said they badly need the legislation. We have that kind of a concern from a lot of different places. But I cannot tell you at this point that we have unanimous consent for the consideration or agreeing to the bill. But I still think it is of great enough importance to the Nation that we ought to be able to see whether we can develop that consent.

Mr. LONG. Will the Senator yield to me?

The PRESIDING OFFICER. The minority leader has the floor.

Mr. LONG. Will the Senator yield to me for a moment?

Mr. ROBERT C. BYRD. Yes.

Mr. LONG. Mr. President, let me make myself clear. I have no objection to Mr. McCLURE's bill. It is perfectly all right with me to bring it up. This Senator is concerned about some other bills, some that I call real dogs. As to the real dogs, I would be serving this Nation well if I sought to keep them from ever being enacted. Some of those are around here, and some Senators are determined that they do not pass.

This Senator does not want to be caught in a situation where some provision like that slides through as an amendment to some other bill. There are all kinds of ways you can pass a bill. It does not need to be a bill that somebody is looking for. It could be something else that slides through by unanimous consent.

But I am willing to give consent as to those bills we are going to pass by unanimous consent. They can come up.

But I do feel that it is fair for us to ask that we be protected against action on the bills that we do not want to have brought up and which no one says are going to be brought up.

Mr. SARBANES. Will the minority leader yield?

Mr. ROBERT C. BYRD. Mr. President, I promised Mr. DOLE next. I will first yield to him and then I will yield—I do not intend to hold the floor—to the Senator from Maryland.

Mr. DOLE. Mr. President, if the Senator would yield without losing his right to the floor, first, I would like to make the point, as one of those interested in the gas tax bill, that I hope we can conclude action on this, final disposition not only here, but final disposition.

And I remind my colleagues it contains a very important provision initiated by the distinguished Senator from Michigan (Senator LEVIN) on unemployment compensation. And I can assure Members on both sides that if we go to conference we are going to insist that that remain in the bill, because it was done in good faith. And because it was done in good faith, there was an overwhelming vote for it. And that is just one of the features in that bill that I know the distinguished minority leader and everybody in this Chamber are concerned about.

Beyond that, it would seem to me that there is some reason for optimism that things might go rather quickly. I do not know what the reason is, but there has to be some reason for optimism.

In addition, it is snowing outside and I understand the zoo is closed. There is no other place to be. You might as well be in the U.S. Senate.

We can take up a number of bills, particularly the farm bill should be addressed today. Speaking in the absence of the distinguished chairman of that committee, that is an important piece of legislation to Members on both sides of the aisle. So I would hope that that might be something we could consider unless there is strong objection. I know of no strong objection to that.

Mr. SARBANES. Will the Senator yield?

Mr. ROBERT C. BYRD. Mr. President, I understand the Senator's concern. We have been kept up night after night and into the wee hours in the morning and we have work in our offices that we could be doing if we did not have to all stay on the floor.

Mr. SIMPSON. Will the Senator yield?

Mr. ROBERT C. BYRD. I yield the floor.

Mr. SIMPSON addressed the Chair.

The PRESIDING OFFICER (Mr. DENTON). The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I would hunch that probably in my time in the U.S. Senate, which is less than 4 years, that I have taken on some interesting tasks as chairman of the Veterans Affairs, Immigration, and Nuclear Regulation. But let me say, Mr. Presi-

dent, that in my time as chairman of the Subcommittee on Nuclear Regulation—and when I came here I served under Senator HART as chairman of that committee and now he is the ranking member—there is a bill to be presented before you today which is of extraordinary importance, and that is a nuclear waste bill.

I have watched Senator MCCLURE, Senator JOHNSTON, Senator JACKSON, and Senator DOMENICI, and I have watched Congressman DINGELL, I have watched Congressman OTTINGER and Congressman BROYHILL putting together this package. It is not in a formal conference. It has been through serious negotiations.

For the first time in 34 years, we have the opportunity to do something with one of the greatest national issues of our time. And I can tell you the continuing resolution and the gas bill will pale into insignificance unless we do something about nuclear waste.

It does not matter whether you are pronuclear or whether you are antinuclear. There will be no more nuclear industry until we deal with nuclear waste. And for the first time, after the most extraordinary negotiations that have been going on now for about 3 weeks with the House and Senate, we are very, very close. Here now is the opportunity to address it.

There are some here who are resisting it, certainly. But let us find out. It seems so curious to me that while we talk about this stable of sleek greyhounds like the gas bill and the continuing resolution, you are taking your eye off the rabbit. And the rabbit is a nuclear waste bill for the first time in the history since we had the Atomic Energy Commission created, this remarkable and awesome force.

So here is the most important issue that we will deal with. I hope that that might rest as a consideration for my colleagues.

Mr. BAKER. Mr. President, could I inquire of the minority leader if he might be in a position to clear for action at this time the Interior appropriations conference report, which is here?

Mr. ROBERT C. BYRD. Yes; I think that is an item that should be done. That was one of the purposes for our returning postelection. I fully agree and have no objection.

Mr. BAKER. I thank the minority leader.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1983—CONFERENCE REPORT

Mr. BAKER. Mr. President, I ask the Senate now to proceed to the consideration of the Interior appropriations conference report, H.R. 7356.

Mr. PROXMIRE. Mr. President, I did not hear the majority leader.

Mr. BAKER. The Interior appropriations conference report.

Mr. PROXMIRE. I have no objection to that.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7356) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 17, 1982.)

Mr. MCCLURE. Mr. President, I am pleased to bring before the Senate the conference report on the fiscal year 1983 appropriations bill for the Department of the Interior and related agencies. The House overwhelmingly approved the conference agreement earlier today, I think now yesterday.

The new budget authority contained in this bill is $7,501,153,000. This agreement represents a decrease of $81,717,000 below the amount proposed by the House and an increase of $25,984,000 above the amount proposed by the Senate. Adding to the bill the effects of the first continuing resolution, the total budget authority recommended by the Interior Appropriations Subcommittee is $7,779,971,000, which is $21,000,000 under our allocation for this year.

The statements from the Office of Management and Budget which were made yesterday lead me to believe that this bill is acceptable to the President and that it will be signed into law.

Due to the amount of business remaining on the agenda, I will not detail the action of the conferees unless there are specific questions Senators would like to pose prior to a vote on the conference report. Mr. President, I ask unanimous consent that a comparative statement of budget authority be placed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

	New budget authority					Conference compared with—			
	Enacted	Estimates	House	Senate	Conference	Enacted	Estimates	House bill	Senate bill
TITLE I—DEPARTMENT OF THE INTERIOR									
LAND AND WATER RESOURCES

ANILCA

Mr. LEVIN. Mr. President, I would like to address a question to the managers of the Interior appropriation bill. Do the gentlemen recall our discussion regarding suggested language for the statement of the managers related to exploration in the Arctic National Wildlife Refuge?

Mr. McCLURE. Yes, I recall the Senator's concerns about the environmental impact of exploration in the refuge. Indeed we had intended to include language in the statement of the managers in response to the Senator from Michigan's concern. That language was accepted by the conferees but inadvertently not include in the statement of the managers. I propose, therefore, to state the language on the floor now and include it in the statement of the managers by reference. The language which should be added to the statement is as follows:

The Managers direct the Secretary to review the regulations proposed pursuant to Section 1002(d) of Public Law 96-487 to ensure that the statutory prohibition against significant adverse impact on fish, wildlife, and the environment and the intent of the Congress relative to the meaning of such prohibition are fully complied with and enforced.

Mr. JOHNSTON. Mr. President, I concur with the Senator from Idaho's proposal and agree that this language stated here should be considered to be part of the official statement of the managers.

Mr. LEVIN. Mr. President, I thank the gentlemen for their consideration.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the table showing the relationship of the conference report agreement to the congressional spending budget and the President's request be printed in the RECORD.

There being no objection, the table was ordered to printed in the RECORD, as follows:

INTERIOR SUBCOMMITTEE SPENDING TOTALS

[Dollars in billions]

	Fiscal year 1983	
	Budget authority	Outlays
Outlays from prior year authority and other actions completed [1]	0.3	3.3
H.R. 7356, conference agreement	7.5	5.3
Possible later requirements, forest firefighting	0.1	0.1
Total for Interior Subcommittee	7.9	8.7
First budget resolution 302(b) allocation	7.8	8.4
Possible amount over (+)/under (−)	+0.1	+0.3
H.R. 7356:		
President's request	7.0	8.3
House-passed	7.9	8.6
Senate-passed	7.8	8.6
Conference agreement	7.9	8.7

[1] Adjusted to include $0.3 billion in budget authority to account for full year appropriation of costs associated with site preparation and construction activities of the strategic petroleum reserve, construction activities of the Smithsonian Institution and the Native Hawaiian Claims Commission that are funded through the continuing resolution Public Law 97-276.

Mr. McCLURE. Mr. President, I am pleased to yield to the distinguished junior Senator from Louisiana who has acted on behalf of the minority in this process and without whose help and assistance it would not have been possible to have produced this conference report.

Mr. JOHNSTON. Mr. President, I want to congratulate the distinguished Senator from Idaho, his staff, and the staff on the minority side for what I consider to be an excellent result in very difficult times.

In the old days, when things were not so stringent financially, it was much easier to put one of these bills together. Today it is extremely difficult because it means in order to take care of the absolutely necessary and essential functions of the Department of the Interior and related agencies, you must make a huge number of trade-offs and fail to do everything we would like to do. That takes patience, perserverance, skill, fairness, and a great deal of time and a great deal of effort.

I think, Mr. President, we have succeeded as well as could have been done in this instance.

On behalf of the minority, Mr. President, we endorse this conference report with thanks to all concerned, and especially the chairman.

Mr. BRADLEY. Mr. President, I am pleased that the conference report we are adopting today contains protections I added in the Senate on behalf of Senator BRADY and myself. These provisions prevent the leasing of 60 environmentally sensitive canyon head tracts on the Outer Continental Shelf off New Jersey.

During the Senate Energy Committee's hearings on this subject I questioned Secretary James Watt about why the Interior Department insisted on leasing vast areas of the Outer Continental Shelf. I was extremely concerned that adequate environmental impact statements could not possibly be conducted on all of these offerings. Leasing without the benefit of those studies would not only be unwise, it would be illegal.

I must say I was not satisfied with the Secretary's answers. In the history of the Interior Department the most the Department has ever offered in 1 year has been 7.7 million acres of OCS land. Yet the Secretary's 5-year plan—of which the leasing that concerns New Jersey is a part—calls for the Interior Department to offer 200 million acres a year for 5 years. With all of the budget cuts the Department of the Interior has sustained, it is inconceivable to me that this aggressive schedule can be sustained with existing personnel without ignoring the requirement for adequate environmental review.

Mr. President, my intention is not to grind all leasing to a halt. I am not "antidevelopment." At the same time, I think we should be making informed decisions on these matters and at the rate Secretary Watt intends to proceed I do not think the environmental information can possibly be available until it is perhaps too late.

The situation that prompted my amendment is a fine example of just what can go wrong.

The State of New Jersey's Department of Environmental Protection conducted an extensive study of the affect of the proposed OCS leases on our State. What they found was that 60 of the tracts at the heads of 10 canyons were vitally important to the recreational and commercial fishing industries in our State. These canyons are important habitats for lobster, tilefish, and coral. Twenty-three tracts directly affect the commercial fishing industry in New Jersey, including seven tracts at the heads of Spencer and Carteret Canyons which produce a significant portion of the New Jersey's and the Nation's tilefish catch. Our State's commercial fishing industry employs 6,700 people and has an economic value of $499.3 million per year.

The tilefish are also important to New Jersey's recreational fishing industry—one of the largest in the country. Over 1 million fishermen annually fish for sport in our State, generating a yearly economic benefit of $551.6 million.

In short, with over a billion dollars worth of economic activity in New Jersey riding on the health of the fishing industry, our State is entitled to be assured that any leasing program will be undertaken with prudent concern for that industry.

I am sorry that Secretary Watt could not assure me or members of the New Jersey delegation in the House that our State's concerns would be recognized. Therefore we had no alternative but to seek legislative protections. I am very pleased that my colleagues in the Senate recognized those concerns and assisted my State's efforts for relief.

The 60 tracts of OCS land that we have deleted will affect only 1.5 percent of the land that the Interior Department seeks to lease. But that land is not only environmentally critical, it is the basis of a billion-dollar industry in New Jersey.

I am grateful to be able to vote for an Interior appropriations bill that contains such an important protection for my State.

INTERIOR APPROPRIATIONS CONFERENCE REPORT

● Mr. BIDEN. Mr. President, regretfully I must express my dissatisfaction with the agreement reached by the conferees on this year's Interior appropriations bill. It contains many provisions which I strongly support including close to $75 million for the State share of the Land and Water Conservation Fund as well as restrictions on sales of surlus Federal properties similiar to the former Navy acreage within Cape Henlopen State Park which was finally transferred to the State of Delaware for inclusion in the park, earlier this year. It also contains prohibitions on leasing of wilderness and evironmentally fragile coastal areas. Unfortunately, it also provides for the clousure of several Federal fish hatcheries operated by the U.S. Fish and Wildlife Service including one located at Paint Bank, Va.

These closings result from a decision made by President Reagan to close 31 of the Nation's 89 fish hatcheries. The House-passed Interior appropriations bill provided funding for all but 19 hatcheries. Paint Bank was one of those identified to be closed.

My concern stems from the fact that Paint Bank supplies the trout used in my State's 30-year-old stocking program. While Delaware's streams are capable of supporting released trout, conditions are not suitable fro reproduction. The annual stocking program has strong support and is partially financed through the sale of trout stamps which presently cost $4.20 in addition to the regular fishing license fee. Last year, close to 6,000 fishing enthusiasts purchased trout stamps.

Upon hearing of the House action, I expressed my concern to the Senate Interior Appropriations Subcommittee. During their consideration of the Interior funding bill, the committee recommended closing 18 hatcheries. Paint Bank was not one of those selected to be closed.

Unfortunately, the House-Senate Conference Committee voted to close not only Paint Bank but another Virginia hatchery in addition to several others. The one remaining Federal hatchery in Virginia had strong support from that State's Congressional delegation. Closing Paint Bank was, in my opinion, a mistake. Based on objective criteria, it should have remained

open. I will do everything possible to work with the State division of fish and wildlife and their Federal counterparts to insure Paint Bank's closure will not end Delaware's trout stocking program.●

Mr. McCLURE. Mr. President, I will be happy to yield for any questions, if there are any. I see no Senator seeking recognition for that purpose.

Mr. President, I move adoption of the conference report.

The PRESIDING OFFICER. The question is on the adoption of the conference report.

The conference report was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. JOHNSTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I will ask a question now that might expedite the procedure on the remainder. That is whether there is any objection to considering the amendments in disagreement en bloc.

If there are no objections to that, I ask that the amendments in disagreement be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered, and the clerk will state the amendments in disagreement.

The legislative clerk read as follows:

Resolved, That the House recedes and concurs with amendments to Senate amendments numbered 10, 36, 40, 42, 43, 46, 48, 58, 62, 74, 76, 84, 87, 88, 90, 96, 97, 98, 100, 102, 104, 111, 112, 116, 122, 123, 136, 137, 141, 153, 154, 155, and 156.

Mr. McCLURE. Mr. President, I move adoption of the amendments in disagreement en bloc.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

The amendments in disagreement agreed to en bloc are as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 10 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert "*Provided further,* That notwithstanding any other provision of this paragraph $2,000,000 is available to carry out the purposes of 16 U.S.C. 1535, to remain available until expended".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 36 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert ": *Provided further,* That notwithstanding any other provision of law, the Secretary of the Interior is authorized to enter into a cooperative agreement with the Smith River Fire Protection District, California, for a special use permit on lands within the boundary of Redwood National Park to permit construction of a fire station".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 40 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$143,158,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 42 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$60,356,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 43 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$161,209,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 46 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$9,350,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 48 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$67,250,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 58 to the aforesaid bill, and concur therein with an amendment as follows: Strike out the matter stricken by said amendment and insert:

": *Provided further,* That notwithstanding any other provision of law: The following may be cited as the "Indian Claims Limitation Act of 1982".

SEC. 2. (a) Subsection (a) of section 2415 of title 28 United States Code, is amended by striking "after December 31, 1982" in the third proviso and inserting in lieu the following: "sixty days after the date of publication of the list required by section 4(c) of the Indian Claims Act of 1982: *Provided,* That, for those claims that are on either of the two lists published pursuant to the Indian Claims Act of 1982, any right of action shall be barred unless the complaint is filed within (1) one year after the Secretary of the Interior has published in the Federal Register a notice rejecting such claim or (2) three years after the date the Secretary of the Interior has submitted legislation or legislative report to Congress to resolve such claim".

(b) Subsection (b) of section 2415 of title 28, United States Code, is amended by striking "December 31, 1982" in the proviso and inserting in lieu the following: "sixty days after the date of the publication of the list required by section 4(c) of the Indian Claims Act of 1982: *Provided,* That, for those claims that are on either of the two lists published pursuant to the Indian Claims Act of 1982, any right of action shall be barred unless the complaint is filed within (1) one year after the Secretary of the Interior has published in the Federal Register a notice rejecting such claim or (2) three years after the Secretary of the Interior has submitted legislation or legislative report to Congress to resolve such claim".

SEC. 3. (a) Within ninety days after the enactment of this Act, the Secretary of the Interior (hereinafter referred to as the "Secretary") shall publish in the Federal Register a list of all claims accruing to any tribe, band or group of Indians or individual Indian on or before July 18, 1966, which have at any time been identified by or submitted to the Secretary under the "Statute of Limitation Project" undertaken by the Department of the Interior and which, but for the provisions of this Act, would be barred by the provisions of section 2415 of title 28, United States Code: *Provided,* That the Secretary shall have the discretion to exclude from such list any matter which was erroneously identified as a claim and which has no legal merit whatsoever.

(b) Such list shall group the claims on a reservation-by-reservation, tribe-by-tribe, or State-by-State basis, as appropriate, and shall state the nature and geographic location of each claim and only such other additional information as may be needed to identify specifically such claims.

(c) Within thirty days after the publication of this list, the Secretary shall provide a copy of the Indian Claims Limitation Act of 1982 and a copy of the Federal Register containing this list, or such parts as may be pertinent, to each Indian tribe, band or group whose rights or the rights of whose members could be affected by the provisions of section 2415 of title 28, United States Code.

SEC. 4. (a) Any tribe, band or group of Indians or any individual Indian shall have one hundred and eighty days after the date of the publication in the Federal Register of the list provided for in section 3 of this Act to submit to the Secretary any additional specific claim or claims which such tribe, band or group of Indians or individual Indian believes may be affected by section 2415 of title 28, United States Code, and desires to have considered for litigation or legislation by the United States.

(b) Any such claim submitted to the Secretary shall be accompanied by a statement identifying the nature of the claim, the date when the right of action allegedly accrued, the names of the potential plaintiffs and defendants, if known, and such other information needed to identify and evaluate such claim.

(c) Not more than thirty days after the expiration of the one hundred and eighty day period provided for in subsection (a) of this section, the Secretary shall publish in the Federal Register a list containing the additional claims submitted during such period: *Provided,* That the Secretary shall have the discretion to exclude from such list any matter which has not been sufficiently identified as a claim.

SEC. 5. (a) Any right of action shall be barred sixty days after the date of the publication of the list required by section 4(c) of this Act for those pre-1966 claims which, but for the provisions of this Act, would have been barred by section 2415 of title 28, United States Code, unless such claims are included on either of the lists required by section 3 or 4(c) of this Act.

(b) If the Secretary decides to reject for litigation any of the claims or groups or categories of claims contained on either of the lists required by section 3 or 4(c) of this Act, he shall send a report to the appropriate tribe, band, or group of Indians, whose rights or the rights of whose members could be affected by such rejection, advising them of his decision. The report shall identify the nature and geographic location of each rejected claim and the name of the potential plaintiffs and defendants if they are known or can be reasonably ascertained and shall, briefly, state the reasons why such claim or claims were rejected for litigation. Where the Secretary knows or can reasonably ascertain the identity of any of the potential individual Indian plaintiffs and their present addresses, he shall provide them with written notice of such rejection. Upon the request of any Indian claimant, the Secretary shall, without undue delay, provide

to such claimant any nonprivileged research materials or evidence gathered by the United States in the documentation of such claim.

(c) The Secretary, as soon as possible after providing the report required by subsection (b) of this section, shall publish a notice in the Federal Register identifying the claims covered in such report. With respect to any claim covered by such report, any right of action shall be barred unless the complaint is filed within one year after the date of publication in the Federal Register.

SEC. 6. (a) If the Secretary determines that any claim or claims contained in either of the lists as provided in sections 3 or 4(c) of this Act is not appropriate for litigation, but determines that such claims may be appropriately resolved by legislation, he shall submit to the Congress legislation to resolve such claims or shall submit to Congress a report setting out options for legislative resolution of such claims.

(b) Any right of action on claims covered by such legislation or report shall be barred unless the complaint is filed within 3 years after the date of submission of such legislation or legislative report to Congress.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 62 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$1,881,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 74 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$6,350,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 76 to the aforesaid bill, and concur therein with an amendment as follows: Strike out the matter stricken by said amendment, and insert:

SEC. 107. No funds provided in this title may be expended by the Department of the Interior for the procurement, leasing, bidding, exploration, or development of lands within the Department of the Interior Central and Northern California Planning Area which lie north of the line between the row of blocks numbered N816 and the row of blocks numbered N817 of the Universal Transverse Mercator Grid System.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 84 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

SEC. 110. Notwithstanding any other provision of law, section 1002 of the Alaska National Interest Lands Conservation Act (Public Law 96-487) (16 U.S.C. 3142(e)(2)(C)) is amended as follows: Insert before the period: "and: *Provided*, That the Secretary shall prohibit by regulation any person who obtains access to such data and information from the Secretary or from any person other than a permittee from participation in any lease sale which includes the areas from which the information was obtained and from any commercial use of the information. The Secretary shall require that any permittee shall make available such data to any person at fair cost.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 87 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$62,328,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 88 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$58,828,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 90 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$1,010,436,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 96 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$240,000,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 97 to the aforesaid bill, and concur therein with an amendment as follows: Strike out matter stricken by said amendment, and insert:

YOUTH CONSERVATION CORPS

There is appropriated $10,000,000, of which $3,400,000 is hereby transferred to "National Forest System", $3,300,000 is hereby transferred to "Operation of the National Park System", National Park Service, and $3,300,000 is hereby transferred to "Resource Management", United States Fish and Wildlife Service, for high priority projects which shall be carried out as if authorized by Public Law 93-408.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 98 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$56,877,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 100 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

None of the funds made available under this Act shall be obligated or expended to adjust annual recreational residence fees to an amount greater than that annual fee in effect at the time of the next to last fee adjustment, plus 50 per centum. In those cases where the currently applicable annual recreational residence fee exceeds that adjusted amount, the Forest Service shall credit to the permittee that excess amount, times the number of years that that fee has been in effect, to offset future fees owed to the Forest Service.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 102 to the aforesaid bill, and concur therein with an amendment as follows: Strike out the matter stricken by said amendment, and insert:

Provisions of Section 702(b) of the Department of Agriculture Organic Act of 1944 (7 U.S.C. 2257) shall apply to appropriations available to the Forest Service only to the extent that the proposed transfer is approved by the House and Senate Committees on Appropriations in compliance with the reprograming procedures contained in House Report 97-942.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 104 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert "$215,514,000 and $31,700,000 to be derived by transfer from the account in Public Law 96-126 (93 Stat. 970 (1979)) entitled "Alternative Fuels Production", and $40,000,000 to be derived by transfer from the account in Public Law 96-304 entitled "Energy Security Reserve" established to carry out the provisions set forth in section 204(a)(2) of the "Energy Security Act" (Public Law 96-294)".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 111 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$35,106,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 112 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert ": *Provided*, That $2,000,000 of the funds herein appropriated shall be available for the fuels conversion program, of which not less than $1,500,000 shall be available only for expenses in issuing prohibition orders under the Powerplant and Industrial Fuel Use Act and other related laws".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 116 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$645,583,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 122 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "($16,193,000)".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 123 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the sum inserted by said amendment, insert "$67,247,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 136 to the aforesaid bill, and concur therein with an amendment as follows: Strike out the matter stricken and insert ": *Provided further*, That regulations of the Institute shall require (1) an appeal process for applications rejected because of technical deficiency, (2) reconsideration of applications upon receipt of materials in a timely manner if the application was rejected because material did not accompany the application, and (3) waivers of certain records under circumstances which would require such waivers".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 137 to the aforesaid bill, and concur therein with an amendment as follows: Strike out the matter stricken by said amendment, and insert ": *Provided*, That hereafter persons serving on the National Council on the Arts, the National Council on the Humanities, and the Museum Services Board shall continue serving until their successors are qualified for office".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 141 to the aforesaid bill, and concur therein with an amendment as follows: Strike out the matter striken by said amendment, and insert:

DEPARTMENT OF THE TREASURY

ENERGY SECURITY RESERVE

Notwithstanding any other law, funds made available from the Energy Security Reserve to the Secretary of Energy for alcohol fuel loan guarantees authorized by title II of the Energy Security Act, Public Law

96-294, may be used to guarantee loans up to three and one-half times the amount held in reserve.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 153 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

SEC. 315. The titles conveyed by and the easements and restrictions heretofore reserved and imposed by the Secretary of the Interior pursuant to section 506(c) of Public Law 96-487 are hereby confirmed in all respects: *Provided*, That nothing herein shall be deemed to amend the Alaska National Interest Lands Conservation Act or the Alaska Native Claims Settlement Act.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 154 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the section number named in said amendment, insert "316".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 155 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

SEC. 317. In the case of any new electric powerplant located in Alaska for which a petition is accepted after the date of enactment of this Act, but before December 31, 1985, pursuant to section 212(f) of the Powerplant and Industrial Fuel Use Act of 1978, to use natural gas (as that term is defined in such Act), as a primary energy source in such powerplant, the petitioner shall be deemed to have made the demonstrations required by clauses (1) and (2) of such section and such exemption, subject to the other applicable provisions of such Act, shall be granted by the Secretary of Energy. Nothing in this section shall apply to any new electric powerplant using natural gas produced from the Prudhoe Bay Unit of Alaska.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 156 to the aforesaid bill, and concur therein with an amendment as follows: In lieu of the section number named in said amendment, insert "318".

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. JOHNSTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. I thank all Members, particularly the junior Senator from Louisiana, for his assistance. I certainly could not pass this opportunity to give profound thanks to the staff on both sides of the aisle. It is a tremendous amount of work and a tremendous amount of detail they have had to handle, and they have done it in an exemplary manner. I thank the Chair.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. HELMS. Mr. President, I wonder if I might inquire of the majority leader where we stand with reference to the payment-in-kind farm bill.

Mr. BAKER. Mr. President, that is one of the two items that I identified last night that had been mentioned to me that Members would like to do. As I indicated earlier, there is no order to do anything in this period between now and 6 p.m. But a window is provided so matters could be taken up if they can be cleared or if they can be reached. This was one that was identified.

I hope that is clear. It is an important bill and I would like to see it disposed of.

Mr. HELMS. If the Senator will yield, it has been absolutely cleared on this side. This is a very important piece of legislation for farmers in every State of the Union. I wonder if we could not get some sort of agreement that we could take this bill up and do something for the farmers of this country. If we do not do something today, I fear, Mr. President, that we will not get a bill at all. That would be a tragedy.

I wonder if the majority leader would inquire if there is a possibility of getting this bill on the floor and getting consideration of it.

Mr. BAKER. Mr. President, I would be glad to do that. I see the distinguished ranking member of the Agriculture Committee on the floor. I shall yield to him if he wishes to comment on this.

Mr. HUDDLESTON. If the majority leader will yield, we do have Members on this side who are working on or perfecting amendments that might be offered. I reiterate what the distinguished chairman of the Agriculture Committee said about the importance of doing something to help alleviate the situation that we find on America's farms today.

During this special session, we have talked a lot about jobs creation and a lot about economic conditions of the country. We have offered a lot of solutions, partial solutions, or proposals to help the situation. As far as the farmer is concerned, there has been some little rhetoric and some little talk on the floor yesterday, but we have not given them any reason during this time to hope or expect that the Government is going to try to be helpful in the difficult situation he is in.

The bill we are talking about is one that has come through the Agriculture Committee and embraces not a totally new concept but a different approach to what is happening right now on the problems we are confronted with. It may not be the solution, of course, but it is something. It does provide a mechanism and the authority to try something different to deal with the great problem we have in agriculture, which is principally the surplus that we have.

I hope that during the next few minutes, we can come to some understanding that at least we ought to have an opportunity to consider this legislation, consider all amendments that may be offered to it, and let the Senate work its will and try to complete here this afternoon a piece of legislation that might offer some hope and some assistance to the agriculture producers throughout the land.

Mr. Leader, I shall be happy to work with you and the distinguished chairman of the committee in trying to reach whatever accommodation can be reached as far as time limits or amendments or whatever so we may proceed.

Mr. BAKER. Let me ask the Senator from Kentucky if it would be useful to propound a unanimous-consent request at this time that we go to that measure?

Mr. HUDDLESTON. I see no reason for not making that attempt. Maybe we can identify just where our problems might be.

Mr. MELCHER. Will the majority leader yield?

Mr. BAKER. Mr. President, if I may have the attention of the minority leader for just a moment, the question I put to the ranking member of the Agriculture Committee was whether it would be useful to propound a unanimous-consent request to go to the agriculture bill, the consideration of that bill. There may or may not be some usefulness in that suggestion. I thought I would bring it to his attention.

Mr. ROBERT C. BYRD. I thank the majority leader. He can make the request if he wishes.

Mr. BAKER. I asked the distinguished ranking member of the committee, and I believe he encouraged me to go ahead and make the request. I believe I will.

UNANIMOUS-CONSENT REQUEST—PIK BILL (S. 3074)

Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the PIK bill with the understanding that nothing contained therein shall abrogate any of the provisions of the unanimous-consent agreement dealing with the cloture vote on the highway bill nor have any effect on the status of the highway bill thereafter.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. Reserving the right to object, Mr. President, will the majority leader yield to me?

Mr. BAKER. Yes; I yield.

Mr. MELCHER. I wonder whether the request was for the Senate bill? Was the request posed for the Senate bill, referring to S. 3074?

Mr. BAKER. The answer is yes, it would be Calendar Order No. 1010, S. 3074. I am advised if that measure were disposed of, we would propose to substitute the House-passed language on the Senate number. Is that correct, I ask the distinguished chairman?

Mr. HELMS. Yes, Mr. President.

Mr. BAKER. The Senate language to the House number.

Mr. MELCHER. Will the majority leader further yield?

Mr. BAKER. Yes.

Mr. MELCHER. Is that substitute, an amendment in the nature of a substitute, that is on the calendar for S. 3074 available at the desk or anywhere in this building? It was not available yesterday.

The PRESIDING OFFICER. It is understood that a copy is available at the desk, but the copies have not been distributed at large.

Mr. MELCHER. It has not been printed, then, in other words, Mr. President?

The PRESIDING OFFICER. The printed copies have not arrived yet.

Mr. MELCHER. The measure was introduced and the committee met a couple of times, over here in a room not too far from the Chamber. On Monday afternoon, the committee met for about 22 minutes or 31 minutes and reported out a substitute. There is a lot of doubt about what is in this bill—not just here in the Senate Chamber. There is a lot of doubt throughout the country about what is in this bill. The word I am getting is "Don't buy a PIK in a poke."

There is no way that agricultural producers can advise us on what they think about this bill because they have not seen it. In terms of the bill as introduced in the Senate, it has been modified in the committee meetings, the amendment in the nature of a substitute that is on the Senate Calendar—supposedly, that is what the unanimous-consent request was made for, to go to the consideration of that——

Mr. HELMS. Will the Senator yield for just a moment?

Mr. MELCHER. I shall yield to the distinguished chairman in a moment. The leading, No. 1 industry of this country, agriculture, is supposed to make a determination on whether the proposal is good or bad on the basis of very scant information. Agriculture is in trouble right now and this plan, assurance that perhaps this would help, has not been very reassuring to the agricultural leaders that I have talked with in the past several days. The bill that the House passed over and that is now available at the desk is merely a scant few words that give more authority to the Secretary of Agriculture. What effect that would have I am not sure. I think it might be wise to continue to work on this a while longer to see whether we can reach some accommodation.

I am glad to yield to the distinguished chairman.

Mr. HELMS. Mr. President, let me say to the Senator, I wish he would state to me the accommodation he desires. We all agree that farmers are in difficulty, farmers in all 50 States.

Mr. MELCHER. I would be delighted to state to the distinguished chairman what I have in mind.

Mr. HELMS. Well, we have asked for that time and time again, Mr. President. If the Senator wants no bill, that is one thing. I wish he would tell me that, because he can block it if he wishes. I do not say that it is a perfect piece of legislation, but I would like to bring it before the Senate for debate so we can consider the Senator's amendments.

Mr. MELCHER. Mr. President, I have made very clear what I thought should be in the bill. I circulated to all the members of the Agriculture Committee in the Senate the proposal, what I thought was important.

The distinguished chairman will recall we had those, I believe, since Wednesday. That is not much time to consider it.

I must say there has not been much time to consider anything that would be particularly enacted on this matter—any one of these vehicles we have, the original bill introduced, I think it was December 3, an amendment in the nature of a substitute the committee passed out, the House-passed bill, the request of the Department of Agriculture, the recommendations of the Secretary of Agriculture.

We all understand that there has not been much time to consider any of these particular proposals. It would require some understanding of just what our goals were.

Now, I do not mind stating what my goals are. Agricultural prices are in a deep slump, and obviously the No. 1 goal for all of us is to make sure that the agriculture prices do not drop lower.

I have the November price for wheat based on Kansas City. No. 1 hard winter was 3.86 as of November 17, a month ago. I do not believe it has improved any. I think it has dropped off a little bit. Nevertheless, that is not a good price. A year earlier it was 4.47, same market, same quality of wheat.

There is a grave concern that the payment-in-kind proposition will result in lower prices immediately after harvest for winter wheat, and perhaps corn farmers and other feed grain farmers have the same fears. If there is going to be something passed, the advice I am getting from agricultural people around the country is "Make sure that you protect this market; it's low enough now and don't let it go any lower."

The payment-in-kind proposition, which is a new soil bank proposal, leads to great fear that if it is put into effect without some guarantee that the market cannot go lower, it will indeed force the market lower.

Mr. COCHRAN. Mr. President, will the Senator yield?

Mr. MELCHER. Yes; I would be delighted to yield to the distinguished Senator.

Mr. COCHRAN. I have a question of the Senator. I wonder, if we do not do anything right now, whether there is any guarantee to the farmers of America that prices will not go lower?

Mr. MELCHER. There is absolutely no guarantee. What the farmers, particularly the wheat farmers, are asking us to do is to put something in the bill that will help cushion, or reassuring that it will cushion the impact of taking massive amounts of land out of production and paying off with the warehouse receipts at about the start of the marketing season; not that they would all be paid off at the same time, but they would be starting at the marketing season, beginning on June 1 and extending approximately for the next 5 months, which corresponds to the first 5 months of the marketing season but also hits during the time of the harvest.

If the harvest begins in Texas on the first day of June or thereabouts, the wheat harvest in my State of Montana is probably going to be in August and some in September. The fear is that the warehouse receipts, or the grain given in kind—if it were winter wheat, it would be principally warehouse receipts—that the farmers who receive those warehouse receipts naturally will have to cash them in, forcing that wheat on a market that is cashed out, and that the price will sag lower.

In turn, the Secretary of Agriculture is asking in the bill—and it would be available in the House bill, it would also be available in the Senate bill, that is the amendment in the nature of a substitute—that there would be permission granted to the Secretary of Agriculture to take grain out of the farmers' own reserves at less price than under the current law.

Mr. HELMS. I hate to do this, but regular order, please.

Mr. MELCHER. I am answering the question of the distinguished Senator from Mississippi. The combination of those two makes it very difficult for wheat farmers to determine whether this is a good or bad proposition for them.

The PRESIDING OFFICER. The Chair advises regular order is simply the unanimous-consent request and whether there is objection to it.

Mr. HELMS. It is not debatable. I do not want to cut the Senator off. We

will debate it if the Senator will permit the bill to come up. Will the Chair put the unanimous-consent request?

Mr. PROXMIRE. Will the Chair inform Senators what the unanimous-consent request is?

The PRESIDING OFFICER. Is there objection to the request?

Mr. MELCHER. I object.

Mr. ZORINSKY. Reserving the right to object——

The PRESIDING OFFICER. Objection is heard.

The Senator from Montana.

Mr. MELCHER. Mr. President, I make that objection at this time with the hope that Senators will be willing to further discuss this and further make an agreement on what would be acceptable in the bill and that we proceed from that point on.

Mr. DIXON addressed the Chair.

Mr. MELCHER. Mr. President, I believe I have the floor.

The PRESIDING OFFICER. The Senator from Montana has the floor, having objected and having been recognized.

Mr. HELMS. Mr. President, who has the floor?

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. It is also necessary to make sure that the Secretary of Agriculture, and the administration is willing to discuss this in an open way and make some accommodations so that it may not be necessary to send a bill out of the Senate without adequate consideration and without adequate input from the farmers and other agriculture people around the country.

Mind you, Mr. President, we are also talking about the effect on agribusiness. We are also talking about not just the people that are involved in growing grain, cotton, rice, or feed grains. We are also talking about the impact it would have on dairy and the impact it would have on cattle. The cattle feeders, after all, have a stake in this. The hog farmers and hog feeders have a stake in this. There is a tremendous number of people involved throughout this country in agriculture, and this bill would touch every last one of them. It is only fair and prudent that we give deep consideration to the reports and the comments and the evaluation and the assessment we receive from all these people.

I will yield to the Senator from Illinois. I ask unanimous consent that I may yield to the Senator from Illinois without losing my right to the floor, because I do have comments to make.

The PRESIDING OFFICER. The unanimous-consent request by the Senator from Montana is to recognize another Senator. Is there objection?

The Chair hears none, and it is so ordered. The Senator from Illinois.

Mr. DIXON. Mr. President, I thank my friend from Montana for recognizing me momentarily to ask his consideration of this matter in this frame of thought. As my friend from Montana knows, I have some of the same concerns and reservations concerning this payment-in-kind program that he has expressed on the floor, and we have shared private moments together about those concerns. As my friend knows, I offered an amendment during markup in subcommittee which was adopted, and again adopted by the Senate Agriculture Committee, along with the support of my friend from Mississippi and others, that guarantees to every American farmer a floor price of 75 percent of the loan rate with reference to certificates that he or she will receive under this PIK program. I think that is a substantial advance. I believe my colleague agrees. I have suggested to my friend from Montana and the chairman of the committee and my distinguished friend from Mississippi, the chairman of the subcommittee, and my friend, the ranking member on this side, that we might try to raise that floor price, if it was considered further on the floor, to perhaps 80 or 85 percent.

What I am going to suggest to my friend from Montana is that I believe this program addressing the major agricultural surpluses in America is sufficiently important to the farmers of Illinois, Montana, and all the other States of this country that we ought to give an opportuntiy to have a decision here today and let the Senator from Montana, be heard regarding his concerns and possibly we could then pass a bill today, perhaps with some adjustments in it, or an amendment to the House version that would adequately address the problems for now. I perceive this is a problem that we ought to address before we leave.

Then when we come back here in the first part of the year in the new session we could revisit this area.

Why would the Senator from Montana have reservations about doing something like this now? Even if it is not all he wants, would he not agree that minimally at least it addresses the surplus problem and we should get on with it and then we can come back to it again in the new session? I think he knows that others are likeminded to myself and support some of his point of view on this.

Mr. MELCHER. I am delighted to answer my friend from Illinois.

That is exactly what I wish to do. I wish to proceed on the basis that we are going to work out an adequate bill, that we are going to work out something that could be reviewed, revised, and corrected early in the next Congress. So far that assurance has not been forthcoming at all. The reason it has not been forthcoming is, first of all, we have not any understanding with the Department of Agriculture that they indeed would like to do that. There is pretty good assurance that they would discuss with us what any shortcomings might pop up but no assurance that they would be willing to step out then and make corrections. Let me point——

Mr. DIXON. Could I ask my friend——

Mr. MELCHER. I would like to complete this thought.

Let me point out that we have not been very successful in Congress in passing something that has been objected to by the administration. The threat of veto hangs heavy over so many propositions around here that we are continually put in the position of either caving into them before we pass something or expecting a veto and then having to react to make up for whatever the objections of the President are.

Mr. DIXON. Will my friend yield?

Mr. MELCHER. We are right now completing a continuing resolution with about eight or nine different appropriations bills lumped into it and we are candidly told to expect a veto of it and to be ready to react to that and respond and make corrections in the bill so we can get the continuing resolution back down to the White House should that occur.

I hope the President does not veto the continuing resolution, but we are very frankly told that that is likely to occur, and we should be on notice that it will occur and we better be here and take up the matter because it is so crucial.

Mr. DIXON. Will my friend yield for a question?

Mr. MELCHER. We are in the same position on this.

Yes, I am delighted to yield.

Mr. DIXON. If I could briefly make this further comment and ask this question of my friend from Montana, if he will recall earlier this year I had a substantial difference with the USDA over their discontinuation of making public net farm income estimates. That came up in our committee at great lengths. Our distinguished chairman was kind enough to suggest he would give us hearings. He did give us hearings and we were able to remedy that problem. The Senator from Mississippi was supportive of the compromise and we ultimately addressed the problem.

The point I make is, I never found any problem with the chairman of our committee giving us a time for hearings. I wonder if the chairman, who is here on the floor, and the subcommittee chairman, who is standing on the other side, would give my friend from Montana an assurance that we would visit the whole question as soon as the next session begins, whether under those circumstances my colleague would not be kind enough to accommodate all of us so we can look at PIK

right now, possibly pass something right now that adequately addresses on a temporary basis the problem, with the assurance of the Chair that we would revisit the whole question next year.

I am sure that that would be a thing he would have no objection to and I would like to put that case to my friend from Montana.

Mr. MELCHER. I think perhaps my friend, the distinguished Senator from Illinois, has not gotten the point I tried to make. I am sure we can have hearings. I am sure that we can have adequate discussion of it in the Agriculture Committee here. I have no question. I did not have any doubts about that at all. The real question is, What will be passed and signed by the President?

We are told that in meetings with the Department of Agriculture, the Under Secretary, a very fine person, a man that I have known for a long time and whom I admire greatly and loved to work with, if there is anything put into this bill that would raise the loan rates any amount, 1 cent or more, it would probably result in a veto, if there is anything put in the bill that would protect sagging prices and payment in kind did indeed hurt the market, that if we put in something, some cushion there in the farmer-owned reserve that that too would result in a veto.

I am not averse to testing the waters and passing a bill with some accommodations in it and some accommodations on protective price, some language, some strengthening provisions in the bill as to conservation on the land that is taken out of production, and on some definite positive proposal that could be incorporated in the bill that would extend opportunity to expand export sales and know that we are doing the right thing at the right time in moving a bill out of here. If we can do that, I would be delighted to join in with all of us, but what I am finding from the distinguished chairman and the members of the Agriculture Committee on the majority side is that would probably result in a veto. We would not want to do that.

Mr. ANDREWS. Mr. President, will the Senator yield?

Mr. MELCHER. I am delighted to yield to my friend from North Dakota.

Mr. ANDREWS. Mr. President, I appreciate my friend yielding.

Let me point this out, and I think my colleague and good friend from Montana knows it, no one in this body has been for higher loan rates on wheat and feed grains more than my friend from Montana and myself, representing the farmers of North Dakota, because I think today's loan rates are abysmally below the cost of production. They are ruinous not only to farm families but to our entire Nation's economy because our balance of payments depend on the grain exports that we can achieve.

Now, I wish to inquire of my friend from Montana if he sees anything really new in this PIK program, this payment in kind. It has been around for a long time, and as my colleague must realize, Mr. President, what we need to do is to eliminate the damnably long list of excuses we keep getting from Agriculture Department after Agriculture Department, irrespective of which administration controls them, on how they can and how they cannot administer the farm acts.

As I interpret it, Mr. President, and I would hope that my colleague and good friend from Montana would interpret it the same way, if we can move toward payment in kind, we achieve two objectives: First, obviously, we have to take some land out of production. But by paying for it in commodities we take care of our surplus stockpile and we disrupt the community less than if we pay by cash for that land taken out of production because we are still marketing the grain, we are still using the infrastructure, the elevators, the transportation, the rest. We are still making available that grain for overseas sale, domestic use, charitable goods, Public Law 480, all of the rest.

The second point I would hope that my friend from Montana would share with me is that if we use payment in kind, we might finally have in the administration more willingness to reach a higher price support, a higher payment, because under the Budget Act—I happen to be a member of the Budget Committee—that we passed, the Budget Reconciliation Act scores commodities as far as the price levels are concerned totally different than they score raw cash.

An if we go toward payment in kind, Mr. President, it would then become possible for the Department of Agriculture to offer a more equitable payment for land taken out of production, a better farm price support loan rate, and a whole host of other things, and I hope that my friend will not shut the door in the face of this great need for a better farm program for America's farmers and for a better price structure.

Let me conclude, Mr. President, by saying that one of the big problems, that we, of course, face in America today is that these farmers out on the land are not getting anywhere near their cost of production. They also are involved in a business where they need to know more than any other industry and if we delay temporarily giving the tools to this Department of Agriculture to put these needed reforms in by the time we meet, organize the committee in the new Congress and get about our business, the farmers in Montana and North Dakota are going to be too close to the planting season for it to do them any good.

But certainly no one realizes better, Mr. President, than my colleague from Montana the importance of timeliness in farm decisions.

So I would hope, Mr. President, that my good friend would take another look at this and recognize that because of the need for a better price support for agriculture, realize that because of the unique characteristics of the Budget Reconciliation Act under which we operate and which has precluded us from doing more for American farmers, and under the unique need for timeliness that my colleague would reconsider and would allow this structure to go through so that the monkey would be then on the Secretary of Agriculture's back to put up or shut up and to produce and do the better job that he ought to do.

I would hope, Mr. President, that my friend could do this, and I would hope also that he would do this from the standpoint of the fact of the number of farm groups that do, in fact, support this whole concept of payment in kind, and my friend and I are both among the, shall we say, liberals in the agriculture field, since the more conservative organizations look down their noses at us, but the American Agriculture Movement, Mr. President, would point out to my friend from Montana, is wholeheartedly in support of this particular concept in our own State of North Dakota and I would suspect in Montana.

Our Farmer's Union is in support of this concept, and I would hope we could give it a chance, Mr. President.

I would urge my colleague from Montana to reconsider because of the great needs out there, which he realizes fully as well if not better than I do.

Mr. METZENBAUM. Mr. President.

Mr. MELCHER. I will respond to my friend from North Dakota.

The PRESIDING OFFICER. If the Senator will withhold, the Chair would like to clarify for the Senator from Ohio that the Senator from Montana still has the floor and that was to receive a question from the Senator from North Dakota.

Mr. JEPSEN. Mr. President, will the Senator from Montana yield?

Mr. MELCHER. I want to respond, first of all, to my good friend from North Dakota.

I would say what all of us should be doing is looking and listening to the more recent messages from people in our own States. We certainly are very similar in our wheat country of Montana to across the border, to the east of us, the wheat farmers in North Dakota. Here is the rundown: The American Agriculture Movement nationally has grave reservations about the bill and wants to understand it.

The Farmer's Union executive board met just a day or two ago and sent word to all of us, "Be very careful about this and don't rush it. Make sure there is something in there that closes the gap on some of our fears." That is them speaking.

The farm bureaus, at least in my State, are inquiring of me to explain how the bill would work and urging me to go very slow until there is some understanding of just exactly how it would work.

The great Senator from North Dakota has raised some valid points. He said what is new in the bill that is new legislation? There are probably three points that are new: Three are changes in current law, and a fourth is a big shift in policy that I do not know whether it is covered by law or not.

The first thing in law that would be changed by this is to consider payment in kind, warehouse receipts, whatever negotiable instruments are given, to not count against the $50,000 payment limitation.

Some of our people in Montana like that $50,000 payment limitation and a lot of them do not, and would like to see it raised, and this would be one mechanism of raising it.

Second, the change in the law is to permit the Secretary of Agriculture to release grain out of the farmer's own reserves at less price than is possible now, and that is extremely significant. When there is not any market, when there is not any cash market, farmers want to know is there a farmer's own reserve that is available.

Under the current law it is available for wheat up to 700 million bushels, and we understand here, those of us from the wheat country, that is going to be filled up, but the problem is in this bill it would release it and, by the way, it is in both the House and Senate bill, it would release it at less price than is possible now under current law, and that is a fear of wheat farmers of reducing the market.

The third change in the law, which I happen to believe is a good one, would allow surplus commodities to be broadened out in distribution to foreign governments.

Mr. ANDREWS. These points, Mr. President, are excellent points.

Mr. MELCHER. The fourth point that is not really covered in this bill to anybody's satisfaction so far that I have been able to talk to is what conservation practices are going to be presented, available, encouraged. Is there going to be any incentive on that land that is taken out of production for conservation? The answer is "It is up to the Secretary of Agriculture." Well, that is not very reassuring in the first go-around.

Yes, I will be delighted to yield again.

Mr. ANDREWS. I appreciate my colleague's yielding once again. Everything he says, as usual, makes good sense.

He referred to the American Agriculture Movement. Let me caveat a little bit of that American Agriculture Movement reference. David Senter, their National Director, who is a friend of my colleague's, my colleague from Montana, as well as mine, Mr. President, points out these cogent thoughts:

> With the economic condition of rural America continuing to weaken, we must do all within our power to save as many family farmers as possible through legislative solutions.
>
> The AAM, Inc. supports the "Payment in Kind" concept. * * *

They then, of course, add this caveat—

> only with the paid diversion, and deficiency payments of the current program unchanged.

A concern of my colleague as well as myself, Mr. President.

But then they go on to say:

> We are convinced, it will take drastic action to solve our problems, and the PIK, program is "drastic action".
>
> I hope, we all agree on one thing. We can't sit still and do nothing. We must try and find solutions.

Mr. President, might I point out to my colleague from Montana the last thing I want to do on the floor of the Senate right now in mid-December is to tell our farmers back home that here is an opportunity to make things a little bit better but we have decided to postpone. The farmers of North Dakota and, I would suspect, Montana and the rest of the upper Midwest, are getting damned sick and tired of those of us saying down here, "Wait a minute, Mr. Farmer, we want to postpone." These things have been studied to death. I say let us give them the tools to work with, and then let us jump on them in February if they do not do it in the right way. But to take the tools away from them, I submit, is doing the farm families a disservice at this critical time, probably the most critical time ever, in the history of farm families of this Nation.

I hope again, Mr. President, that my colleague and good friend and great champion of the farmers would reconsider on this basis.

Mr. MELCHER. Certainly I would be delighted to work out some understanding with my friend from North Dakota and maybe get a majority of the committee to agree, and then we can move forward with some definite, positive language in this bill and not just leave it up in the air.

I would be delighted to yield to the Senator from Iowa without losing my right to the floor.

Mr. JEPSEN. Mr. President, I thank my good friend from Montana. I have always found the distinguished Senator from Montana in the area of agricultural affairs and problems to be most wise and most practical and, most importantly, he has really the sense in the field of the grass roots people of the agricultural community.

The PRESIDING OFFICER. Will the Senator yield? The Senator from Montana has the floor and the Chair has to inquire if he yields to a request of the Senator from Iowa.

Mr. MELCHER. I ask unanimous consent to yield to the Senator from Iowa for a question without losing my right to the floor.

Mr. METZENBAUM. I object to that. I do not think any one Member should control the floor in a matter of this kind, and I object.

Mr. MELCHER. Mr. President, I have to agree——

Mr. ROBERT C. BYRD. The Senator does not need unanimous consent to yield for a question.

Mr. METZENBAUM. I understand, but he has yielded the floor, I say to the minority leader.

The PRESIDING OFFICER. The Chair inquires again of the Senator from Montana if he yields for a question?

Mr. MELCHER. I have no intention of holding the floor. It will be available for another hour.

The PRESIDING OFFICER. Is the Senator yielding for a question?

Mr. MELCHER. I yield for a question, then I will yield the floor.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. JEPSEN. I thank the Chair and I thank the distinguished Senator from Montana.

Mr. President, I ask the Senator from Montana, is there anything in this whole proposal that is mandatory?

Mr. MELCHER. Mr. President, I will answer the question of the Senator from Iowa, which is an extremely pertinent question, that there is nothing in it that makes it mandatory. It is up to each individual farmer and it is between that farmer and the Department of Agriculture. It is just a repetition of what we had in the soil bank. It was up to an individual farmer to make a choice, then it was up to the Secretary of Agriculture to agree with him.

The soil bank has its good and bad points; this, too, will have its good and bad points. I just want to make sure that the bad points are not too bad.

Mr. JEPSEN. Does the Senator from Montana agree that we have a need for working in the soil conservation area and we have problems in that are a and we have a need to control or in some way or another induce a lower production for the time being?

Mr. MELCHER. The Senator's question has really two parts. The Senator from Iowa is one of the leading advocates of sound soil conservation practices, not only in the Senate but

throughout the country. I commend him for it.

But, a huge problem that is raised in this bill is taking the land out of production. Then what happens to it? Very candidly and frankly, the Department of Agriculture says to me that they do not expect any conservation practices to apply to the land taken out of production. Under this bill, in their proposal, they are talking about 2 years. I think that is unwise.

I think that is one of the fallacies and weaknesses in the bill, that we do not zero in on what conservation practices should be used for the land taken out of production and that we offer an incentive in the bill to make sure that that land conservation does take place. Because, after all, it is an investment for all of us throughout the country to keep our land base in good condition.

To answer the second part of the question, yes, indeed, there are huge surpluses. The question of how we are going to handle those surpluses, that really is the thrust and the forefront of questions that are being posed by my constituents and by agriculture leaders throughout the country of how it will work in the marketplace.

Mr. JEPSEN. I know this is an obvious question, but I ask the Senator to please answer yes or no. Does the Senator from Montana believe that prices for feed grains are too low?

Mr. MELCHER. Absolutely.

Mr. JEPSEN. Does the Senator from Montana believe that the big obstacle to price increases, if we have to single out one single item, would be the huge reserves that we have hanging over the heads of all of the trading commissions and all of the markets, and so on?

Mr. MELCHER. I did not understand the first part of the Senator's question.

Mr. JEPSEN. The big obstacle of getting those prices back up on a stable, permanent basis, is it not the reserves we have stored now, not only in storage bins, but in high schools, in boxcars, in empty buildings, and so on, with a bumper crop now being put in these places all over the country?

Mr. MELCHER. That, indeed, is one of the obstacles. As the Senator well knows—it is almost a rhetorical question—another obstacle is how much are we going to be able to sell abroad. And on that, we are united 100 percent in the Senate Agriculture Committee. Let us remove those obstacles for sales abroad.

This bill does not address that and I would not expect it to, except it does perhaps move in the right direction in a very minimal way. There are subsidies for export of eggs contemplated in the bill by giving grain out of CCC stocks to poultry producers, both for the export of the meat itself and for the export of the eggs. The provisions in the bill would permit the Secretary of Agriculture to give grain to those chicken producers and those egg producers in the form of an export subsidy.

And, I might point out along that same line, that section of the bill refers to long staple cotton which, again, would subsidize the exporting of long staple cotton by giving some cotton to the exporter to encourage the sale and to make a profitable sale.

Now, there is nothing in the bill, per se, that says let us give anything on corn sales abroad or wheat sales abroad, let us give some grain out of CCC stock to make those sales attractive; in other words, an export subsidy.

Very candidly, when I inquired of Under Secretary Lang whether that was contemplated by the Department of Agriculture, he said he believed not. There would possibly be some grain out of CCC stocks given to flour millers on export sales, but that is as far as they are able to go.

Now, this is a departure from the Department of Agriculture policy. It is a departure from the policy on agricultural sales from the United States. It may be very good. I would certainly like to see how it would work. It is one of the features of the bill that has some attraction to me.

Mr. BOREN. Will the Senator yield?

Mr. MELCHER. Mr. President, if the Senator has one more question, I would be glad to answer, but I do not want to hold the floor and deny any other Senator his right to the floor.

Mr. JEPSEN. I thank the Senator.

I would just suggest that I, too, have some reservation in giving the PIK program any full endorsement without knowing all the details of how they will be implemented and what regulations there will be affecting governing its operation. As with any program, the success or failure will depend on the mechanisms of operations. How well this program is administered and develop will determine how much participation we will have.

But I would point out it is voluntary. It is optional. It is not mandatory. And the direction of the Secretary of Agriculture to his people at the Department I think is well worth repeating. He said: "Keep it simple and make it a real enticement for farmers to participate."

I would suggest and recommend and urge that we get this bill up, that we run it up the flagpole and we do so as should be done on a logical, solid, prudent man basis, and that is we have an opportunity at this point in time to present a bill, knowing what is mandated, to the people, especially to the agriculture community of this country. We should present it to them and in the next couple of months they will have a chance, with something concrete in their hands to look at, to review, to address themselves, and then, as we do in a democracy, we will listen for the whisper of the people to find out what they are really thinking about. But let us give them something to look at and work on.

Mr. MELCHER. Mr. President, let me just respond that I think the Senator from Iowa made a very good suggestion. I would like to work throughout the day and tomorrow on making some propositions to the Senate for stronger language, and, hopefully, we can pass the bill rather shortly. If we do not pass it this week, I would hope that we pass it very shortly in January because, indeed, we do need to move.

Mr. President, I yield the floor.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER (Mr. WALLOP). The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, I would just say before the Senator from Montana leaves the floor, that we are running out of time. There is a great deal of non-partisan support for this legislation. The primary credit goes to the distinguished Senator from Kentucky, Senator HUDDLESTON, and the distinguished Senator from Mississippi, Senator COCHRAN. They spent a great deal of time with Senator DIXON and others on both sides of the aisle.

We have a product now that may not be perfect. But we only have about 1 hour and 50 minutes, as I see it, after which it is too late for the American farmer. Somebody asked me yesterday, "What is the name of the farm program?" I said, "It is the PIK bill." They said, "No, it is the nit-PIK bill." We are nitting and picking the thing to death.

Everybody knows it takes only one Senator—we learned that on our side with the gas tax —to kill a bill. While it is not going to happen with the gas tax,

It may just happen on the other side with the farm bill.

We are running out of time. We ought to bring the farm bill up or we ought to say we do not want to bring it up. Whoever does not want to bring it up ought to stand up and say,"I do not want the farm bill," and not pick it to pieces.

Members are saying we can pass this bill in January. We are going to do a lot of things in January, the way it looks. I hope after all the time, all the hearings, and all the time spent by the Senator from Mississippi and others, that we will be allowed to bring this bill to the floor where amendments could be offered.

Some are good amendments. We can vote on the amendment of the Senator from Montana. Senator BUMPERS has an amendment he would like to include in this bill. It has some merit. I think Senator Metzenbaum said he has an amendment.

There is a lot of bipartisan interests in this legislation. I do not know why

we cannot reach an agreement for an hour and a half, give an hour to the Senator from Montana and 30 minutes to the rest of us, pass the bill by 6 o'clock, and go to conference.

Mr. HUDDLESTON. Will the Senator yield?

Mr. DOLE. I yield.

Mr. HUDDLESTON. The Senator from Kansas believes this is an approach we ought to take, and I agree. If we wait to devise a bill that is absolutely perfect to every person who has an interest in the subject before it is even brought up for discussion and consideration on the floor, I am afraid we are going to have to be here a mighty long time. I have been in the Senate a long time and that does not happen very often.

I know there are some concerns and some questions about whether this particular bill, this particular plan, will provide the solution. There is nobody who can say. We cannot look into the future and say this absolutely going to work.

We can look at the present and we can look at the past, and we can say what we have now is not working. We have the largest surpluses in the history of the United States. Prices are depressed. The cost of the program in 1 year has gone from about $8 to $12 billion and will go to $16 billion if it stays on the same path. That is not the direction we want to go.

Farm income for 3 straight years has dropped in real terms and, if the present projections hold, next year farm income will be just about one-half in actual dollars what it was in 1979—100,000 farmers in the country are facing bankruptcy right now. Farm credit is at an all-time high. These are serious conditions.

The distinguished Senator from Montana has rightly expressed some concerns about this particular bill and whether it will do certain things. There are two things that we know it will do that ought to be positive.

One is it will decrease the amount of grain on hand in the United States. If it works at all, if anybody takes advantage of it, there will be less grain available. How much less, nobody knows. Will it be enough less to have an upward surge in the prices in the market? Nobody knows, because we have surplus on top of surplus. We have to eliminate a lot of surplus and we will still have surplus. So the question is, How far do you go until you get down to the point where the buyers again will be competing for the crop and the price will go up and the farmer will get a decent return? Nobody can say right now. But there is one thing we know will happen: There will be less grain in the United States if this program goes into effect than there will be if it does not go into effect.

The second positive thing that we know is that those farmers who participate will get their grain without having to incur the expense of production. That is incontrovertible. Those two things will happen with those who participate in this program.

So it seems to me there would be less pressure, there would be less need, for the farmer who participates in this program and takes his payment in kind to run to the market immediately and cash in his receipts in order to have a cash flow, because he has incurred less indebtedness, because he has not had to pay for the cost of producing that crop.

These things seem to be fairly acceptable, logical, and reasonable. That much we know.

The other provisions of the bill that will allow the use of this surplus for various ways may need to be altered. But, there again, we are trying to approach the major problem that confronts the American farmer. That is the tremendous amount of surplus that is overhanging the market at the present time and depressing his price.

We have provided, as has already been indicated, a guarantee in our bill that a person who participates in the program, who takes the grain instead of cash, will be guaranteed at least 75 percent of the loan rate for that crop he takes. So he has some protection.

It just seems to me that the time has come to say to the American farmer that the Senate of the United States is ready to enact some legislation that will be helpful to him.

There is talk about doing it tomorrow. We might as well tell him tonight we are not going to do anything; we are through. There will have been no action. The idea that we can pass a bill tomorrow, get it to the House, they pass a different one, go to conference, and get it back here for concurrence, I do not think is within reason.

So we are faced with the problem of trying to do something rather than doing nothing, trying to take something on which there are still questions and concerns but putting it in such shape that it can go into effect and can possibly help the struggling agricultural producers in this country. Sitting back and waiting for that perfect bill, that one that everybody can agree with, one that everybody thinks or knows will succeed, if we ever had one of those, I know we would all be for it. But who knows? We have tried program after program.

As I pointed out before, one thing that is absolutely known now is that none of these are working at the present time.

Mr. DOLE. Mr. President, there has always been bipartisan, nonpartisan cooperation in the Agriculture Committee. Under the leadership of Senator Talmadge of Georgia, those of us from the wheat States took care of the wheat program, and those in the Corn Belt worked on the corn program. That system has not changed under the leadership of the distinguished Senator from North Carolina, Senator HELMS, with the help of the distinguished Senator from Kentucky, Senator HUDDLESTON. We agree to work together for the most part.

If someone is concerned that we are trying to sneak something through rather than addressing it next year, I would be willing to make that pledge right now.

Look back on the farm bill last year. The administration did not want target prices. We still have target prices because some of us on this side of the aisle and some on the other side of the aisle thought they were necessary to protect farm income. They have protected farm income.

I would hope we could get to the bill and have this debate on amendments because once cloture is invoked on the gas tax bill, we cannot get off the gas tax bill without unanimous consent.

Although, the Senator from Montana thinks we have tomorrow, Tuesday, or Wednesday, it is the view of this Senator that time is running out.

Mr. JEPSEN. Will the Senator yield?

Mr. DOLE. I yield.

Mr. JEPSEN. Can the Senator from Kansas or someone else on the Agriculture Committee tell this Senator what action does the House take, and, second, what has the House indicated as to their willingness to take further action?

Mr. DOLE. For all practical purposes, the House bill would make certain that the administration can initiate the PIK program. If we do not start it soon, we cannot apply it to 1983 crops. We have about 1 week. Someone can ask for a unanimous-consent agreement on either side. We now have 1 hour 40 minutes left. We can bring up the amendment of the Senator from Montana and we can vote on all amendments. If they are carried, they go to conference. If they lose, we will still get a farm bill. I just know my friends on both sides have farmers in their States who are concerned about this bill. They do not think it is perfect and we all know it is not perfect. We have been using PIK programs since 1933. We have had a lot of problems in administrations of both parties, but it is all we have left to try. We ought to do it today.

I yield the floor.

Mr. BOREN, Mr. PRYOR, and Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. Mr. President, I shall take just 30 seconds. I would like to join the distinguished Senator from Kansas, the distinguished Senator from Kentucky, and the distinguished chairman of the subcommittee, Sena-

tor COCHRAN of Mississippi. We have to do something in the next hour or hour-and-a-half in order to provide our farmers some hope. I would like to say I do not understand everything that is in this bill; the farmers do not understand everything that is in this bill. But I think if we could pass this bill and come back in January or February and hold hearings and fine tune it, that is the least we can do.

I beg and I implore my colleague not to offer objections on this legislation. Let us pass this bill and let us fine tune it when we come back.

Mr. BOREN and Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BOREN. Mr. President, I want to associate myself with what the Senator from Arkansas just said. I shall not debate here. We have had a full-scale debate on the merits and demerits of the PIK proposition. I have a lot of doubts about it. There are things I would like to change. Anybody who followed the debates in the Agriculture Committee knows there have been some strenuous objections to it and there are some suggestions for changing it.

It has been almost an hour and a half now since we started this debate. We have a window of an hour and 15 minutes. We have a chance to do something that might—might; I use that word advisedly—help the farmers in this country. They are in such desperate shape that I do not think we can sit here responsibly and not use the next hour and 15 minutes to try to do something to help the farmers of the country.

I share the skepticism of the Senator from Montana about the House-passed bill. As far as I am concerned, the House-passed bill has no guarantees in it. It is absolutely worthless as far as anything to help the farmers.

I cannot in conscience vote to give the Congress a blank check to work the House-passed bill. If the Members on the other side of the aisle will give us this guarantee, this will be something that will help the Senator from Montana. I wonder if they will give us the guarantee that in no case will they allow the Senate-passed bill, if we pass the Senate bill this afternoon, in no case, on third reading or in conference, would the Senate managers of the bill allow the House-passed bill to be totally substituted for this bill. I do not want to vote to send the Senate bill forward, and I am sure the Senator from Montana does not—I know that is one of the objections he has raised—then have it be used as a subterfuge for substituting a blank check House-passed bill.

I think if we do have assurance that the Senate conferees, if we are able to pass this bill, will take the Senate bill to conference and make every effort to get the Senate bill, with the understanding that it would be useless to bring nothing but the House-passed bill back here before the Senate as a conference report and have us act on it. If we can make a unanimous-consent request with that as a proviso, an understanding, at least—perhaps it does not have to be part of the unanimous consent, but a stated agreement.

Second, the Senator from Montana would have an opportunity to offer his four amendments, I think he has, first, that he be given an up or down vote on those four amendments, as far as I know; the rest of us would be glad to take 10 or 15 minutes to offer, with very little or no debate, the amendments we have to offer.

I wonder if it would be possible to break this logjam so the Senator from Montana would clearly have his day and offer all the proposals he made so we are clearly protected against the House-passed bill being substituted in the committee in toto—that this will not be used as that kind of device.

I ask the Senator from Mississippi, would it be possible to get those assurances? If it would, I hope our colleague, the Senator from Montana (Mr. MELCHER), whose aim is solely to help the American farmers, as is the aim of the rest of us who talked here today, the greatest champions of the farmer in this body and in this century, as far as I am concerned. I wonder if he would seriously consider if that would be possible.

Mr. COCHRAN. Will the Senator yield to me?

Mr. BOREN. I am happy to yield to the Senator from Mississippi.

Mr. COCHRAN. Mr. President, I appreciate the Senator from Oklahoma trying to identify the real problem we have here. That is we have just about an hour-and-a-half to dispose of this bill. We are going to have to come to some agreement on a time certain for debate and disposition of whatever amendments are going to be offered. I for one would certainly be willing to join him in this and if the request were to be granted, I would be willing to proceed in that fashion. With respect to the conference, it is my hope the Senate conferees will urge the House conferees to accept that bill, whatever that bill would be, that is passed by the Senate today. I agree with the Senator that we do need safeguards in the legislation to protect the interests of the farmers and not just give the Secretary of Agriculture a blank check, total discretion, in how to formulate or administer a payment-in-kind program. I might say if we continue to proceed as we are, they are going to rename the PIK bill the "nit-PIK." bill.

We should not be trying to write the bill before we ever proceed to the consideration of it. I hope we can get agreement to proceed to consider this bill. The Senator has my assurance that we shall try to work in conference to make sure the Senate side prevails.

Mr. HUDDLESTON. Will the Senator yield?

Mr. COCHRAN. The Senator from Oklahoma has the floor.

Mr. HUDDLESTON. Will the Senator yield?

Mr. BOREN. Yes.

Mr. HUDDLESTON. I wonder if it would not be true that the Senator from Oklahoma, the Senator from Alabama, and other members of the Agriculture Committee would be on the conference and we would not have to accept a conference result that is not to our liking in the least. I agree; I do not believe we ought to just accept what has been sent over from the House, because it does not have those safeguards, does not have the amount of work in it that obviously went into the product of the Senate here in our committee hearings and committee actions. I think the Senator can be assured that the conferees would not be receptive to anything substantially less than what might be enacted here in the Senate.

Mr. METZENBAUM. Mr. President?

The PRESIDING OFFICER. The Senator from Oklahoma still has the floor. Does he yield?

Mr. BOREN. I yield to the Senator from Ohio.

Mr. METZENBAUM. I thank the Senator from Oklahoma. I speak as being one of those less knowledgeable than probably any other Member who has spoken on the subject today.

Certainly, you do not have to be an expert in the field of agricultural legislation to know the plight of the farmers in Ohio and every other State in the Union. Therefore, I think this legislation is a major move in the right direction as far as providing some relief, some assistance to the farmers of America.

As a matter of fact, it is rather interesting to me that this bill's title is probably a misnomer. I think the bill ought to be called the vindication of Henry Wallace bill, because it now appears in this legislation that Ronald Reagan, who is always so ready to quote Franklin Delano Roosevelt, has totally picked up the programs of Henry Wallace, emphasizing the vast expansion of the set-aside program. Henry Wallace was one who first came forward with those programs. I am not here to tout him. But I do point out that he was the Vice President under Franklin Delano Roosevelt and was probably even better known to one of the Members of this body who ran against him in 1948, the distinguished Senator from South Carolina.

I think that is significant. I hope the man in the White House will not only see fit in the future to praise and quote Franklin Delano Roosevelt, but

that he will look to other Democrats for leadership and for answers to other problems this Nation is facing, not only in the field of agriculture.

Further addressing myself to the legislation itself, I am pleased that an amendment I had discussed with those active on the Agriculture Committee and was prepared to offer on the floor of the Senate has been adopted. That amendment will assist those voluntary agencies which do humanitarian work in feeding the hungry people of the world.

Over the years, these programs could not have worked were it not for the efforts of organizations such as CARE, Catholic Relief Services, Church World Services, the Cooperative League of the USA, the Joint Distribution Committee, Lutheran World Relief, and many others who have demonstrated their ability to give food directly to the hungry people who need it. As a matter of fact, the amendment that has been included in the bill would make it possible for these agencies to barter and sell commodities and, I might say, under very tight standards of accountability, so tight in fact that those funds that they would receive could not be used by those organizations to meet their operating and overhead expenses. I believe that the legislation is a major step in the right direction. I believe the legislation is better legislation by reason of the amendment that they have seen fit to accept that I had intended to propose on the floor of the Senate. And I agree with those who have said the sooner we get on with legislation, the better chance the farmers will get some relief from this Congress.

SEVERAL SENATORS addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma has the floor.

Mr. BOREN. Mr. President, I wonder if I might try to break the logjam by propounding a unanimous-consent request, if I could have the attention of those Members who are interested.

Mr. President, I ask unanimous consent that we proceed to the consideration of the PIK bill; that the time for debate on the PIK bill expire no later than the hour of 5:55; that the Senator from Montana be allowed 1 hour in which to present his four amendments; that the remaining time be left for other amendments, and that if any rollcalls are ordered on those amendments or on final passage of the measure, those rollcalls to be stacked and occur immediately after the vote on cloture, which is scheduled for 6 o'clock.

Mr. LONG. Mr. President, reserving the right to object, I would not object to that bill coming before the Senate. I believe I would want to object to amendments. I do not know what all the amendments are going to be, but I will not object to the bill coming before the Senate.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, it is within the Members' right to ask unanimous consent to proceed to the consideration of the bill. I think it ought to be cleared with the majority leader, which is usually a right reserved to him. It is not saying that the Senator from Oklahoma does not have that right under the rules; he does, but I would certainly like to continue the comity that has always existed between the Senator from Tennessee (Mr. BAKER) and myself. When I was majority leader, I rather zealously guarded the right of the majority leader to do the moving and to ask unanimous consent to proceed when at least it had been cleared by me and it still had to be cleared by the minority leader.

But I would hope that the distinguished Senator from Oklahoma would let us make sure that the majority leader has no objection.

Mr. BOREN. Mr. President, I certainly think the point of the distinguished minority leader is well taken, and the Senator from Oklahoma did not wish in any way to usurp that position. I merely offer the unanimous-consent request, and I hope that the majority leader perhaps has been notified by now about it. I see the distinguished chairman of the committee is on the floor. It was simply an attempt to get us off high center to see if in discussion on this matter there would be objection to it. Perhaps we might proceed to see if there would be objection to it if it is offered in the form which I propounded. I will at this time temporarily, without losing the floor, withdraw the unanimous-consent request until the majority leader arries and until we hear from the distin.guished chairman of the committee.

I will be happy to yield to other Members to see what reaction there might be to it, including the Senator from Montana, just to see if this might get us off high center.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. HELMS. Will the Senator state the unanimous-consent agreement that he has in mind?

Mr. BOREN. I will tell the distinguished chairman what I suggested—since time is about to run out on us—is that we have an agreement that will allow us to take up the bill, which would terminate debate on this bill at 5:55, which would be immediately prior to the scheduled vote on cloture, which I believe is at 6 o'clock; that the Senator from Montana be allowed 1 hour in which to bring up the amendments that he has to offer—I believe there are four of those amendments—and perhaps we would need to specify the request as to the amount of time on each one to take up that hour; that others be allowed to offer amendments immediately after that, and if there were any votes offered on amendments or the reporting of the bill that rollcalls be stacked without further debate, to occur immediately following the vote on the cloture motion.

I say to the distinguished majority leader that I just offer this in an effort to try to get us off high center, to see if the Senator from Montana and others who have been looking at it might think this might be a worthwhile way to proceed. I have deferred offering this until the majority leader and the chairman of the committee returned to the floor to see what their reactions to it might be.

Mr. BAKER. Mr. President, does the Senator have the floor?

Mr. BOREN. I yield to the majority leader.

Mr. BAKER. I thank the Senator.

Mr. President, I would like to cooperate in any way I can, but I have to say I am a little disturbed by the idea of having those votes after cloture, because we are going to be hard put to spend the time we are going to need after cloture is invoked, if cloture is invoked anyway, before it gets very late this evening.

I wonder how the Senator would feel about having those votes just before 6 p.m. instead of just after the cloture vote?

Mr. BOREN. I think that would be good if we have the time. I think the Senator from Montana has four amendments, if I am correct. If you had four rollcalls, that would be an hour's time, and we now have less than an hour and a half to have discussion of the amendments and votes, plus I understand the Senator from Ohio, I think, had—

Mr. METZENBAUM. No.

Mr. BOREN. The Senator from Arkansas has an amendment.

Mr. METZENBAUM. Will the Senator yield?

Mr. BOREN. We have potentially two or three other amendments.

Mr. METZENBAUM. I have no amendment, but I am concerned about extraneous amendments. I want to be certain that the unanimous-consent request was made in such a manner that only the amendments from the Senator from Montana would be considered and that all of those would have to be germane.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I would like to be sure that we know what amendments we are talking about, because the request is made in such a way that the gas tax bill could be hooked on an amendment for that matter or any other amendment.

I have no objection to the Senators trying to work out some order by which the bill and the amendments that they are interested in are taken up and disposed of, but I want to see that request, or hear it very carefully propounded, to make sure that some other amendments not germane to this matter at all cannot be brought in as amendments with a time limitation and an order for the yeas and nays and the thing is a fait accompli.

Mr. BAKER. Mr. President, with the Senator reserving the right to object, there is another matter, too, and that is I am advised by our staff that if we are going to restrict amendments—and I favor that, by the way—but if we are going to do that, we have a number of Senators we have to check who have made notations on our calendar, so I am afraid we would not be in a position to get an agreement right now. But I would be glad to shop that agreement.

Once again, may I urge Senators to consider that we ought to consider doing this in the time that we have available, because if we start doing this after cloture is invoked and temporarily laying aside that measure, it will just be that much more time that is added to the time required to try to complete action, whatever that action is, on the highway bill.

So I am going to stop talking with the hope that the Senator would not put a request at this time and that we will get our staffs together and see if we can work something out that will fit the action sought within the time available.

Mr. BOREN. I wonder if the majority leader could get a list of those who wanted to offer amendments and then determine from each one of them—there are other concerns—that there are no nongermane amendments offered.

Mr. BAKER. Yes; I will be glad to ask my staff to cooperate with the staff of the Senator and the minority leader to see if we can get that done.

Mr. BOREN. I thank the majority leader.

I believe I have already withdrawn my unanimous-consent previously, and at this time I relinquish the floor.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, could we have order in the Senate?

The PRESIDING OFFICER. Will staff, Senators, and visitors please take their conversations to the cloakroom? The Senator is entitled to be heard.

The Senator from Nebraska.

Mr. EXON. I thank the Chair.

Mr. President, I would hope that we could work out something along the lines of the unanimous-consent request just offered by my friend and colleague from Oklahoma.

I have looked at the PIK program and I have varying degrees of concern about it. But I generally——

The PRESIDING OFFICER. Would the Senator suspend?

The Senator is entitled to the courtesy of a Chamber reception for his words.

Would people please take their conversations out; the galleries please cease conversations?

The level of noise is not such that the Senator can be heard.

The Senator from Nebraska.

Mr. EXON. I thank the Chair again.

The RECORD will show that this Senator generally goes along with the recommendations of the committee. I have a great deal of respect for Members on both sides of the aisle who serve on the Agriculture Committee, including a high-ranking member of that committee, my colleague the senior Senator from Nebraska.

Therefore, it is upon their recommendation that I would hope that we get on with bringing up this bill as quickly as we can, giving everyone an opportunity to offer any amendments that they think are in order so long as we would have a clear understanding that nongermane amendments would not be placed thereon because if that happens this could become another lightening rod for all kinds of considerations.

Mr. President, I am having great difficulty hearing myself. I do not know whether the Chair can hear me or not.

The PRESIDING OFFICER. The Senate will be in order.

Mr. EXON. I thank the Chair once again.

I am pleased, of course, to hear the usual situation where we take a bipartisan approach to many things here and especially with regard to agriculture, and I compliment the Senate Agriculture Committee for that action.

Mr. President, the Agriculture Act of 1982 provides for a special payment-in-kind land conservation program and for the expansion of U.S. agricultural markets. It has been described as a shot in the dark by many and that is what it might well be. Certainly, many farmers in Nebraska are accepting this program on a conditional basis, probably because they have no other alternative, that they can see right now in facing the dire distress that we are experiencing in the Farm Belt of this Nation.

Mr. President, certainly there is little doubt that one of the fundamental problems facing our family farmers today is overproduction and the huge carryover from previous harvests. The very basic problem does, indeed, need to be addressed and, on first blush the PIK program seems to be a possible solution to this serious situation. To reduce our agricultural commodity production will, in the long run, reduce the carryovers of stock which have had such a dangerous and depressing effect on our grain markets. However, there remain strong concerns which need further study as to the impact the PIK program will have on the short-term economic conditions in the Farm Belt.

I have been in contact with many Nebraskans since the announcement of the PIK program. The wheat growers, wife, and the Farmers Union officials, to name just a few, have indicated their basic support for the concept, and I emphasize the concept of the program, but remain skeptical about the true intention of the basic reasons in proposing the payment-in-kind program. Many people have asked the question: Is this program really intended for the good of the ailing farm economy or once again an attempt to reduce Government expenditures and reduce high deficits by pushing CCC grain supplies onto the back of the American farmer?

Mr. President, I cannot answer that question, even though I do have my suspicions. I have talked about this with several members of the Agriculture Committee and others on the House side. I continually get the feedback that no one knows for sure, nor has the Secretary of Agriculture outlined what he proposes to do.

Mr. President, I am having a great deal of trouble hearing myself again. Could you ask for order one more time?

The PRESIDING OFFICER. The Senator is correct.

A great deal of the problem that is taking place is taking place in the galleries and in the staff areas of the Chamber, and if the staff cannot sit quietly, then it will be asked to remove itself and conduct whatever business it sees fit outside the Chamber.

The Senator will proceed.

Mr. EXON. Mr. President, I suggest if this bill is passed into law great care must be taken in the implementation of this program. Not enough information currently exists to give us a clear picture of just how this program will impact on the agribusiness community in rural America. Even though this program concept is not new and met with only limited success in the early 1960's when it was first employed to reduce surplus feed grain supplies, the times today are significantly different. In the early 1960's, the American economy as a whole was sound and our farmers were certainly much better off economically than they are today. Our farm economy, as well as the entire agribusiness community, is in the midst of a severe depression. Not only is the family farmer in serious financial difficulty, he is joined by the Main Streets' small businessman, the seed fertilizers, and implement dealers whose very existence relies on the farm economy.

Can these support agribusinesses survive this type of reduced production which is being proposed? Can the livestock industry withstand an almost certain dramatic increase in meat supplies, depressing livestock prices even further?

These concerns must be addressed and if we eventually pass this bill I hope that the Agriculture Committee during the early part of the 98th Congress will look further into the potential impact of PIK and be willing to propose changes should they be necessary in order to protect our farm economy from the unknown hazards which may be brought about by the enactment of this payment-in-kind program.

In closing, just let me say that I hope that somehow we can get the message clearly across. Some of the news reports today indicated that the House of Representatives yesterday gave the President another victory. Today we seem to measure the success or failure of a program in Congress on the President's score sheet. Someone told me a few moments ago that the Indians won today on a Mark Moseley fieldgoal in the last 10 seconds. That is not the way we should keep track in the opinion of this Senator of whatever we do right or wrong on this issue.

I would simply say that as I understand it, after talking to Members of the House of Representatives, the bill passed yesterday was not the PIK program in total and I am quoting from a remark made by the chairman of the Agriculture Committee whose bill passed yeasterday.

This bill which I have introduced does not as such provide a specific new farm program. What it does is simply clear up the Secretary's urgent request of some gray areas in the current law so the Secretary can have the right, as he wants to, to proceed to design and adopt a payment-in-kind program under the authority of existing law.

I would hope that we could proceed with this with the understanding that our Agriculture Committee will take an early indepth look at this when the new Congress convenes.

I yield the floor.

The PRESIDING OFFICER. The Chair will inform the Senator from Nebraska he was momentarily out of order in that they are not Indians but Redskins who won on the Mark Moseley fieldgoal.

Who seeks recognition?

Mr. FORD. Mr. President, since we are out trying to check on the ability or possibility of a unanimous-consent agreement, let me just give those who are listening and not talking, and I may get some quiet, what has been running through my mind during the last few days, and I think it falls on the PIK legislation.

Mr. President, I was raised on a farm. I understand the good and the bad about living on the farm. For now almost 60 years I have known or been a part of the change in the farm community. Things were different when I grew up than how it is today with the continuing intensity that is being placed or pressure that is being placed on the farming community.

We hear today about 100,000 farmers who are hanging on by their fingernails and we need to help.

It takes a special breed, I think, to stay on the farm today. To those who have a background of farming, I think it is 2½ percent of our population who are on the farm, the farm is a good life. Under the present circumstances, however, it is not so good.

Let me say what culminated my thinking. I have been in the Senate now almost 8 years. I found something that you do almost automatically, and that is gain confidence in individuals. The Committee on Agriculture is made up of decent men and women. They try very hard to find answers, and I have never known of a group that could find the perfect answer for the farmer. No matter how hard they try they never find the perfect answer for the farmer, and from what we have heard here today this is not perfect, but it is a start. We can put it into place and fine tune it in late January or early February. But start it now.

I found you have to have some semblance of confidence, and that confidence is built up over the years. I do not think you ought to look at a Senator, let him pull your chain and change your vote down there any way he wants you to vote, but I think you ought to have the confidence in their ability to put things together.

The ranking minority member of the Committee on Agriculture is not only my colleague but he is my friend. We have been through thick and thin in State politics. He was the majority leader of the State Senate in Kentucky. I watched him work there and I saw his integrity and I saw his ability, I watched his desire, and that desire of my distinguished colleague from Kentucky has grown to the point now where he is the ranking minority member of the Committee on Agriculture.

No one has more desire to see that the farmer's life is improved. Yet we find those who do not agree with what this committee put together. I think you have to trust some folks after they pound it out, bring it to the floor, and then you ought to give them an opportunity to vote on it. If you have got an amendment put it on, let it happen. You win some and you lose some, and some are rained out. One thing about those that are rained out, you can play it over. But that is the way the game is played here. That is the institution. That is what it is all about, and if we would just do that our constituents would understand what we are doing instead of all the parliamentary procedures of staying here all night, stopping Government. You would have an opportunity to explain it.

So, Mr. President, I am very pleased to be the junior Senator from Kentucky and have an opportunity to support my friend and my colleague in his effort to do an honest job to help the farmers.

I just say to you you have to have some confidence in your colleagues. I hope this body will give our colleagues on the Committee on Agriculture that signal of confidence. Let us have an opportunity to take the Senate bill, PIK, and let us have an opportunity to help the farmer. We have to try. I am a strong advocate of synthetic fuels. I am so strong I think we ought to build something even if it is a white elephant and try, and if that one fails try again, and if this agriculture bill does not work, try again, but let us put it down and get it out there and show confidence in our distinguished colleagues.

I yield the floor.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. COCHRAN. Mr. President, I want to express my personal appreciation to the distinguished Senator from Kentucky for his remarks and to thank him for the confidence he is placing in the members of the Committee on Agriculture who have worked very, very hard in a very short period of time to try to fashion a bill that would provide safeguards that were adequate to protect the interests of the farmers and, at the same time, give the administration an opportunity to implement an emergency farm program.

It is an emergency because there is not much time within which to act to provide relief for the 1983 crop year. That is why, Mr. President, it was necessary to act quickly when it became apparent that after this year's harvest the farmers of America had produced another bumper crop in almost all commodities, all the major commodities certainly. This was added to the previous years' good crop we have had. Couple that with the continuation of the world economic conditions that have led to reduced demand for U.S. agricultural commodities, and the continued strength of the U.S. dollar, which has made it more expensive for our foreign customers to pay for U.S. farm commodities, and we find ourselves in an emergency.

If nothing is done now to help farmers anticipate a better crop picture in the next crop year, many of them are not going to be able to get financing when they try buying fertilizer, chemicals, and seed and do the things they have to do within the next few weeks,

and many of them to prepare for this next planting season.

Some Senators may wonder why have we come here with this program all of a sudden? It is because all of these factors have converged in a very short period of time to make it apparent that unless Congress and the administration work in a cooperative way to try to provide a new opportunity for farmers to operate at a profit they are going to continue to go broke by the hundreds and the thousands and American agriculture is going to be down the drain. That is not overstating the problem, Mr. President.

We have about an hour within which to take this bill up and pass it and try to get together with the House, work out whatever differences may exist between the two bills, and get something to the President to authorize the implementation of this new program.

Every member of the Committee on Agriculture, according to my information, is supporting the proceeding to the consideration of the bill, save one. Three days ago we had a window of opportunity between the consideration of cloture motions and filibuster tactics, and whatever was going on with respect to the highway program and the continuing resolution, to bring this bill up.

We tried to get a unanimous-consent agreement worked out at that time, and it was not possible because of the objections of one Senator. I am hoping that during this period of time we can work out some way to agree to bring up the concerns of this Senator, and other Senators who may want to submit amendments, and let us vote on them, dispose of them, agree to them or reject them, and then go to conference and get this bill to the President for signing.

I do not know any other way we can provide any hope to American farmers to stay in business, Mr. President, unless we implement this program. We know it will not be an assured success, and we know it is fraught with difficulties of administration, but we will have opportunity as time goes on through the oversight activities here in Congress to help in consultation and discussions with the Department, fine tune the program, made modifications so that it will work. At least, Mr. President, it will give us some hope that there will be a possibility of profit on the farm if not in 1983 then certainly in 1984 because of the reduced surpluses that this program will achieve.

I am hoping that we can see others take another look at the situation we confront and try to come to some resolution of differences that may exist so that we can at least proceed to the consideration of the legislation.

I yield the floor.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER (Mr. DANFORTH). The Senator from South Carolina.

Mr. THURMOND. I rise in support of S. 3074, Agriculture Act of 1982, and sincerely hope it can be brought up today and passed today.

This bill authorizes a payment-in-kind, acreage diversion and conservation program for the 1983 and 1984 crops of wheat, feed grains, upland cotton, and rice. It is a much needed step toward restoring stability and profitability to America's farming sector.

And I might say, Mr. President, there is no segment of the population in America today that needs more help than our farmers.

In recent years, especially in the Southeast, farmers have suffered from high interest rates, severe weather conditions, and low farm commodity prices. These hardships have meant bankruptcy and foreclosures for many family farmers in my State. For this reason, I have been a strong supporter of acreage set-aside programs, in an effort to find a solution to the problems of oversupply and depressed commodity prices that exists in our agricultural sector today.

I recently wrote the Secretary of Agriculture, as well as the chairmen of both the Senate and House Agriculture Committees, expressing my support for a mandatory acreage set-aside program. Secretary of Agriculture John Block has opposed a mandatory set-aside because he felt such a program would unduly interfere with the freedom of farmers to operate their farm enterprises in the way they feel best. However, I am pleased to see that the Department of Agriculture, in conjunction with our Senate Agriculture Committee, has developed another alternative.

Mr. President, this bill will allow a farmer to receive Government-owned commodities in return for reducing production of surplus crops. This will provide direct assistance to the farmer by reducing his production cost, will reduce commodity surpluses in storage, trim the high cost of our Federal farm programs, and lead to more favorable commodity prices.

By helping to eliminate excessive stocks of commodities that depress our agricultural markets, farmers will soon be able to obtain decent prices for their products—and, hopefully, begin to earn a profit again after so many lean years. This much needed relief to the farming sector will trigger a resurgence in other related agricultural supply, marketing, processing, and transportation industries.

Mr. President, I am pleased to see that this proposal has bipartisan support, and that it is backed by the Secretary of Agriculture, as well as President Reagan. I am confident that this measure will be beneficial to all farmers, in all areas of the country. The problems in the agricultural economy have reached crisis proportions, making it essential that we act now to implement this new strategy in an effort to assure that widespread farm failures do not continue. By working to resolve these severe farm problems, we will not only help preserve a chosen lifestyle for thousands of family farmers, but we will provide a tremendous boost to our national economy.

Mr. President, I commend the initiative of the authors of this bill, the distinguished Senator from Mississippi (Mr. COCHRAN), and the distinguished Senator from Kentucky (Mr. HUDDLESTON). I would also like to commend my good friend from North Carolina (Mr. HELMS), the Honorable Chairman of the Senate Agriculture Committee, and others who played an important part in this. I am pleased to lend my support to this proposal, and I hope my colleagues will do likewise.

Mr. President, I cannot say too strongly how important I feel it is to act now. The farmers have suffered. Their farms are being foreclosed and now is the time to do something for them.

It has been suggested we wait and come back next year. Mr. President, I want to say that we ought to pass this bill now, pass it today. Then, if there are any kinks in it, we can iron them out when we come back here in the spring.

Mr. QUAYLE. Mr. President, I would like to register my strong support for the bill to authorize the PIK program. This bill should be passed without further delay. This program is necessary to address the crisis in farm income that has plagued the U.S. farm economy for the past 3 years. Moreover, this is a sound, innovative, and fiscally responsible approach to the problem of strengthening farm income. I want to commend Secretary Block, Assistant Secretary Bill Lesher, Senator HELMS, Senator, COCHRAN, Senator HUDDLESTON and all those who have worked so hard the past few weeks to make the PIK idea become a reality. This bill shows how responsible leadership can and should be marshaled to address a very real and very serious problem.

Mr. President, the farm sector is one of the principal pillars of the American economy. Although less than 5 percent of the population can still be counted as farmers, some 20 percent of our GNP is directly or indirectly related to the production and distribution of food. The American farm economy is the marvel of the world—it is efficient, cost-effective, tremendously innovative, and self-sufficient. Without a prosperous farm economy to build

on, we run the risk not only of a threat to our abundant and cheap supplies of food, but also a threat to the economic well-being of the entire Nation. We can already see some of the immediate ripple effects of the sluggish farm economy in the distressed state of implement makers, fertilizer makers, and dealers, and equipment suppliers. Additionally, we have seen a precipitous decline in the value of farmland, which is causing acute problems for both individuals and lending institutions whose loans are backed by farm real estate.

Not the least of the problems resulting from the decline in farm income is the tremendous rise in Federal CCC outlays to support farm product prices. When we passed the farm bill in 1981 we anticipated total CCC costs over a 4-year period at $10.4 billion. We saw this much and more spent in fiscal year 1982 as farm prices plummeted and the use of Federal storage and deficiency payments programs increased. We are now facing the prospect to another $12 to $14 billion in outlays in fiscal year 1983 because of the continued slump in prices. I need not remind my colleagues that we can ill afford expenditures of this magnitude in the current budgetary situation.

Mr. President, I am confident that the proposed PIK program which we have before us today is the correct approach to resolving the crisis in farm income. The PIK program will gradually whittle down the huge stocks of grain, cotton, and dairy products which are hanging over the markets and keeping prices at their present low levels. An added feature of the program which makes it even more attractive is that the new program will also cut Federal costs by reducing CCC stocks and by strengthening market prices.

I also want to commend the architects of the PIK program for addressing the demand as well as the supply side of the equation. We are all painfully aware that U.S. agricultural exports declined by 10 percent in value i the marketing year just completed. Much of this decline was undoubtedly caused by the effects of a sluggish world economy and the strength of the dollar. But we have also felt the effects of foreign competition which on many occasions is not conducted according to the rules of fair play and international accords. We all have seen instances of potential or actual U.S. markets being eroded or lost to subsidized foreign competition.

The bill we have before us today will provide our farmers and grain dealers the tools to meet such unfair competition head on. The authors of this legislation provide the Secretary with the authority not only to increase humanitarian donations to the needy throughout the world, but also to combat unfair competition by using our own surplus stocks to supplement and to sweeten export sales agreements.

Like the set-aside measures, the expanded export stimulation programs will serve the dual purpose of chipping away at surplus stocks and strengthening prices.

Mr. President, although I have great hope and great confidence in the PIK program, I do think we should recognize that there are certain potential problems associated with this innovative program. Our need to find a solution to current problems outweighs any potential difficulty with the PIK concept, but I do not think we should ignore some of the possible pitfalls.

First of all, we must remember that our current surplus in grain and other commodities is partly due to the favorable, almost miraculous, weather the past 2 years. We all know from painful experience that the situation could be reversed this coming year. The only lesson I want to draw from past experience is that we should not try to solve the surplus problem all at once—we should set our goals for reducing the surplus at very prudent levels. Based on his testimony to the Senate Agriculture Committee, I have great confidence that Secretary Block will design the program incentives in such a way as to achieve the modest reduction in stocks that is commensurate with both the gradual strengthening of prices and the need to retain reserves at a prudent level.

Second, because this is a new program that will be implemented on rather short notice, there are many questions related to administering the program equitably among all potential participants. I for one Senator would like to have had more details about how different farm operations could tailor their participation in the program, how it would affect suppliers and local economies, and what the payment-in-kind levels would be before being asked to approve the program. Again, however, I have the fullest confidence in Secretary Block and his staff that the program will be administered fairly and prudently.

Finally, Mr. President, I would like to note that the export stimulus programs authorized in this bill may, if used broadly, lead to violations of GATT trade rules. While I fully realize the need for the United States to become more aggressive in protecting its industry and its farmers against unfair competition, I think we should avoid the type of blunt and undiscriminating actions which might harm innocent third parties or lead us into a counterproductive trade war.

For instance, if we were to sell large quantities of our surplus dairy stocks on world markets and thereby depress world market prices, we would certainly be sending a strong signal to the EEC, but we would do more harm to New Zealand, which has always supported our free trade efforts, than we would to France. Likewise, I would not like to see generalized use of CCC stocks to supplement all foreign sales, because we would harm Australia and other U.S. supporters as much or more than the EEC.

Mr. President, I would strongly urge Secretary Block to use his strengthened export stimulus authority very selectively. I much prefer the concept of trade reciprocity advanced by Senators DOLE and DANFORTH and others to a blanket, acress-the-board trade war on agricultural subsidies. We should take care to target our export assistance to those cases in which we need it directly to combat subsidies by the EEC or others. We should use our own assisted sales in a selective way so that we achieve real reciprocity and avoid fighting a trade war which harms our friends as well as our foes indiscriminately. We should be tough and aggressive in combating foreign agricultural subsidies, but we should not use our own subsidies to harm our closest allies. Finally, I think we all realize that the first sector of the American economy to be hurt by a trade war would be the farm sector, since almost 40 percent of all U.S. grain production goes into export markets.

Mr. President, I believe all of these potential problems can and will be avoided by the skillful USDA team under Secretary Block. Again I commend the Secretary and all the others who have worked so diligently on this innovative program, and I urge immediate passage of the bill so that the American farm economy can get the boost that it needs and that is so overdue.

THE "PIC" BILL SHOULD HAVE BEEN ENACTED; THE FARMERS ARE THE LOSERS

Mr. HELMS. Mr. President, I commend Senator COCHRAN and Senator HUDDLESTON for their efforts to help American farmers through S. 3074.

The time has come for Congress to act. The farm economy is in distress, and farmers cannot afford to wait much longer for solutions. I regret that one Senator, the Senator from Montana (Mr. MELCHER) appears unwilling to permit the Senate to consider S. 3074. However, the Senator is exercising his rights.

The "payment in kind" idea is a fairly innovative approach to our farm problems. According to witnesses at our hearing, the program outlined by Secretary Block is projected to provide modest price strength in 1983, much stronger farm prices in 1984 and 1985, and savings in farm program costs of from $3 to $5 billion over the 3 fiscal years.

As the old saying goes: "If life gives you lemons, make lemonade." In this case, life has given us huge surpluses

of the major farm commodities. These surpluses depress market prices and are costly for the taxpayer to store.

Through the PIK program, we can convert these stocks from burdensome supplies into an incentive for farmers to reduce overproduction.

I believe this program deserves a chance to work. Congress should act without delay to clear the legal impediments so that the PIK program can operate with maximum effectiveness.

Recently I addressed the North Carolina Corn Growers in Raleigh. They had numerous questions and concerns about the PIK program, and I share those concerns. But I am even more concerned about what will happen if there is no PIK program.

According to the witnesses at our hearing, without a PIK program, prices will continue to be low, farm program costs will soar and surpluses will continue to pile up.

We could and should change all that. We could and should have acted today to clear the obstacles to a successful PIK program. I regret we were not afforded that opportunity.

PAYMENT-IN-KIND PROGRAM

Mr. DIXON. Mr. President, during consideration of the payment-in-kind program, a number of questions were raised by those of us on the Senate Agriculture Committee. Some of them were: What effect will this program have on prices? What effect will this program have on net farm income? What assurance does the farmer have that there will not be a depressing effect on prices when the grain is taken out of Government storage and placed on the market? Many of these questions are still unanswered by the U.S. Department of Agriculture.

During consideration of this program, I offered an amendment that was adopted by the Senate Agriculture Committee which gives the farmer some assurance regarding the value of the grain he receives under this program by providing a floor price. This amendment was directed at one of the major questions about the payment-in-kind program.

Under the amendment, in no case could the value of the commodities received by the producer fall below 75 percent of the basic county loan rate in effect during the marketing year in which the commodities are received by the producer. If the Secretary of Agriculture determines that the average market price for such commodity is less than 75 percent of the loan rate, the Secretary has a number of options, including authorizing the Commodity Credit Corporation to make cash payments, to assure that the producer receives this amount.

During consideration of S. 3074, the Agriculture Act of 1982, I had suggested a higher floor than that provided by the committee. Today, we would have reached a consensus for a higher floor price of 80 percent. This would have provided a floor of $2.12 per bushel for corn, $2.92 per bushel for wheat, 44 cents per pound for cotton, and $6.40 per cwt. for rice. Also, we could have provided funds for farmers who use conservation practices on the land taken out of production.

Mr. President, these are trying times on the American farm with commodity prices at the lowest level in years and net farm income at the lowest level since the days of the Great Depression. We must provide a program that is equitable and fair. We cannot transfer the total risk and responsibility from the Federal Government onto the backs of the American farmer. The floor provision helps provide a more fair and equitable assurance to the farmer if he or she participates in this proposed payment-in-kind program.

I, along with many of my colleagues on both sides of the aisle, have tried to reach a consensus regarding those areas that are still of concern to some of our colleagues, but to no avail. Many of us agree with my friend, the senior Senator from Oklahoma, that a time agreement should have been reached. This would have given Senators time to present their amendments and let the Senate determine the outcome of these matters.

In these closing days of the session, I met repeatedly with my colleagues on the Senate Agriculture Committee and worked assiduously to find a suitable plan we could offer to the full Senate. It is a tragedy that we did not produce what was needed. it is not tragic for the U.S. Senate alone. It is especially tragic that we did not provide the American and Illinois farmers and the Secretary of Agriculture with the tools to help reduce the surpluses that are depressing the markets and to reduce the cost of the commodity programs to the taxpayer. Though S. 3074 is not perfect, it is an improvement to the already announced farm program. I would have supported this measure had I had the opportunity to vote on the payment-in-kind program.

During the next session, I fully intend to pursue this concept and other measures designed to rescue the American and Illinois farmers from the economic straits now confronting us.

Mr. PERCY. Mr. President, I rise to urge my colleagues to pass this legislation, S. 3074.

Two weeks ago, I met in Springfield, Ill., with my Farm Advisory Committee, to discuss some of the critical issues facing our Nation's farmers. This legislative proposal was high on our agenda.

Mr. President, I value the advice and judgment of this group of Illinois farm leaders who have shared their collective wisdom with me for over 14 years. We spent 2 hours discussing the pressing problems facing the agricultural sector of our economy. The payment-in-kind (PIC) land diversion and conservation program proposal was endorsed by many of my farm advisers. The Secretary of Agriculture, John Block, has been working extremely hard to develop a proposal which will contribute to eliminating the huge surpluses and carryover stocks which hang over our great and productive agricultural machine. There is little doubt that something has to be done—and done now—about these problems.

In early December, the Illinois Farm Bureau, at their annual meeting in Chicago, voted to support this concept. It is not going to solve single-handedly the current situation. But it will contribute to establishing a course of action which will hopefully boost farm prices in the long run.

Mr. President, I am proud of the fact that I represent in the U.S. Senate the most efficent and productive agricultural State in the Union. Our farmers work hard and deserve a decent living. I am commited to staying here as long as necessary to see this legislation passed. How can we go home before we implement this alternative? Last summer, I spent 3 weeks traveling throughout the great Illinois farm counties—in fact, I have visited all 102 Illinois counties since my reelection—I have seen first hand the agony facing far too many Illinois farm families today. Every day my mail reflects these problems. Quite often a farm wife will sit down and write in her own words—I wish I had some of those moving letters in hand so that I could share them with my colleagues here today—about the struggles facing farmers.

Mr. President, the Senate Agriculture Committee has reported this legislation to the floor for consideration. They have worked hard on this bill—under trying conditions—it deserves our support. I have worked with the chairman of the committee, Senator HELMS, on this bill and other agriculture issues. For example, we are working together to urge the President to sign the legislation he has on his desk right now which would provide for contract sanctity for our worldwide agricultural trade. We have to restore confidence in our reliability as a supplier. This is just one of many farm-related matters which I am working on right now.

Mr. President, I ask unanimous consent that a background paper describing the new PIK program be printed in the RECORD following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3074—BACKGROUND AND NEED

In recent years, large supplies and weak demand have resulted in low prices for farm

commodities. These same low prices have also resulted in large outlays for commodity price support progams. The result has been the buildup of excessive stocks both by the Commodity Credit Corporation and in the farmer-owned reserve.

There are a number of reasons why crop surpluses are so large, the principal of which is increased production. Over the past decade, many factors have propelled production upward. Among them, easy credit, heavy capital investment, rising prices and price supports, increased farm exports, acreage expansion, yield-boosting technology, and excellent weather in 1981 and 1982 in the United States and other key areas of the world.

On the other side of the supply-demand equation, weak demand is a global problem. It results from widespread recessions, the rising value of the dollar, and instability in Eastern Europe, Mexico and other traditional export markets. Furthermore, embargo related losses, East-West political tensions, and unfair trade practices have hurt export potential for farmers.

All of this has placed a tremendous stress on our farm economy. In addition to weak world demand, reduced exports, soaring stocks, and depressed farm prices, farmers have also had 3 years of poor farm income, a drop in farmland prices, costly credit, and solvency problems.

Government outlays for farm programs are skyrocketing. Outlays have tripled in 1 year from approximately $4 billion in 1981 to an estimated $12 billion in 1982. Without a change in farm program policy, outlays for Fiscal Year 1983 could climb higher, and reserve stocks and farm program costs could increase markedly.

On November 17, 1982, Secretary of Agriculture John Block met with members of the Senate Committee on Agriculture, Nutrition, and Forestry to discuss the outlook for the farm economy. At this meeting, the Secretary discussed the possibility of instituting a payment-in-kind (PIK) program for the 1983 crop year.

As proposed by the Secretary, a PIK program would operate as a paid diversion program, with farmers given grain from surplus stocks in return for their agreement to reduce production by specified amounts. The PIK program would be operated in addition to already announced price support programs for the 1983 crops of wheat, feed grains, upland cotton, and rice.

The immediate effect of such a program would be to reduce existing stocks of surplus commodities, and to reduce future outlays by the Commodity Credit Corporation. USDA estimates savings from a 2 year PIK program at $3 billion over 3 years.

After a period of discussion and opportunity for questions, Secretary Brock indicated that he believed that such a program could largely, if not totally, be carried out under existing authorities, but that legislative assistance would be helpful and clarify matters in several areas.

On December 3, 1982, Senators Cochran and Huddleston introduced S. 3074, "The Agricultural Act of 1982". This bill included expanded authority for the operation of a domestic PIK program, as well as authority for an export PIK program, and donation measures.

A hearing on S. 3074 was held by the Subcommittee on Agricultural Production, Marketing, and Stabilization of Prices on December 9, 1982. Testimony was received from farmers, farm organizations, and others. Secretary Block testified and answered questions on the Administration's approach to a PIK program.

Also on December 9, President Reagan announced his support for the operation of a PIK program for the 1983 crop year.

Subcommittee markup on S. 3074 was held on December 13, 1982. The subcommittee favorably reported S. 3074, with amendments, to the full committee.

On December 13, 1982, the full Committee on Agriculture, Nutrition, and Forestry met to consider S. 3074, as reported from subcommittee. Eight amendments were accepted, and the Committee in the presence of a quorum unanimously agreed to report S. 3074, as amended.

GENERAL EXPLANATION

Special payment-in-kind (PIK) land conservation program

The bill, as amended, would provide that the Secretary of Agriculture may carry out a special payment-in-kind (PIK) land conservation program for the 1983 and 1984 crops. Under the program, producers who divert acreage from production and carry out soil and water conservation practices on that acreage would receive payments in kind. Eligible producers would be those who produce wheat, feed grains, upland cotton, rice, or other nonconserving commodities designated by the Secretary (not to include peanuts, tobacco, sugar beets, or sugarcane).

Under the program, producers would receive an amount of commodities equal to the number of acres diverted from production multiplied by a percentage of the normal yield as established by the Secretary. For example, a corn farmer may have a typical crop yield of 100 bushels per acre. If the Secretary were to provide 75 percent of normal yield for PIK participants, the farmer would receive 75 bushels per acre for each acre diverted under this program.

In order to encourage participation, the Secretary would be authorized to adjust the percent of yield offered to producers to participate in the program in order to compensate for reduced yields resulting from double cropping.

The Secretary may also take bids from producers for land to be diverted, but for the 1983 crops, before using a bid procedure the Secretary must offer all producers a specified percentage of yield for participating in the program and allow producers to sign up for it.

Payments under this program shall be made by the delivery of actual commodities, the transfer of warehouse receipts, or by some other method determined by the Secretary, which could include cash payments. In no case could the value of commodities received by the producer fall below 75 percent of the basic county loan rate during the marketing year in which the commodities are received by a producer. The Commodity Credit Corporation would be authorized to make cash payments if necessary to assure that the producer receives this amount. Commodities must be made available in such a way as to minimize any adverse effect on normal marketings, and PIK commodities may not again be placed under Government loan.

In order to protect farm suppliers and other businesses in any local area, the total acreage diverted from production for a particular commodity in any county may not exceed 50 percent of the total acreage base for the commodity in that county in any year. The Secretary is required to provide adequate safeguards to protect the interests of tenant farmers and sharecroppers.

The Secretary is also authorized to allow producers to consolidate their acreage bases among farms under the PIK program.

Under the payment-in-kind concept, a farmer could receive government-owned commodities in return for reducing production of surplus crops. The intent is to provide farmers assistance, to utilize our market-depressing surpluses, and to reduce farm program costs.

American farmers have produced record crops of major grains for 2 years in a row. Record production in addition to high inventories is causing low farm prices.

The PIK program will help remedy both factors. Inventories will be reduced as CCC commodities are distributed in the form of in-kind payments to producers for participating in farm programs. New production will also be reduced because a farmer must remove a percentage of his acreage base from production in order to qualify for program benefits. An effective PIK program will reduce surplus stocks and strengthen farm prices.

In the interest of promoting orderly marketing, the Committee supports program provisions discussed during the markup session that (1) would extend to participating producers payment by the Commodity Credit Corporation for storage costs to commence with the issuance of PIK certificates to the point of sale or through the end of the marketing year whichever comes first and (2) would cause PIK certificates to be issued on a staggered schedule based on normal harvest times in individual States. Of course, payment for storage under PIK would apply only when the producer is incurring the cost of storing the grain.

Expansion of United States agricultural markets

The first section of title II of the bill authorizes the Secretary of Agriculture to tender, at zero cost, commodities acquired by the Commodity Credit Corporation through its price support operations to United States exporters and users, and foreign purchasers to encourage development, maintenance, and expansion of markets for U.S. agricultural commodities and their products.

The intent of this program is to increase the volume of agricultural commodities and products thereof and products produced using the commodities moving into foreign markets to reduce the amounts of these commodities in government stocks and to develop, maintain, and expand foreign markets. The Commodity Credit Corporation could provide commodities held by the CCC to U.S. exporters, users, or foreign purchasers as an incentive to foreign customers to purchase additional U.S. commodities above the level of normal marketings. For example, if a foreign purchaser that normally purchases a given quantity of a specific commodity agrees to purchase additional quantities, then an amount equal to some portion of the additional purchases could be provided at no cost to the foreign importer. In addition, it is contemplated that the Secretary could provide commodities or products even though purchases are less than normal marketings in case where such bonuses would contribute to maintaining or expanding U.S. markets.

Such bonus agricultural commodities could serve to reduce the overall cost of U.S. commodities to foreign purchasers and thereby increase the competitiveness of United States products. Commodities provided under the program could offset the

use of export subsidies by competing exporting nations.

The bill required that equal treatment be provided to domestic purchasers and users of U.S. agricultural commodities on the same basis as foreign purchasers and users that receive U.S. commodities and products where the importation of a manufactured product made, in whole or in part, from a commodity made available for export under this provision would place domestic users of the commodity at a competitive disadvantage. In such a case in order to assure that domestic purchasers or users are not disadvantaged by the importation of a foreign manufactured product made, in whole or in part, from a commodity made available for export under the program, domestic purchasers or users would be eligible for receipt of a like amount of commodities or products.

In providing this authority the Committee does not want to worsen the problem now faced by the cotton industry resulting from foreign manufactured cotton products coming into the United States and competing unfairly with domestic products. Accordingly, the bill provides that the program shall be carried out in a manner that gives equal treatment to domestic users of U.S. agricultural commodities. In the case of cotton, this would be the processor, manufacturer, or other user who opens the bale of raw cotton. Any action taken by the Secretary under this provision, with respect to exports of cotton, is to be accompanied by comparable action for domestic users.

This bill, as amended, also provides that commodities or products shall be provided in such a manner so as to encourage increased utilization and avoid displacing normal sales. Commodities are not to take the place of domestic or foreign commercial sales or be reexported.

Expanded authority for use abroad of Commodity Credit Corporation stocks

Section 416 of the Agricultural Act of 1949 provides the Secretary of Agriculture the authority to donate surplus dairy products to needy persons in foreign countries. The bill, as amended, extends the authority for food donations under section 416 of the Agricultural Act of 1949 to other agricultural commodities and products acquired by the Commodity Credit Corporation. The commodities or products would be donated through foreign governments and public and private nonprofit humanitarian organizations for the assistance of needy persons outside the United States.

In order to facilitate movement of these donated commodities to needy individuals, the CCC may pay reprocessing, packaging, transporting, handling, and other charges, including ocean freight for overseas delivery, associated with the donated commodities or products.

Because the United States Government conducts food donation programs under other legislative authority, the provision requires the Secretary of Agriculture to ensure that donations under this authority complement, and are coordinated with, other United States foreign assistance programs, such as the Agricultural Trade Development and Assistance Act of 1954 (P.L. 480).

This provision would also permit increased exports of CCC surplus commodities under titles I and III of the Agricultural Trade Development and Assistance Act of 1954, and such exports would be in addition to the level of assistance programmed under that Act.

Distribution of surplus commodities

The bill as amended provides additional authority to the Secretary of Agriculture for the disposition and use of CCC-owned agricultural commodities.

Current law provides that surplus commodities owned by CCC may be distributed through certain food and nutrition programs. The bill provides that the Secretary shall encourage use of the commodities by contracting with private companies to have commodities processed into finished food products. The end products would then be used by eligible recipients, who would pay the cost of processing.

The intent is to increase consumption of surplus commodities by providing schools and other eligible recipients the opportunity to have bulk commodities from the Department of Agriculture processed into desired end food products at their own expense. For example, donated cheese might be processed into tacos, pizza, or other items.

The provision places no obligation on individual schools or States. Such processing, however, would provide schools with additional options for using free, bonus USDA commodities.

CCC sales of extra long staple cotton

The bill, as amended, allows the Commodity Credit Corporation to sell its stocks of extra long staple (ELS) cotton at such price levels as the Secretary determines appropriate to maintain and expand export and domestic markets for such cotton. Currently, the minimum price at which ELS cotton can be sold for unrestricted use is 115 percent of the loan rate as provided under the Agricultural Act of 1949. Removal of this restriction on the sale of extra long staple cotton will provide the Secretary with greater flexibility to effect the reduction of surplus stocks while at the same time allowing extra long staple cotton to be more competitive in both domestic and export markets.

Disposition of dairy products

The United States is currently storing large quantities of dairy products purchased under the dairy price support program. With the likelihood that sizeable quantities of the stored dairy products will not be resold in the domestic market because of restrictions in law prohibiting resale below certain price levels, it behooves the United States to export as much of its dairy surplus as possible in order to reduce Government outlays and recover expenditures made by the Commodity Credit Corporation in purchasing dairy products. Other nations export large quantities of dairy products into the world market either with the aid of subsidies or by donations.

Under the bill, the Secretary is encouraged to donate, or to export at the best price possible, at least 50,000 metric tons of dairy products during each of the fiscal years 1983 through 1985. In addition, the Secretary is required to report semiannually to Congress on the status of such donations and sales.

The Committee encourages the Secretary to take aggressive action in the area of U.S. dairy product exports.

Presidential report on the status of negotiating a new long-term grain sales agreement with the Soviet Union

The bill requires the President to report to Congress by December 31, 1982, on the reasons for maintaining the measures announced on December 29, 1981, postponing entering into negotiations on a new long-term grains agreement with the Soviet Union.

After the imposition of martial law by the military government in Poland on December 13, 1981, the United States took a number of trade-related actions to demonstrate its displeasure.

On December 29, 1981, the Reagan Administration announced specific measures to convey its disappointment with the involvement of the Soviet Union in the imposition of martial law in Poland. Included among the measures taken by President Reagan at that time was the announcement that the United States would postpone negotiations on a new long-term grain agreement with the Soviet Union. This position has remained in effect, and the Committee provision would elicit the reasons for the continuation of that position.

EXPLANATION OF THE COMMITTEE'S SUBSTITUTE TO S. 3074, AS REPORTED

1. Authorizes a payment-in-kind ("PIK") land diversion and conservation program for 1983 and 1984 crops of wheat, feed grains, upland cotton, rice, and other nonconserving crops (excluding sugar cane, sugar beets, tobacco, and peanuts). Under the "PIK" program—

Payments would not be subject to current law restrictions on the resale of CCC stocks or payment limitations;

Producers would be required to divert acreage from production to conservation uses and to comply with other terms specified by the Secretary;

Payments would be made by CCC by delivery to producers of commodities or warehouse receipts, in cash, or by other methods determined by the Secretary;

The value of commodities received by producers could not be less than 85 percent of the basic county loan rate for the commodity involved;

Commodities received by producers could not be put under the annual commodity programs;

Not more than 50 percent of the eligible acreage for a crop in a county can be diverted, in one year;

All producers of a crop for which a PIK is authorized for 1983 will have the opportunity to participate on an equal basis in the program;

Adjustments in program yields are authorized for producers who practice double-cropping;

Consolidation of farm acreage bases is allowed;

Normal marketings are protected; and

Protections are provided for tenants and sharecroppers.

Urge the Secretary to consider production expenses incurred for commodities already planted, in determining the payment rate for 1983 crops.

2. Provides that commodities may be tendered at no cost to exporters, users, and foreign nations to encourage foreign market development for U.S. commodities. Under the export "PIK" program—

Domestic users are provided equal treatment relative to foreign purchasers and users in cases where domestic users may be disadvantaged as a result of the program;

CCC will use qualified stocks to encourage increased use and avoid displacing usual marketings of the United States; and

CCC will take reasonable precautions to prevent resale or transshipment of commodities.

Allow the use of any CCC owned commodities, not just commodities acquired through

price support operations, under the export PIK program.

3. Expands current authority (to donate stocks of dairy products to needy persons in foreign countries) to include donations of other CCC agricultural commodities and products thereof, and authorizes the use of CCC commodities under titles I and III of Public Law 480, in addition to programmed levels.

Allow voluntary agencies to receive CCC donated commodities, under section 416, and to barter, sell, and distribute such commodities for the assistance of needy people.

4. The Secretary is encouraged to make available eligible products from CCC stocks directly to processors who contract with school lunch authorities.

Provide for making CCC stocks of surplus commodities available without charge or credit to special distribution programs developed by the States.

5. Allows the CCC to sell extra long staple cotton to maintain and expand export and domestic markets for such cotton.

6. Encourages the Secretary of Agriculture to donate or sell abroad at least 50,000 metric tons of CCC dairy products in each of fiscal years 1983-1985.

7. Authorize the use of CCC stocks to guarantee financial commitments and feedstock supplies in connection with alcohol fuels plants.

8. Authorize the Secretary of Agriculture to purchase commodities from farmers who have products stored in bankrupt grain warehouses.

9. Extend from March 1, 1983 to April 30, 1984, the deadline for filing with Congress the report of the Soybean Research Advisory Institute.

Mr. HEFLIN. Mr. President, I support the bill as considered and reported by our Senate Agriculture Committee. I have serious reservations about the bill as passed by the other Chamber. Our farmers are in dire economic circumstances. They are in a depression, not a recession, and we should make it our particular business to pass a bill to provide meaningful assistance to our farmers before this Congress adjourns. I think a PIK program, as outlined in the Cochran-Huddleston bill, could be an excellent approach. I think it provides safeguards for the farmers, safeguards for the agribusiness, and safeguards for communities that are needed in connection with the administration and carrying out of any payments-in-kind program.

The House-passed, bill, on the other hand, is a broad grant of power to the Secretary of Agriculture with no safeguards whatsoever. This bill leaves entirely to the discretion of the Secretary of Agriculture the details pertaining to the program. I think that there are no real mandatory features to go forward with certain things in administering the PIK program as we have inserted in the Senate bill.

As I review our farm situation and farm legislation, things come to my mind. When I first came to the Senate, everybody was saying that the Secretary of Agriculture has too much discretion. When we passed the farm bill last year, there was a general philosophy: "Do not give the Secretary of Agriculture a blank check. He will not exercise it"—not meaning the present one, but meaning those that occupy that position—"for the real benefit of the farmer."

Now, here we are today thinking about the possibility of passing the House PIK program, which is obviously the administration's bill, with no safeguards or restraints whatsoever on the Secretary of Agriculture. Back on November 24, during the recess, I believe, a number of Senators were in Washington and met with officials of the Department of Agriculture, including the Secretary of Agriculture, about this program and at that time asked for some specific details. The officials were asked to consider how this program would affect each of the commodities involved, to give the Congress some goals, to give the Congress some ideas on what they were seeking, to give us some formulas. And here nearly a month later we have not yet received anything whatsoever from either the Secretary or the Department. The recent hearings on the PIK proposal also failed to provide any details to the Senate Agricultural Committee and the Congress.

We have not yet been furnished with any of the details as to formulas by which PIK payments would be given and all of the various commodities that would be affected. All we know is that the program is to be left to the discretion of the Secretary of Agriculture.

I realize that some of this program has to be developed by regulation. But the Cochran-Huddleston bill approaches this from the viewpoint of providing some needed safeguards to our farmers. I think that our Senate Agriculture Committee has come up with a good bill that gives the right amount of discretion to the Department of Agriculture in the short time we have had to reconsider the PIK proposal.

Now, if this bill fails to pass, I think that the Department of Agriculture must share a large measure of the blame due to its failure to come forth with any of the details requested by many of us who serve on the Senate Agriculture Committee. In a month's time, they could tell, I think, tell us how they intend to operate this program. But spokesman and policymakers for the Department of Agriculture have remained silent on the details we have requested and sought. I repeat if this measure does not pass, then the Department of Agriculture has to bear the major share of the responsibility for its failure.

The Cochran bill gives a lot of discretion to the Secretary of Agriculture, more so than I would like, but I would support it under the circumstances and inasmuch as time is of the essence insofar as providing some relief to our hard-pressed farmers. But if we have to accept the House bill which does not contain any of the safeguards we have provided in Cochran-Huddleston bill then I could have some serious reservations about the feasibility of passing any kind of payments-in-kind legislation until early in the next Congress until we have had an opportunity to study the matter thoroughly. Let me mention some of the safeguards in the Senate bill. We have conservation practices allowing for the growing of certain crops. We also have safeguards where double cropping is concerned. None of that would be giving the discretion to the Secretary of Agriculture. There is a floor at 75 percent of the county's basic loan rate in regard to PIK payments. There are farm consolidation safeguards and admonitions. There are landlord-tenant share cropper safeguards and admonitions. These are all listed in the Senate PIK bill and it could be that the Secretary of Agriculture could ignore these safeguards and admonitions if he is given the blank check as invisioned in the House-passed PIK legislation.

I support the Cochran bill. I am willing to go ahead with the payments-in-hand program which was formulated by our Senate Agriculture Committee. But I think I can assure anyone who has any reservations about the payments-in-kind concept that, it is gonig to get very close scrutiny by this Senator unless the Cochran-Huddleston provisions dealing with the domestic PIK programs are contained therein, particularly the safeguards I have previously mentioned.

I think we ought to go ahead. We can have some time to work out any issue which may be in dispute. I think if there are dangers that come as a result of the conference activity we can have an opportunity to fully discuss the bill before we adjourn.

I would like to see us move forward with the Cochran-Huddleston bill. I think this is as good a bill as we can come up with at this time. It has many adequate safeguards in it and it also gives a lot of discretion to the Secretary of Agriculture, maybe too much, but I am willing to give that discretion to the Department of Agriculture and to the Secretary in order to get something moving in the quest to restore prosperity to American agriculture.

So I urge my colleagues to move forward and let us adopt the Cochran-Huddleston bill. It is by far and away the best approach to the payments-in-kind concept.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, I want to respond to a few of the points

of my colleagues and respond to some of them.

First, it has been said that we have a bill today or it is too late. Well, in the first place, a bad bill is too early and you live with it too long, a PIK in a poke.

Let us talk about the changes that will not happen very readily. The Secretary of Agriculture has very positively said what he wants. What he wants is a bill that will give him broader authority to enter into this without some guidelines, without some restraints, and without some protection in the marketplace for those producers. Mind you, that protection is what I am talking about. PIK will not take care of all the farmers. PIK is not designed to take care of all the farmers. PIK is designed to take care of perhaps 20 percent of the agricultural producers of this country in the commodities that it covers. Those are wheat, feed grains, cotton, and rice.

Perhaps there are some of those commodities, my colleagues could advise me, where a signup, a participation in the program of more than 20 or 25 percent would be likely to occur. But I can speak for wheat producers, that the Secretary of Agriculture anticipates that perhaps 25 percent of the farmers who grow wheat would participate in the program.

What does that mean for the other 75 percent who are not participating?

What they are afraid of, and I will make this point again, is that their market prices will be lower due to two things: First of all, the warehouse receipts may be cashed in very promptly after they are given out by the Secretary of Agriculture. Second, the removal of the triggering mechanism on the farmer's own reserve. The House-passed bill and the Senate bill do remove that because the Secretary of Agriculture contemplates using grain out of the farmer's own reserve to give them either the payment in kind, which would be the wheat or the feed grains, or to use for the warehouse receipt.

These are very valid concerns.

Another point that has not been mentioned at all in this discussion this afternoon has been what is the effect of the bill on sharecroppers? What is the effect of the bill on tenants?

That language, as far as I could find in going over it very thoroughly, is not included in the bill.

It is said that we can make corrections. I hope if we do take up the bill we are able to make those corrections in the right way.

Forty-five minutes ago when other Senators were speaking, it was discussed that perhaps in an hour and a half we could complete action on this bill. This is the largest industry in the country, and we are going to complete a major overhaul in an hour and a half?

I yield to the majority leader.

Mr. BAKER. The last remark of the Senator caught my attention. Indeed, an hour and a half ago we said we were going to do this in an hour and a half. There is no chance, in my opinion, that you are going to do this. There are a lot of other things that we need to do that we can do by unanimous consent.

I thank the Senator for yielding the floor so that we can go forward with things that will accommodate a great number of Senators, disposing of a great number of calendar items and Executive Calendar work that ought to be done.

THE CALENDAR

Mr. BAKER. I inquire of the majority leader if he is prepared to go through this list of actions which have been cleared on my side by unanimous consent.

Mr. ROBERT C. BYRD. Yes, Mr. President.

REAUTHORIZE THE DEEP SEABED HARD MINERAL RESOURCES ACT FOR FISCAL YEARS 1983 AND 1984

Mr. BAKER. Mr. President, the first item on my list is to discharge the Energy Committee from consideration of H.R. 6120. I ask unanimous consent that the Energy Committee be discharged from further consideration of H.R. 6120, the Deep Seabed Hard Minerals Act, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 6120) to reauthorize the Deep Seabed Hard Mineral Resources Act for fiscal years 1983 and 1984.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 6120) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXCHANGE OF CERTAIN LANDS IN MONO COUNTY, CALIF.

Mr. BAKER. Mr. President, I ask if the minority leader is agreeable that the Senate turn to the consideration of Calendar Order 984, H.R. 2475, the Mono County, Calif., bill.

Mr. ROBERT C. BYRD. We have no objection.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 2475.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate numbered 1 to the bill (H.R. 2475) entitled "An Act to modify a withdrawal of certain lands in Mono County, California, to facilitate an exchange for certain other lands in Mono County, California, and for other purposes."

Resolved, That the House disagree to the amendments of the Senate numbered 267, inclusive, to the aforesaid bill.

Mr. BAKER. Mr. President, I move that the Senate recede en bloc from the amendments 2 through 7.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

INDIAN CLAIMS

Mr. BAKER. Mr. President, I ask if the minority leader is agreeable that the Senate turn to consideration of Calendar Order 948, H.R. 3731.

Mr. ROBERT C. BYRD. Mr. President, we have no objection.

The Senate proceeded to consider the bill (H.R. 3731) to amend the act of October 19, 1973 (87 Stat. 466), relating to the use or distribution of certain judgment funds awarded by the Indian Claims Commission or the Court of Claims which had been reported from the Select Committee on Indian Affairs with amendments as follows:

On page 3, after line 22, insert the following:

Such plan or plans shall be limited to urgent needs arising from extenuating circumstances and shall accord with general principles governing administration of trust funds of minors and legal incompetents, including a requirement for strict accounting for expenditures.

(b) Clause (5) of section 3(b) of said Act is hereby striking out "warrant otherwise" and inserting in lieu thereof the following: "warrant otherwise: Provided, That in the development of such plan the Secretary shall survey past and present plans of the tribe for economic development, shall consider long range benefits which might accrue to the tribe from such plans, and shall encourage programing of funds for economic development purposes where appropriate.".

On page 4, strike line 11, through and including line 5, page 5, and insert the following:

SEC. 3. (a) Subsection (a) of section 5 of said Act is amended by deleting "either House adopts a resolution" and inserting in lieu thereof "a joint resolution is enacted".

(b) Subsection (b) of section 5 of said Act is amended by deleting "adoption of a resolution" and inserting in lieu thereof "enactment of a joint resolution".

(c) Section 5 of said Act is amended by adding the following new subsections at the end thereof:

"(c) Within the sixty-day period and before the adoption of any resolution disapproving a plan, the Secretary may withdraw or amend such plan: Provided, That any amendments affecting the division of an award between two or more beneficiary entities shall be subject to the consent of these entities as provided in section 2(d) of this Act. Any such amended plan shall become valid at the end of a sixty-day period beginning on the day such amendment is submitted to the Congress, unless during such sixty-day period, a joint resolution is enacted disapproving such plan as amended.

"(d) Once a plan is withdrawn before the end of a sixty-day period, the Secretary has until the expiration of the original one-year deadline to resubmit a plan to Congress. Such a plan shall become valid at the end of a sixty-day period beginning on the day such new plan is submitted to the Congress, unless during such sixty-day period, a joint resolution is enacted disapproving such plan.

"(e) Upon the introduction of the first such resolution of disapproval in either the House of Representatives or the Senate, the sixty-day period shall be recomputed from the date of such introduction and shall not again be extended.".

On page 6, strike line 14, through and including line 22, and insert the following:

"SEC. 7. None of the funds which—

"(1) are distributed per capita or held in trust pursuant to a plan approved under the provisions of this Act, or

"(2) on the date of enactment of this Act, are to be distributed per capita or are held in trust pursuant to a plan approved by the Congress prior to the date of enactment of this Act,

including all interest and investment income accrued thereon while such funds are so held in trust, shall be subject to Federal or State income taxes, nor shall such funds nor their availability be considered as income or resources nor otherwise utilized as the basis for denying or reducing the financial assistance or other benefits to which such household or member would otherwise be entitled under the Social Security Act or, except for per capita shares in excess of $2,000, any Federal or federally assisted program.

Mr. BAKER. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendments were agreed to en bloc.

● Mr. COHEN. Mr. President, H.R. 3731 is a bill to amend the act of October 19, 1973 (87 Stat. 466), which established a uniform policy and procedure for the distribution of judgment funds awarded Indian tribes or groups by the Indian Claims Commission or the U.S. Court of Claims. Prior to enactment of the 1973 act, it was encumbent upon the Congress to enact special legislation to provide for distribution of these awards in each and every case. The 1973 act was intended to alleviate this burden upon the Congress by establishing an administrative procedure which still remained subject to congressional review. Over the years a number of deficiencies have been discovered in this legislation. The purpose of H.R. 3731 is to rectify these shortcomings and again relieve the Congress of this legislative burden while still preserving the review function incorporated in the original act.

Mr. President, the first of the two amendments I have sent to the desk I am offering at the request of Senator MELCHER. The purpose of this amendment is to make the provisions of section 7 of this bill retroactive to judgment fund distribution plans approved by the Congress subsequent to December 31, 1981. Judgment funds awarded against the United States or taking of Indian lands or assets have customarily been treated as exempt from State or Federal taxation, and such funds also have generally been exempt from consideration as a resource for purposes of programs under the Social Security Act and the Food Stamp Act. Sometime late in 1981, however, it was determined that the exemption of these funds from consideration as a resource for purposes of the Food Stamp Act was not legally well founded. Section 7 of H.R. 3731 provides that in future distributions under this act, only those funds in excess of $2,000 per capita shall be considered as a resource for purposes of Federal or federally assisted programs. The amendment I offer on behalf of Senator MELCHER would make this provision retroactive to funds distributed since 1981, or purchases made with such funds.

Mr. President, the second amendment I offer provides that interests of individual Indians in trust or restricted lands, lands that cannot be alienated without the consent of the United States, shall not be considered a resource in determining eligibility for assistance under the Social Security Act or any other Federal or federally assisted program. The 1981 Omnibus Reconciliation Act (Public Law 97-35) adopted a new policy for determination of eligibility for these programs that excluded from eligibility for such programs as AFDC and medicaid under the Social Security Act, any person owning an interest in real property with a value greater than $1,000. It does not appear that in adopting this standard any consideration was given to problems or policies associated with Indian trust or restricted land which cannot be alienated without the consent of the United States.

Mr. President, certain States have determined that Indian trust and restricted lands must be considered a resource in determining eligibility for assistance under these programs and the status of Indian dependent on these programs is now in doubt. Funds have not been appropriated to the Bureau of Indian Affairs to cover the increase in General Assistance this policy will bring about. Funds have been appropriated to the Department of Health and Human Services to provide these services on the same basis as in previous years. Mr. President, I believe this policy is unfair to the Indian people who are caught in the switches, and it creates disruption between the agencies who are responsible for the programs.

Mr. President, underlying this problem is a long standing dispute among the States and the United States with respect to "primary" or "residual" responsibility of the two units of Government where Indians are concerned. I do not believe this issue should be fought out over the question of Indian eligibility to social programs. I do, however, believe there are meritorious arguments that can be present by both the States and Federal Government. For this reason I would recommend hearings in the 98th Congress to properly explore this issue in a considered fashion.

I ask unanimous consent that these amendments be agreed to, and that the bill as amended be adopted by the Senate.●

● Mr. ABDNOR. Mr. President, I appreciate the concerns expressed by the distinguished chairman of the Select Committee on Indian Affairs regarding the difficult issues surrounding the statutory basis for eligibility for aid to dependent children benefits under existing law.

The unique relationship between the native American population and the Federal Government often creates extreme difficulties for our States.

This is especially true for those States, including my own of South Dakota, which contain large Indian reservations within their borders. This is further aggravated by the complex and sensitive issues of jurisdiction.

There appears to be a lack of uniformity in how the individual States are treated under current Federal and Bureau of Indian Affairs (BIA) programs. Gov. William Janklow, of my State, has expressed his concerns about these inequities and I am sure that other Governors have as well.

This is neither the time nor the place to pursue these delicate issues. But, I am pleased that the distinguished chairman from Maine has indicated that his committee will attempt to address these issues at greater length in the next session of Congress.●

UP AMENDMENT NO. 1566

Mr. BAKER. Mr. President, I send to the desk two amendments by the distinguished Senator from Maine (Mr. COHEN), and I ask that they be considered en bloc.

The PRESIDING OFFICER. Without objection, the amendments will be considered en bloc.

The clerk will report.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Mr. COHEN, proposes an unprinted amendment numbered 1566.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

After subsection (2) of section 7, add the following: "or,".

"(3) were distributed pursuant to a plan approved by Congress after December 31, 1981, but prior to the date of enactment of this Act, and any purchases made with such funds,".

At the end of the bill, add a new section 8 as follows:

"SEC. 8. Interests of individual Indians in trust or restricted lands shall not be considered a resource in determining eligibility for assistance under the Social Security Act or any other Federal or federally assisted program."

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1566) was agreed to.

The PRESIDING OFFICER. If there be no further amendments to be proposed, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 3731), as amended, was passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CLAIM SETTLEMENT

Mr. BAKER. Mr. President, I propose to go to Calendar Order No. 779.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. There is no objection, Mr. President.

The PRESIDING OFFICER. The clerk will state the bill.

The legislative clerk read as follows:

A bill (H.R. 1029) to amend section 1 of the Act of June 5, 1920, as amended, to authorize the Secretary of Commerce to settle claims for damages of less than $2,500 arising by reason of acts for which the National Oceanic and Atmospheric Administration is responsible.

The Senate proceeded to consider the bill.

UP AMENDMENT NO. 1567

(Purpose: To increase the penalties for violations of the Taft-Hartley Act, to prohibit persons, upon their convictions of certain crimes, from holding offices in or certain positions related to labor organizations and employee benefit plans, and to clarify certain responsibilities of the Department of Labor)

Mr. ROBERT C. BYRD. Mr. President, I send to the desk, on behalf of Mr. NUNN, an amendment and ask that it be stated by the clerk.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) for Mr. NUNN, proposes an unprinted amendment numbered 1567.

Mr. ROBERT C. BYRD. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page , line , insert the following:

SEC. . (a) Subsection (d) of section 302 of the Labor Management Relations Act, 1947 (29 U.S.C. 186) is amended to read as follows:

"(d)(1) Any person who participates in a transaction involving a payment, loan, or delivery of money or other thing of value to a labor organization in payment of membership dues or to a joint labor-management trust fund as defined by clause (B) of the proviso to clause (5) of subsection (c) of this section or to a plant, area, or industry-wide labor-management committee that is received and used by such labor organization, trust fund, or committee, which transaction does not satisfy all the applicable requirements of subsections (c)(4) through (c)(9) of this section, and willfully and with intent to benefit himself or to benefit other persons he knows are not permitted to receive a payment, loan, money, or other thing of value under subsections (c)(4) through (c)(9) violates this subsection, shall, upon conviction thereof, be guilty of a felony and be subject to a fine of not more than $15,000, or imprisoned for not more than five years, or both; but if the value of the amount of money or thing of value involved in any violation of the provisions of this section does not exceed $1,000, such person shall be guilty of a misdemeanor and be subject to a fine of not more than $10,000, or imprisoned for not more than one year, or both.

"(2) Except for violations involving transactions covered by subsection (d)(1) of this section, any person who willfully violates this section shall, upon conviction thereof, be guilty of a felony and be subject to a fine of not more than $15,000, or imprisoned for not more than five years, or both; but if the value of the amount of money or thing of value involved in any violation of the provisions of this section does not exceed $1,000, such person shall be guilty of a misdemeanor and be subject to a fine of not more than $10,000, or imprisoned for not more than one year, or both.".

(b) Subsection (e) of such section is amended to read as follows:

"(e) The district courts of the United States and the United States courts of the territories and possessions shall have jurisdiction, for cause shown, and subject to the provisions of Rule 65 of the Federal Rules of Civil Procedure (relating to notice to opposite party), over—

"(1) suits alleging a violation of this section brought by any person directly affected by the alleged violation, and

"(2) suits brought by the United States alleging that a transaction involving a payment, loan, or delivery of money or other thing of value to a labor orgainzation in payment of membership dues or a joint labor-management trust fund as provided for in clause (B) of the proviso to clause (5) of subsection (c) of this section or to a plant, area, or industry-wide labor-management committee violates this section, to restrain such violations without regard to the provisions of section 6 of the Clayton Act (15 U.S.C. 17), section 20 of such Act (29 U.S.C. 52), and sections 1 through 15 of the Act entitled 'An Act to amend the Judicial Code to define and limit the jurisdiction of courts sitting in equity, and for other purposes', approved March 23, 1932 (29 U.S.C. 101-115.)

"SEC. . (a) So much of subsection (a) of section 411 of title I of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1111) as follows "the Labor-Management Reporting and Disclosure Act of 1959 (29 U.S.C. 401)," is amended to read as follows: "any felony involving abuse or misuse of such person's labor organization or employee benefit plan position or employment, or conspiracy to commit any such crimes or attempt to commit any such crimes, or a crime in which any of the foregoing crimes is an element, shall serve or be permitted to serve—

"(1) as an administrator, fiduciary, officer, trustee, custodian, counsel, agent, employee, or representative in any capacity of any employee benefit plan,

"(2) as a consultant or adviser to an employee benefit plan, including but not limited to any entity whose activities are in whole or substantial part devoted to providing goods or services to any employee benefit plan, or

"(3) in any capacity that involves decision-making authority or custody or control of the moneys, funds, assets, or property of any employee benefit plan,

during or for the period of ten years after such conviction or after the end of such imprisonment, whichever is later, unless the sentencing court on the motion of the person convicted sets a lesser period of at least five years after such conviction or after the end of such imprisonment, whichever is later, and unless prior to the end of such period, in the case of a person so convicted or imprisoned (A) his citizenship rights, having been revoked as a result of such conviction, have been fully restored, or (B) the United States Parole Commission determines that such person's service in any capacity referred to in paragraphs (1) through (3) would not be contrary to the purposes of this title. Prior to making any such determination the Commission shall hold an administrative hearing and shall give notice to such proceeding by certified mail to the Secretary of Labor and to State, county, and Federal prosecuting officials in the jurisdiction or jurisdictions in which such person was convicted. The Commission's determination in any such proceeding shall be final. No person shall knowingly

hire, retain, employ, or otherwise place any other person to serve in any capacity in violation of this subsection. Notwithstanding the preceding provisions of this subsection, no corporation or partnership will be precluded from acting as an administrator, fiduciary, officer, trustee, custodian, counsel, agent, or employee of any employee benefit plan or as a consultant to any employee benefit plan without a notice, hearing, and determination by such Parole Commission that such service would be inconsistent with the intention of this section.".

(b) Subsection (b) of such section is amended to read as follows:

"(b) Any person who intentionally violates this section shall be fined not more than $10,000 or imprisoned for not more than five years, or both.".

(c) Subsection (c) of such section is amended to read as follows:

"(c) For the purpose of this section:

"(1) A person shall be deemed to have been 'convicted' and under the disability of 'conviction' from the date of the judgment of the trial court, regardless of whether that judgment remains under appeal.

"(2) The term 'consultant' means any person who, for compensation, advises, or represents an employee benefit plan or who provides other assistance to such plan, concerning the establishment or operation of such plan.

"(3) A period of parole shall not be considered as part of a period of imprisonment.".

(d) Such section is amended by adding at the end thereof the following:

"(d) Whenever a person—

"(1) by operation of this section, has been barrred from office or other position in an employee benefit plan as a result of a conviction, and

"(2) has filed an appeal of that conviction, any salary which would be otherwise due such person by virtue of such office or position, shall be placed in escrow by the individual or organization responsible for payment of such salary. Payment of such salary into escrow shall continue for the duration of the appeal or for the period of time during which such salary would be otherwise due, whichever period is shorter. Upon the final reversal of such person's conviction on appeal, the amounts in escrow shall be paid to such person. Upon the final sustaining of that person's conviction on appeal, the amounts in escrow shall be returned to the individual or organization responsible for payments of those amounts. Upon final reversal of such person's conviction, such person shall no longer be barred by this statute from assuming any position from which such perosn was previously barred.".

SEC. (a) So much of subsection (a) of section 504 of the Labor-Management Reporting and Disclosure Act of 1959 (29 U.S.C. 504) as follows "or a violation of title II or III of this Act" is amended to read as follows: "any felony involving abuse or misuse of such person's labor organization or employee benefit plan position or employment, or conspiracy to commit any such crimes, shall serve or be permitted to serve—

"(1) as a consultant or adviser to any labor organization,

"(2) as an officer, director trustee, member of any excecutive board of similar governing body, business agent, manager, organizer, employee, or representative in any capacity of any labor organization,

"(3) as a labor relations consultant or adviser to a person engaged in an industry or activity affecting commerce, or as an officer, director, agent or employee of any group or association of employers dealing with any labor organization, or in a position having specific collective bargaining authority or direct responsibility in the area of labor-management relations in any corporation or association engaged in an industry or activity affecting commerce.

"(4) in a position which entitles its occupant to a share of the proceeds of, or as an officer or executive or administrative employee of, any entity whose activities are in whole or substantial part devoted to providing goods or services to any labor organization,

"(5) in any capacity that involves decision-making authority concerning, or decision-making authority over, or custody of, or control of the moneys, funds, assets, or property of any labor organization,

during or for the period of ten years after such conviction or after the end of such imprisonment, whichever is later, unless the sentencing court on the motion of the person convicted sets a lesser period of at least five years after such conviction or after the end of such imprisonment, whichever is later, and unless prior to the end of such period, in the case of a person so convicted or imprisoned, (A) his citizenship rights, having been revoked as a result of such conviction, have been fully restored, or (B) the United States Parole Commission determines that such person's service in any capacity referred to in clauses (1) through (5) would not be contrary to the purposes of this Act. Prior to making any such determination the Commission shall hold an administrative hearing and shall give notice of such proceeding by certified mail to the Secretary of Labor and to State, county, and Federal prosecuting officials in the jurisdiction or jurisdictions in which such person was convicted. The Commission's determination in any such proceeding shall be final. No person shall knowingly hire, retain, employ, or otherwise place any other person to serve in any capacity in violation of this subsection.".

(b) Subsection (b) of such section is amended to read as follows:

"(b) Any person who willfully violates this section shall be fined not more than $10,000 or imprisoned for not more than five years, or both.".

(c) Subsection (c) of such section is amended to read as follows:

"(c) For the purpose of this section:

"(1) A person shall be deemed to have been 'convicted' and under the disability of 'conviction' from the date of the judgment of the trial court, regardless of whether that judgment remains under appeal.

"(2) A period of parole shall not be considered as part of a period of imprisonment.".

(d) Such section 504 is amended by adding at the end thereof the following:

"(d) Whenever any person—

"(1) by operation of this section, has been barred from office or other position in a labor organization or employee benefit plan as a result of a conviction, and

"(2) has filed an appeal of that conviction, any salary which would be otherwise due such person by virtue of such office or position, shall be placed in escrow by the individual employer or organization responsible for payment of such salary. Payment of such salary into escrow shall continue for the duration of the appeal or for the period of time during which such salary would be otherwise due, whichever period is shorter. Upon the final reversal of such person's conviction on appeal, the amounts in escrow shall be paid to such person. Upon the final sustaining of such person's conviction on appeal, the amounts in escrow shall be returned to the individual employer or organization responsible for payments of those amounts. Upon final reversal of such person's conviction, such person shall no longer be barred by this statute from assuming any postion from which such person was previously barred.".

SEC. . (a) The first paragraph of section 506 of title I of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1136) is amended by striking out "In order" and inserting in lieu thereof the following:

"(a) COORDINATION WITH OTHER AGENCIES AND DEPARTMENTS.—In order".

(b) Such section is amended by adding at the end thereof the following new subsection:

"(b) RESPONSIBILITY FOR DETECTING AND INVESTIGATING CIVIL AND CRIMINAL VIOLATIONS OF EMPLOYEE RETIREMENT INCOME SECURITY ACT AND RELATED FEDERAL LAWS.—The Secretary shall have the responsibility and authority to detect and investigate and refer, where appropriate, civil and criminal violations related to the provisions of this title and other related Federal laws, including the detection, investigation, and appropriate referrals of related violations of title 18 of the United States Code. Nothing in this subsection shall be construed to preclude other appropriate Federal agencies from detecting and investigating civil and criminal violations of this title and other related Federal laws.".

(c) The title of such section is amended to read as follows:

"Coordination and responsibility of agencies enforcing Employee Retirement Income Security Act and related Federal laws".

SEC. . (a) The amendment made by section 3 and section 4 of this Act shall take effect with respect to any judgment of conviction entered by the trial court after the date of enactment of this Act, except that that portion of such amendments relating to the commencement of the period of disability shall apply to any judgment of conviction entered prior to the date of enactment of this Act if a right of appeal or an appeal from such judgment is pending on the date of enactment of this Act.

(b) Subject to subsection (a) the amendments made by sections 3 and 4 shall not affect any disability under section 411 of the Employee Retirement Income Security Act of 1974 or under section 504 of the Labor-Management Reporting and Disclosure Act of 1959 in effect on the date of enactment of this Act.

● Mr. NUNN. Mr. President, I wish to offer an amendment to H.R. 1029 which will revise current Federal labor laws to more effectively combat the problem of labor corruption. Senators HATCH, CHILES, RUDMAN, and NICKLES join me in introducing this legislation. The amendment will increase the criminal penalties for violations of the Taft-Hartley Act, prohibit immediately upon conviction of certain crimes persons from holding certain positions in unions or employee benefit plans, and clarify the Department of Labor's responsibilities to investigate and refer allegations of criminal activity. As worded, the amendment is identical to S. 1785, the Labor Management Racketeering Act of 1982 which I intro-

duced on October 28, 1981, reported favorably out of the Senate Labor and Human Resources Committee, and passed by unanimous consent in the Senate on July 28 of this year. I am introducing the bill this morning as an amendment to H.R. 1029 in an effort to insure prompt passage of the bill into law during this session.

I might point out that this legislation has received enthusiastic support from a wide range of interests. It has been endorsed by the Department of Labor, the Department of Justice, Lane Kirkland of the AFL-CIO, as well as George Lehr of the Teamsters Central States Pension Fund.

Of particular note was Lane Kirkland's endorsement of the bill in his testimony before the Permanent Subcommittee on Investigations in October 1981. We have worked very closely with Mr. Kirkland and the AFL-CIO in ironing out possible difficulties in the bill. Their cooperation and support has undoubtedly added significantly to the merits of this legislation.

The amendment attempts to remedy serious problems concerning the infiltration of some unions and some employee benefit plans by corrupt officials who have no real concern for the well-being of the honest rank-and-file union members they pretend to represent. Those problems were graphically illustrated in public hearings on waterfront corruption before the Permanent Subcommittee on Investigations in February 1981. The legislation, which is now before us, is a direct result of those hearings. As ranking minority member and former chairman of the subcommittee, I had the opportunity to direct an extensive staff investigation of criminal activity within both the International Longshoremen's Association—ILA—and the American shipping industry.

This set of hearings followed a very extensive investigation of the waterfront and the corruption on the waterfront by the U.S. Department of Justice and the FBI. They did a superb job.

In 1975 the Justice Department launched a nationwide investigation of racketeering on our waterfronts. This sweeping inquiry culminated in the criminal convictions of more than 100 high-level ILA officials and shipping company executives.

These persons were charged with a variety of offenses ranging from violating the Taft-Hartley Act to extortion, payoffs, kickbacks, threats, intimidation, obstruction of justice, and income tax evasion.

Spurred by the success of the Department of Justice's UNIRAC investigation, the subcommittee staff interviewed numerous witnesses and reviewed countless other items of evidence in order to convey to the American public an accurate portrait of the American waterfront in the 1980's. That portrait, as presented in 2 weeks of hearings in February of last year, is, unfortunately, a dismal one. Witness after witness described the struggle for economic survival in some ports which are riddled with a pervasive pattern of kickbacks and illegal payoffs to union officials.

My colleagues and I heard of payoffs to insure the award of work contracts, payoffs to maintain contracts already awarded, payoffs to insure labor peace, payoffs to allow management circumvention of labor strikes, payoffs to prevent the filing of fraudulent workmen's compensation claims, payoffs to expand business activity into new ports, and payoffs to accord certain company the freedom to circumvent ILA contract requirements with impunity.

Especially disturbing is the fact that the evidence clearly suggests that, through that system of payoffs, recognized leaders of the traditional organized crime families influence and effectively dominate the International Longshoremen's Association and large segments of the American shipping industry. Again this year our subcommittee, in public hearings on the Hotel Employees and Restaurant Employees International Union, received evidence of the corrupt influence of organized crime in labor-management relations in other industries. It is a sobering event, indeed, to learn that substantial portions of our national economy have fallen prey to the influence of organized crime.

I might add that their investigation and the revelations that came from that, with the cooperation we had from the Justice Department and the FBI, were absolutely essential in both the hearings and in the framing of this legislation.

In the case of the waterfront industries, we were told that a payoff is commonly treated as a mere cost of doing business which can be, and is, routinely passed on as an added cost to the consumer. Our traditional and cherished notions of free enterprise have become nearly nonexistent in some ports of this country.

These payoffs, though illegal under current law, are punishable only as a misdemeanor.

The amendment makes any such violation involving an amount of money greater than $1,000 a felony, punishable by up to 5 years imprisonment or a fine of up to $15,000, or both.

Our proposal also attempts to rid labor organizations and employee benefit plans of the influence of persons convicted of criminal offenses. Current disbarment provisions—29 U.S.C. 504 and 29 U.S.C. 1111—are expanded in several significant ways: Enlarging the categories of persons affected by the disbarment provisions; increasing the time barred from office or position from 5 to a possible maximum of 10 years; and providing for disbarment immediately upon conviction rather than after appeal.

The amendment does provide that any salary otherwise payable shall be placed in escrow pending final disposition of any appeal.

Finally, our hearings examined more than the ways and means of criminal corruption itself. We also explored the adequacy of law enforcement's response to this corruption. As for the waterfront, several things quickly became obvious: First, that the Department of Justice, through a massive assignment of resources and manpower in UNIRAC, had had great success in the short run; second, that, if we are to eliminate such corruption on a permanent basis, continuous monitoring and enforcement efforts are required; and third, that the Department of Labor had generally failed to participate in criminal law enforcement efforts in this area. To correct this problem and to maximize available law enforcement resources in this area, the amendment clearly delineates the responsibility and authority of the Department of Labor to actively and effectively investigate and refer for prosecution criminal activities on the waterfront.

In sum, I want to stress again that the provisions of this bill are designed to protect the best interests of labor and management, as well as the American consumers. Our hearings strongly indicated that corruption within the leadership of the ILA, as documented by the conviction of numerous ILA officers, is depriving the average longshoreman of the full benefits of his union membership. Not only did the ILA itself fail to act to remove those officials and prevent further corruption, but ILA President Teddy Gleason himself testified, with apparent lack of concern, that the ILA "will have to * * * run a rehabilitation center." By contrast, the provisions of this amendment will protect the union member where corrupt officials have failed to do so.

Mr. President, the record is clear that the vast majority of union officers, employee benefit plan officials, and rank-and-file union members are honest, hard-working, law-abiding citizens. Our Nation can and should be justifiably proud of the enormous contribution our unions have made to the economic and social strength of the United States. But our hearings have shown that a small group of parasites have fastened themselves onto the body of the labor movement. These parasites are perverting the true interests of the union members they claim to represent through a pattern of payoffs and extortion. The unions have labored to shed themselves of these people, but in many cases they have been unable to do so alone. I believe

that the unions need our help here in Congress. I believe that this amendment is a major step forward in providing the extra assistance needed for the unions to finally rid themselves of those corrupt officials who are motivated not by the welfare of the American worker but by their own greed.

I submit a section-by-section analysis of my amendment.

The analyses is as follows:

Section amends section 302(d) of the Taft-Hartley Act to provide that willful violations involving labor bribery or a payoff of an amount in excess of $1,000 shall be a felony punishable by a fine of not more than $15,000 or imprisonment for not more than five years or both. Crimes involving amounts of less than $1,000 would continue to be misdemeanors subject to the current penalties of $10,000 and/or 1 year imprisonment.

The amendment grants special treatment to subsection 302(c)(4) through (9). These subsections contain exceptions to the prohibitions contained in sections 302(a) and (b). These exceptions often are technical in nature so that a person can unknowingly fall within the prohibitions of sections 302(a) and (b) while maintaining a good-faith belief that his conduct falls within the excepted behavior of section 302(c)(4) through (9). Therefore, the amendment adds to the "willful" requirements for this behavior the additional element that such conduct be "with intent to benefit himself or to benefit other persons whom he knows are not permitted to receive such payment, loan, money or other thing of value under subsections (c)(4) through (c)(9)."

A violation of Taft-Hartley sections 302(c)(4) through (9) which is "willfull" and with the requisite "intent" and which involves an amount in excess of $1,000 is a felony punishable by a fine of not more than $15,000 or imprisonment for not more than five years or both. If the amount involved is $1,000 or less, then violations remain misdemeanors subject to a fine of not more than $10,000 and/or 1 year imprisonment.

Section also amends Taft-Hartley section 302(e). The amendments grant civil enforcement authority to the United States district courts over specific allegations of violations of Taft-Hartley and over suits brought by any person directly affected by the alleged violation. In addition, the amendment preserves the jurisdiction of such courts to restrain violations under the Act.

Section amends section 1111(a) of ERISA which prohibits persons convicted of certain crimes from serving in listed positions with an employee benefit plan. Added to this list of crimes are those offenses relating to abuse or misuse of such person's employee benefit plan position. The addition of these new felonies in no way affects current treatment by the courts of crimes already leading to debarment. The categories of positions affected by the disbarment provisions also are enlarged.

Current disbarment is for 5 years. Section makes this time period a maximum of 10 years but reducible down to 5 years by the trial court judge for good cause.

Section also amends section 1111(b) of ERISA. International violations of this section of ERISA currently carry a penalty of a $10,000 fine or 1 year imprisonment or both. The 1 year period is increased to 5 years.

Section amends section 1111(c) of ERISA to change the definition of the word "convicted." Current law defines this as the date of the trial court judgment or the final appeal thereof, whichever is later. The amendment changes the date to the date of the trial court judgment, regardless of appeals.

Finally section adds a new section 1111(d) to ERISA and provides that any salary otherwise payable to a person convicted by a trial court shall be placed in escrow pending final disposition of any appeal.

Section amends section 504(a) of Landrum-Griffin by adding to the list of crimes in the same manner that Section extended them under ERISA. The same disbarment provisions as contained in Section are added as well.

Section amends section 504(b) of Landrum-Griffin to increase the penalty for willful violations of that section from imprisonment for not more than 1 year to not more than 5 years.

Section amends section 504(c) of Landrum-Griffin to make the same changes in the definition of the term "convicted" as made in section 1111(c) of ERISA and discussed in Section 3 above.

Section adds new section 504(d) to Landrum-Griffin to provide the same escrow provisions added to ERISA and discussed in Section 3.

Section amends section 1136 of ERISA by changing the headings and adding a new subsection (b). This new subsection delineates the responsibility and authority of the Department of Labor actively and effectively to investigate and refer criminal activities for prosecution.

Section makes retroactive that portion of the amendment which insures that convicted union officials will be barred from office immediately upon conviction, as opposed to final disposition of their appeal. The section also makes expressly clear that the enactment of this legislation will not in any way secure to terminate restrictions placed on individuals now barred from office; those bars will remain as imposed under current law.●

● Mr. ROTH. Mr. President, I am pleased to add my support for S. 1785, the Labor-Management Racketeering Act of 1982.

Although this legislation was approved by the Senate earlier this year, the bill remains pending in committee in the House of Representatives. As a result, the sponsors of this legislation are again attempting to bring the issue to the attention of the House membership in an effort to pass this important legislative measure during this session of Congress.

In February 1981, the Permanent Subcommittee on Investigation, which I now chair, held extensive hearings on waterfront corruption. These hearings underscored the fact that congressional efforts to end the domination of certain unions by organized crime and other criminal elements have not been entirely successful and that current Federal prohibitions and penalties designed to protect the legitimacy of labor relations have, to a certain extent, proven to be inadequate. For instance, many individuals in the International Longshoremen's Association who have been convicted on enormous Federal charges still maintain their positions of power, despite their convictions.

The problem with allowing convicted union leaders to retain their positions of fiduciary responsibility is classically illustrated in the story of Bernard Rubin, an official in the Laborers Union in Florida. Convicted in the mid-1970's of embezzling union funds, Rubin retained his union position while appealing his conviction. It was later learned that, during the interim, Rubin had continued to pilfer union moneys.

The need for immediate action on S. 1785 was further emphasized only yesterday with the conviction of Teamsters Union President Roy Lee Williams. Williams together with his four codefendants, was convicted of conspiracy to commit bribery, traveling interstate in the furtherance of a bribe and various charges of scheming to defraud the Teamsters Central States Pension Fund. Despite these convictions, however, neither Williams nor the two officials of the pension fund convicted with him will be forced to resign their positions with the union until all avenues of appeal have been exhausted.

The time has come for Congress to take a decisive step in ridding the unions of the stranglehold imposed by criminal elements. Congress must take these steps in order to safeguard the workers of this Nation and to insure that money for benefits to which they are entitled is in fact used for its intended purpose.

In addition, this legislation will also clarify the responsibility of the Secretary of Labor to investigate civil and criminal violations of the Federal pension laws and related statutes.

I urge my colleagues to join with me in my support of S. 1785.●

Mr. HATCH. Mr. President, today, we are sending to the other body once again, S. 1785, the Labor Management Racketeering Act of 1982. As I mentioned when this bill was first presented to the Senate, it reflects a compromise worked out among Senators NICKLES, KENNEDY, NUNN, and myself. The AFL-CIO was involved in the drafting of many of its sections and I am confident that the cooperation of all who participated in the bill's evolution have helped to make sure that its provisions protect and enhance the rights of the thousands of honest union members and officials.

I would also like to give special recognition to Senators NUNN and RUDMAN. The comprehensive record on union corruption as it exists on our waterfronts is directly the result of their vigorous and tireless leadership of the Permanent Subcommittee on Investigations.

S. 1785 is one of the most critical pieces of labor legislation which Congress will vote on this year. Without question, corrupt union officials and management representatives pose one of the most sinister threats to the health and well-being of the trade union movement and to our industrial democracy. The existence of corruption undermines the integrity of the collective bargaining process; these activities taint the hard work of thousands of honest, committed union officers and members. They have literally robbed the American public of millions of dollars through bribes, kickbacks, and payoffs, sapping the economic resources we so desperately need to increase productivity and generate employment opportunities. Consequently, this disregard for Federal labor laws and the Government's correlative failure to enforce these statutes aggressively has undermined the statutory and regulatory prohibitions devised by Congress over the last 30 years to combat union corruption.

Some have contended that union corruption is more a cliche than fact, the unions are being unfairly categorized in the press and in Congress because of the criminal activities of only a handful of corrupt officials. It is true that the majority of union members and union officials are honest men and women, committed to the principles of collective bargaining and our economic system. Unfortunately, it is also true that many officials are not so committed; instead, they look upon labor management relations as a field ripe for manipulation and abuse for personal gain and profit. Moreover, they perceive Government enforcement as being lax at best, and the penalties if one is actually caught as being more of a minor, temporary nuisance than true punishment.

The endorsement of this legislation by Lane Kirkland, the distinguished president of the AFL-CIO, and Douglas Fraser, president of the United Auto Workers, underlines the reality and seriousness of the problem before us today.

We have laid out in hearings, on the floor, and elsewhere the seriousness of the problem of labor corruption and the correlative abuse of our Federal labor statutes. The point today is not to belabor those issues once again. Instead, it should be obvious to all that to combat the corruption that plagues labor relations today, we need both strong statutes and committed enforcement.

S. 1785 will provide the statutory basis for this effort by strengthening three key statutes: The Labor Management Relations Act of 1947, known as the Taft-Hartley Act; the Employee Retirement Income Security Act of 1974, known as ERISA; and, the Labor Management Reporting and Disclosure Act of 1959, known as the Landrum-Griffin Act.

First, the buying and selling of labor peace, which is prohibited in the Taft-Hartley Act, is raised from a misdemeanor to a felony, subject to imprisonment of up to 5 years and a fine of $15,000 or both. Testimony received by the committee has made it clear that existing penalties have not served as an effective deterent.

Second, S. 1785 expands the list of positions an individual convicted of committing a disqualifying crime, is barred from holding in a union or with an employee benefit plan. Convicted officials will no longer be able to circumvent the intent of these statutes by taking allegedly clerical positions or serving as consultants during the disqualification period, only to resume their previous positions of authority and influence once this period has ended. The bill also expands the list of disqualifying crimes contained in these two statutes.

Third, the bill extends the disqualification period from 5 to 10 years, in order that a union or benefit plan can thoroughly rid itself of the influence of convicted officials. This provision does provide for judicial discretion in application of the ban, however. As I understand, this discretion is included to accommodate the rare occasions where a 10-year ban might be considered too harsh. For example, at the time of his conviction of a disqualifying crime, an individual might not be a union member or might not have given any thought to the ramifications of his act with regard to holding office in a union or with a benefit plan. If he were to serve his sentence and subsequently obtain a job which would lead to election to union office, a 10-year ban might be unnecessarily rigid. In such rare circumstances, the judge is given the discretion to reduce the disqualification period to no less than 5 years.

Fourth, S. 1785 redefines "date of conviction" so that once an individual is found guilty of a disqualifying crime, he is immediately barred from holding a series of specific positions with a union or employer, regardless of whether he has appealed his conviction. This provision will end the blatant abuse of our appellate procedures by union officials who are continuing to engage in the very prohibited activities which led to their conviction simply because they have appealed the trial court judgment. Members of a union or participants in a benefit plan are entitled to have their interests and rights protected from those found guilty in a court of law. To protect the rights of an individual who has appealed his conviction, the bill provides that his salary will be paid into an escrow account which will be turned over to the official if the conviction is overturned. This represents an equitable treatment of two competing interests—the interests of the convicted official on appeal and the interests of union members or participants in a pension plan in having their organizations free of criminal influence.

Fifth, S. 1785 will increase the maximum term of imprisonment for intentional violations of ERISA and the Landrum-Griffin Act from 1 year to 5 years.

Sixth, S. 1785, makes it clear that the Department of Labor has not only the authority but also the responsibility for detection, investigation, and referral of civil and criminal violations of the appropriate Federal labor laws to the Department of Justice. This is perhaps the most important provision in S. 1785. Unless the Department of Labor is committed to the principles of this legislation and to ridding the labor movement of organized crime and other criminal elements, our efforts today to strengthen these three statutes may prove fruitless.

S. 1785 makes it clear that it is the intent of Congress that the Department of Labor enforce these statutes aggressively. The Department has repeatedly testified that it needs stronger statutes and penalties if it is to accomplish the task Congress has given it. S. 1785 provides the Department with many of the amendments it has requested and will give it the statutory basis and authority it needs to effectuate the purpose of this legislation—the elimination of corruption and criminal elements from the field of labor management relations.

I would like to note that in clarifying congressional intent, we believe that the Department can accomplish its mission with its current budget.

Mr. President, the bill being offered today contains an amendment that was added to S. 1785 when it first passed the Senate. The purpose of this amendment is to make retroactive only one portion of S. 1785—the commencement of the disqualification mechanisms of section 411 of the Employee Retirement Income Security Act and section 504 of the Labor-Management Reporting and Disclosure Act at the time of the trial court conviction.

Currently, an individual who is found guilty of an act prohibited under these two statutes is disqualified from holding certain specified positions in a union or employee benefit plan for a period of 5 years. The disqualification period begins on either the date of the trial court judgment or the date of the final sustaining of such judgment on appeal, whichever is later. S. 1785 amends these two statutes to read that the commencement of the disqualification period begins on the date of the trial court judgment, regardless of whether that decision is appealed. This amendment

would make this portion of S. 1785 retroactive.

The amendment also makes it clear that nothing in S. 1785 or this amendment can be construed as authority to overturn a conviction or to terminate prematurely a disqualification period in existence prior to the effective date of the legislation.

Testimony received by the Senate Labor and Human Resources Committee indicated that the present alternative standard has allowed union officials, who have been convicted of disqualifying crimes such as fraud and embezzlement, to retain their union offices or positions of control over pension plans while their convictions were being appealed, a period which can exceed 2 years. The testimony made it clear that in several instances, these officials continued to engage in the same prohibited activity during the appeals process that led to their trial court conviction. While the bill will end this abuse, it would only apply to those convicted subsequent to the effective date of the legislation. Those individuals convicted prior to the passage of the bill who have appealed their decision will be able to continue to take advantage of this procedural loophole.

The amendment is designed to prevent this abuse of appellate procedures from occurring, and thus it will promote the overall purpose of the bill—to provide union members and participants in a pension plan immediate and effective protection from convicted officials and other criminal elements.

Whenever a bill or an amendment makes reference to a retroactivity clause, it is important that the necessary steps are taken to insure that the clause is fashioned in a manner which insures that it is not unconstitutional.

When the Labor-Management Reporting and Disclosure Act was passed by Congress in 1959, it contained a section which stated that the disqualification mechanism established in the statute applied to convictions regardless of whether the conviction occurred before or after the effective date of the statute. Moreover, this retroactivity clause applied to all of the disqualification procedures contained in the statute.

The constitutionality of this retroactive clause was raised in *Postma* v. *International Brotherhood of Teamsters*, 337 F.2d 609 (2d Cir. 1964). The appellant alleged that the application of the 1959 statute to a previous conviction violated the constitutional prohibition against bills of attainder and ex post facto laws.

The court rejected this argument summarily, citing the Supreme Court's decision in *DeVeau* v. *Braisted*, 363 U.S. 144 (1960). At issue there was a similar disqualification mechanism established under State law; namely, section 8 of the New York Waterfront Commission Act of 1953. It too applied to convictions which preceded the enactment of the statute. Addressing the constitutionality of such a retroactive provision, the Court stated:

> The distinguishing feature of a bill of attainder is the substitution of a legislative for a Judicial determination of guilt. Clearly, section 8 embodies no further implications of appellant's guilt than are contained in his 1920 judicial conviction; and so it manifestly is not a bill of attainder. The mark of an ex post facto law is the imposition of what can fairly be designated punishment for past acts. The question in each case where unpleasant consequences are brought to bear upon an individual for prior conduct, is whether the legislative aim was to punish that individual for past activity, or whether the restriction of the individual comes about as a relevant incident to a regulation of a present situation, such as the proper qualifications for a profession. No doubt is justified regarding the legislative purpose of section 8. The proof is overwhelming that New York sought not to punish ex-felons, but to devise what was felt to be a much-needed scheme of regulation of the waterfront, and for the effectuation of that scheme it became important whether individuals had previously been convicted of a felony (363 U.S. at 160, citations omitted).

The amendment meets these standards.

As the Supreme Court noted, the distinguishing feature of a bill of attainder is that it substitutes a legislative determination of guilt for a judicial determination. The amendment to S. 1785 simply applies the disqualification period to those who have already been convicted. It contains no legislative determination of guilt, nor does it deprive any individual of a constitutionally guaranteed right to a judicial procedure. The amendment only affects those who already have been convicted of a disqualifying crime in a court of law. Thus, it is not a bill of attainder.

The Supreme Court also stated in the DeVeau decision that the mark of an ex post facto law is the imposition of what can be designateed as punishment for past acts. The Court then went on to clarify this statement by establishing the following standard: Was the legislative aim to punish an individual for past acts or does the restriction come about as an incident to the regulation of a present situation, such as the proper qualifications for a profession?

The purpose of this amendment is not to inflict new punishment. It is intended to bring immediate relief to the union rank and file from abuse by convicted officials. The legislative aim is to establish qualifications for certain key labor related positions, such as benefit plan trustee or union officer; it is regulatory in nature, not punitive. Consequently, any punishment inherent in the operation of this amendment is incidental to its purpose—the need to protect the rights of union members and pension plans from abuse by convicted officials, a need well established in the numerous congressional hearings which led to the drafting of S. 1785.

Mr. President, I believe that S. 1785 is an important first step in our effort to eliminate corruption from unions and employee benefit plans. It may not be as strong as some would have liked, and it may be stronger than others had hoped. That is the nature of a consensus bill. Nonetheless, it is an important, and I hope, encouraging signal to the working men and women of this country that the presence of organized crime and other criminal elements will not be tolerated at the waterfronts, in unions, or in pension plans. I look forward to the day when this bill is signed into law, because it will afford unions and employee benefit plans with the means to operate free of the influence or fear of corrupt union and management officials. I hope that by sending the bill to the other body once again that they now will see fit to act upon this important piece of legislation and pass it before Congress adjourns this year.

Mr. President, I ask to have printed in the RECORD an article by the nationally syndicated columnist Victor Riesel, distributed by Field Newspaper syndicate on December 2, 1982. It highlights the type of problem S. 1785 will address and correct.

The article referred to follows:

NEW FEDERAL LABOR RACKET LAW STONEWALLED IN HOUSE

(By Victor Riesel)

NEW YORK.—Any local union chief who can appoint hundreds of friends to construction-site supervisory jobs, such as shop stewards and project foremen, paying up to $75,000 yearly, is a power. Labor barons, we used to call them. Some have more influence in their national unions than do their national officials.

Such a man is the 62-year-old John Cody, one of the skein of barons who controls much of the Teamsters Brotherhood with a muscular assist from time to time.

Cody is paid well by his Building Material Local 282—a hundred thousand dollars a year in salary and expenses and a car to match the barony. He has two posh homes and an egocentric sense of power that has smashed the opposition inside his 4,000-member union, which can paralyze billions of dollars worth of construction in this megalopolis.

John Cody was mixed up in $150,000 worth of extortion and in kickbacks from brokers involving his union's $55-million pension fund—each dollar of which is intended to ease the vintage years of men who drive concrete-carting trucks through this city and Long Island.

Officially, Cody is president of Local 282 and will be for a while though on Oct. 7 he was convicted on seven counts, including "a pattern of racketeering," under "RICO"—the Racketeer Influenced Corrupt Organization Act.

He violated income tax laws and the Taft-Hartley Act, which prohibits a union officer

from taking things of value from an employer.

On Dec. 1, Cody, truly churlishly ruthless in handling rank-and-file opposition and menacing to the few employers who dared face him down, was sentenced in an Eastern District Federal Court to 17 years and fined $80,000. He will serve five, since the terms are concurrent. He has been found by a jury to be an extortioner and hardly prudent in the handling of some pension transactions.

Yet this tough man, hard-bitten as any well-written movie-script villian, legally remains president of Local 282 until he runs through his appeals.

Thus Cody, who has violated several codes of decency and his responsibility to all his members, and is a convicted criminal sentenced to prison, will have some two years in office to run the most powerful local union in the construction and building industry here.

As Local 282 president, with the power to interpret contracts and continue to appoint project supervisors, and of course run the "secretariat," which in effect every union is, Cody will be able to plant his people where he wishes.

He will draw about $2,000 weekly. He will have his "limo" and he will be cheered by his crews as he was by some of them in the courtroom here despite the sentencing.

Yet, there could easily have been a law on the federal books which could have prevented all this—the proposed Labor-Management Racketeering Act of 1982. Sponsored by Georgia Senator Sam Nunn, this bill was passed by the Senate in July. It calls for the removal of convicted union officials immediately after a jury finds them guilty. Those convicted wouldn't be permitted to serve while they push their appeals to the Supreme Court.

Further, it would give the sentencing judge the power to rule that a convicted labor official couldn't go near a union in any capacity—except as a member—for 10 years. This is double the current period during which a corrupt chief can't in any fashion service or influence any unit of the labor movement after the appeals fail.

The bill passed the Senate after sailing through a unanimous labor subcommittee. But it hasn't become law because its counterpart in the House-California Congressman Phil Burton's Labor-Management Relations subcommittee of the House Education and Labor Committee—wasn't summoned during all the time available.

Burton represents the San Francisco liberal constituency which is built around a strong labor bloc. However, when last contacted, Burton's spokesman said that he would call the committee during this lame-duck session and was "consulting the speaker (of the House, Thomas "Tip" O'Neill) on it."

This doesn't give Burton, O'Neill, the House or the special session much time on a matter which could involve more billions than the lame-duckers are discussing these days.

Senator Nunn's "Labor-Management Racketeering Act" would also discipline conspiratorial and imprudent pension-fund trustees. Labor-management trust boards handle more than several hundred billion dollars.

Of course, our nation's workers need a law. Why has Congressman Burton's subcommittee been on the slow bell?

An assist is also needed from the president of the U.S. In Florida last month Ronald Reagan said: "We will open a new legislative offensive to bring about approval for reform in criminal statutes dealing with bail, sentencing, criminal forfeiture, the exclusionary rule and labor racketeering. This will give us powerful new weapons in the battle against organized crime. . . ."

Well, there is a weapon in the House. A phone call to Tip O'Neill would get it swinging—instead of becoming a museum piece when the lameducks waddle into history.

Mr. CHILES. Mr. President, I urge my colleagues to join me in supporting the amendment curtailing labor management racketeering. This amendment embodies all of S. 1785, the Labor Management Racketeering Act of 1982, which passed the Senate July 28. Its purpose is to help the worker by protecting pension funds from criminal mismanagement. It is the most significant effort dealing with labor corruption since Landrum-Griffin in 1959 as it will bring tougher penalties for those convicted of racketeering in organized labor management fraud. We developed the legislation after extensive investigations by the Permanent Subcommittee on Investigations of Alleged Corruption on the Nation's Waterfronts.

Mr. President, I ask that the Senate vote once again on this far-reaching act to protect the trust funds of the working person.

● Mr. NICKLES. Mr. President, I am both pleased and frustrated in joining Senator NUNN and the other cosponsors in offering this amendment today.

The pleasure is that this amendment is identical to S. 1785, the Labor Management Racketeering Act, which passed the Senate unanimously on July 28, 1982. S. 1785 was the result of hearings by the Permanent Subcommittee on Investigations and by the Labor Subcommittee. It is the product of much careful debate and scrutiny. I continue in my praise of Senator NUNN and his leadership in this important piece of legislation.

My frustration is that the House of Representatives has taken no action on this amendment. I hope that they will give it the consideration it warrants to insure that this amendment becomes public law.

Mr. President, the record already contains the need for this legislation. I will not today go into the need for this legislation again. My views remain unchanged from July when this passed the Senate. I urge the House, this time, to give this amendment immediate consideration.●

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1567) was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LIVINGSTON PARISH, LA.

Mr. BAKER. Mr. President, I propose, if there is no objection, to go to Calendar No. 817, S. 1978.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. There is none, Mr. President.

The PRESIDING OFFICER. The bill will be stated.

The legislative clerk read as follows:

A bill (S. 1978) to quiet title and possession with respect to a certain private land claim in Livingston Parish, La.

Without objection, the Senate proceeded to consider the bill which had been reported from the Committee on Energy and Natural Resources with an amendment.

To strike out all after the enacting clause, and insert the following:

That, for the purposes of this Act only, the limitation provision of section 1 of the Act of December 22, 1928, as amended (45 Stat. 1069; 43 U.S.C. 1068), popularly known as the Color-of-Title Act, that restricts conveyances under that Act to not more than 160 acres, shall not apply to any claim for a patent that may be filed under the Color-of-Title Act for a parcel of land described as section 39, township 5 south, range 4 east, Saint Helena Meridian, Louisiana.

SEC. 2. Except as otherwise provided in section 1 of this Act, all provisions of the Color-of-Title Act shall apply to any claim for a patent under the Color-of-Title Act for the parcel of land described in the first section of this Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ST. CROIX ISLAND INTERNATIONAL HISTORIC SITE

Mr. BAKER. Mr. President, I propose to ask the Chair to lay before the Senate Calendar No. 820, Senate Joint Resolution 155, if there is no objection.

Mr. ROBERT C. BYRD. There is no objection, Mr. President.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 155) redesignating the St. Croix Island National Monument in the State of Maine as the "St. Croix Island International Historic Site,"

There being no objection, the Senate proceeded to consider the joint resolution.

UP AMENDMENT NO. 1568

Mr. BAKER. Mr. President, I send an amendment to the desk on behalf of the distinguished Senator from Idaho (Mr. McCLURE).

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) for Mr. McCLURE proposes an unprinted amendment numbered 1568.

Mr. BAKER. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, after line 13 add the following new sections:

SEC. 2. Funds authorized to be appropriated for the construction of a hydroelectric facility in Ponape pursuant to section 101 of Public Law 96-205 (94 Stat. 84), as amended, may be appropriated directly to the Corps of Engineers.

SEC. 3. Section 303 of Public Law 96-597 (94 Stat. 3477, 3478) is amended by deleting "January 1, 1983" in subsections (a) and (b) and inserting in lieu thereof "January 1, 1984".

SEC. 4. Section 419(a)(2) of the Federal Aviation Act of 1958 (49 U.S.C. 1389(a)(2)) is amended by adding at the end thereof the following new subparagraph:

"(d) The Board may, after considering the views of any interested community, the territory of Guam, and appropriate federal agencies, determine what is the essential air transportation for the territory of Guam without regard to whether it is being served by more than one air carrier holding a certificate issued under section 401 of this title."

Mr. McCLURE. Mr. President, the amendment which I am offering would accomplish several important and necessary objectives in the territories of the United States. I emphasize that these provisions deal solely with questions of administration and do not contain any authorizations nor would they result in any cost to the United States.

The first provision provides that the funds authorized under Public Law 96-205 in 1980 to construct a hydroelectric facility on Ponape in the Trust Territory of the Pacific Islands may be appropriated directly to Corps of Engineers. The authorization in Public Law 96-205 is to the Secretary of the Interior who has administrative responsibility for the trust territory, but who has delegated the oversight over most major construction in the trust territory to either the Navy or the Corps of Engineers. The Corps of Engineers has completed feasibility work on the project and it makes sense to have the option of providing already authorized construction funds directly to the agency rather than appropriating to the Secretary of the Interior for transfer to that agency. I would note that the total cost of this project is only $5 million and when completed will provide Ponape with significant savings over imported fuel and reduce their present total dependence on imported fuels.

The second provision would defer for 1 year the requirement in section 601 of the Covenant To Establish a Commonwealth of the Northern Mariana Islands that the Mariana use the provisions of the Internal Revenue Code as their local territorial tax. The Congress has twice deferred this provision and a further deferral has been requested by the Governor of the Commonwealth together with president of the senate and speaker of the house of the Commonwealth of the Northern Mariana Islands.

There are several reasons for the deferral. The original intent of the Congress was that the Marianas should use the same local tax system as does Guam. We have found, however, that the Marianas, which has no experience with the Federal internal revenue laws, has had great difficulty in training people to administer these complex provisions compared to their present gross income tax requirements. Also due to increased administrative costs and the structure of the code, the Marianas has estimated that implementation would raise significantly fewer revenues than their present gross income tax. These are legitimate concerns and this deferral will allow the Committee on Energy and Natural Resources the opportunity to review the continued efficacy of the mirror system and whether comprehensive reform is needed.

The third provision would permit the CAB to make an essential air service determination for Guam notwithstanding the fact that Guam is presently served by more than one carrier. This provision is being offered at the request of Congressman WON PAT and is acceptable to the Senator from Kansas (Mrs. KASSEBAUM), who chairs the Subcommittee on Aviation of the Committee on Commerce, Science, and Transportation. I wish to express my appreciation to the Senator for her concern and support for this provision.

Mr. President, the amendment being offered would clarify the jurisdiction of the Civil Aeronautics Board to issue an essential air service determination for Guam. The amendment was requested by Congressman WON PAT, the nonvoting Delegate from Guam and it is my understanding that the CAB has no objection to the amendment and that the chairman of the Subcommittee on Aviation of the Commerce Committee has reviewed the amendment and has no objection.

Mrs. KASSEBAUM. The Senator is correct. The issues surrounding essential air service determination are very complex and become even more complicated when the territories of the United States are concerned. The territories have a unique problem in that, as noncontiguous areas, they are almost completely dependent upon air transportation for the movement of goods and persons.

Mr. McCLURE. I understand that this amendment would be consistent with and carries out the original intent of Congress in including the territories in the essential air service program in the first place.

Mrs. KASSEBAUM. The Senator is correct and essential air service determinations have already been issued for the similar cases of American Samoa and the Northern Marianas. The problem which has arisen is due to the February 1982 decision by the D.C. Circuit Court in Delta Air Lines against C.A.B. which involved Montgomery, Ala., and which held that the Board does not have jurisdiction, at least in some cases, to issue an essential air service determination for a point which is being served by more than one section 401 carrier. This amendment would eliminate any uncertainty and permit the Board to make such a determination for Guam.

Mr. McCLURE. I thank the Senator and I appreciate her assistance and concern for the territories. The Committee on Energy and Natural Resources, which has the general jurisdiction and responsibility for the territories and insular areas of the United States has had to face the transportation difficulties faced by the islands in their development almost on a continuing basis. I appreciate the efforts which the Senator, and her subcommittee, and the Commerce Committee have made to recognize the unique situation of the territories in considering legislation before that committee and the advice and expertise offered to us in the discharge of our responsibilities.

Mrs. KASSEBAUM. I appreciate the Senator's remarks and would note that while the Committee on Energy and Natural Resources does have the responsibility and jurisdiction for the territories, the Commerce Committee has the responsibility and jurisdiction over transportation and civil aviation. It is inevitable that our responsibilities will overlap. I welcome the opportunity to assist the Senator in discharging his responsibilities and similarly I appreciate his assistance and the expertise of his committee in enabling us to insure that in discharging our responsibilities we will be responsive to the situation of the territories and their unique needs and problems. By working together I am certain that the Congress will properly discharge its responsibilities both over transportation

and for the welfare of the territories and the residents of those areas.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1568) was agreed to.

● Mr. COHEN. Mr. President, I support Senate Joint Resolution 155, a bill redesignating the St. Croix Island National Monument in Maine as the St. Croix Island International Historic Site. I thank the chairman of the Energy and Natural Resources Committee (Senator McCLURE) for all of his efforts on behalf of this legislation, and for bringing it to the attention of the Senate today.

Senate Joint Resolution 155 would change the name of the St. Croix Island National Monument, located near the mouth of the St. Croix River, to the St. Croix Island International Site. The status of the area as a unit of the National Park Service will not be affected by the legislation, and the area will continue to be administered by Acadia National Park.

Since 1949, when the island was first dedicated as a national monument, thousands of visitors have flocked to the site of the first French settlement in North America. Nearly 20 years later, all lands were finally deeded to the National Park Service, and the island was formally dedicated. In September of this year, a formal memorandum of understanding, recognizing the historical significance of the island to both Canada and the United States, was signed by officials of both countries.

This legislation would recognize the international significance of the island which is often referred to as a Canadian Plymouth Rock or Jamestown. The bill is patterned after legislation passed in 1964, which created the Roosevelt-Campobello International Park on Campobello Island in New Brunswick, and would help both countries work together to promote the history of the island.

To fully appreciate the historic significance of the island, one must consult Canadian as well as U.S. history. Settled by French explorers Champlain and Sieur de Monts, St. Croix Island was one of the first European settlements north of Florida. During the summer of 1604, a diverse group of 150 settlers traveled over 3,000 miles from their native homeland to found a permanent French colony in North America. The company was an unusual mixture of men of both the noble and working classes.

In June of that year, the group came to Passamaquoddy Bay and sailed up the St. Croix River. They came upon a island which Champlain described as covered with firs, birches, maples, and oaks, and "by nature very well situated." De Monts named the island "St. Croix," because just above it two long coves met the river to form a cross. Other names were given to the island throughout the years, including the Indian name "Matnagwish."

Later, during the war of 1812, the Island served as a base where British and American merchants met, safely away from the U.S. Customs Office in Eastport, to exchange cargoes. Because of the nature of this activity, the island became known as Neutral Island.

In 1866, the name "De Monts" was formally given to the island by the officers of the U.S. Coast Survey. Other names recorded throughout history included "Bone," "Big," or "Great," "Dochet," and "Hunts."

After the Revolutionary War, an international commission was established, and it fixed the boundary line down the middle of the river, putting St. Croix within the territorial limits of the United States. Despite the depth of their personal feelings, Canadians were conciliatory about the boundary for the sake of the future.

St. Croix Island is, in the view of many, the missing link between earlier explorations and the settlement of Acadia. As one of the first settlers of the island noted after the first harsh winter on the island:

> De Monts, it is you whose high courage has traced the way for such a great undertaking, and for this reason, in spite of the effect of times, the leaf of your fame will grow green in an eternal spring.

I believe the time has come to fully acknowledge the "leaf of fame" for De Monts, and all Franco-Americans and Acadians, wherever they may reside.●

● Mr. MITCHELL. Mr. President, I want to express my support for Senate Joint Resolution 155, a resolution redesignating St. Croix Island National Monument in the State of Maine as an international historic site.

St. Croix Island National Monument is a small portion of the national park system that lies within the boundaries of the city of Calais, in Washington County, Maine, in the estuary of the St. Croix River approximately 4 miles from the river's entrance into Passamaquoddy Bay. The monument itself consists of three parcels of land, with over 7 acres above high tide.

Archeological excavations have revealed human habitation dating back 4,000 years, when Indians with a nomadic life style used St. Croix Island as a seasonal fishing camp. Of important historical significance was the landing of a French expedition in June 1604 led by Sieur de Monts. With a company of around 150, including the geographer Samuel de Champlain, Sieur de Monts established a colony which was expected to hold promise because of the monopoly he had on fur trade and the existence of timber, arable land, and precious metals. Half of the inhabitants left that autumn and, of the 79 persons who remained during the harsh winter, 35 perished. After a relief party arrived from France the following June 1605, the company moved to Port Royal, Nova Scotia, ending one of the first permanent European settlements in North America.

The island received attention once again during the late 1700's when negotiators of the 1796–99 International Boundary Commission sought to settle the boundary between the United States and Canada following the end of the Revolutionary War. Excavators verified the French settlement, and ultimately, the island was placed on the American side of the border.

History books record the founding of Jamestown in 1607 and the landing at Plymouth in 1620 as significant events in the early European colonization of this continent. St. Croix Island received relatively scant attention as part of this effort until it was designated by Congress in 1949 as a national monument. It was dedicated as such in 1968 after all the deeds to what had been private land on the island and on the mainland were transferred to the National Park Service.

As a Senator representing the State of Maine, I am proud of the role which St. Croix Island has played in the settlement of North America. It is of historical significance to Maine, which today continues to have a strong French heritage. And it is important to our Canadian neighbors, particularly those in the Provinces of Quebec and New Brunswick. For not only was the settlement led by Sieur de Monts and Champlain one of the first of European origin north of Florida, but Champlain went on to found Quebec and explored other parts of present-day Ontario. He is regarded as the father of Quebec and a founder of Canada.

The premier of New Brunswick, Richard Hatfield, has for many years been seeking the redesignation of St. Croix Island as testimony to its prominence in Canadian history.

Sixty miles southeast of St. Croix Island on the Canadian side of Passamaquoddy Bay lies Campobello Island. Located on it is the Roosevelt Campobello International Park, dedicated to the memory of Franklin Delano Roosevelt, one of our country's great Presidents. My predecessor in the Senate, former Senator Edmund S. Muskie, currently serves as its chairman. Since its founding in 1964, this park has served as a model of cooperation between the United States and Canada, both of which contribute funds equally on an annual basis for the operation and maintenance of park grounds and facilities.

Designating St. Croix Island as an international historic site would build on this cooperative effort on the borders of Maine and eastern Canada and

preserve that which is of historical, cultural, and recreational significance to both countries.

Enactment of Senate Joint Resolution 155 would neither affect the status of St. Croix Island as a unit of the national park system nor disrupt management by the National Park Service. Rather, it will serve to recognize its significance as a historic site valued by Americans and Canadians alike.

I hope the committee will act promptly to recommend its passage by the Senate. I thank the Chair for this opportunity to present testimony in behalf of the resolution.●

The PRESIDING OFFICER. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading and to be read the third time.

The joint resolution was read the third time and passed.

The preamble was agreed to.

The joint resolution, with the preamble, is as follows:

S.J. RES. 155

Whereas in the summer of 1604, a small French expedition led by Sieur de Monts established the first European settlement in the northern half of North America on what is now Saint Croix Island, on the Saint Croix River, in the State of Maine;

Whereas pursuant to the Act entitled "An Act to authorize the establishment of the Saint Croix Island National Monument in the State of Maine" (approved June 8, 1949), portions of Saint Croix Island of national historical importance were established as the Saint Croix Island National Monument, a unit of the National Park System;

Whereas the historic settlement on Saint Croix Island marked the beginning of European colonization of Canada, from which the French embarked to establish the settlement which became Quebec; and

Whereas Saint Croix Island is important to the history of the people of Canada as well as that of the people of the United States: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) in recognition of its historic significance to the United States and Canada, the Saint Croix Island National Monument in the State of Maine is hereby redesignated as the "Saint Croix Island International Historic Site".

(b) Any reference in a law, map, regulation, document, record, or other paper of the United States to such monument shall be deemed to be a reference to the "Saint Croix International Historic Site".

(c) Nothing in this joint resolution shall affect the status of the "Saint Croix Island International Historic Site" as a national monument and a unit of the National Park Service.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EMANUEL F. LENKERSDORF

Mr. BAKER. I propose to ask the Senate to proceed to the consideration of Senate Calendar No. 913, H.R. 2520.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the bill.

● Mr. GRASSLEY. Mr. President, earlier in this Congress I introduced S. 331, a bill for the relief of Emanuel F. Lenkersdorf. We have before us for consideration today, H.R. 2520, the companion bill introduced in the House by Congressman COOPER EVANS. Mr. Lenkersdorf was born in Mexico City on August 29, 1939. He is a citizen of Germany living here on a student visa and is presently attending Northern Virginia Community College in Annandale, Va.

Mr. Lenkersdorf's parents are native Germans who came to North America and resided in Mexico City at the time of his birth. Upon reaching the age of 9 years, he and his family moved to Ohio. Four years later Mr. Lenkersdorf's father moved the family back to Mexico in order to perform missionary work. Emanuel had a difficult time in Mexico due to the inadequate educational system and difference in language. After 2 years, friends of the family invited him to attend high school in Iowa.

At that time it was impossible to renew his immigrant visa as he had spent more than 1 year outside the United States. The only available option was to reenter the United States on a student visa. He has continually resided in the United States since entering the country under this visa.

Mr. Lenkersdorf has spent virtually all of his adult life in the United States. He does not identify with either his German or Mexican background. He has not visited Germany since 1972 and is not conversant in either German or Spanish. He has received all of his education in this country, and if he were required to return to either Mexico or Germany, he would face a long and difficult adjustment.

Because of these very unusual circumstances, and because there appears to be no other recourse open to him, it would be my hope that the Senate would consider this bill favorably, especially in light of favorable House action. This would allow Mr. Lenkersdorf to remain in this country and become a useful and productive U.S. citizen.●

The bill was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BUDGET ACT WAIVER—H.R. 5858

Mr. BAKER. I say to the minority leader, I propose to ask the Senate to take up a budget waiver to accompany H.R. 5858; then, if the budget waiver is adopted, to take up that measure, if it is agreeable.

Mr. ROBERT C. BYRD. Mr. President, there is no objection to either.

Mr. BAKER. I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1025, Senate Resolution 505; and then proceed to consider H.R. 5858.

The PRESIDING OFFICER. The clerk will state the resolution.

The legislative clerk read as follows:

A resolution (S. Res. 505) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 5858.

There being no objection, the resolution was considered and agreed to, as follows:

S. RES. 505

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of H.R. 5858. Such waiver is necessary because H.R. 5858, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

This budget waiver will allow Senate consideration of H.R. 5858 which is a private relief bill for the relief of Mocatta and Goldsmid, Limited, et al. H.R. 5858 was reported by the members of the Subcommittee on Agency Administration on December 2, 1982.

H.R. 5858 authorizes the appropriation of the following amounts to the silver dealers enumerated below:

Mocatta and Goldsmid, Limited...	$1,502,462
Sharps, Pixley and Company	1,001,641
Primary Metal and Mineral Corporation.....	851,395

These awards compensate dealers for losses they sustained when the United States Treasury failed to honor their telephone orders for silver on May 18, 1967.

H.R. 5858 was not reported on or before May 15, 1982, because the Senate did not receive the bill from the House of Representatives until after September 21, 1982.

RELIEF OF MOCATTA & GOLDSMID, LTD.; SHARPS, PIXLEY & Co., LTD.; PRIMARY METAL & MINERAL CORP.

Mr. BAKER. Mr. President, I ask unanimous consent now that the Senate proceed to the consideration of H.R. 5858, the underlying measure.

There being no objection, the bill for the relief of Mocatta & Goldsmid, Ltd., Sharps, Pixley & Co., Ltd., and Primary Metal & Mineral Corp., was

considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CHEAHA WILDERNESS

Mr. BAKER. Mr. President, I propose to ask the Chair to call up S. 2955, Calendar Order No. 1000, if the minority leader is agreeable.

Mr. ROBERT C. BYRD. I have no objection.

There being no objection, the bill to establish the Cheaha Wilderness in Talladega National Forest, Alabama, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 2955

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Cheaha Wilderness Act".

SEC. 2. (a) In furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131-1136), certain lands in the Talladega National Forest, Alabama, which comprise approximately six thousand seven hundred and eighty acres, as generally depicted on a map entitled "Cheaha Wilderness Proposed", dated May 1982, are hereby designated as wilderness and shall be known as the Cheaha Wilderness.

(b) Subject to valid existing rights, the existing rights, the wilderness area designated under subsection (a) shall be administered by the Secretary of Agriculture (hereinafter in this Act referred to as the "Secretary") in accordance with the provisions of the Wilderness Act of 1964 (16 U.S.C. 1131-1136) governing areas designated by that Act as wilderness except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act.

(c) As soon as practicable after the date of the enactment of this Act, the Secretary shall submit a map and legal description of the wilderness area designated by subsection (a) to the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives. Such map and legal description shall have the same force and effect as if included in this Act, except that any clerical or typographical error in such map or legal description may be corrected. The Secretary shall place such map and legal description on file, and make them available for public inspection, in the Office of the Chief of the Forest Service, Department of Agriculture.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TEMPORARY USE OF BUREAU OF LAND MANAGEMENT LANDS

Mr. BAKER. Mr. President, I propose to ask the Senate to turn to consideration of S. 1705, Calendar No. 1001.

Mr. ROBERT C. BYRD. There is no objection.

The PRESIDING OFFICER. The clerk will state the bill.

The legislative clerk read as follows:

A bill (S. 1705) to amend the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) to permit temporary use by Federal departments and agencies of public lands controlled by the Bureau of Land Management.

The Senate proceeded to consider the bill, which had been reported from the Committee on Energy and Natural Resources with an amendment to strike out all after the enacting clause, and insert the following:

That the Federal Land Policy and Management Act of 1976 is amended as follows:

(1) by inserting in section 302(b) the phrase "temporary use permits under section 319 of this Act," between the comma following the words "section 204 of this Act," and the word "and", in the first proviso;

(2) by adding the following new section 319:

"TEMPORARY USE PERMITS FOR FEDERAL AGENCIES

"SEC. 319. The Secretary is authorized to issue temporary use permits to Federal departments and agencies to use, occupy, and develop public lands. Such permits may be issued for a term not to exceed three years and may be renewed once for an additional term not to exceed three years."; and

(3) by adding the following new heading to the table of contents after section 318:

"SEC. 319. Temporary use permits for Federal agencies.".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONVEYANCE OF CERTAIN PROPERTY

Mr. BAKER. The next item is Calendar 1002, if there is no objection.

Mr. ROBERT C. BYRD. I have no objection.

The PRESIDING OFFICER. The clerk will state it.

The legislative clerk read as follows:

A bill (S. 2308) to direct the Secretary of Agriculture to convey certain property to the city of Show Low, Arizona.

The Senate proceeded to consider the bill, which had been reported from the Committee on Energy and Natural Resources with an amendment to strike out all after the enacting clause, and insert the following:

That the Secretary of Agriculture is authorized and directed to survey and convey, by quitclaim deed and without consideration, to the city of Show Low, Arizona, all right, title, and interest of the United States to the lands generally depicted on a map entitled "Land Conveyance, city of Show Low, Arizona," and dated July 1982, which shall be on file and available in the office of the Chief Forest Service, Department of Agriculture, and more particularly described as follows:

(a) a tract of land, together with improvements thereon known as the David C. Porter Park estimated to include approximately 52.46 acres; and

(b) a tract of land, together with improvements thereon known as the Show Low Municipal Airport estimated to include approximately 533 acres.

SEC. 2. Title to any real property acquired by the city of Show Low pursuant to this Act shall revert to and become the property by the United States if the city or any successor of the city uses such real property for other than public purposes.

The amendnent was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RELEASE OF CERTAIN PATENT CONDITIONS

Mr. BAKER. Next, Mr. President, I propose to ask the Senate to turn to consideration of Calendar 1005, H.R. 6419, if there is no objection.

Mr. ROBERT C. BYRD. There is no objection.

The PRESIDING OFFICER. The clerk will state it.

The legislative clerk read as follows:

A bill (H.R. 6419) to direct the Secretary of the Interior to release certain conditions contained in a patent concerning certain land conveyed by the United States to Eastern Washington University.

● Mr. GORTON. Mr. President, I would like to say a few words in support of H.R. 6419. This bill directs the Secretary of the Interior to release certain conditions in a land patent conveyed to Eastern Washington University in order to allow the university to convey the property and purchase other real property.

Mr. President, I commend the Senate for acting on this legislation at this time. In 1961, pursuant to the Recreation and Public Purposes Act, as amended, the university acquired 21 acres of lakeside property from the United States subject to a reverter if the university attempts to transfer title or use the property for purposes other than education or recreation.

Because of the physical features of the land, however, it is not suitable for unsupervised recreation. The university believes that its needs would be better served by purchasing land located closer to the university campus. By relieving the university of the application of the reversionary clause, Congress will, in essence, allow the university to effect a transfer of property. The new land acquired will be subject to the same limitations as the original tract.

Mr. President, this bill will help to fulfill the intent of Congress in making the original transfer of property to the university. I thank my colleagues for their support.●

The bill was ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FLORIDA WILDERNESS ACT OF 1982

Mr. BAKER. Mr. President, H.R. 9, Calendar Order No. 1006, is next on my list, if the minority leader is prepared to consider it.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. No objection.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 9) to designate components of the National Wilderness Preservation System, in the State of Florida.

There being no objection, the Senate proceeded to consider the bill (H.R. 9), which had been reported from the Comittee on Energy and Natural Resources, with an amendment in the nature of a substitute to strike out all after the enacting clause, and insert the following:

That this Act may be cited as the "Florida Wilderness Act of 1982".

WILDERNESS DESIGNATION

SECTION 1. In furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131 et seq.) the following lands are hereby designated as wilderness, and therefore, as components of the National Wilderness Preservation System—

(1) certain lands in the Apalachicola National Forest, Florida, which comprise approximately one thousand one hundred and seventy acres, are generally depicted on a map entitled "Bradwell Bay Wilderness Addition—Proposed", dated February 1980, and which are hereby incorporated in and shall be deemed a part of, the Bradwell Bay Wilderness as designated by Public Law 93-622;

(2) certain lands in the Apalachicola National Forest, Florida, which comprise approximately seven thousand eight hundred acres, are generally depicted on a map entitled "Mud Swamp/New River Wilderness—Proposed", dated February 1980, and shall be known as the Mud Swamp/New River Wilderness;

(3) certain lands in the Osceola National Forest, Florida, which comprise approximately thirteen thousand six hundred acres, as generally depicted on a map entitled "Big Gum Swamp Wilderness—Proposed", dated March 1980, and shall be known as the Big Gum Swamp Wilderness;

(4) certain lands in the Ocala National Forest, Florida, which comprise approximately seven thousand seven hundred acres, as generally depicted on a map entitled "Alexander Spring & Billies Bay Wilderness—Proposed", dated March 1980, and shall be known as the Alexander Springs Wilderness: *Provided, however,* That the Secretary of Agriculture shall not prohibit existing motorboat use on Alexander Springs Creek;

(5) certain lands in the Ocala National Forest, Florida, which comprise approximately thirteen thousand two hundred and sixty acres, as generally depicted on a map entitled "Juniper Prairie Wilderness—Proposed", dated November 1981, and shall be known as the Juniper Prairie Wilderness;

(6) certain lands in the Ocala National Forest, Florida, which comprise approximately two thousand five hundred acres, as generally depicted on a map entitled "Little Lake George Wilderness—Proposed", dated March 1980, and shall be known as the Little Lake George Wilderness; and

(7) certain lands in the Ocala National Forest, Florida, which comprise approximately three thousand one hundred and twenty acres, as generally depicted on a map entitled "Alexander Springs & Billies Bay Wilderness—Proposed", dated March 1980, and shall be known as the Billies Bay Wilderness.8

MAPS AND DESCRIPTIONS

SEC. 2. As soon as practicable after the provisions of section 1 of this Act take effect, the Secretary of Agriculture shall file maps and legal descriptions of each wilderness area designated by such section with the Committee on Interior and Insular Affairs and the Committee on Agriculture of the House of Representatives and the Committee on Energy and Natural Resources of the United States Senate, and each such map and legal description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal descriptions and maps may be made. Each such map and legal description shall be on file and available for public inspection in the office of the Chief, United States Forest Service, Department of Agriculture.

ADMINISTRATION OF WILDERNESS

SEC. 3. Subject to valid existing rights, each wilderness area designated by this Act shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness: *Provided,* That any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of the relevant provisions of this Act.

SEC. 4. (a)(1) The Department of the Interior shall not issue phosphate leases in the Osceola National Forest, Florida, unless and until the President transmits a recommendation to the Congress that phosphate leasing be permitted in a specified area in the Osceola National Forest. Notice of such transmittal shall be published in the Federal Register. No recommendation of the President under this section may be transmitted to the Congress before ninety days after publication in the Federal Register of notice of his intention to submit such recommendation.

(2) FINDINGS.—A recommendation may be transmitted to the Congress under subsection (a) if the President finds that, based on the information available to him—

(i) there is a clear and present national need for the phosphate resulting from a domestic shortage of phosphate reserves, and

(ii) such national need outweighs the overall public values of the public lands involved, including the wilderness area designated in section 1(3) of this Act, and any adverse environmental impacts which are likely to result from the activity.

(3) REPORT.—Together with his recommendation, the President shall submit to the Congress—

(i) a report setting forth in detail the relevant factual background and the resons for his findings and recommendation;

(ii) a statement of the conditions and stipulations which would govern the activity; and

(iii) in any case in which an environmental impact statement is required under the National Environmental Policy Act of 1969, a statement which complies with the requirements of section 102(2)(C) of such Act. In the case of any recommendation for which an environmental impact statement is not required under section 102(2)(C) of the National Environmental Policy Act of 1969, the President may, if he deems it desirable, include such a statement in his transmittal to the Congress.

(4) DISAPPROVAL.—Any recommendation under this section shall take effect only upon enactment of a joint resolution of Congress approving such a recommendation. Any recommendation of the President submitted to Congress under subsection (a) shall be considered received by both Houses for purposes of this section on the first day on which both are in session occurring after such recomendation is submitted.

(5) NINETY-DAY COMPUTATION.—For purposes of this section—

(i) continuity of session of Congress is broken only by an adjournment sine die; and

(ii) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the ninety-day calendar period.

(b) Within sixty days of the date of enactment of this Act, the Secretary of the Interior shall, with respect to those individuals and companies (hereinafter referred to as "applicants") which have applied for phosphate preference right leases by applications numbered:

BLM-A-080538, 080539, 080540, 080544, 080545, 080546, 080547, 080548, 080549, 080093, 080297, 080298, 080299, 080801, 080975, 079903, 079904, 079905, 079906, 079907, 079956, 079957, 079958, 079959, 079992, 080004, 080027, 080028, 080048, 080067, 080069, 080070, 080632, 080634, 080638, ES-0980, 0981, 0982, 0983, 3181, and 3208,

determine if any of those indidviduals or companies have made a discovery or discoveries of valuable deposits in accordance with the regulations and policies in effect as of the date of the filing of the applications.

(c) Within one year of the date of enactment of this Act, the Secretary, in consulta-

tion with the applicants, shall determine the present fair market value of leases which would be issued, absent the leasing prohibition of subsection (a) of this section, for those applications for which the Secretary has determined that a valuable deposit discovery or discoveries exist.

(1) The determination of fair market value shall be based on the replacement cost of the unmined recoverable phosphate in the ground, taking into account comparable sales of unmined recoverable phosphate in the ground in the Eastern United States, costs of compliance with all applicable Federal, State, and local laws and regulations, including reclamation and restoration of the land (including wetlands) and other costs normally incurred in the mining of phosphate. In determining fair market value the Secretary may contract with an applicant to perform any necesary exploratory drilling or other evaluation work and may compensate the applicant therefor through payment of money or as an addition to the monetary credit under this Act. In lieu of the monetary credits described above, the Secretary may, at his option only, offer to purchase the preference right to the applicant's lease.

(2) In the event the Secretary and any or all of the applicants cannot agee on fair market value within one year of the date of enactment of this Act, either the Secretary, or any of the applicants shall have the right to petition the United States Claims Court for determination of fair market value in accordance with the standards set forth in this subsection, and said court shall have jurisdiction to make said determination which shall be binding on all parties for purposes of this Act subject to the right of appeal.

(d)(1) Within three months of the date of enactment of this Act the Secretary of the Interior shall enter into negotiations and shall, within one year of the date of enactment of this Act for those lease applications for which he determined a valuable deposit discovery or discoveries exist, extend to the applicant, its successors or assigns upon voluntary surrender and relinquishment by the lease applicant of the preference right lease applications and all right to lease the land covered by such applications, a monetary credit to be used against that portion of bonus payments, rental or royalty payments paid into the Treasury of the United States and retained by the Federal Government on any mineral, oil, or gas lease competitively won or otherwise held by the applicant, its successors, or assigns. Such credit shall be used over a period of years with not more than 10 per centum of the credit to be used in one year.

(2) Monetary credits authorized pursuant to this subsection shall be based on the fair market value of the prospective leases as determined pursuant to subsection (c) of this section.

(e) The designation of the Big Gum Swamp wilderness shall in no way be construed to diminish, abate, impair, or modify any rights which may be vested in the applicants on the date of enactment of this Act for Federal phosphate preference right leases applicable to any lands within the Big Gum Swamp wilderness area designated by this Act. The fair market value of any such rights as may exist shall be determined without reference to any restrictions on access or use which may result from designation of this area as wilderness.

(f) Notwithstanding any provision of this section to the contrary, the Secretary and the applicant may mutually agree to extend any of the time limitations in this section.

(g) Effective October 1, 1983, there are hereby authorized to be appropriated such sums as are necessary to carry out the purposes of this Act: *Provided,* That any payments made pursuant to this Act shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts: *Provided, however,* That until the necessary sums are appropriated the holder of a phosphate lease application specified in section 4(b), will retain such legal rights he may have under such application and such rights shall remain in full force and effect.

Mrs. HAWKINS. Mr. President, I rise in support of H.R. 9, as amended, the Florida Wilderness Act. This legislation implements the RARE II recommendations for Florida and bans phosphate mining in Florida's Osceola National Forest. It is very similar to S. 1138, introduced by Senator CHILES, and S. 1633, which I introduced earlier this Congress.

Mr. President, as part of the Forest Service's RARE II—Roadless Area Review and Evaluation—approximately 49,150 acres have been considered for inclusion in the National Wilderness Preservation System. This area encompasses Florida's three national forests—the Apalachicola, the Ocala, and the Osceola. This land provides a natural habitat for several endangered species, offers prime hiking, canoeing, and recreational opportunities, and harbors significant archeological sites. These regions also have unique vegetative, water, and wildlife resources. The public comment that was solicited during the RARE II process indicates that the wilderness designation of these areas received significant public support. Such action has also been endorsed by Florida's major environmental groups and a number of community and academic organizations.

Second, Mr. President, I feel that there is grave doubt as to the wisdom of permitting phosphate mining in the Osceola National Forest. Between 1969 and 1972, four companies—Kerr-McGee Corp., Global Exploration Co., Monsanto Chemical Products Co., and Pittsburgh and Midway Coal Mining Co.—filed applications for preference right leases to mine phosphate in the Osceola. Their basing rights covered an area of 52,253 acres, or approximately 34 percent of the Osceola National Forest. Processing these lease applications has encountered considerable obstacles in the past decade. Florida's citizens and environmental groups have consistently opposed mining in the Osceola Forest, and the State has intervened in several lawsuits against the U.S. Government to block efforts to issue the permits. Furthermore, the Environmental Protection Agency held that mining in the forest would be environmentally damaging, based on the original environmental impact statement filed by the Interior Department. And, in fact, on January 12, 1982, the EPA commented on Forest Service stipulations for mining and reclamation in the Osceola, again expressing concern about the protection of sensitive wetland areas in the forest.

The banning of phosphate mining in the Osceola National Forest is unequivocally supported by both Senator CHILES and myself, the entire Florida congressional delegation, the Governor and cabinet of Florida, and both chambers of the Florida State Legislature. As you know, RARE is the issue that is so uniformly supported by so many different political entities and factions. In fact, I am unaware of any Florida official who thinks mining is a good idea. Given this remarkable unanimity of opinion, those who support States rights should insist that the Federal Government leave our forest alone. Should we decide otherwise, a dangerous precedent will be set. What can happen to Florida will happen in other States, too.

I believe Florida's argument can be summed up in a question. Is it reasonable to overrule a congressional delegation and State cabinet that judge, based on unequaled experience elsewhere, that unacceptable environmental damage will follow from phosphate mining in its smallest national forest, which is not needed for national purposes, and is willing to sacrifice needed royalties to prevent it? The answer should be "No." Let me document these points in turn.

I have stated that Florida has had more experience than any other with phosphate mining, and indeed, it is quite true. Presently, Florida produces over 80 percent of the Nation's phosphate rock. And we have done so for years. It can be said that Florida is phosphate mining. So, Florida citizens and officials have more experience than anyone else in evaluating the environmental risks from phosphate mining. Anyone who chooses to challenge our expertise would carry a heavy burden of proof to show our judgment is unreasonable.

More important, there is no compelling reason for this country to mine the Osceola forest at this time, and there probably never will be. Mining the forest would recover approximately 100 million tons of phosphate. The U.S. Bureau of Mines has estimated that 4.1 billion metric tons of phosphate are recoverable in Florida alone, representing 95 years of domestic consumption, for less than twice the current price. Therefore, the Osceola deposit represents only 2.4 percent of Florida's phosphate reserves. Also major new discoveries have been made in other States, which means we have a supply to last longer than 100 years. I do not consider adding another 2 years a reasonable return for the destruction of a forest.

In fact, the State of Florida alone already produces more than the United States consumes, and it has for years. Only foreign countries would therefore benefit from phosphate mining in the Osceola.

And just who are the foreign customers for U.S. phosphates? Poland has become an increasing demanding patron. In 1979, Poland purchased 742,000 metric tons of U.S. phosphate rock. In 1980, that figure rose to 900,000 metric tons. In 1980, we also sold 382,000 metric tons to Romania and 67,000 tons to the Soviet Union. Patrons of U.S. phosphate products in 1980 also include Libya which purchased 256,000 metric tons of phosphates. Given these amounts, which represent more than 50 percent of expected annual production from mining the Osceola, in effect we will tear up a beautiful forest to help the governments most hostile to us.

Should one day relations between our countries change for the better, then sacrificing for friends could make sense. But even under these circumstances, it will not prove necessary to mine the Osceola to meet our domestic needs and to continue a vigorous export business.

Furthermore, Florida is not asking for a free ride. Like some other States, our State government is under fiscal pressure. And, in fact, our Governor has filed a request for higher sales taxes with the legislature. Despite this pressure, Mr. President, the State of Florida is willing to forego over $9 million in annual royalties and fees that will be collected if mining takes place.

When these points are considered, I believe the case for banning mining in the Osceola becomes compelling. And under H.R. 9, fair compensation for affected companies is also provided. I would like to describe briefly the compensation provision. Upon relinquishing their lease rights, four companies will receive monetary credits. These credits will be applied against the portion of bonus payments, rental, or royalty payments due the Federal Government on other mineral, oil, or gas leases held by the applicants. However, such credits can be used only over a period of years provided not more than 10 percent is used in any one year. Thus minimizing the impact on Federal revenue during a given year. This extended payout provision represents a substantial concession by the companies. Dollars received later are obviously worth less than dollars received today.

The amount of the monetary credits awarded will be based on the fair market value of the replacement cost of the unmined recoverable phosphate in the ground. In addition, calculations to determine the size of credits must include all costs of compliance with applicable Federal, State, and local laws as well as other costs normally incurred in the mining of phosphate. However, the legislation also provides that the fair market value of any existing rights will be determined without reference to any restrictions on access or use that may result from the designation of any area as "wilderness." This has been agreed to, in part, since the companies applications were made prior to the RARE II report.

Establishing the actual settlement costs of this legislation is difficult. However, my maximum estimated is $74 million. I calculate this by assuming there is at most 90 million tons of phosphate and that it may be worth up to $3 a ton, resulting in a preliminary value of $270 million for the pending leases. From that value I subtract the additional reclamation and mining costs, associated with mining a fragile forest compared to other land, conservatively estimated at $100 million. This results in a maximum fair market value of the leases of $170 million. Because not more than 10 percent of the credits can be used in 1 year, the actual value of thse credits must be, discounted to determine a figure comparable to receiving them in a lump sum today. That figure is $102 million. Furthermore, these monetary credits must be treated for tax purposes as cash, and corporate capital gains tax must be paid equalling over $28 million. Therefore, the net, after-tax maximum estimate of the settlement cost is $74 million. However, I expect the actual cost will be substantially less.

Finally, in the event that the Secretary or any or all of the applicants cannot agree on a fair market value within 1 year of the date of inactment, either the Secretary or applicants have the right to petition the U.S. Claims Court for a binding determination of the fair market value. In this manner, all parties are protected.

Mr. President, to summarize H.R. 9 is neither an agggessive act against the mining industry nor an impediment to land development on progress. It is, rather a small bill with a big heart. It is a sincere attempt to protect a very tiny and wild stretch of land from being needlessly torn apart. Affected mining companies will be adequately compensated for the loss. If strip mining is allowed in the Osceola, the forest—and the people who enjoy it—will suffer a far greater loss.

I urge my colleagues to support this legislation.

Mr. CHILES. Mr. President, I am extremely pleased that the Senate now has the opportunity to consider legislation affecting national forest lands in the State of Florida. This bill, H.R. 9, will expand the National Wilderness Preservation System by adding seven areas located in three national forests in Florida—the Ocala, the Apalachicola, and the Osceola National Forests. In addition to designating wilderness areas, this legislation seeks to resolve a longstanding controversy concerning possible phosphate strip mining in the Osceola National Forest. The bill before us today would insure the continued protection of the forest by banning phosphate mining and setting forth a timely procedure to deal with the pending lease applications.

The seven wilderness proposals incorporated in H.R. 9, the Florida Wilderness Act of 1982, are roadless or undeveloped areas on national forest system lands in Florida that were studied and recommended by President Carter and the Forest Service in April 1979 as a result of the RARE II process. The recommended wilderness areas have been approved three times by the House of Representatives. The recommended areas, their locations and acreage involved are as follows:

Wilderness area and National Forest	*Approximate acreage.*
Bradwell Bay Wilderness, Apalachicola	1,170
Mud Swamp/New River, Apalachicola	7,800
Big Gum Swamp, Osceola	13,600
Alexander Springs, Ocala	7,700
Juniper Prairie, Ocala	13,260
Little Lake George, Ocala	2,500
Billies Bay, Ocala	3,120

Mr. President, I would now like to address the issue of protecting an important forest resource in my State, the Osceola National Forest. This 157,000-acre forest in north central Florida is a valuable source of timber, fish and wildlife species, wetlands, and recreational opportunities.

Unfortunately, the continued management and use of these lands for these purposes is threatened by the possibility that significant portions of the forest will be strip mined for phosphate deposits underlying the forest. The Department of the Interior is presently reviewing 41 preference right lease applications of phosphate mining covering 52,000 acres, or approximately one-third of the forest. I join that State of Florida, local and regional agencies, and interested citizen groups, in strongly opposing the issuance of phosphate mining leases in this area.

Environmental studies have pointed to the adverse impact of strip mining on water resources, wildlife habitat, and timber production.

At a time when other phosphate deposits in my State and elsewhere remain undeveloped, I feel it is both unwise and unnecessary to allow for the irreversible alteration or severe limitation of the use and productivity of this great forest.

H.R. 9 prohibits the issuance of phosphate mining leases at this time and sets up a process for dealing fairly with the pending lease applications under consideration by the Department of the Interior. The legislation represents a compromise of a variety

of proposals offered to address the concern of the destruction of the Osceola through strip mining operations.

The possibility of strip mining in the Osceola National Forest is drastically inconsistent with the purposes for which these lands were originally acquired—to promote timber management and protect the swamplands. The pending lease applications cover approximately 36,000 acres of pine/palmetto flatwoods.

If these leases are granted significant acreage will be permanently removed from timber production and other areas will experience reduced productivity. The pending lease applications cover 10,731 acres of cypress swamps, 4,354 acres of bay swamps, and 845 acres of creek swamps. The 1979 final supplement to the environmental impact statement on phosphate mining in the Osceola National Forest cites a high potential for irreversible damage to 16,000 acres of cypress, bay, and creek swamps. These figures clearly substantiate that mining would be contrary to effective timber management and swampland protection.

The Osceola National Forest is currently managed for a variety of activities including outdoor recreation, timber production, watershed protection, and fish and wildlife preservation. To allow strip mining in the forest would violate the policy of multiple-use management of the forest as public land.

Multiple use of these lands must be possible before mining can be allowed and, at the present time, it has not been successfully demonstrated that full restoration of strip mined land is possible.

In May 1980, Secretary of Agriculture Bob Bergland expressed concern about the adverse impacts of phosphate strip mining and requested the Secretary of the Interior to withhold leasing on the Osceola National Forest for the immediate future.

He said technology is presently available or unproven to assure mining could be carried out under conditions that would insure the adequate utilization of the lands for the primary purposes for which they have been acquired or are being administered.

Past environmental studies, agency reports, and public testimony have provided a clear record of adverse impacts of strip mining on the forest and have, in my view, presented a convincing case that the exclusive use of these lands for intensive phostate mining would be inconsistent with the multiple-use management objectives of the Osceola National Forest.

Phosphate mining would significantly impact existing uses of the forest for hunting, camping, vacationing, and other recreational activities. Mining would pose serious threats to wildlife habitats and populations found in the forest.

Environmental studies have pointed to the probable irretrievable loss to the forest of several Federal and State listed endangered species including the red-cockaded woodpecker, Florida panther, and gopher tortoise. Other impacts identified in past studies include the loss of suitable habitat and/or high potential for significant adverse effects to other animals in the forest including Bachman's warbler, Florida black bear, gray bat, eastern indigo snake, Sherman's fox squirrel, and Florida sandhill crane. It is clear from the information available on this issue that allowing phosphate mining in the Osceola National Forest is not in the public interest.

Soon after the Reagan administration took office, I contacted the Secretary of Agriculture, Mr. Block, concerning the Department's position on the Osceola phosphate mining leasing question. In an April 1981 response to me, Secretary Block indicated that the Department position was the same as that expressed by Secretary Bergland to Secretary Andrus in the previous administration. I was encouraged by this reponse.

Then, however, during an October 1981 House subcommittee hearing on H.R. 9, the Reagan administration announced a drastic departure from the previous position on phosphate mining in the forest. The Assistant Secretary for National Resources and Environment of the Department of the Interior reported that the administration felt the Osceola National Forest could be reclaimed if strip mined for phosphate, and plans were underway for moving forward in considering the phosphate lease applications. In response to the strong public sentiment against phosphate mining in the forest, the House of Representatives passed H.R. 9 in December 1981. I applaud the leadership efforts of Congressman DON FUQUA who sponsored H.R. 9 in the House, and he diligent work done by the House Public Lands Subcommittee in forging a resolution of the pending controversy. While differences exist between the House-passed bill and the committee substitute before use today, both bills attempt to accomplish the same goal. Both prohibit phosphate mining in the Osceola National Forest and both set forth a procedure for dispensing with the pending lease applications.

The history of the pending phosphate mining applications dates back to the early sixties when 92 prospecting permits were issued for the Osceola National Forest. Eventually, 41 of these permits resulted in noncompetitive lease applications. Under existing regulations, these applicants first must make an initial showing to demonstrate the discovery of minable reserves.

Then, they must make a final showing to prove the current profitability of a mining operation. This final show, the so-called valuable deposit test takes into account, among other things, the costs of operating the mining, of complying with existing governmental regulations, and of meeting reclamation requirements, Forest Service stipulations, and environmental standards.

Meeting the "valuable deposit" test is a condition precedent to issuance of a preference right lease. At the present time none of the Osceola National Forest lease applicants have yet demonstrated that they have discovered "valuable deposits," but the Department is presently in the process of making this determination. It is critical that Congress enact legislation to protect the Osceola National Forest before the Department completes the valuable deposit determination and rights to leases are established.

I would like to briefly summarize the major provisions of the Senate committee proposal and outline as well some major differences between this bill and the House-passed version of H.R. 9.

MINING BAN AND PRESIDENTIAL RECOMMENDATION

Both H.R. 9 and the Senate Committee Amendments prohibit the Secretary of the Interior from issuing a phosphate mining lease for deposits within the Osceola National Forest until such time as Congress determines that it would be in the national interest to allow mining to take place. Under the provisions of the House-passed bill, the President could reopen the forest for phosphate mining at some point in time unless Congress disapproves his recommendation to do so by enacting a concurrent resolution within 90 days. Under the Senate committee amendments, the President's recommendation to reopen the forest for mining would have to be endorsed by Congress before the mining ban were lifted. No leasing would take place unless Congress enacted a joint resolution approving the President's recommendation.

FAIR MARKET VALUE DETERMINATION

Both the House bill and the Senate committee amendments to H.R. 9 set up a mechanism for determining which of the lease applications would have been entitled to a lease if leases were issued, determining the fair market value of these lease rights, and providing just compensation for those applicants who establish a right to a lease. Both bills spell out specifically that the fair market value of the lease shall be determined by considering the replacement cost of the phosphate rock, the costs of complying with all applicable Federal, State, and local laws and regulations including reclamation and restoration of the land (in-

cluding wetlands), and other costs normally incurred in the mining of the phosphate. Under the House bill if the lease applicants and the Secretary of the Interior can not agree on fair market value within 1 year of the date of enactment of the bill, then the fair market value determination shall be subject to binding arbitration.

The Senate committee version does not provide for binding arbitration, rather it provides that any dispute will be referred to the Federal Court of Claims.

COMPENSATION OPTIONS

Under the House-passed version of H.R. 9, lease applicants found to be entitled to a lease enter into negotiations with the Secretary of the Interior for the purpose of acquiring these lease rights by exchange, monetary credits, suspension of leases until some later date, or, at the Secretary's option only, by purchase. The Senate committee amendment eliminates the exchange option because of the difficulties that have been encountered pursuant to other exchange legislation when the attempt is made to select lands for the exchange. In addition, the Senate committee proposal would allow the monetary credit to apply only to the Federal share of the royalties, thus avoiding any impact on States which receive a share of such royalties. And finally, the amendment includes a provision which permits not more than 10 percent of the credit to be applied in any one year thus avoiding a substantial impact on revenue during a given year.

In summary, Mr. President, I want to again point out the long history of controversy surrounding phosphate mining in the Osceloa National Forest. The legislation before us today seeks to put to rest the possibility that this forest will be unnecessarily damaged by strip-mining operations in the immediate future.

While I certainly recognize the critical importance of providing adequate phosphate supplies for our country, I see no reason to destroy a national forest when alternative undeveloped phosphate deposits exist.

The anticipated deposits underlying the Osceola National Forest are estimated to represent less than 5 percent of Florida's reserve base and less than 1.5 percent of the U.S. phosphate reserve base.

Surely we should put the question of mining the Osceola aside at least until such a time when the supply of phosphate becomes critical, and the supply of recoverable phosphates has been exhausted on private or Federal lands on which the mining would have lesser environmental impacts, or which can be more effectively reclaimed.

For the time being, Congress has a responsibility to encourage an effective management policy for the Osceola National Forest that recognizes the multiple uses and rich natural values associated with this important forest resource.

In addition, it is important that pending lease applications for phosphate mining leases be settled in a timely and equitable manner. The Senate Energy and Natural Resources Committee amendments to H.R. 9 seek to achieve both these goals. By prohibiting phosphate mining in the Osceola National Forest and establishing a procedure for justly compensation applicants who have established a right to a mining lease, this proposal sets the stage for resolving the long-lived controversy of strip mining in the Osceola National Forest.

In closing, Mr. President, I want to thank the chairman of the Senate Energy Committee, Senator McCLURE, for his assistance in getting this bill through committee and to the Senate floor. I appreciate as well the participation of the large number of interested parties. This includes Senator HAWKINS, Congressman FUQUA, Governor Graham, the State of Florida regulatory agencies, as well as interested citizen groups and the private mining companies involved—Kerr-McGee, Global Corp., Gulf Oil, and Monsanto. Countless hours have gone into developing this bill which I feel represents a fair and workable solution to this complex and longstanding problem. Without the spirit of cooperation and compromise we saw exhibited during deliberations on this bill, I suspect we never would have reached this point of consideration. I hope all these joint efforts will be productive and we will see final action taken on Osceola National Forest legislation during the remaining days of the 97th Congress.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER TO POSTPONE S. 2715—NATIONAL PARK VISITOR FACILITIES FUND

Mr. BAKER. Mr. President, next I would propose to postpone Calendar Order No. 1003 indefinitely, S. 2715, if the minority leader is prepared to clear that action.

Mr. ROBERT C. BYRD. I have no objection.

Mr. BAKER. Mr. President, then I ask unanimous consent that S. 2715, Calendar Order No. 1003, be indefinitely postponed.

The PRESIDING OFFICER. Is there objection?

Mr. EAST. Mr. President, reserving the right to object—

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. EAST. I would like to inquire of the majority leader—as I indicated yesterday, I am very anxious that we always move along as expeditiously as we can in the legislative process. Of course, I have not personally made any effort to object to these bills because I know they mean a great deal to the Members of the Senate.

I was hoping that perhaps some of them we might consider postcloture. But I know there is a great desire to move these things through very promptly prior to the 6 o'clock cloture vote, and I have tried to accommodate that. I would just like to inquire of the leadership, the distinguished majority leader and the minority leader, directing my question, of course, to the majority leader, since I am obviously being cooperative as far as seeing these measures move through easily and expeditiously without objection, whether I could anticipate cooperation from the leadership on amendments, for example, that might be offered in postcloture, that we would not expect any efforts to perhaps forego yeas and nays on my amendments because I am simply raising the point, Mr. Leader, that I want to cooperate on this phase of the smooth operation of the U.S. Senate. And I am just hopeful that there will also be encountered in the body as a whole a willingness to allow good, substantive amendments to be considered in the postcloture period as regards the gas tax bill, assuming, of course, that cloture is invoked.

I would like to make that inquiry of the leadership. I think it is a fair inquiry in that I am cooperative on this side of postcloture, and I would hope that the leadership would be cooperative with me and other Members of the Senate—I have been cooperative in precloture, and I hope they would be cooperative in postcloture. I would just like to inquire of the majority leader where we might stand at that time on this matter.

Mr. BAKER. Mr. President, I must say to my friend from North Carolina that it is late in the weekend and even late in this day, there is snow outside, and I am almost too weary to say what I am about to say, but the Senator from North Carolina knows that I cannot do that.

He knows that I am committed to try to pass the highway bill, and that we are going to have a cloture vote now in 25 minutes; that if cloture is invoked, we will make an effort to complete this bill and to do so tonight. The Senator is within his rights to uti-

lize the rules and precedent of the Senate as he may wish after that vote, but I cannot, I simply cannot couch the facts in any other terms. I must try to pass that bill. Therefore, the Senator surely knows that I cannot agree to his request.

Now, as to the matters still in the unanimous-consent folder, I suppose that it will discommode a great number of Senators if we do not pass these matters which have gone through the clearance process on both sides, but it is no matter to me. I would like to accommodate the greatest number of Senators. But almost any one of these items in here can be stopped by a unanimous-consent request at this point, but at some point we will pass them.

Mr. President, I hope the Senator would not object, indeed I hope he would not utilize a great deal more time between now and 6 o'clock, because we will utilize that time in discussion of this point, I suspect, without effect and have a very little time left before cloture to try to do what I believe should be done. The answer to my friend from North Carolina is that I would be most anxious to cooperate with him under normal circumstances, but in this case we find ourselves on opposite sides of the fence.

He wants to keep me from passing a bill and I want to pass it. I guess we are just sort of locked into that position.

Mr. EAST. Well, I respect the majority leader's position. I would simply like for the Senate to know, for my colleagues to know that I have been forgoing a very rich opportunity here to object, to ask that these measures be taken up in the post-cloture situation.

Now, last evening I attempted to find a graceful way out of the filibuster because I knew that though the spirit was willing, the flesh was weak and one can only go so long with that. Some understood that to have been some sort of error on our part. We knew exactly what we were doing, and we wanted to do it as an accommodation to try to find some reasonable way to get together with the majority and the minority leaders and reach a unanimous-consent agreement. That seemed to be the appropriate time to do it. At some point the filibuster would have ended and we would have reached, it seemed to us, the prudent and reasonable time to do it. And naturally the opposition and the high keepers of the Nation's conscience will interpret that as some sort of error.

I tried to be cooperative last evening in getting out of the filibuster, not making it unduly long, working out a unanimous-consent agreement, which we did. Now, what I have been doing is sitting here for a couple of hours this afternoon allowing these measures to go through unchallenged, and I suspect again the keeper of the Nation's conscience would say, "Oh, EAST missed a golden opportunity."

No, I did not. I know exactly what is going on. All these measures are going through without objecting, and I am not objecting because I want to be cooperative, as I have from the outset. I just oppose the gas bill, and I do not think it should have been brought up in this lameduck session, Mr. Leader.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. EAST. I would like for the record to show——

The PRESIDING OFFICER. The majority leader has the floor.

Mr. BAKER. Mr. President, the Senator is speaking on a reservation with his right to object. I do not make a point of order that this is not a statement of objection, but I would like to get on. I will now withhold making that point of order so the Senator may proceed.

Mr. EAST. I will complete my point quickly. I would like for the record to show that I fully understand what is occurring. I am not availing myself of a very rich opportunity to try to push these matters into a post-cloture position which would make it further difficult for our colleagues to move out of here and get home, which I know they are very anxious to do. I think that is an eminently fair position to take, an eminently responsible one to take. I only hope that when we get to the merits of the gas tax bill we could expect a response from the Chamber in terms of whether if substantive and meaningful amendments are offered we might be able to get yeas and nays on those particular matters. We shall see. I am only asking for reciprocity in terms of not taking advantage of the rules to unduly affect the outcome of legislation. So I shall not object to this particular request right now. I withdraw my objection. The majority leader may proceed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAST. I am, of course, reserving the right on any particular measure to possibly object and that it be taken up in a post-cloture period. Mr. President, I thank the leader and I thank the Chair.

Mr. BAKER. Mr. President, what is the last item that was acted on?

The PRESIDING OFFICER. The Chair agreed to the unanimous-consent request to indefinitely postpone Calendar item 1003.

Mr. BAKER. I thank the Chair.

PROTECTION OF MIGRANT AND SEASONAL AGRICULTURAL WORKERS

Mr. BAKER. Mr. President, the next item on my list is H.R. 7102. If the minority leader is agreeable I will ask the Chair to lay that matter before the Senate at this time.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. There is no objection.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 7102) To provide for the protection of migrant and seasonal agricultural workers and for the registration of contractors of migrant and seasonal agricultural labor and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

UP AMENDMENT NO. 1569

Mr. BAKER. Mr. President, I send an amendment to the desk on behalf of the distinguished Senator from Utah (Mr. HATCH).

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) for Mr. HATCH proposes unprinted amendment numbered 1569.

Mr. BAKER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At page 41, line 1, strike "on" through "1982" on line 2, and insert in lieu thereof the following: "ninety days from the date of enactment".

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. KENNEDY be added as a cosponsor on the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, I am very gratified today to take a giant step toward enacting a major reform of the laws protection migrant and seasonal workers. At the outset I must acknowledge the strong and cooperative support of the distinguished ranking member of the commitee, Senator KENNEDY, who joins me in this unanimous-consent request. His participation was vital in developing this legislation and in securing the necessary bipartisan support to pass the bill without objection. I hope that our joint efforts on this measure foreshadows good things for the 98th Congress, as we work to develop the kind of consensus that is indispensable for enacting sound public policy.

Mr. President, H.R. 7102 will enact the Migrant and Seasonal Agricultural Worker Protection Act, and supersede entirely the Farm Labor Contractor Registration Act of 1963. The bill is identical to the measure S. 2930 which I introduced on September 17, 1982, with the cosponsorship of Mr. QUAYLE, Mrs. HAWKINS, and Mr. HELMS. Since then, Mr. BYRD of West Virginia and Mr. BOREN, and today, Mr. KENNEDY,

have been added as cosponsors. The proposal in fact carried the imprimatur of the current administration, which carried on extensive negotiations over an 18-month period with various interest groups to develop new legislation that would strengthen enforcement over labor contractors as well as enhance labor standard protections for migrant and seasonal agricultural workers. Among the representative groups consulted were the American Farm Bureau Federation, the AFL-CIO and its affiliate, the United Farm Workers of America, the migrant legal action program, the National Cotton Council, the National Council of Agricultural Employers, the National Food Processors Association, the United Fresh Fruit and Vegetable Association, and the Western Growers Association. As Secretary Donovan indicated in the letter transmitting the measure, "the bill represents a consensus among the parties who are most directly affected."

Congress enacted the current law FLCRA in 1963 to curb the exploitation of migrant agricultural workers and their employers by irresponsible farm labor contractors. Known commonly as crew leaders, these contractors typically traveled the country, following the planting and harvesting season. They recruited, transported, supervised, handled pay arrangements, and otherwise acted as intermediary between migrant workers and agricultural employers. Congressional hearings, however, revealed sordid abuses in many instances. Migrant workers were commonly promised higher wages and more work than they eventually received; they were transported long distances in unsafe vehicles and under degrading conditions; they were housed in hovels; they were subjected to physical abuse and kept in virtual slavery. The hearings also showed that itinerant crew leaders at times victimized agricultural employers. Lured by a more lucrative arrangement in the interim, a crew leader might break a previously made contract to supply labor to a farmer, who would then face financial ruin if he could not get help to harvest his crop in time.

The 1963 act regulated these crew leaders through a system of Federal registration and the imposition of affirmative obligations with respect to vehicle liability insurance, recordkeeping, and disclosure of prospective terms and conditions of employment. However, the act proved ineffective. After a decade of experience and several congressional studies, the Congress in 1974 adopted sweeping amendments. The amendments provided an express private right of action to migrant workers; it extended coverage to intrastate contracting activities; it extended registration requirements; it imposed affirmative duties on the Secretary of Labor to monitor and investigate the activities of contractors; and, it imposed substantive duties on a contractor with respect to transportation and housing. The amendments also imposed on farmers and other employers the requirement of confirming that a contractor is properly registered and the requirement to maintain payroll records on migrant workers furnished by the contractor.

Unfortunately, the experience under the 1974 amendments has been anything but satisfactory. Newspapers and the news magazines still periodically report on continuing exploitation of migrant workers, on squalid housing, and on unscrupulous crew bosses. At the same time, strong criticism has been directed against the Department of Labor, particularly against its expansive interpretation of the act and its enforcement policies. Congressional hearings have confirmed that the Department in the past concentrated its scarce resources on securing the registration of every employer who might conceivably be construed a farm labor contractor. In an inordinate number of cases, farmers and other agricultural employers—basically fixed situs employers, who were easy targets for Government enforcement—were cited for technical violations dealing with registration requirements. The impact of this enforcement policy has not been the improvement of the migrant workers' lot in the workplace.

The overriding result has been the harassment of agricultural employers. They have expended valuable time and energy in attempting to comply with burdensome registration requirements which in fact are of little utility when it comes to stationary employers. They have wasted resources fighting legal battles over technical violations. If anything, the whole enforcement philosophy of the past has undermined cooperation between the Government and the agricultural employer community in curbing the exploitation of migrant workers.

The bill we are enacting today seeks to rectify these fundamental problems with current law. It eliminates redtape, paperwork, and administrative burdens. Yet the bill preserves the rights of migrant and seasonal farm workers against abusive employment practices. As outlined in the Secretary's transmittal letter, this consensus measure follows certain basic principles.

First, unlike FLCRA, the bill distinguishes between the traditional, itinerant crewleaders and fixed situs agricultural employers by totally eliminating the obligation of fixed situs employers to register as crewleaders. Second, it maintains the basic farmworker protections under the present FLCRA and has made clear that these protections are to be provided by the appropriate agricultural employer or association, irrespective of whether that employer is a crewleader or a fixed situs employer; those protections pertain to vehicle safety, adequate housing, disclosure of wages, and working conditions, and maintenance of certain records. Third, the bill distinguishes between migrant agricultural workers and seasonal agricultural workers; under the bill migrant agricultural workers are those who are working away from their home overnight, while seasonal agricultural workers are those who live at home and commute to agricultural employment. Fourth, exemptions are provided for labor unions, family businesses and small businesses. Fifth, ambiguous words and phrases which have caused extensive litigation under FLCRA have been eliminated.

Now, Mr. President, it is true that the Labor Committee has not formally filed a report on this measure, nor on S. 2930 for that matter. However, I think it is appropriate to set forth some explanation for purposes of legislative history. First, I will outline the provisions of the bill by way of a section-by-section analysis.

SECTION-BY-SECTION ANALYSIS

Section 1.—This section provides the table of contents for this Act and that the Act may be cited as the "Migrant and Seasonal Agricultural Worker Protection Act".

Section 2.—This section states that the purpose of this Act is to remove the restraints on commerce caused by activities detrimental to migrant and seasonal agricultural workers; to require farm labor contractors to register under this Act; and to assure necessary protections for migrant and seasonal agricultural workers, agricultural associations, and agricultural employers.

Section 3.—This section provides for the definitions of terms to be used for the purpose of this Act.

(1) The term "agricultural association" is defined as "any nonprofit or cooperative association of farmers, growers, or ranchers, incorporated or qualified under applicable State law, which recruits, solicits, hires, employs, furnishes, or transports any migrant or seasonal agricultural worker."

(2) The term "agricultural employer" is defined as "any person who owns or operates a farm, ranch, processing establishment, cannery, gin, packing shed or nursery, or who produces or conditions seed, and who either recruits, solicits, hires, employs, furnishes, or transports any migrant or seasonal agricultural worker."

(3) The term "agricultural employment" is defined as "employment in any service or activity included within the provisions of section 3(f) of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(f)), or section 3121(g) of the Internal Revenue Code of 1954 (26 U.S.C. 3121(g)) and handling, planning, drying, packing, packaging, processing, freezing, or grading prior to delivery for storage of any agricultural or horticultural commodity in its unmanufactured state."

(4) The term "day-haul operation" is defined as "the assembly of workers at a pickup point waiting to be hired and employed, transportation of such workers to agricultural employment, and the return of such workers to a drop-off point on the same day."

(5) The term "employ" is defined as "having the meaning given such term under section 3(g) of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(g)) for the purposes of implementing the requirements of that Act."

(6) The term "farm labor contracting activity" is defined as "recruiting, soliciting, hiring, employing, furnishing, or transporting any migrant or seasonal agricultural worker."

(7) The term "farm labor contractor" is defined as "any person, other than an agricultural employer, an agricultural association, or an employee of an agricultural employer or agricultural association, who, for any money or other valuable consideraton paid or promised to be paid, performs any farm labor contracting activity."

(8) The term "migrant agricultural worker" is defined as "an individual who is employed in agricultural employment of a seasonal or other temporary nature, and who is required to be absent overnight from his permanent place of residence." Specifically excluded from the definition of a migrant agricultural worker are any immediate family member of an agricultural employer or a farm labor contractor and any temporary nonimmigrant agricultural H-2 alien worker.

(9) The term "person" is defined as "any individual, partnership, association, joint stock company, trust, cooperative, or corporation."

(10) The term "seasonal agricultural worker" is defined as "an individual who is employed in agricultural employment of a seasonal or other temporary nature and is not required to be absent overnight from his permanent place of residence—(i) when employed on a farm or ranch performing field work related to planting, cultivating, or harvesting operations; or (ii) when employed in canning, packing, ginning, seed conditioning or related research, or processing operations, and transported, or caused to be transported, to or from the place of employment by means of a day-haul operation." Specifically excluded from the definition of a seasonal agricultural worker are any migrant agricultural worker, any immediate family member of an agricultural employer or a farm labor contractor, and any temporary nonimmigrant agricultural H-2 alien worker.

(11) The term "Secretary" is defined as "the Secretary of Labor or the Secretary's authorized representative."

(12) The term "State" is defined to include "any of the States of the United States, the District of Columbia, the Virgin Islands, the Commonwealth of Puerto Rico, and Guam."

Section 4.—This section addresses the applicability of this Act and specifically excludes certain persons.

Subsection (a) enumerates the persons who are not subject to this Act.

(1) The family business exemption applies to any individual who engages in a farm labor contracting activity on behalf of a farm, processing establishment, seed conditioning establishment, cannery, gin, packing shed, or nursery, which is owned or operated exclusively by such individual or an immediate family member of such individual, if such activities are performed only for such operation and exclusively by such individual or an immediate family member, but without regard to whether such individual has incorporated or otherwise organized for business purposes.

(2) The small business exemption applies to any person, other than a farm labor contractor, for whom the man-days exemption for agricultural labor provided under section 13(a)(6)(A) of the Fair Labor Standards Act of 1938 (29 U.S.C. 213(a)(6)(A)) is applicable.

(3) Other exemptions include—

(A) Any common carrier which would be a farm labor contractor solely because the carrier is engaged in the farm labor contracting activity of transporting any migrant or seasonal agricultural worker.

(B) Any labor organization, as defined in section 2(5) of the Labor Management Relations Act (29 U.S.C. 152(5)) (without regard to the exclusion of agricultural employees in that Act) or as defined under applicable State labor relations law.

(C) Any nonprofit charitable organization or public or private nonprofit educational institution.

(D) Any person who engages in any farm labor contracting activity solely within a twenty-five mile intrastate radius of such person's permanent place of residence and for not more than thirteen weeks per year.

(E) Any custom combine, hay harvesting, or sheep shearing operation.

(F) Any custom poultry harvesting, breeding, debeaking, desexing, or health service operation provided the employees of the operation are not regularly required to be away from their permanent place of employment other than during their normal working hours.

(G) Any person whose principal occupation or business is not agricultural employment, when supplying full-time students or other individuals whose principal occupation is not agricultural employment to detassel, rogue, or otherwise engage in the production of seed and to engage in related and incidental agricultural employment, unless such full-time students or other individuals are required to be away from their permanent place of residence overnight or there are individuals under eighteen years of age who are providing transportation on behalf of such person. The exemption is further extended to certain persons to the extent that they are supplied with the specified workers.

(H) Any person whose principal occupation or business is not agricultural employment, when supplying full-time students or other individuals whose principal occupation is not agricultural employment to string or harvest shade grown tobacco and to engage in related and incidental agricultural employment, unless there are individuals under eighteen years of age who are providing transportation on behalf of such person. The exemption is further extended to certain persons to the extent that they are supplied with the specified workers.

(I) Any employee of any person described in subparagraphs (A) through (H) when performing farm labor contracting activities exclusively for such person.

Subsection (b) states that Title I of this Act does not apply to any agricultural employer or agricultural association or to any employee of such an employer or association.

TITLE I—FARM LABOR CONTRACTORS

Section 101.—This section requires that no person shall engage in any farm labor contracting activity unless the person has a certificate of registration from the Secretary specifying which farm labor contracting activity is authorized. This section further prohibits a farm labor contractor from hiring, employing or using any individual to perform farm labor contracting activities unless such individual has a certificate of registration, or a certificate of registration as an employee of a farm labor contractor, which authorizes the activity. The section states that a farm labor contractor shall be held responsible for violations of this Act by any employee regardlesss of whether the employee possesses a certificate based on the contractor's certificate of registration.

The section also requires the farm labor contractor and the farm labor contractor employee to carry the certificate of registration at all times while engaging in farm labor contracting activities and to exhibit the certificate, upon requests, to all persons with whom he is dealing as a contractor.

The section would deny the use of the State employment service system, as provided through the Wagner-Peyser Act, to any contractor who refused or failed to produce, when asked a certificate of registration.

Section 102.—This section directs the Secretary, after appropriate investigation, to issue a certificate of registration or a certificate of registration as an employee of a farm labor contractor to any person who has filed a written application which contains the following information: a declaration stating the applicant's permanent place of residence and the contracting activities for which the certificate is requested, and any other relevant information; a statement identifying each vehicle to be used to transport migrant or seasonal workers and the appropriate documentation concerning ownership or control and compliance with the motor vehicle safety requirements of section 401; a statement identifying each facility or real property to be used to house migrant workers and the appropriate documentation concerning ownership or control and compliance with the safety and health standards of housing under sectin 203; a set of fingerprints; and a declaration consenting to the designation of the secretary as an agent available to accept service of summons if the contractor has left the jurisdiction in which the action is commenced, or is otherwise unavailable.

Section 103.—This section provides for determinations with respect to a certificate of registration. In accordance with regulations the Secretary may refused to issue or renew, or may suspend or revoke, a certificate if the applicant or holder has knowingly made any misrepresenatation; is not the real party in interest and the real party in interest has been refused a certificate, or has had a certificate suspended or revoked, or does not qualify for a certificate; has failed to comply with this Act or the regulations, has failed to pay a court judgment under the Farm Labor Contractor Registration Act of 1963 (FLCRA) or to comply with a final order issued by the Secretary, as a result of a violation under this act or FLCRA; or has been convicted within the preceding five years, or a crime relating to gambling or to the sale, distribution or possession of alcoholic beverages in connection with any farm labor contracting activity, or of any felony involving robbery, bribery, extortion, embezzlement, grand larceny, burglarly, arson, violation of narcotics laws, murder, rape, assault with intent to kill, assult which inflicts grievous bodily injury, prostitution, peonage or smuggling or harboring individuals who have entered the country illegally.

Any person who is refused the issuance or renewal of a certificate or whose certificate is suspended or revoked will be afforded an opportunity for an agency hearing, upon request made within 30 days after the date of issuance of the notice of the refusal, suspension, or revocation. The hearings are held in

accordance with the Administrative Procedures Act and the agency determination shall be made by final order.

If no hearing is requested, the refusal, suspension, or revocation shall constitute a final and unappealable order. If a hearing is requested, the initial agency decision shall be made by an administrative law judge and the decision shall become the final order unless the Secretary modifies or vacates the decision. Notice of an intent to modify or vacate the decision shall be issued to the parties within 30 days after the decision of the administrative law judge.

Any person against whom a final order has been entered after an agency hearing may obtain review by the district court by filing a notice of appeal within 30 days from the date of such order, simultaneously sending a copy to the Secretary. The Secretary shall certify the record to the court. The findings of the Secretary shall be set aside only if found to be unsupported by substantial evidence. Any decision, order or judgment of the United States District Court shall be subject to appeal to the appropriate circuit courts.

Section 104.—This section provides that a certificate of registration may not be transferred or assigned. Unless suspended or revoked, a certificate shall expire 12 months from the date of issuance, except that certificates issued between December 1, 1982 and November 30, 1983 may be issued for a period of up to 25 months to provide for an orderly transition. Certificates may also be temporarily extended by filing an application with the Secretary at least 30 days prior to its expiration date. The Secretary may review a certificate for additional 12-month periods or for periods in excess of 12 months but not greater than 24 months. The eligibility for renewals of periods in excess of 12 months shall be limited to contractors who have not been cited for a violation of this Act of FLCRA during the preceding 5 years.

Section 105.—The section requires each farm labor contractor to provide to the Secretary within 30 days, a notice of each change of permanent place of residence. The section also directs the Secretary to amend a certificate whenever a contractor intends to: engage in another farm labor contracting activity; use another vehicle to transport migrant or seasonal workers; or use another facility or real property to house migrant workers.

Section 106.—This section states that no farm labor contractor shall recruit, hire, employ, or use, with knowledge, the services of any illegal alien. The contractor will be considered to have complied with this provision if he demonstrates that he relied in good faith on documentation prescribed by the Secretary and that he has no reason to believe that the individual was an illegal alien.

TITLE II—MIGRANT AGRICULTURAL WORKER PROTECTIONS

Section 201.—This section provides for informing migrant agricultural workers of their wages and working conditions and for the maintenance of records.

The section requires each farm labor contractor, agricultural employer and agricultural association which recruits migrant workers to ascertain and disclose to the worker the following information in writing at the time of the worker's recruitment; the place of employment; the wage rates to be paid; the crops and kinds of activities on which the worker may be employed; the period of unemployment; the transportation, housing and other employee benefits and their costs; the existence of a strike or other concerted work stoppage, slowdown, or interruption of operations at the place of employment; and the existence of any arrangements under which the farm labor contractor, agricultural employer or association is to receive a commission as a result of any sales to the workers.

The section requires each farm labor contractor, agricultural employer and agricultural association which employs migrant workers to post in a conspicuous place a poster provided by the Secretary setting forth the rights and protections afforded the workers under this Act, including their right to receive, upon request, a written statement of the information described in the preceding paragraph.

If housing is provided by a farm labor contractor, agricultural employer or agricultural association, they must post or present to the migrant workers a statement of the terms and conditions, if any, of occupancy.

The section requires, with respect to each worker, that each farm labor contractor, agricultural employer and agricultural association which employs migrant workers make, keep and preserve, for three years, records of the following: The basis on which wages are paid; the number of piecework units earned; the number of hours worked; the total pay period earnings; the specific sums withheld and the purpose of each withholding; and the net pay. The above information must also be provided through an itemized written statement to each migrant worker for each pay period.

If a farm labor contractor furnishes migrant workers to another contractor, agricultural employer or association, the farm labor contractor must provide copies of all records with respect to the above information for the workers so provided; the recipient of the records must keep them for a period of three years from the end of the period of employment.

The section further provides that no farm labor contractor agricultural employer or association shall knowingly provide false or misleading information to any migrant worker concerning the terms, conditions, or existence of employment required to be disclosed by the preceding paragraphs.

The information required to be disclosed to migrant workers when recruited, employed or housed must be in written form in English, or as necessary and reasonable, in Spanish or other fluent or literate in English. The Department will provide forms in English, Spanish and other languages, as necessary, which may be used in providing migrant workers with the required information.

Section 202.—This section provides for further protections for migrant workers with respect to wages, supplies and other working arrangements.

This section requires each farm labor contractor, agricultural employer and association to pay the wages owed to the migrant workers when due. The section also prohibits the contractor, employer or association from requiring migrant workers to purchase any goods or services solely from them. Finally, the section states that no contractor, employer or association shall, without justification, violate the terms of any working arrangements made with any migrant worker.

Section 203.—This section provides for the safety and health of housing. This section requires that each person who owns or controls a facility or real property which is used as housing for migrant workers shall be responsible for ensuring that the housing complies with substantive Federal and State safety and health standards applicable to that housing.

The section prohibits the occupancy of such housing by migrant workers unless the housing has been certified by an appropriate State or local health authority that it meets the applicable safety and health standards, and a copy of the certification of occupancy is posted at the site. The section notes that the receipt of such a certification does not relieve any person of the responsibilities of ensuring that the housing complies with substantive Federal and State safety and health standards. The owner of the housing is required to retain the original certification for a period of three years.

If a request for inspection and certification of a facility or real property is made to the appropriate State or local health agency at least 45 days prior to the anticipated date of occupancy by migrant workers and the agency has not conducted the investigation, this section permits the housing to be occupied although occupancy would not relieve any person of the responsibilities of ensuring that the housing complies with substantive Federal and State safety and health standards.

Finally, this section does not apply to any person who, in his ordinary course of business, regularly provides housing on a commercial basis to the general public, such as an innkeeper.

TITLE III—SEASONAL AGRICULTURAL WORKER PROTECTIONS

Section 301.—This section provides for informing seasonal agricultural workers of their wages and working conditions and for the maintenance of records.

The section required each farm labor contractor, agricultural employer and agricultural association which recruits seasonal workers, other than day-haul workers, to ascertain and disclose to the worker, upon request, the following information in writing when an offer of employment is made to such worker: the place of employment; the wage rates to be paid; the crops and kinds of activities on which the worker may be employed; the period of employment; the transportation and other employee benefits and their costs; the existence of a strike or other concerted work stoppage, slowdown, or interruption of operations at the place of employment; and the existence of any arrangements under which the farm labor contractor, agricultural employer or association is to receive a commission as a result of any sales to the workers.

In the case of day-haul workers, the above information shall be required to be disclosed in writing at the place of recruitment.

The section requires each farm labor contractor, agricultural employer and agricultural association which employs seasonal workers to post in a conspicuous place a poster provided by the Secretary setting forth the rights and protections afforded the workers under this Act, including their right to receive, upon request, a written statement of the information described in the preceding paragraphs.

The section requires, with respect to each worker, that each farm labor contractor, agricultural employer and agricultural association which employs seasonal workers make, keep and preserve, for three years, records of the following: the basis on which wages are paid; the number of piecework units earned; the number of hours worked; the

total pay period earnings; the specific sums withheld and the purpose of each withholding; and the net pay. The above information must also be provided through an itemized written statement to each seasonal worker for each pay period.

If a farm labor contractor furnishes seasonal workers to another contractor, agricultural employer or association, the farm labor contractor must provide copies of all records with respect to the above information for the workers so provided; the recipient of the records must keep them for a period of three years from the end of the period of employment.

The section further provides that no farm labor contractor, agricultural employer or association shall knowingly provide false or misleading information to any seasonal worker concerning the terms, conditions, or existence of employment required to be disclosed by the preceding paragraphs.

The information required to be disclosed to seasonal workers when recruited or employed must be in written form in English, or as necessary and reasonable, in Spanish or other language common to the seasonal workers who are not fluent or literiate in English. The Department will provide forms in English, Spanish and other languages, as necessary, which may be used in providing seasonal workers with the required information.

Section 302.—This section provides for further protections for workers with respect to wages, supplies and other working arrangements.

This section requires each farm labor contractor, agricultural employer and association to pay the wages owed to the seasonal workers when due. The section also prohibits the contractor, employer or association from requiring seasonal workers to purchase any goods or services solely from them. Finally, the section states that no contractor, employer or association shall, without justification, violate the terms of any working arrangements made with any seasonal worker.

TITLE IV—FURTHER PROTECTIONS FOR MIGRANT AND SEASONAL AGRICULTURAL WORKERS

Section 401.—This section provides for motor vehicle safety and applies to the transportation of any migrant or seasonal agricultural worker. The section does not apply to transportation of any migrant or seasonal agricultural worker on a tractor, combine, harvester, picker, or other similar machinery and equipment while such worker is actually engaged in the planting, cultivating, or harvesting of any agricultural commodity or the care of livestock or poultry.

The section requires each farm labor contractor, agricultural employer and agricultural association to ensure that any vehicle used to transport a migrant or seasonal agricultural worker conforms to certain standards to be prescribed by the Secretary and other applicable Federal and State safety standards. The section would also ensure that the driver of each vehicle possess a valid and appropriate license and provides for the existence of an insurance policy or liability bound insuring against liability for damage to persons or property arising from the ownership or operation of the vehicle. The Secretary is required to issue regulations which would prescribe standards to protect the health and safety of migrant and seasonal agricultural workers, and in issuing the standards for the protection of those workers consider, among other factors, the type of vehicle used, the passenger capacity in the vehicle, the distance which such workers will be carried in the vehicle, the type of roads and highways on which such workers will be carried in the vehicle, and the extent to which a proposed standard would cause an undue burden on agricultural employers, agricultural associations, or farm labor contractors.

The standards prescribed by the Secretary shall be in addition to, and shall not supersede or modify, any standard under the Interstate Commerce Act relating to the transportation of migrant workers which is independently applicable. A violation of these standards shall also constitute a violation under this Act.

In the event the Secretary fails to prescribe the standards by the effective date of this Act, the standards prescribed under the Interstate Commerce Act relating to the transportation of migrant workers shall be deemed to be the standards prescribed by the Secretary and shall, as appropriate and reasonable in the circumstances, apply: (1) without regard to the mileage and boundary line limitations of that Act, and (2) until superseded by standards actually prescribed by the Secretary.

The level of insurance required by this section should be at least the amount required for common carriers under the Interstate Commerce Act.

If the farm labor contractor, agricultural employer or association is the employer of any migrant or seasonal worker for the purposes of State workers' compensation law and thus provides coverage for the workers in the case of bodily injury or death, the section would excuse the requirement of an insurance policy or liability bond if the workers are only transported under circumstances where there is coverage under State law. An insurance policy or liability bond will be required for those circumstances where there is no coverage under State law.

Finally, the section requires the Secretary to promulgate regulations, not later than the effective date of this Act and in accordance with section 511 of this Act.

Section 402.—This section requires that prior to utilizing the services of a farm labor contractor all persons should take reasonable steps to determine that the contractor possesses a valid certificate of registration which authorizes the activity to be performed. The section states that the person may rely on the possession of a certificate of registration or on confirmation by the Department of Labor. The section also requires the Secretary to maintain a central public registry of all persons issued a certificate of registration.

Section 403.—This section requires each farm labor contractor to obtain at each place of employment and make available for inspection to the workers he furnishes a written statement of the conditions of employment described in sections 201 and 301.

Section 404.—This section states that no farm labor contractor shall violate, without justification, the terms of any written agreements made with agricultural employers or associations pertaining to any contracting activity or worker protection under this Act. The provision also notes that written agreements under this section do not relieve the parties of any responsibilities that they would otherwise have under the Act.

TITLE V—GENERAL PROVISIONS

Part A—Enforcement provisions

Section 501.—This section provides for criminal sanctions of a fine of not more than $1,000 or a prison term not to exceed three years, or both, for willful and knowing violations of this Act. The section also provides for a fine of not more than $10,000 or a prison term not to exceed three years, or both, for any person who has been denied a certificate, or has failed to obtain a certificate or has had his certificate suspended or revoked and such person had been found to have recruited, hired, employed or used, with knowledge, the services of an illegal alien.

Section 502.—This section provides for judicial enforcement by permitting the Secretary to petition any appropriate district court for temporary or permanent injunctive relief if the Secretary determined that this Act, or any regulation, has been violated. This section also permits the Solicitor of Labor to appear for, and represent, the Secretary in any civil litigation brought under this Act, subject to the direction and control of the Attorney General.

Section 503.—This section provides for administrative sanctions of a civil money penalty of not more than $1,000 for each violation of this Act or the regulations. In determining the amount to be assessed the Secretary must take into account the previous record of the person in terms of compliance with this Act and with comparable requirements of FLCRA, and the gravity of the violation. Any person assessed a civil money penalty will be afforded an opportunity for an agency hearing, upon request made within 30 days after the date of issuance of the notice of assessment. The hearings are held in accordance with the Administrative Procedures Act and the agency determination shall be made by final order.

If no hearing is requested, the assessment shall constitute a final and unappealable order. If a hearing is requested, the initial agency decision shall be made by an administrative law judge and the decision shall become the final order unless the Secretary modifies or vacates the decision. Notice of an intent to modify or vacate the decision shall be issued to the parties within 30 days after the decision of the administrative law judge.

Any person against whom a final order has been entered after an agency hearing may obtain review by the district court by filing a notice of appeal within 30 days from the date of such order, simultaneously sending a copy to the Secretary. The Secretary shall certify the record to the court. The findings of the Secretary shall be set aside only if found to be unsupported by substantial evidence. Any decision, order or judgment of the United States District Court shall be subject to appeal to the appropriate circuit courts.

All penalties collected under the authority of this section shall be paid into the Treasury of the United States.

Section 504.—This section provides for a private right of action by any person aggrieved by a violation of this Act, or the regulations, by a farm labor contractor, agricultural employer, agricultural association or other person. The aggrieved party may file suit in any district court having jurisdiction of the parties, without respect to the amount in controversy and without regard to the citizenship of the parties and without regard to exhaustion of any alternative administrative remedies. The court is authorized to appoint an attorney for such complainant, upon application, and may authorize the commencement of the action.

If the court finds that the respondent has intentionally violated any provision of this Act, or the regulations, it may award damages up to and including an amount equal to

the amount of actual damages, or statutory damages of up to $500 per plaintiff per violation, or other equitable relief. Multiple infractions of a single provision of this Act, or the regulations, shall constitute only one violation for purposes of determining statutory damages due a plaintiff. If a complaint is certified as a class action, the court shall award no more than the lesser of up to $500 per plaintiff per violation, or up to $500,000 or other equitable relief.

In determining the amount of damages to be awarded, the court is authorized to consider whether an attempt was made to resolve the issues in dispute before resorting to litigation.

Civil actions brought under this section shall be subject to appeal to the appropriate circuit courts.

Section 505.—This section prohibits the discrimination against any migrant or seasonal agricultural worker and provides that no person shall intimidate, threaten, restrain, coerce, blacklist, discharge, or in any other manner discriminate against such worker because the worker has filed a complaint or caused a complaint to be filed under this Act, or has exercised on behalf of himself or others any rights or protections afforded by this Act.

A worker who believes that he has been discriminated against by any person in violation of this section, may within 180 days after the violation occurs, file a complaint with the Secretary. The Secretary shall investigate the complaint and if he determines that the provisions of this section have been violated, he shall bring an action in any appropriate district court against such person. The courts shall have jurisdiction, for cause shown, to restrain the violation and to order all appropriate relief, including rehiring or reinstatement of the worker, with back pay, or damages.

Section 506.—This section states that agreements by employees purporting to waive or to modify their rights under this Act shall be void as contrary to public policy, except for waivers or modifications in favor of the Secretary which shall be valid for purposes of enforcement of this Act.

Part B—Administrative provisions

Section 511.—This section authorizes the Secretary to issue rules and regulations as are necessary to carry out this Act.

Section 512.—This section authorizes the Secretary to investigate and pursue complaints, including the inspection of places and records and the questioning of persons and gathering of information to determine compliance with the Act or its regulations. The provision authorizes the Secretary to issue subpoenas requiring the attendance of witnesses or the production of evidence. The provision extends to the Secretary the authority contained in sections 9 and 10 of the Federal Trade Commission Act relating to the attendance of witnesses and the production of documents. The provision also makes it a violation of this Act for any person to interfere in any manner with an official during the performance of his investigation or law enforcement function under the Act.

Section 513.—This section permits the Secretary to enter into agreements with Federal and State agencies to use their facilities, and to delegate authority, other than rulemaking, as may be useful in carrying out this Act to a State agency pursuant to a written State plan. The State plan must include a description of the functions to be performed, the methods of performance and the resources to be devoted to the performance of such functions. The State plan must also provide assurances that the State agency's performance of functions so delegated will be at least comparable to the performance of such functions by the Department. The provision also permits the allocations or transfer of funds to the agencies for expenses incurred pursuant to such agreements.

Part C—Miscellaneous provisions

Section 521.—This section states that the Act is intended to supplement State action and therefore does not excuse anyone from compliance with State law or regulation.

Section 522.—This is a transition provision which permits the Secretary to deny a certificate of registration to any farm labor contractor who has a judgment outstanding against him under FLCRA or is subject to a final order of the Secretary under FLCRA assessing a civil money penalty which has not been paid. The provision also permits the use of any findings under FLCRA to be applied to determinations of willful and knowing violations under this Act.

Section 523.—This section repeals FLCRA.

Section 524.—This section, as reflected by the Senate amendment, makes this Act effective 90 days after enactment. The section also provides for classification in title 29, United States Code.

DAY-HAUL OPERATION

Mr. President, I would now like to supplement the preceding analysis with some specific comments on several areas. One of these areas is the day-haul operation which is defined in section 3(4) of the bill and utilized in connection with the definition of "seasonal agricultural worker" in section 3(10).

The term "day-haul operation" as defined in the bill means the assembly of workers at a pickup point waiting to be hired and employed, transportation of such workers to agricultural employment, and the return of such workers to a dropoff point on the same day. It is clear that to be considered part of a day-haul operation the workers must be waiting to be hired and employed. Thus, workers who have already been hired and are part of the employer's work force would not fall within the day-haul definition.

To illustrate, take the case of a processing plant which hires local workers at specific wage rates to work in the plant for a 3-month canning season. The persons hired for this period are told at the time of hire that the employer will provide bus transportation to and from work, and if the workers wish to use the bus transportation they should report to a particular pickup point. Since these workers are not waiting to be hired and employed, they are not part of a day-haul operation.

PRIVATE RIGHT OF ACTION

A second area deserving specific comment is the private right of action provided under section 504 of the bill. The bill changes the current act's provisions on private rights of action. Currently, FLCRA exposes employers to substantial monetary awards for highly technical violations, especially those related to registration status, when there may be very little actual damages. Where an intentional violation of the act has been committed, the bill would allow courts to award up to $500 per plaintiff, per violation, as statuory damages in a private lawsuit with an upper limit of $500,000 for a class action. There is no limit on the amount of actual damages that can be awarded by a court.

In determining the amount of statutory damages due a plaintiff, the bill is clear that multiple infractions of a single provision of the act of regulations constitute a single violation. Thus, maintaining inaccurate records of working time for an individual working for a 3- or 4-week period would be considered a single violation and not a new violation for each work day. It is my understanding, of course, that the same type of recordkeeping violation for another individual for the same time period would be an additional transaction or occurrence for which additional damages could be awarded. Similarly, in relation to housing safety violations, the continuation of violations over a period of time would be considered one violation for the purpose of determining statutory damages for each plaintiff. However, if these same safety violations were not corrected and another group of workers were exposed to them, that would be another occurrence for which additional statutory damages could be awarded. I want to make absolutely clear, however, that as I have stated earlier, full actual damages would be awarded in every case.

JUDICIAL REVIEW

A third area on which I would like to comment is the provision in sections 103(c) and 503(c) relating to the standard of judicial review of agency decisions. Both sections provide that the findings of the Secretary of Labor shall be set aside only if found to be unsupported by substantial evidence as provided by section of 706(2)(E) of title 5, United States Code. Section 706 of title 5, as part of the Administrative Procedure Act, sets forth generally the scope of judicial review of administrative agency decisions. Subsection (2) lists several grounds on which agency action may be held unlawful and set aside, including lack of substantial evidence—paragraph (E). I would like the record to be clear that by referring specifically to section 706(2)(E) in the migrant labor protection bill, we are not precluding the other grounds in section 706(2) as providing a basis for reviewing the actions of the Department of Labor.

At this point in the debate, Mr. President, I would like to insert in the RECORD the statement of Mr. Robert B. Collyer, Deputy Under Secretary of Labor for Employment Standards Administration, who testified before the

House Labor Committee in September on the bill, I think it provides a useful amplification of the basis for the bill and of the intent of the legislation.

STATEMENT OF ROBERT B. COLLYER, DEPUTY UNDER SECRETARY OF LABOR

Mr. Chairman and Members of the Subcommittee: Thank you for your invitation to appear before the Subcommittee today to describe the Administration's proposed legislation to replace the Farm Labor Contractor Registration Act (FLCRA).

The Administration's bill was developed because of concerns raised about FLCRA in the Congress and in the agricultural community among both employer and worker groups. In response to these concerns, we entered upon a cooperative effort to replace FLCRA with a new law better designed to provide needed protections for farmworkers and, at the same time, eliminate unnecessary regulatory requirements that FLCRA has placed on agricultural employers.

This cooperative effort has now resulted in a consensus bill, endorsed by the AFL-CIO, the Migrant Legal Action Program and by major agricultural employer organizations, such as the American Farm Bureau Federation, the National Food Processors Association and the National Council of Agricultural Employers. While none of these groups believes the bill to be ideal from its individual standpoint, there is important agreement that the bill materially improves the law. As a public administrator, there is no doubt in my mind that it does. Therefore, the Administration urges the Congress to give our proposal careful consideration and expedite its enactment.

Before describing our bill, I want to provide the Subcommittee with a brief background sketch of current law. FLCRA was enacted in 1964, following considerable media attention about the conditions of migrant agricultural workers. That concern was centered on crewleaders, who are the middlemen between agricultural workers and farm operators. In this capacity, crewleaders often transport agricultural workers to jobsites; they may also have some supervisory responsibility for these workers in the fields; they may act as a paymaster for the workers or furnish and maintain farmworker housing, collect rent or occasionally supply meals.

Evidence was developed at the time of the original Congressional hearings that crewleaders did not always provide these services to farm operators or to farmworkers in an honest way. The original Act was designed, therefore, to prevent exploitation by crewleaders engaged in interstate activities and to improve working conditions of migrant farmworkers who were employed by crewleaders. The Act required all farm labor contractors covered by its provisions to register with the U.S. Department of Labor and to observe certain requirements in dealing with farmworkers and farm operators.

In 1974—ten years after enactment of the original statute—Congress reviewed farmworker conditions and determined that an expansion of coverage was appropriate. These 1974 amendments to FLCRA had the effect of broadening coverage of individuals and entities other than the traditional crewleader by including any person who, for a fee for himself or another, recruited, solicited, hired, furnished, or transported any migrant worker for agricultural employment, either within a State or across State lines. One result of this broadening language was that large numbers of fixed-situs agricultural employers such as growers and processors were included as farm labor contractors and are now required to register as contractors under the Act. The situations however, under which these fixed-situs employers must register were not clearly stated in the amendments, and the exemptions from registration were even less clear.

The 1974 amendments dealt with other issues as well. For example, they eliminated the requirement pertaining to the recruitment of 10 or more workers and extended the Act's application to intrastate farm labor contracting activities. They also provided greater protection for workers injured while being transported in a contractor-owned or controlled motor vehicle, by increasing motor vehicle insurance requirements. Applicants for registration were required to have proof of a liability insurance policy equivalent to that required for vehicles transporting passengers under the Interstate Commerce Act. The amendments also strengthened the statutory enforcement mechanisms.

Thus, it is clear that the 1974 amendments made several important improvements in the law, but it is also clear that the amendments created substantial uncertainty about the status of fixed-situs agricultural employers and have resulted in great numbers of these employers being treated as if they were crewleaders with no fixed addresses or financial integrity. As a result, the Labor Department's administration of the 1974 amendments with regard to fixed-situs agricultural employers has become controversial, and our efforts to register fixed-situs employers have led to a great deal of litigation.

These matters have caused substantial concern in the Congress. In late 1979, the Department received a letter signed by 52 United States Senators expressing their concern about the issues I have just discussed. In 1980, legislation passed the Senate which would have substantially amended FLCRA. Soon after the Reagan Administration took office in 1981, the Department, therefore, set out to resolve these problems. Our guiding principle, as I have stated, Mr. Chairman, was to develop consensus legislation which would provide essential protections for farmworkers within a rational statutory structure that eliminated unnecessary paperwork and reduced the constant litigation which has been the hallmark of current law. We have achieved that goal.

Now, Mr. Chairman, let me describe this consensus bill.

We are proposing a completely new statutory structure. Our proposal repeals FLCRA and creates a new law, the "Migrant and Seasonal Agricultural Worker Protection Act"—MSPA. The bill encompasses five basic principles:

First, it distinguishes between the traditional crewleader and the fixed-situs agricultural employer, eliminating the fiction that fixed-situs employers are crewleaders and thus most register as such with the Labor Department.

Second, it provides important worker protections, irrespective of whether the worker is employed by a crewleader, a fixed-situs employer or both: vehicle safety housing safety and health requirements, disclosure of wages, hours and working conditions, maintenance of necessary records, and provision to workers of itemized information concerning pay and withholding.

Third, the bill distinguishes between migrant workers, seasonal workers and day-haul workers. Day-haul workers are included within the seasonal worker category.

Fourth, the bill provides exemptions for both family businesses and small businesses.

Fifth, the bill deletes the ambiguous words and phrases which have caused extensive litigation under the current law.

In examining these five principles, I want to emphasize the importance of distinguishing between fixed-situs employers and traditional crewleaders. Nothing under the current law has caused more bitterness—not to mention more litigation—than the failure to do so. Under MSPA, therefore, we have excluded fixed-situs employers from the definition of farm labor contractor. Agricultural employers and associations—and the employees of both—would not be required to register as farm labor contractors or carry out the requirements designed specifically for contractors under the Act, such as being fingerprinted. However, as we have emphasized in our second principle, these fixed-situs employers and associations would be required to comply with the substantive labor protections provided in the new law when they are the employers of migrant or seasonal agricultural workers. Of course, traditional crewleaders would also be required to comply with all of these worker protection provisions and would be required, in addition, to adhere to registration requirements, such as designating the farm labor contracting activities to be performed, providing the address of their permanent place of residence, providing documentation on housing and vehicle compliance, providing a set of fingerprints, and consenting to have the Secretary accept service of summons in certain instances. Agricultural employers and associations are specifically excluded from these registration requirements which apply to farm labor contractors.

As noted in our third principle, the bill would establish two categories of covered farmworkers. The term "migrant agricultural worker" has been redefined so it includes only those farmworkers who are away from their home overnight for purposes of agricultural employment. A new category of covered worker is established, namely "seasonal agricultural worker", to include persons who are employed on a farm or ranch but do not live away from their permanent residence. A seasonal agricultural worker employed on a farm or ranch to perform field work relating to planting, cultivating or harvesting operations is covered by the bill; but the bill does not cover local "in-plant" workers who commute daily to their jobs and are not part of a day-haul operation. "Field work" would typically be handwork such as setting out plants, hoeing, or picking but could also include loading baskets on a truck or riding on a potato harvester to sort the potatoes. It would not, for example, include tractor drivers, operators of complex or major farm machinery or truck drivers.

The bill would fully cover day-haul workers, including those employed by canneries, processing plants and similar agricultural employers, as listed in the bill. Day-haul is defined to mean the assembly of workers at a pick-up point where they are waiting to be hired and employed, transported to the agricultural employment, and then returned to a drop-off point at the end of the same day. Experience has shown that protection is needed for day-haul agricultural workers, irrespective of whether they are living away from home, as they are often highly vulnerable individuals who can be easily subjected to abuse.

As stated in our fourth basic principle, the bill contains a separate section which enumerates various exemptions from the Act. Included are exemptions for family and small businesses. The family business exemption applies where all farm labor contracting activity is performed exclusively by the owner (or owners) or a member of the immediate family, whether or not the family business is incorporated. The small business exemption is structured to exempt those employers who are also exempt from the minimum wage and overtime requirements of the Fair Labor Standards Act by reason of the "500 man-day" test for small agricultural employers under the FLSA.

Other exemptions in FLCRA are retained in MSPA—for example, the exemption for any custom combine, hay harvesting or sheep shearing operations. In the past, the Department has limited the custom combine exemption to grain combining. This interpretation will be continued.

The current exemption for employment of full-time students in the production of seed corn and sorghum has been clarified to include all seed production and to eliminate the four-week limitation on employment. A similar exemption has been provided for the employment of full-time students in the stringing and harvesting of shade grown tobacco.

To resolve the paradox concerning employees of otherwise exempt entities, the bill provides an exemption to ensure that employees of exempt employers are not subject to the new Act.

The exemption provision also provides a specific coverage exclusion for labor unions.

Finally, in order to deal with the potentially ambiguous situation where workers may be jointly employed by a farm labor contractor and an agricultural employer, the bill adopts the definition of the term "employ" used under the Fair Labor Standards Act (FLSA) as the term has been interpreted by the courts over the years for joint-employment circumstances. For example, under the FLSA Regulations a worker may be an employee of two or more employers. That determination is based on the facts of the individual case. Joint employment includes situations where there is an arrangement between employers to share the service of an employee or where one employer is acting directly or indirectly in the interest of another employer in relation to the employee. For example, crew members would be considered jointly employed by the labor contractor and farmer if the crewleader assembles a crew and brings them to the farm, and the farmer exercise the power to direct, control or supervise the work or to determine the pay rates and the methods of payment.

Our goal in dealing with "joint employer" issues was very simple: if a fixed-situs agricultural business "employs" a covered farmworker for FLSA purposes, it also "employs" that farmworker for MSPA purposes. The exact same principles will be used to define the term "employ" in MSPA "joint employment" situations as are used under FLSA.

As a related matter, the current definition of "agricultural employment" in the FLCRA would be retained under the new law.

Now, Mr. Chairman, I would like to describe the employer responsibility and worker protection provisions in the bill. Title I of the bill establishes the basic obligations of farm labor contractors—traditional crewleaders—beginning with the requirement that they be registered with the U.S. Department of Labor. There is a clear statement in the bill that this title will not apply to other types of agricultural employers or agricultural associations. The registration of employees of farm labor contractors who perform farm labor contracting activities for their employer remains unchanged. We intend that contractors should be fully responsible for the farm labor contracting activities of their employees.

Title II of the bill sets out the specific protections for migrant agricultural workers—those working away from their permanent residence. Title III sets out specific protections for seasonal workers. Title IV sets out protections for both.

For migrant workers, information about wages and working conditions must be provided in writing at the time of recruitment. For seasonal workers this basic information must be available, upon request, at the time employment is offered. Employers are required to keep certain payroll records, and employees must be given an itemized statement of earnings and deductions for each pay period. Each employer is also required to post at the place of employment a poster which sets forth the rights of workers under the Act, such as wage rates, period of employment, crops and activities on which the worker will be employed, the existence, if any, of a strike or work stoppage at the place of employment, and the right of a worker to have, upon request, a written statement pertaining to work and conditions of work. When there is joint employment, compliance by either employer will satisfy any requirement.

The bill also would expand the protections related to housing for migrant agricultural workers. For example, when more than one entity is involved in providing the housing, such as when the grower owns it and the farm labor contractor operates it, both will be responsible for the safety and adequacy of the housing. This is a significant change from the present law which fixes responsibility only on the farm labor contractor who may or may not own the housing. Substantive Federal and State housing health and safety standards must be complied with at all times. The bill provides for State and local health authorities to certify that the housing meets these standards based on inspection prior to occupancy. The bill, however, also provides sufficient enforcement flexibility so that employers will not be cited for mere technical or non-substantive violations that do not impact worker safety and health.

An exemption to the housing requirement is provided for hotels and motels that may provide accommodations to migrants and others in the general course of doing business. We do not, of course, intend that migrant labor camps would qualify for this "innkeeper exemption" simply by offering lodging to the general public.

The MSPA transportation provisions differ in several respects from the current FLCRA. MSPA recognizes that standards now in place under the Interstate Commerce Act are not always appropriate with respect to transportation of agricultural workers under certain circumstances, particularly on farms and for other local travel. The bill directs the Secretary to develop regulations that will apply to the transportation of farmworkers not covered by Department of Transportation regulations. The Department of Labor regulations will take into account the distances traveled, the type of vehicle used, the number of passengers, the types of roads to be traveled and the extent to which any standards would impose an undue burden on the person providing the transportation, while continuing to provide for the health and safety of migrant and seasonal agricultural workers.

The transportation standards will not be applied to farm equipment or machinery when used for its intended purpose, but use of such equipment or machinery purely for the transportation of workers from place-to-place will be regulated. The vehicle insurance requirement of the current FLCRA will be retained, except that no additional insurance will be required where transportation is fully covered by a State workers' compensation law and the employer provides such coverage.

The bill prohibits the using of services of a farm labor contractor without first taking reasonable steps to determine that a contractor is properly registered. Unlike the current law, the bill would not penalize farmers who do take those reasonable steps.

The enforcement provisions of the bill retain FLCRA's civil and criminal penalties, and the investigative authority of the Department of Labor. A new provision makes it unlawful to interfere with officials of the Department in the performance of their duties under the bill. This section has been added as a result of the increasing number of incidents involving threats of bodily harm to our compliance officers.

The bill would change the current Act's provisions on private rights of action. It is our basic intent to encourage resolution of differences without resorting to litigation, while retaining full access to the Federal courts by injured private parties. Currently, however, FLCRA exposes employers to substantial monetary awards for highly technical violations, especially those related to registration status, when there may be very little actual damages. Where an intentional violation of the Act has been committed, the bill would allow courts to award up to $500 per plaintiff, per violation, as statutory damages in a private lawsuit with an upper limit of $500,000 for a class action. However, there is no limit on the amount of actual damages that can be awarded by a court.

Multiple infractions of a single provision, however, would be counted a only one violation. For example, failure to keep accurate hours-worked records over a period of several weeks would be considered one violation for each worker involved. In determining the amount of damages, the Federal courts are authorized to consider whether an attempt was made to resolve the issues in dispute before resorting to litigation. The provision in the bill prohibiting individuals from waiving their rights is not intended to preclude their entering into settlements under the private right of action section in order to avoid litigation and reach resolution.

The bill also retains the current FLCRA provision prohibiting discrimination with respect to individuals who have filed a complaint or have testified in any proceeding under the Act. The Secretary of Labor will continue to have authority to investigate complaints alleging such discrimination and may seek redress in the Federal courts. The bill expands upon the provision of the FLCRA allowing for agreements with Federal and State agencies in order to ensure that those functions delegated, especially to the States, are performed with adequate resources and in a manner comparable to Federal enforcement efforts.

89-059 O-86-12 (Pt. 24)

There will, of course, be the matter of the transition from the application of the current statute to the new one. With regard to enforcement and compliance, the bill provides that for the purposes of determining appropriate action under the new law, the record of violations under the current FLCRA will be a factor to be considered if that individual or entity violates this Act.

Certificates of registration may be denied under this bill if the applicants under FLCRA have either failed to pay their court judgments obtained under FLCRA or failed to comply with a final order issued by the Secretary under FLCRA. Registration under the new Act will also require a phase-in. It is our intention to use a 12-month period for each certificate of registration based on the applicant's date of birth rather than the current calendar year method which creates an unnecessary administrative burden upon the Department at the close of each calendar year.

Mr. Chairman, in concluding my statement, I want to reemphasize two major points. First, the revised farm labor statute that we are proposing today greatly enhances the Labor Department's ability to protect migrant and seasonal agricultural workers. Second, the bill eliminates the unnecessary, burdensome and costly regulation of fixed-situs agricultural employers which has been so troublesome under current law. Enactment of the bill will, therefore, enable the Department to concentrate its enforcement efforts on those areas of farmworker employment where the most egregious violations of workers' rights occur.

I also want to again thank all those persons and organizations who participated in the cooperative effort over the past 18 months to develop this legislation. Without their thoughtful assistance—not to mention their vigorous advocacy—we would not be here today.

Mr. President, I have no further comments to make on the bill. I believe it addresses the problems which, as everyone now recognizes, undermines severely the effectiveness of the Farm Labor Contractor Registration Act. The bill substantially reforms the program, to enable a more efficient allocation of enforcement resources and to impose a fairer matrix of rights, obligations, and remedies. I am pleased to have played a part in its enactment.

Mr. ROBERT C. BYRD. Mr. President, it is with pleasure that I rise in support of H.R. 7102, the Migrant and Seasonal Agricultural Worker Protection Act. This measure will replace the unwieldy Farm Labor Contractor Registration Act, known as FLCRA.

Apple and peach orchardists in West Virginia's eastern panhandle have been frustrated by FLCRA. It imposes unfair burdens on agricultural employers without providing effective safeguards for workers.

H.R. 7102 will replace FLCRA with a more reasonable set of standards, including simpler reporting requirements and a clearer definition of the responsibilities of crew leaders. The current law causes employers confusion with its complicated and duplicative provisions. The bill before the Senate provides us with an opportunity to enact a valuable piece of regulatory reform legislation.

H.R. 7102 is a consensus bill. It is the product of negotiations carried out over more than a year. Last March, I met with leaders of the West Virginia fruitgrowers and the Labor Department to discuss this legislation. All the parties involved have shown patience and good faith in producing this bill.

I commend the distinguished chairman and the ranking members of the labor and human resources committee, Senator HATCH and Senator KENNEDY, for their attention to this matter. I also make a special point of singling out Senator BOREN's leading role in the development of these improvements in the law. The bill and amendments that he advocated in 1980 form an important basis for the Migrant and Seasonal Farmworker Program Act.

I ask that I be made a cosponsor of the bill, and I urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (UP 1569) was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 7102) was passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

JOE POOL LAKE

Mr. BAKER. Mr. President, I wish next to go to H.R. 7377, the Joe Pool Lake bill, if there is no objection to that.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. There is no objection.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 7377) to designate the Lakeview Lake project, Mountain Creek, Texas, as the "Joe Pool Lake".

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (HR. 7377) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FISHERY CONSERVATION AND MANAGEMENT

Mr. BAKER. Mr. President, I propose to proceed next to a massage from the House on H.R. 5002, if there is no objection.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. There is no objection.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 5002.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House disagree to the amendments of the Senate to the bill (H.R. 5002) entitled "An Act to improve fishery conservation and management", and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. ANDERSON, Mr. BREAUX, Mr. STUDDS, Mr. SNYDER, and Mr. FORSYTHE be the managers of the conference on the part of the House.

Mr. BAKER. Mr. President, I move that the Senate insist on its amendments and agree with the House request for a conference and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to, and the Chair appointed Mr. PACKWOOD, Mr. GORTON, Mr. STEVENS, Mr. HOLLINGS, and Mr. INOUYE conferees on the part of the Senate.

PURCHASE, SALE, AND EXCHANGE OF LANDS BY THE DEVILS LAKE SIOUX TRIBE

Mr. President, next is another message from the House of Representatives on S. 503, if there is no objection.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. No objection.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 503

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 503) entitled "An Act to authorize the purchase, sale, and exchange of lands by the Devils Lake Sioux Tribe of the Devils Lake Sioux Reservation, North Dakota, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause and insert:

TITLE I

SECTION 101. The Congress finds that—

(1) the Devils Lake Sioux Tribe, of the Devils Lake Sioux Reservation, North Dakota, is vigorously pursuing its goal of self-determination through development of manufacturing and farming enterprises; and

(2) the continued existence of the Devils Lake Sioux Reservation, North Dakota, as a permanent homeland of the Devils Lake Sioux Tribe and as a necessary foundation for continued self-determination requires that the Secretary of the Interior have authority to—

(A) consolidate and increase the trust land base in the reservation for the tribe and individual tribal members; and

(B) prevent further loss of trust land.

SEC. 102. (a) The Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") is authorized to—

(1) purchase with any funds held by the Secretary in trust for the benefit of the Devils Lake Sioux Tribe or appropriated for the purpose, or acquire by gift, exchange, or relinquishment, any interest in land (or any improvements thereon) located within the boundaries of the Devils Lake Sioux Reservation for the benefit of the Devils Lake Sioux Tribe or individual members of such tribe;

(2) sell or approve sales of any interest in tribal trust or tribal restricted land (or any improvements thereon) located within the boundaries of the Devils Lake Sioux Reservation but only if additional tribal trust or tribal restricted land which is approximately equal in acreage or value to the interest sold is acquired by the Secretary at the time of such sale; and

(3) exchange any interest in tribal or individual trust land or tribal or individual restricted land (or any improvements thereon) for any land located within the Devils Lake Sioux Reservation but only if the values of the interests in land involved in such an exchange are equal or are equalized by the payment of money.

(b) Any purchase of Federal lands under subsection (a)(1) shall be made in accordance with the provisions of the Federal Land Policy and Management Act of 1976 (90 Stat. 2744).

SEC. 103. The Secretary shall accept any transfer of title from the Devils Lake Sioux Tribe, or from any individual member of such tribe, for any interest in land (or any improvements thereon) located within the boundaries of the Devils Lake Sioux Reservation, and shall take title to such property in the name of the United States in trust for the benefit of the Devils Lake Sioux Tribe, or for such individual member.

SEC. 104. Any acquisition, sale or exchange of lands for the Devils Lake Sioux Tribe which is made under this title shall be made only upon the request of the authorized governing body of the Devils Lake Sioux Tribe, subject to the limitations and procedures of the tribal constitution.

SEC. 105. Notwithstanding any other provision of applicable law, the title to any interest in land, or any improvements thereon, acquired by the Secretary under this title shall be acquired in the name of the United States in trust for the benefit of the Devils Lake Sioux Tribe or an individual member of such tribe, as the case may be, and such property shall be held and treated in the same manner as other trust or restricted Indian lands are held and treated under Federal law.

SEC. 106. Money or amounts credited to the Devils Lake Sioux Tribe from the sale or exchange under this title of any interest in trust or restricted land (or any improvements thereon) may be used only for the purpose of purchasing or acquiring property under this title and shall be deposited in a special account under the control of the Secretary or his duly authorized representative.

SEC. 107. Subsection (a) of the first section of the Act of August 9, 1955 (69 Stat. 539; 25 U.S.C. 415), as amended, is further amended—

(1) by striking out "and leases of land on the Agua Caliente" in the second sentence and inserting in lieu thereof "leases of land on the Agua Caliente", and

(2) by striking out "and the lands comprising the Moses Allotment Numbered 10, Chelan County, Washington," in the second sentence and inserting in lieu thereof the following: "leases of the lands comprising the Moses Allotment Numbered 10, Chelan County, Washington, and leases to the Devils Lake Sioux Tribe, or any organization of such tribe, of land on the Devils Lake Sioux Reservation,".

SEC. 108. (a)(1) The devise or descent of any interest in trust or restricted land located within the Devils Lake Sioux Reservation to any person who is not a member of the Devils Lake Sioux Tribe shall be subject to the right of such tribe to purchase such interest within two years of the date of death of the decedent by paying to the Secretary for the benefit of such person an amount equal to the fair market value of such interest on the date of such purchase (as determined by the Secretary after appraised).

(2) Within ninety days after the date on which the Secretary receives payment of an amount for the benefit of a person under paragraph (1), the Secretary shall pay such amount to such person.

(3) The Devils Lake Sioux Tribe may exercise its right under paragraph (1) to purchase the interest of a person only if the governing body of such tribe notifies such person and the Secretary of the intent of such tribe to purchase such interest at least ninety days prior to the date of such purchase.

(b)(1) Subsection (a) shall not apply to any interest in land acquired by the spouse of a decedent if—

(A) the spouse elects the application of this subsection prior to the date which is ninety days after the date on which the governing body of the Devils Lake Sioux Tribe notifies the spouse of its intent to acquire such interest, and

(B) prior to such date, the spouse retains a life estate in such interest and conveys the remainder of such interest to any heir of the decedent who is a member of such tribe.

(2) If the spouse of a decedent elects the application of this subsection with respect to any interest in land which was trust or restricted land immediately prior to the death of the decedent, the life estate and the remainder of such interest created by the conveyance described in paragraph (1)(B) shall acquire such trust or restricted status.

(c) This section shall only apply to interests included in the estates of decedents dying on or after the date of enactment of this title.

SEC. 109. The Devils Lake Sioux Reservation, North Dakota, is hereby declared the permanent homeland of the Devils Lake Sioux Tribe.

SEC. 110. The Secretary is authorized to take such action as may be necessary to carry out the purposes of this title.

TITLE II

SEC. 201. This title may be cited as the "Indian Land Consolidation Act".

SEC. 202. For the purpose of this title—

(1) "tribe" means any Indiian tribe, band, group, pueblo, or community for which, or for the members of which, the United States holds lands in trust;

(2) "Indian" means any person who is a member of a tribe or any person who is recognized as an Indian by the Secretary of the Interior;

(3) "Secretary" means the Secretary of the Interior; and

(4) "trust or restricted lands" means lands, title to which is held by the United States in trust for an Indian or an Indian tribe or lands title to which is held by Indians or an Indian tribe subject to a restriction by the United States against alienation.

SEC. 203. The provisions of section 5 of the Act of June 18, 1934 (48 Stat. 985), shall apply to all tribes notwithstanding the provisions of section 18 of such Act: *Provided*, That nothing in this section is intended to supersede any other provision of Federal law which authorizes, prohibits, or restricts the acquisition of land for Indians with respect to any specific tribe, reservation, or state(s).

SEC. 204. (a) Notwithstanding any other provision of law, any tribe, acting through its governing body, is authorized, with the approval of the Secretary to adopt a land consolidation plan providing for the sale or exchange of any tribal lands or interest in lands for the purpose of eliminating undivided fractional interests in Indian trust or restricted lands or consolidating its tribal landholdings.

SEC. 205. Any Indian tribe may purchase at no less than fair market value all of the interests in any tract of trust or restricted land within that tribe's reservation or otherwise subjected to that tribe's jurisdiction with the consent of over 50 per centum of the owners or with the consent of the owners of over 50 per centum of the undivided interests in such tract: *Provided*, That—

(1) no such tract shall be acquired by any Indian or Indian tribe over the objection of three or less owners owing 50 per centum or more of the total interests in such tract;

(2) any Indian owning any undivided interest in, and in actual use and possession of such tract, may purchase such tract by matching the tribal offer;

(3) no Indian acquiring land under this section shall be eligible to apply for a fee patent in such lands for a period of 10 years after such acquisition;

(4) this section shall not apply to any tract of land owned by less than fifteen persons; and

(5) all purchases and sales initiated under this section shall be approved by the Secretary.

SEC. 206. Notwithstanding any other provisions of law, any Indian tribe may provide by appropriate action of its governing body, subject to approval by the Secretary, that nonmembers of the tribe or non-Indians shall not be entitled to receive by devise or

descent any interest in trust or restricted lands within that tribe's reservation or otherwise subjected to that tribe's jurisdiction: *Provided*, That in the event a tribe takes such action—

(1) the sale price or exchange value received by the tribe for land or interests in land covered by this section shall be no less than within 10 per centum of the fair market value as determined by the Secretary;

(2) if the tribal land involved in an exchange is of greater or lesser value than the land for which it is being exchanged, the tribe may accept or give cash in such exchange in order to equalize the values of the property exchanged;

(3) any proceeds from the sale of land or interests in land or proceeds received by the tribe to equalize an exchange made pursuant to this section shall be used exclusively for the purchase of other land or interests in land;

(4) the Secretary shall maintain a separate trust account for each tribe selling or exchanging land pursuant to this section consisting of the proceeds of the land sales and exchanges and shall release such funds only for the purpose of buying lands under this section; and

(5) any tribe may retain the mineral rights to such sold or exchanged lands and the Secretary shall assist such tribe in determining the value of such mineral rights and shall take such value into consideration in determining the fair market value of such lands.

(b) The Secretary must execute such instrument of conveyance needed to effectuate a sale or exchange of tribal lands made pursuant to an approved tribal land consolidation plan unless he makes a specific finding that such sale or exchange is not in the best interest of the tribe or is not in compliance with the tribal land consolidation plan.

(1) if an Indian dies intestate, the surviving non-Indain or nonmember spouse and/or children shall be entitled to a life estate in as much of the trust or restricted lands as he, she or they would have been entitled to take under existing law;

(2) if an intestate Indian decedent has no heir to whom interests in trust or restricted lands may pass, such interests shall escheat to the tribe, subject to any non-Indian or nonmember spouse and/or children's rights as described in pargraph (1) of this section;

(3) if an Indian decedent has devised interests in trust or restricted lands to persons who are ineligible for such an inheritance by reason of a tribal ordinance enacted pursuant to this section, the devise shall be voided only if, while the estate is pending before the Secretary for probate, the tribe acquires such interests by paying to the Secretary, on behalf of the devisees, the fair market value of such interests as determined by the Secretary as of the date of the decedent's death: *Provided*, That any non-Indian or nonmember spouse and/or children of such decedent who have been devised such interests may retain, at their option, a life estate in such interests, or be compensated by the tribe for the value of such interests.

SEC. 207. No undivided fractional interest in any tract of trust or restricted land within a tribe's reservation or otherwise subjected to a tribe's jurisdiction shall descedent by intestacy or devise but shall escheat to that tribe if such interest represents 2 per centum or less of the total acreage in such tract and has earned to its owner less than $100 in the preceding year before it is due to escheat.

SEC. 208. The Secretary in carrying out his responsibility to regulate the descent and distribution of trust lands under section 1 of the Act of June 25, 1910 (36 Stat. 855; 25 U.S.C. 372) as amended, and other laws, shall give full faith and credit to any tribal actions taken pursuant to section 206 of this title, which provision shall apply only to estates of decedent's whose deaths occur on or after the effective date of tribal ordinances adopted pursuant to this title.

SEC. 209. The Secretary shall have the authority to issue deeds, patents, or such other instruments of conveyance needed to effectuate a sale or exchange of tribal lands made pursuant to the terms of this title and to remove, at the request of an Indian owner, the trust status of individually held lands or interests therein, where authorized by law.

SEC. 210. Title to any land acquired under this title by any Indian or Indian tribe shall be taken in trust by the United States for that Indian or Indian tribe.

SEC. 211. All lands or interests in land acquired by the United States for an Indian or Indian tribe under authority of this title shall be exempt from Federal, State and local taxation.

Amend the title so as to read: "An Act to authorize the purchase, sale, and exchange of lands by Indian tribes and by the Devils Lake Sioux Tribe of the Devils Lake Sioux Reservation of North Dakota specifically, and for other purposes.".

Mr. BAKER. Mr. President, I move to concur in the House amendments with a further Senate amendment which I send to the desk on behalf of the Senator from Maine (Mr. COHEN).

UP AMENDMENT NO. 1570

(Purpose: Making technical corrections to the House amendment relating to Indian lands.)

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), for Mr. COHEN, proposes unprinted amendment numbered 1570.

Mr. BAKER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 8, line 17, delete subsection 205(3) by striking the language "(3) no Indian acquiring land under this section shall be eligible to apply for a fee patent in such lands for a period of 10 years after such acquisition;". Renumber subsections 205 (4) and (5) as subsections 205 (3) and (4).

On page 9, line 3, after the word "interest" and before the word "in", insert the words "of a member of such tribe".

● Mr. COHEN. Mr. President, the purpose of this amendment is to make technical corrections in the House amendment to this bill. The House Interior and Insular Affairs Committee worked closely with the administration in the development of the provisions of title II, the House amendment. This title is intended to address itself to a longstanding problem of fractionated heirship of Indian lands. This provision is avidly supported by the administration and appears to be a worthy first step toward addressing this controversy. The amendment I offer is technical in nature and I believe will help avoid certain problems that could occur in situations where more than one tribe occupies a single reservation of members of a different tribe reside on a reservation governed by a different tribe.

I ask the Senate to concur in the House amendments to S. 503 with the further amendment I have just offered.●

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator for Tennessee.

The amendment (UP No. 1570) was agree to.

The motion was agreed to.

TRICENTENNIAL ANNIVERSARY YEAR OF GERMAN SETTLEMENT IN AMERICA

Mr. BAKER. Mr. President, I propose next to ask the Chair to lay before the Senate Senate Joint Resolution 260, if the minority leader is prepared to proceed to that item.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. There is no objection.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on Senate Joint Resolution 260.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the resolution from the Senate (S.J. Res. 260) entitled "Joint resolution to designate the period commencing January 1, 1983, and ending December 31, 1983, as the 'Tricentennial Anniversary Year of German Settlement in America'." do pass with the following amendment:

Page 2, after line 16, insert:

SEC. 3. (a) There is hereby established a Commission to be known as the Presidential Commission for the German-American Tricentennial (hereinafter referred to as the "Commission") to plan, encourage, develop, and coodinate the commemoration of the German-American Tricentennial. In preparing its plans and carrying out its progam, the Commission shall give due consideration to any related plans and programs developed by State, local, private, and foreign groups.

(b) The Commission shall be composed of not more than 40 members, appointed by the President, 10 of whom shall be appointed upon the recommendation of the Speaker of the House of Representatives, and 10 of whom shall be appointed upon the recommendation of the President pro tempore of the Senate, in consultation with the majority leader and minority leader of the Senate. One member shall be the Chief Justice of the United States or his designee. The members shall be from the public and private sectors and the President shall desginate a member from the private sector as Chairman. The members of the Commission shall receive no compensation for their ser-

vices as such but may be allowed necessary travel expenses, as authorized by law, to carry out Commission activities.

(c) The Commission is authorized to encourage the participation of, and receive donations of money, property and personal services from, public and private organizations and individuals to assist the Commission in carrying out its responsibilities. The Director of the United States Information Agency is authorized to provide administrative services and staff support to the Commission, as necessary, for which reimbursement shall be made from funds of the Commission under section 686 of title 31, United States Code, in such amounts as may be agreed upon by the Chairman of the Commission and the Director. The heads of other Executive agencies and departments are also authorized and requested to cooperate with and assist the Commission in fulfilling its responsibilities.

(d) The Commission shall have power to appoint and fix the compensation of such personnel as it deems advisable and to appoint such advisory committees as it deems necessary. The Commission may also procure temporary and intermittent services as authorized by section 3109(b) of title 5, United States Code. The Commission shall have authority to make contracts and grants as necessary and appropriate to carry out its program.

(e) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(f) All expenditures of the Commission shall be made from donated funds.

(g) A report of the Commission's activities shall be made to Congress no later than January 31, 1984, upon which date the Commission shall terminate.

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

PADDY CREEK WILDERNESS ACT

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House on S. 1965, the Paddy Creek wilderness bill.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. Mr. President, I know of no objection on this side.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1965.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1965) entitled "An Act to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately six thousand eight hundred and eighty-eight acres, and which are generally depicted on a map entitled 'Paddy Creek Wilderness Area', as a component of the National Wilderness Preservation System", do pass with the following amendment:

Strike out all after the enacting clause, and insert: That this act may be known as the Paddy Creek Wilderness Act of 1981.

SEC. 2. In furtherance of the purposes of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), the following area as generally depicted on a map appropriately referenced, dated December 1981, is hereby designated as wilderness and, therefore, as a component of the National Wilderness Preservation System; certain lands in the Mark Twain National Forest, Missouri, which comprise about six thousand hundred and eighty-eight acres, are generally depicted on a map entitled "Paddy Creek Wilderness Area", dated December 1981, and shall be known as the Paddy Creek Wilderness Area.

SEC. 3. As soon as practicable after this Act takes effect, the Secretary of Agriculture shall file a map and legal description of the Paddy Creek Wilderness Area with the Energy and Natural Resources Committee of the Senate and the Committees on Agriculture and Interior and Insular Affairs of the House of Representatives, and such map and legal description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal description and map may be made.

SEC. 4. The area designated as wilderness by this Act shall be administered in accordance with the applicable provisions of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), except that any reference in such provisions to the effective date of such Acts shall be deemed to be a reference to the effective date of this Act.

SEC. 5. (a) The Congress finds that—

(1) the Department of Agriculture has completed the second roadless area review and evaluation program (RARE II); and

(2) the Congress has made its own review and examination of National Forest System roadless areas in the State of Missouri and of the environmental impacts associated with alternative allocations of such areas.

(b) On the basis of such review, the Congress hereby determines and directs that—

(1) without passing on the question of the legal and factual sufficiency of the RARE II Final Environmental Statement (dated January 1979) with respect to National Forest System lands in States other than Missouri such statement shall not be subject to judicial review with respect to National Forest System lands in the State of Missouri;

(2) with respect to the National Forest System lands in the State of Missouri which were reviewed by the Department of Agriculture in the second roadless area review and evaluation (RARE II), except those lands remaining in further planning upon enactment of this Act, or designated as wilderness by this Act or previous Acts of Congress that review and evaluation shall be deemed for the purposes of the initial land management plans required for such lands by the Forest and Rangeland Renewal Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976 (Public Law 94-588) to be an adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System and the Department of Agriculture shall not be required to review the wilderness option prior to the revision of the initial plans and in no case prior to the date established by law for completion of the initial planning cycle;

(3) areas in the State of Missouri reviewed in such final environmental statement and not designated as wilderness by this Act or previous Acts of Congress or remaining in further planning upon enactment of this Act shall be managed for multiple use pursuant to section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976; and

(4) unless expressly authorized by Congress the Department of Agriculture shall not conduct any further statewide roadless area review and evaluation of national forest system lands in the State of Missouri for the purpose of determining their suitability for inclusion in the National Wilderness Preservation System.

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

RELIEF OF JERRY L. CROW

Mr. BAKER. Mr. President, next I ask that the Chair lay before the Senate a message from the House on S. 835, an act for the relief of Jerry L. Crow.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. There is no objection.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 835.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 835) entitled "an Act for the relief of Jerry L. Crow", do pass with the following amendments:

Page 2, after line 11, insert:

SEC. 4. That the Secretary is hereby authorized and directed to convey to Ralph D. and Connie V. Hubbell, Carbondale, Colorado, all right, title, and interest to the United States in and to a tract of land situated in lot 19 of section 27, township 7 south, range 88 west of the sixth principal meridian, Garfield County, Colorado, consisting of one and twenty-five one-hundredths acres, more or less. Notwithstanding any other provision of law, such conveyance shall be made upon prompt payment of the 1964 fair market value, as determined by the Secretary. For purposes of this Act, prompt payment shall be no more than thirty days after notification by the Secretary of such value.

Amend the title so as to read: "An Act for the relief of Jerry L. Crow and Ralph D. and Connie V. Hubbell.".

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

EDUCATIONAL MINING ACT OF 1982

Mr. BAKER. Mr. President, next I ask that the Chair lay before the Senate a message from the House on S. 1501, the Educational Mining Act of 1982.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. Mr. President, there is no objection for the Chair to lay before the Senate this message.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1501.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1501) entitled "An Act entitled 'Educational Mining Act of 1982'", do pass with the following amendment: Strike out all after the enacting clause, and insert

TITLE I

SEC. 101. (a) Subject to the conditions and limitations specified in this section, the Secretary of the Interior (hereinafter referred to as the "Secretary") is authorized and directed to convey to the University of Alaska, all right, title, and interest of the United States in the following described land comprising approximately fifty-seven acres:

FAIRBANKS MERIDIAN, ALASKA

Township 2 North, Range 1 East

Section 8:
East half southeast quarter southwest quarter northeast quarter southeast quarter,
North half southwest quarter southeast quarter northeast quarter southeast quarter,
South half south half southeast quarter northeast quarter southeast quarter,
East half northeast quarter northwest quarter southeast quarter southeast quarter,
Northeast quarter southeast quarter southeast quarter,
North half southeast quarter southeast quarter southeast quarter,
North half south half southeast quarter southeast quarter southeast quarter,
South half southeast quarter southeast quarter southeast quarter southeast quarter,
South half southwest quarter northwest quarter southeast quarter southwest quarter.
Section 9:
West half southwest quarter southwest quarter,
South half southwest quarter northwest quarter northeast quarter southwest quarter southwest quarter,
Southwest quarter northeast quarter southwest quarter southwest quarter,
Southeast quarter southwest quarter southwest quarter,
West half west half southwest quarter southeast quarter southeast quarter southwest quarter,
Southwest quarter southeast quarter southwest quarter,
South half southwest quarter northwest quarter southeast quarter southwest quarter.

(b) Conveyance under this section shall be made only upon the condition that the described land shall be held and used by the University of Alaska and shall not be conveyed by the University.

(c) No conveyance shall be made unless application for conveyance is filed by the university with the Secretary within six months of the date of the approval of this Act.

(d) The Secretary may at his discretion require that he be provided a perimeter survey of the lands to be conveyed under this section. All costs of obtaining such survey shall be borne by the university.

SEC. 102. (a) Notwithstanding the Act of March 4, 1931 (46 Stat. 1530-1548), or any other provision of law, the following described lands, situated in Mono County, California, and comprising approximately 202.167 acres, are withdrawn from settlement, sale, location, or entry under all of the general land laws, including the mining laws: The southeast quarter of the southeast quarter of section 23, the west half of the northwest quarter of section 25, and the north half of the northeast quarter of section 26, all in township 5 south, range 32 east, Mount Diablo meridian, California.

(b) Notwithstanding the first section of the Act of March 4, 1931 (46 Stat. 1530, 1532), the withdrawal accomplished by said Act of March 4, 1931, of the lands described as the southwest quarter of section 34, township 5 south, range 33 east, Mount Diablo meridian, comprising approximately 160 acres, situated in Mono County, California, is hereby modified to the extent that the lands described in this subsection may be exchanged by the Secretary of the Interior in accordance with the directive contained in subsection (c) of this section.

(c) Notwithstanding any other provision of law, the Secretary of the Interior is hereby authorized to exchange the Federal lands described in subsection (b) of this section for the lands described in subsection (a) of this section, the title to the lands to be acquired by the United States to be satisfactory in all respects to the Secretary and to be conveyed by a good and sufficient deed, in recordable form, that is satisfactory to the Secretary.

TITLE II

SHORT TITLE

SEC. 201. This title may be cited as the "American Conservation Corps Act of 1982".

CONGRESSIONAL FINDINGS AND PURPOSE

SEC. 202. (a) FINDINGS.—The Congress finds that—

(1) public lands, resources, and facilities, including parks, rangelands, wildlife refuges, forests, water resources, fishery facilities, historic and cultural sites, and urban and community resources, have become subject to increasing public use and resource production demands;

(2) the condition of many of these lands, resources, and facilities has deteriorated as a result of these increasing uses and demands and as a result of the inability of Government agencies to adequately staff and fund the maintenance necessary to arrest the deterioration;

(3) public land management agencies have a responsibility to assure that public lands and resources are managed—

(A) to assure continued productivity,

(B) to protect public health and safety, and

(C) to assure their wise and economic conservation, maintenance, and use;

(4) a program designed to systematically guide and enhance the conservation, rehabilitation, and improvement of our public lands, resources, and facilities is urgently needed; and

(5) youth conservation programs have proven highly successful and cost effective in providing training and jobs for unemployed youth and in assisting land management agencies at all levels of government to reduce the backlog of neglected public land conservation, rehabilitation and improvement projects and to carry out other public land resource management work.

(b) PURPOSE.—It is the purpose of this title to—

(1) reduce the backlog of conservation, rehabilitation, and improvement work on the public lands, prevent the further deterioration of public lands and resources and facilities, conserve energy and restore and maintain community lands, resources, and facilities;

(2) establish an American Conservation Corps to carry out a program to improve, restore, maintain, and conserve public lands and resources in the most cost-effective manner;

(3) use such program to assist State and local governments in carrying out needed public land and resource conservation, rehabilitation, and improvement projects;

(4) provide for implementation of the program in such manner as will foster conservation and the wise use of natural and cultural resources through the establishment of working relationships among the Federal, State, and local governments, Indian tribes, and other public and private organizations; and

(5) use this program to increase (by training and other means) employment opportunities for young men and women especially those who are economically, socially, physically, or educationally disadvantaged and who may not otherwise be productively employed.

DEFINITIONS

SEC. 203. For purposes of this title:

(1) The term "Secretary" means the Secretary of the Interior, except where otherwise expressly provided.

(2) The terms "public lands" and "publicly owned lands" mean any lands and waters (or interest therein) owned or administered by the United States or by any agency or instrumentality of a State or local government.

(3) The term "program" means the public lands conservation, rehabilitation, and improvement program established under this Act.

(4) The term "program agency" means any Federal agency or instrumentality with responsibility for the management of any public or Indian lands, any State agency designated by the Governor to manage the program in that State, and the governing body of any Indian tribe.

(5) The term "Indian tribe" means any Indian tribe, band, nation, or other group which is recognized as an Indian tribe by the Secretary. Such term also includes any Native village corporation, regional corporation, and Native group established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1701 et seq.).

(6) The term "Indian" means a person who is a member of an Indian tribe.

(7) The term "Indian lands" means any real property owned by an Indian tribe, any real property held in trust by the United States for individual Indians or Indian tribes, and any real property held by individual Indians or Indian tribes which is subject to restrictions on alienation imposed by the United States.

(8) The term "employment security service" means the agency in each of the several States with responsibility for the administration of unemployment and employment

programs, and the oversight of local labor conditions.

(9) The term "chief administrator" means the head of any program agency as that term is defined in paragraph (4).

(10) The term "enrollee" means any individual enrolled in the American Conservation Corps in accordance with section 205.

(11) The term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, the Commonwealth of the Northern Mariana Islands, and the Trust Territories of the Pacific Islands.

PUBLIC LANDS CONSERVATION, REHABILITATION, AND IMPROVEMENT PROGRAM

SEC. 204. (a) ESTABLISHMENT AND ADMINISTRATION OF PROGRAM.—Not later than ninety days after the enactment of this Act, the Secretary, in cooperation with the Secretary of Agriculture and after consultation with the Secretary of Labor, shall establish and administer a public lands conservation, rehabilitation, and improvement program to carry out the purposes of this title. Under such program, the Secretary shall provide assistance to program agencies for the establishment and operation of residential and nonresidential American Conservation Corps centers and for the implementation by the American Conservation Corps of projects designed to carry out such purposes.

(b) PROJECTS INCLUDED.—The program established under this section may include, but shall not be limited to, projects such as—

(1) forestry, nursery, and silvicultural operations;

(2) wildlife habitat conservation, rehabilitation, and improvement;

(3) rangeland conservation, rehabilitation, and improvement;

(4) recreational area development, maintenance, and improvement;

(5) urban revitalization;

(6) historical and cultural site preservation and maintenance;

(7) fish culture and habitat maintenance and improvement and other fishery assistance;

(8) road and trail maintenance and improvement;

(9) erosion, flood, drought, and storm damage assistance and control;

(10) stream, lake, and waterfront harbor and port improvement, and pollution control;

(11) insect, disease, rodent, and fire prevention, and control;

(12) improvement of abandoned railroad bed and right-of-way;

(13) energy conservation projects and renewable resource enhancement;

(14) recovery of biomass from public lands, particularly forestlands; and

(15) reclamation and improvement of strip-mined lands.

(c) PREFERENCE FOR CERTAIN PROJECTS.—The program shall provide a preference for those projects which—

(1) will provide long-term benefits to the public;

(2) will provide meaningful work experience to the enrollee involved;

(3) will be labor intensive; and

(4) can be planned and initiated promptly.

(d) LIMITATION TO PUBLIC LANDS.—Projects to be carried out under the program shall be limited to projects on public lands or Indian lands except where a project involving other lands will provide a documented public benefit and reimbursement will be provided to the program agency for that portion of the total costs of the program which does not provide a public benefit. Notwithstanding any other provision of law, any reimbursement referred to in the preceding sentence shall be retained by the program agency and shall be used by the agency for purposes of carrying out other projects under the program.

(e) CONSISTENCY.—The Secretary and the chief administrators of other program agencies shall assure that projects selected under this title for conservation, rehabilitation, or improvement of any public lands are consistent with the provisions of law relating to the management and administration of such lands and with all other applicable provisions of law.

(f) CONSERVATION CENTERS.—(1) Each program agency may apply to the Secretary for approval of conservation centers to carry out projects under this title.

(2) Applications for approval of conservation centers shall be submitted to the Secretary in such manner as the Secretary may prescribe. Each application shall contain, in such detail as the Secretary deems necessary—

(A) a comprehensive description of the objectives and performance goals for the conservation center and a description of the types of projects to be carried out, including a description of the types and duration of training (including work experience) to be provided;

(B) a description of the facilities and equipment to be available for use in the center;

(C) an estimate of the number of enrollees and crew leaders necessary for the proposed projects, the length of time for which the services of such personnel will be required, and the services which will be required for their support;

(D) a plan for managing the conservation center, supplying the necessary equipment and material, and administering the payroll; and

(E) such other information as the Secretary shall prescribe.

(3) In approving conservation centers, the Secretary shall give due consideration to the cost and means of transportation available between the center and the homes of the enrollees who may be assigned to those centers. The location and type of conservation centers shall be selected in such manner as will increase the enrollment of economically, socially, physically, and educationally disadvantaged youths, and of youths from areas of high unemployment.

(g) LOCAL GOVERNMENT PARTICIPATION.—Any State carrying out a program under this title shall provide a mechanism under which local governments in the State may be approved by the State to participate in the program and to carry out projects in accordance with the requirements of this Act.

(h) AGREEMENTS.—Program agencies may enter into contracts and other appropriate arrangements with local government agencies and nonprofit organizations for the management of conservation centers under the program.

(i) JOINT PROJECTS.—The Secretary is authorized to develop jointly with the Secretary of Labor regulations designed to allow, where appropriate, joint projects in which activities supported by funds authorized under this title are coordinated with activities supported by funds authorized under employment and training statutes administered by the Department of Labor (including the Comprehensive Employment and Training Act and any successor statutes). Such regulations shall provide standards for approval of joint projects which meet both the purposes of this title and the purposes of such employment and training statutes under which funds are available to support the activities proposed for approval. Such regulations shall also establish a single mechanism for approval of joint projects developed at the State or local level.

ENROLLMENT, FUNDING, AND MANAGEMENT

SEC. 205. (a) ENROLLMENT IN PROGRAM.—(1) Enrollment in the American Conservation Corps shall be limited to individuals who, at the time of enrollment, are—

(A) unemployed;

(B) not less than sixteen or more than twenty-five years of age (except that programs limited to the months of June, July, and August may include individuals not less than fifteen years and not more than twenty-one years of age at the time of their enrollment); and

(C) citizens or lawful permanent residents of the United States or lawfully admitted alien parolees or refugees.

(2) Except in the case of a program limited to the months of June, July, and August, individuals who at the time of applying for enrollment have attained age sixteen but not attained age nineteen, and who are no longer enrolled in any secondary school shall not be enrolled unless they give adequate written assurances, under criteria to be established by the Secretary, that they did not leave school for the express purpose of enrolling.

(3) The selection of enrollees to serve in the American Conservation Corps in any conservation center shall be the responsibility of the chief administrator of the program agency. Enrollees shall be selected from those qualified persons who have—

(A) applied to, or been recruited by, the program agency, a State employment security service, a prime sponsor under the Comprehensive Employment and Training Act (or comparable entity under any successor statutes), community or community-based nonprofit organization, the sponsor of an Indian program, or the sponsor of a migrant or seasonal farmworker program; and

(B) been screened for eligibility and referred to the program agency by the State employment security service.

(4) In the recruitment and selection of enrollees, special consideration shall be given to both—

(A) economically, socially, physically, and educationally disadvantaged youths, and

(B) youths residing in areas, both rural and urban, which have substantial unemployment.

(5)(A) Except for a program limited to the months of June, July, and August, any qualified individual selected for enrollment may be enrolled for a period not to exceed twenty-four months. When the term of enrollment does not consist of one continuous twenty-four-month term, the total of shorter terms may not exceed twenty-four months.

(B) No individual may remain enrolled in the American Conservation Corps after that individual has attained the age of twenty-six.

(b) SERVICES, FACILITIES, SUPPLIES, ET CETERA.—The program agency shall provide such quarters, board, medical care, transportation, and other services, facilities, supplies, and equipment as the Secretary deems necessary for conservation centers. Whenever possible, the Secretary shall make arrangements with the Secretary of Defense to have such logistical support provided by a military installation near the proposed

center, including the provision of temporary tent centers where needed. The Secretary shall establish basic standards of health, nutrition, sanitation, and safety for all conservation centers, and shall assure that such standards are enforced.

(c) CONSERVATION CENTER MANAGEMENT.—Every conservation center shall have sufficient supervisory staff appointed by the chief administrator which may include enrollees who have displayed exceptional leadership qualities.

(d) FUNDING.—(1) The Secretary may award grants to, or enter into agreements with, program agencies for the funding and operation of conservation centers approved by the Secretary under this title.

(2) The Secretary shall not make any grant to, or enter into any agreement with any program agency for the funding of any conservation center under this title unless such agency certifies that projects carried out by the conservation center will not—

(A) result in the displacement of individuals currently employed by the program agency concerned (including partial displacement through reduction of nonovertime hours, wages, or employment benefits);

(B) result in the employment of any individual when any other person is in a layoff status from the same or substantially equivalent job within the jurisdiction of the program agency concerned; or

(C) impair existing contracts for services.

(3) Of the sums appropriated to carry out this title for any fiscal year—

(A) not less than 35 per centum shall be made available by the Secretary for expenditure by State program agencies;

(B) not less than 25 per centum shall be made available by the Secretary for expenditure pursuant to agreements with the Secretary of Agriculture;

(C) not less than 25 per centum shall be made available by the Secretary for expenditure by program agencies within the Department of the Interior;

(D) not less than 5 per centum shall be made available by the Secretary for expenditure by the governing bodies of participating Indian tribes; and

(E) the remaining amount shall be made available by the Secretary for expenditure by other Federal program agencies and for demonstration projects or projects of special merit carried out by any program agency or by any nonprofit organization or local government which is undertaking or proposing to undertake projects consistent with the purposes of this title.

10 per centum of the amount disbursed to State agencies under subparagraph (A) (or to local governments within the State where paragraph (4) applies) shall be divided equally among the States and 90 per centum of such amount shall be distributed among such States proportionately according to the total youth population of such States between the ages of fifteen and twenty-five (as determined on the basis of the most recent census). Any State receiving funds under subparagraph (A) for the operation of any conservation center shall be required to provide not less than 15 per centum of the cost of operation of such center. Any State receiving funds under subparagraph (A) for any fiscal year shall provide not less than 10 per centum of such funds to local governments approved by the State under section 4(g) to carry out projects under this Act unless no such local government in that State is approved before the end of such fiscal year. In any case where no such local government is approved before the end of such fiscal year, such 10 per centum may be expended by the State in accordance with this Act.

(4) If, at the commencement of any fiscal year, any State does not have a program agency designated by the Governor to manage the program in that State, then during such fiscal year each local government within such State may establish a program agency to carry out the program within the political subdivision which is under the jurisdiction of such local government. In any such case, the State share (or a reasonable portion thereof) for such State may be made available by the Secretary for expenditure by such local government program agencies to carry out the program within such political subdivisions. Such local government program agencies shall be in all respects subject to the same requirements as State program agencies. Where more than one local government within a State has established a program agency under this subsection, the Secretary shall allocate funds between such agencies in such manner as he deems equitable.

(5) Payments under grants under this section may be made in advance or by way of reimbursement and at such intervals and on such conditions as the Secretary finds necessary.

(6)(A) There is authorized to be appropriated to the Secretary for purposes of carrying out this title $50,000,000 for the fiscal year 1983, and the amount determined under subparagraph (B) for each of the fiscal years 1984 through 1989 from so much of the following amounts as would otherwise be credited to miscellaneous receipts in the Treasury—

(i) all franchise fees estimated to be collected for the fiscal year concerned by the Secretary and Secretary of Agriculture; and

(ii) all receipts estimated to be due and payable to the United States for the fiscal year concerned from (I) permit fees (including fees for special use permits) imposed by the Secretary or the Secretary of Agriculture, (II) sales of timber by the Secretary or the Secretary of Agriculture, and (III) leasing activities of the Secretary and the Secretary of Agriculture other than leasing activities under the Mineral Leasing Act of 1920 (30 U.S.C. 181 et seq.) or under the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351 et seq.).

Such sums shall remain available until expended. Appropriations under this section shall be made without fiscal year limitation.

(B) The amount authorized to be appropriated under subparagraph (A) for each of the fiscal years 1984 through 1989 shall be $250,000,000 plus a percentage increase for each fiscal year based upon the percentage increase in the Consumer Price Index published by the Bureau of Labor Statistics. The increase for each such fiscal year shall be a percentage of $250,000,000 (plus unappropriated balances). Such percentage for any fiscal year shall be equal to the percentage increase of—

(i) the Consumer Price Index for the last calendar year ending prior to such fiscal year, over

(ii) the Consumer Price Index for the calendar year 1982.

(7) No authority under this Act to enter into contracts or to make payments shall be effective except to the extent and in such amounts as provided in advance in appropriations Acts. Any provision of this Act which, directly or indirectly, authorizes the enactment of new budget authority shall be effective only for fiscal years beginning after September 30, 1982.

FEDERAL EMPLOYEE STATUS

SEC. 206. (a) IN GENERAL.—Except as otherwise specifically provided in the following paragraphs, enrollees and crew leaders shall not be deemed Federal employees and shall not be subject to the provisions of law relating to Federal employment:

(1) For purposes of the Internal Revenue Code of 1954 and title II of the Social Security Act, enrollees and crew leaders shall be deemed employees of the United States and any service performed by any person as an enrollee shall be deemed to be performed in the employ of the United States.

(2) For purposes of subchapter I of chapter 81 of title 5, United States Code, relating to the compensation of Federal employees for work injuries, enrollees and crew leaders shall be deemed civil employees of the United States within the meaning of the term "employee" as defined in section 8101 of title 5, United States Code, and the provisions of that subchapter shall apply, except—

(A) the term "performance of duty" shall not include any act of an enrollee member or crew leader while absent from his or her assigned post of duty, except while participating in an activity authorized by or under the direction and supervision of the Secretary or the conservation center supervisory staff (including an activity while on pass or during travel to or from such post of duty); and

(B) compensation for disability shall not begin to accrue until the day following the date on which the injured enrollee's or crew leader's employment is terminated.

(3) For purposes of chapter 171 of title 28, United States Code, relating to tort claims procedure, enrollees and crew leaders shall be deemed employees of the United States within the meaning of the term "employee of the Government" as defined in section 2671 of title 28, United States Code.

(4) For purposes of section 5911 of title 5, United States Code, relating to allowances for quarters, enrollees and crew leaders shall be deemed employees of the United States within the meaning of the term "employee" as defined in that section.

(b) AMENDMENT OF TITLE 5.—Section 8332(b) of title 5, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (11);

(2) by striking out the period at the end of paragraph (12) and inserting in lieu thereof "; and"; and

(3) by adding after paragraph (12) the following new paragraph:

"(13) service as an enrollee or crew leader only if the enrollee or crew leader in the American Conservation Corps later becomes subject to this subchapter.".

USE OF VOLUNTEERS

SEC. 207. (a) Where any program agency has authority to use volunteer services in carrying out functions of the agency, such agency may use volunteer services for purposes of assisting projects related to conservation centers established under this title and may expend funds made available for those purposes to the agency, including funds made available under this title, to provide for services or costs incidental to the utilization of such volunteers, including transportation, supplies, lodging, subsistence, recruiting, training, and supervision.

(b)(1) The Secretary may recruit, without regard to the civil service classification laws, rules or regulations, the services of individuals contributed without compensa-

tion as volunteers for aiding or in facilitating the activities administered by the Secretary through the Bureau of Land Management.

(2) In accepting such services, the Secretary—

(A) shall not permit the use of volunteers in hazardous duty or law enforcement work, or in policymaking processes or to displace any employee; and

(B) may provide for services or costs incidental to the utilization of volunteers, including transportation, supplies, lodging, subsistence, recruiting, training, and supervision.

(3) Volunteers under this subsection shall not be deemed employees of the United States except for the purposes of the tort claims provisions of title 28, United States Code, and subchapter I of chapter 81 of title 5, United States Code, relating to compensation for work injuries.

SPECIAL RESPONSIBILITIES OF THE SECRETARY

SEC. 208. (a) PAY.—The Secretary shall establish standards for—

(1) rates of pay for enrollees which shall be not less than the wage required by section 6(a)(1) of the Fair Labor Standards Act of 1938 (29 U.S.C. 206(a)(1));

(2) rates of pay for crew leaders which shall be at a wage comparable to the compensation in effect for grades GS-3 to GS-7; and

(3) reasonable hours and conditions of employment.

(b) COORDINATION.—The Secretary and the chief administrators of other program agencies carrying out programs under this Act shall coordinate the programs with related Federal, State, local, and private activities.

(c) MILITARY EXEMPTION STUDY.—The Secretary, in consultation with the Secretary of Defense, shall conduct a study to determine the feasibility and desirability of allowing enrollees who have completed a two-year enrollment in the program to be exempt from training and service under the Military Selective Service Act (50 U.S.C. App. 456). A report containing the results of the study shall be submitted to Congress not later than one year after the enactment of this Act.

EDUCATION, GUIDANCE, AND PLACEMENT

SEC. 209. (a) ACADEMIC CREDIT.—Whenever possible, the Secretary shall make arrangements for the award of academic credit by educational institutions and agencies to enrollees for competencies developed from work experience under this title.

(b) STUDY.—Program agencies may provide training and educational materials and services for enrollees and may enter into arrangements with academic institutions for academic study by enrollees during nonworking hours to upgrade literacy skills, obtain equivalency diplomas or college degrees, or enhance employable skills. Whenever possible, an enrollee seeking study or training not provided at his or her conservation center shall be offered assignment to a conservation center providing such study or training.

(c) CERTIFICATION.—The program agencies shall provide certification of the training skills acquired by enrollees who have participated in the program.

(d) GUIDANCE AND PLACEMENT.—The program agency shall provide such job guidance and placement information and assistance for enrollees as may be necessary. Such assistance shall be provided in coordination with appropriate State, local, and private agencies and organizations.

EVALUATION AND PILOT PROJECTS

SEC. 210. (a) RESEARCH AND EVALUATION.—The Secretary shall provide for research and evaluation to—

(1) determine costs and benefits, tangible and otherwise, of work performed under this title and of training and employable skills and other benefits gained by enrollees, and

(2) identify options for improving program productivity and youth benefits, including improved alternatives for: organization, subjects, sponsorship, and funding of work projects; recruitment and personnel policies; siting and functions of conservation centers; work and training regimes for youth of various origins and needs; and cooperative arrangements with programs, persons and institutions not covered under this Act.

(b) DEMONSTRATIONS.—The Secretary may authorize pilot or experimental projects to demonstrate or test new or alternative arrangements or subjects of work and training for programs under this title, which may include alternatives identified under subsection (a)(2).

ANNUAL REPORT

SEC. 211. The Secretary shall prepare and submit to the President and to the Congress at least once each year a report detailing the activities carried out under this Title. Such report shall be submitted not later than December 31 of each year following the date of enactment of this Act. The report shall describe (1) conservation work procedures, accomplishments and benefits; (2) the extent to which youth who are economically, socially, physically or educationally disadvantaged have been enrolled in and benefited by the program; (3) other youth benefits; and (4) problems and opportunities encountered in carrying out the Act which require attention. The Secretary shall include in such report such recommendations as he considers appropriate.

LABOR MARKET INFORMATION

SEC. 212. The Secretary of Labor shall make available to the Secretary and to any program agency under this title such labor market information as is appropriate for use in carrying out the purposes of this title.

EMPLOYEE APPEAL RIGHTS

SEC. 213. In the case of—

(1) the displacement of a Federal employee (including any partial displacement through reduction of nonovertime hours, wages or employment benefits), or the failure to reemploy an employee in a layoff status, contrary to a certification under section 205(d)(2) (A) or (B) of this Act, or

(2) the displacement of a Federal employee by reason of the use of one or more volunteers under section 207(b)(2)(A) of this Act,

such employee is entitled to appeal such action to the Merit Systems Protection Board under section 7701 of title 5, United States Code.

Mr. BAKER. Mr. President, I move to disagree to the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

U.S. SECRET SERVICE UNIFORMED DIVISION

Mr. BAKER. Mr. President, next I hope to discharge the Finance Committee from further consideration of H.R. 6254 if there is no objection by the minority.

Mr. ROBERT C. BYRD. Mr. President, I have no objection.

Mr. BAKER. Mr. President, I ask unanimous consent that the Finance Committee be discharged from further consideration of H.R. 6254, a bill to clarify the function of the U.S. Secret Service Uniform Division and ask for its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 6254) to amend title 3, United States Code, to clarify the function of the United States Secret Service Uniformed Division with respect to certain foreign diplomatic missions in the United States, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. MOYNIHAN. Mr. President, H.R. 6254, a bill to amend section 202(7)(C) of title 3, United States Code, to authorize increased reimbursements for local police protection at foreign diplomatic missions, has been discharged from the Committee on Finance and held at the desk. This matter has been cleared with the distinguished chairman and ranking minority member of the Finance Committee, is that not correct?

Mr. DOLE. The Senator from New York is correct.

Mr. MOYNIHAN. Mr. President, H.R. 6254 passed the House of Representatives this year on June 15. It was referred to the Finance Committee, which was surely an instance of misreferral. The underlying legislation, Public Law 94-196, was reported out of the Senate Public Works Committee in 1975. The two Senate bills introduced this year which are similar in purpose to H.R. 6254 were referred to the Committee on Environment and Public Works. That committee held hearings on S. 2845, and reported it favorably to the Senate. Does the distinguished chairman of the Finance Committee agree with my explanation of this jurisdictional issue?

Mr. DOLE. I agree with Senator MOYNIHAN that this legislation has always before been within the jurisdiction of the Public Works Committee.

Mr. MOYNIHAN. Mr. President, I thank the majority and minority leaders, and the distinguished chairmen of the Finance and Environment and Public Works Committees for helping expedite consideration of H.R. 6254. This legislation, which passed the House on June 15, is identical to S. 2845, which Senator D'AMATO and I introduced on August 17, and which the Committee on Environment and Public Works ordered reported by a vote of 15 to 0 on December 15. It will provide adequate reimbursement to the city of New York for the police protection provided diplomatic mis-

sions to the United Nations and to chiefs of state visiting the U.N.

It is important to note that this legislation provides reimbursement, and not a grant. In protecting U.N. missions and visiting dignitaries, the New York Police Department is carrying out a national obligation. It is the responsibility of the Government of the United States, under international convention and custom to protect diplomats within its borders and, specifically, to assure the safety of diplomats posted to the United Nations. That is an obligation our Government took on when it agreed to provide a site for the headquarters of the U.N.

It is also a matter of national concern because our protection of foreign diplomats in the United States is the basis of our insistence upon reciprocal security arrangements for our diplomats abroad. Our Ambassador to the United Nations, Jeane Kirkpatrick, this year told the House subcommittee that considered H.R. 6254:

> The need for protection of diplomats attached to the United Nations community has gone up rather dramatically in recent years and is likely to continue to go up * * * the most cost-effective means of providing protection is through the New York City Police.

I would note that, here in the District of Columbia, over 12 years ago we established a Federal police force to guard embassies and diplomats, relieving the local police force of the responsibility. We could do that in New York also, but the Secret Service estimates that to do so would cost approximately twice each year what H.R. 6254 would authorize in annual reimbursements to the city of New York.

Finally, I would say to my colleagues that this legislation is not a referendum on the United Nations, nor should it be. As a former Ambassador to the United Nations, I would eagerly engage in a discussion of the problematic nature of the United Nations and of our participation in it. But this matter of our protecting diplomats in New York so long as the United Nations is there is a separate matter entirely, and one of pressing national concern.

I commend to my colleagues the draft report of the Committee on Environment and Public Works which explains the provisions of S. 2854—and congruently, of H.R. 6254—in great detail. And I urge my colleagues to approve H.R. 6254 and clear it for the President's approval.

Mr. President, I thank the Chair and the majority leader and minority leader.

Mr. BAKER. I thank the Senator from New York.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 6254) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MOYNIHAN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TO CODIFY CERTAIN LAWS REGARDING TRANSPORTATION

Mr. BAKER. Mr. President, I am prepared now to ask to discharge the Judiciary Committee from further consideration of H.R. 6993 if there is no objection on the minority side.

Mr. ROBERT C. BYRD. There is no objection.

Mr. BAKER. Mr. President, then I ask unanimous consent that the Judiciary Committee be discharged from further consideration of H.R. 6993 making technical corrections of existing statutes, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. Mr. President, there is no objection to the immediate consideration of the measure.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

> A bill (H.R. 6993) to revise, codify, and enact without substantive change certain general and permanent laws related to transportation as subtitle I and chapter 31 of subtitle II of title 49, United States Code, "Transportation".

There being no objection, the Senate proceeded to consider the bill.

Mr. BAKER. Mr. President, I ask unanimous consent to have printed in the RECORD a letter from Senator THURMOND to me dated December 13, 1982.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON THE JUDICIARY,
Washington, D.C., December 13, 1982.

Hon. HOWARD H. BAKER, Jr.,
Office of the Majority Leader, U.S. Senate, Washington, D.C.

DEAR SENATOR BAKER: The Law Revision Counsel's Office has an ongoing codification and technical correction program for systematically codifying the non-codified titles of the United States Code and for making technical corrections to existing statutes. These efforts do not involve making substantive changes in the law.

It is anticipated that a bill of this type—H.R. 6993—will shortly be passed by the House on its suspension calendar. We have consulted with the Office of the Law Revision Counsel and understand no objection has been made to this bill by interested agencies or congressional committees. Indeed, there is general agreement that it is an improving non-substantive proposal that should be promptly passed by the Senate without amendment. It is important to pass this bill now so that the statutory changes may be included in the new edition of the United States Code to be published at the end of this Congress.

We request that you take the necessary steps to have H.R. 6993 held at the desk upon receipt from the House and passed by the Senate under Senate procedures for acting on legislation by unanimous consent.

If we can be of further assistance to you, please have your staff contact Paul Summitt (ext. 4-8055) or Kathy Zebrowski (ext. 4-5701).

With kindest regards and best wishes.

Sincerely,

STROM THURMOND,
Chairman.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 6993) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TO CODIFY RECENT LAWS RELATED TO MONEY AND FINANCE AND TO IMPROVE THE UNITED STATES CODE

Mr. BAKER. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of H.R. 7378, making technical corrections to existing statutes, and proceed to its consideration, if the minority leader is agreeable.

Mr. PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, there is no objection to the several requests.

Mr. BAKER. Mr. President, I ask unanimous consent, first, that the Committee on the Judiciary be discharged from further consideration of H.R. 7378, making technical corrections to existing statutes, and then I ask, Mr. President, that the Senate turn immediately to its consideration.

Mr. PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will state the bill by title.

The legislative clerk read as follows:

> A bill (H.R. 7378) to codify without substantive change recent laws related to money and finance and to improve the United States Code.

Mr. PRESIDING OFFICER. If there be no amendments, the question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TRIBALLY CONTROLLED COMMUNITY COLLEGE—CONFERENCE REPORT

Mr. BAKER. Mr. President, next is the conference report to accompany S. 2623, that I propose to consider at this time, if the minority leader is agreeable.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. There is no objection.

Mr. BAKER. Mr. President, I submit a report of the committee of conference on S. 2623 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2623) to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MODIFICATIONS TO LIMITATIONS RELATING TO BIOCHEMICAL OXYGEN DEMAND AND PH

Mr. BAKER. Mr. President, next I would propose to proceed to the consideration of Calendar Order 1020, H.R. 7159, if the minority leader finds that agreeable.

Mr. ROBERT C. BYRD. I have no objection.

The Senate proceeded to consider the bill (H.R. 7159) to amend the Federal Water Pollution Control Act to allow modifications of certain effluent limitations relating to biochemical oxygen demand and pH, which had been reported from the Committee on Environment and Public Works with an amendment:

On page 1, strike line 6, through and including line 9 on page 4, and insert the following:

"(m)(1) The Administrator, with the concurrence of the State, may issue a permit under section 402 which modifies the requirements of subsections (b)(1)(A) and (b)(2)(E) of this section, and of section 402, with respect to effluent limitations to the extent such limitations relate to biochemical oxygen demand and pH from discharges by an industrial discharger in such State into deep waters of the territorial seas, if the applicant demonstrates and the Administrator finds that—

"(A) the facility for which modification is sought is covered at the time of the enactment of this subsection by National Pollutant Discharge Elimination System permit number CA0005894 or CA0005282;

"(B) the energy and environmental costs of meeting such requirements of subsections (b)(1)(A) and (b)(2)(E) and section 403 exceed by an unreasonable amount the benefits to be obtained, including the objectives of this Act;

"(C) the applicant has established a system for monitoring the impact of such discharges on a representative sample of aquatic biota;

"(D) such modified requirements will not result in any additional requirements on any other point or nonpoint source;

"(E) there will be no new or substantially increased discharges from the point source of the pollutant to which the modification applies above that volume of discharge specified in the permit;

"(F) the discharge is into waters where there is strong tidal movement and other hydrological and geological characteristics which are necessary to allow compliance with this subsection and section 101(a)(2) of this Act;

"(G) the applicant accepts as a condition to the permit a contractural obligation to use funds in the amount required (but not to exceed $250,000 per year for ten years) for research and development of water pollution control technology, including but not limited to closed cycle technology;

"(H) the facts and circumstances present a unique situation which, if relief is granted, will not establish a precedent or the relaxation of the requirements of this Act applicable to similarly situated discharges; and

"(I) no owner or operator of a facility comparable to that of the applicant situated in the United States has demonstrated that it would be put at a competitive disadvantage to the applicant (or the parent company or any subsidiary thereof) as a result of the issuance of a permit under this subsection.

"(2) The effluent limitations established under a permit issued under paragraph (1) shall be sufficient to implement the applicable State water quality standards, to assure the protection of public water supplies and protection and propagation of a balanced, indigenous population of shellfish, fish, fauna, wildlife, and other aquatic organisms, and to allow recreational activities in and on the water. In setting such limitations, the Administrator shall take into account any seasonal variations and the need for an adequate margin of safety, considering the lack of essential knowledge concerning the relationship between effluent limitations and water quality and the lack of essential knowledge of the effects of discharges on beneficial uses of the receiving waters.

"(3) A permit under this subsection may be issued for a period not to exceed five years, and such a permit may be renewed for five additional periods not to exceed five years each upon a demonstration by the applicant and a finding by the Administrator at the time of application for any such renewal that the provisions of this subsection are met.

"(4) The Administrator may terminate a permit issued under this subsection if the Administrator determines that there has been a decline in ambient water quality of the receiving waters during the period of the permit even if a direct cause and effect relationship cannot be shown: *Provided*, That if the effluent from a source with a permit issued under this subsection is contributing to a decline in ambient water quality of the receiving waters, the Administrator shall terminate such permit.".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1571

Mr. BAKER. Mr. President, I send to the desk an amendment on behalf of the distinguished Senator from Washington (Mr. GORTON) and the distinguished Senator from Ohio (Mr. METZENBAUM).

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), for Mr. GORTON and Mr. METZENBAUM, proposes an unprinted amendment numbered 1571.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, line 20 strike "to exceed" and insert "less than" and on page 6, line 25 and page 6, line 1 strike "five additional periods not to exceed five years each" and insert "one additional period not to exceed five years."

Mr. GORTON. Mr. President, I would like to express my support for H.R. 7159, the Clausen bill. This bill is designed to provide a procedure, pursuant to which, the Administrator of the Environmental Protection Agency may grant a variance from the best practicable and best conventional treatment technology requirements of the Clean Water Act for two pulp mills located on the Samoa Peninsula, near Eureka in Humboldt County, Calif.

These mills are in a unique situation. They currently discharge their effluent into deep Pacific Ocean waters in an area with strong currents and turbulent into deep Pacific Ocean waters in an area with strong currents and turbulent conditions through separate

outfalls about a half-mile long. Those familiar with the area believe that these conditions make it possible to discharge into these waters without any resulting decline in water quality. I understand the concern of some of my colleagues that we not depart from the underlying principle of the Clean Water Act; that of requiring technology without regard to the quality of the receiving water. That principle has proven to be most effective in our effort to clean up the Nation's waters. I do not believe, however, that this bill, in its narrowly drawn form, will constitute a precedent for departing from that principle.

In this case, the treatment facilities which would be required to be constructed without this amendment to the act would cause considerable adverse impact on a sensitive plant and wildlife habitat and cause a degradation of air quality. Because of this, this bill has the support of the environmental community of the north coast of California. Mr. President, I ask that a letter in support of H.R. 7159 from the Northcoast Environmental Center be reprinted in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. GORTON. Mr. President, H.R. 7159 was amended by the Senate Environment and Public Works Committee in order to leave no doubt of its limited application and the fact that it is not to be considered as precedent for other mills or industries. I would like to thank the distinguished chairman of the committee, Senator STAFFORD, for his cooperation in crafting those amendments.

Finally, I would like to note that a part of any permit that might be issued under the provisions of this bill would be a commitment by the applicant to use up to $250,000 per year for period of 10 years for research and development into water pollution control processes. This is certainly a fair requirement to make of these mills and if it results in the development of a closed-cycle system for mills such as these, the benefit of the bill will be felt well beyond the local area of these mills.

EXHIBIT 1

THE NORTHCOAST ENVIRONMENTAL CENTER,
Arcata, Calif., December 3, 1982.

Re H.R. 7159.

GENTLEPERSONS: This letter is to indicate our support for H.R. 7159 which would prevent the creation of a larger environmental problem to solve one of less magnitude. The language of this measure represents a delicate balance and a local consensus amongst environmental and industrial interests on the north coast of California.

We would appreciate your support for this measure in its original form.

The Northcoast Environmental Center is a nonprofit educational organization established in 1971. Through our member organizations and through individual memberships the Center represents almost 4,000 people in the sparsely populated region of northwestern California.

The Center's member groups include Redwood Region Audubon Society, Six Rivers Branch—Friends of the Earth, the North Group of the Redwood Chapter of the Sierra Club, the North Coast Chapter of the California Native Plant Society, the North Coast Chapter of Friends of the River, the Redwood Alliance, the Arcata Community Recycling Center, the Humboldt Herbicide Task Force and the Hoopa Valley Business Council.

Thank you for your time and consideration in this matter.

Sincerely yours,

TIM MCKAY,
Coordinator.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (UP No. 1571) was agreed to.

The PRESIDING OFFICER. If there be no further amendment, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed, and the bill to be read a third time. The bill was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TO IMPROVE THE INTERNAL SECURITY OF THE UNITED STATES

Mr. BAKER. Mr. President, I ask unanimous consent now that the Judiciary Committee be discharged from further consideration of S. 1963, the foreign agents registration bill, and, Mr. President, I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. There is no objection to either request.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 1963) to improve the internal security of the United States by clarifying the notification requirements for foreign agents under section 951 of title 18, United States Code, and to increase the penalties for failure to notify.

The PRESIDING OFFICER. If there are no further amendments, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and to be read a third time, was read the third time, and passes as follows:

A bill to improve the internal security of the United States by clarifying the notification requirements for foreign agents under section 951 of title 18, United States Code, and to increase the penalties for failure to notify.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 951 of title 18, United States Code, is amended by—

(1) striking out "Secretary of State" and inserting in lieu thereof "Attorney General if required in subsection (b)";

(2) striking out "$5,000" and inserting in lieu thereof "$50,000"; and

(3) inserting "(a)" before "Whoever" and adding at the end of such subsection the following new subsections:

"(b) The Attorney General shall promulgate rules and regulations establishing requirements for notification. Such rules and regulations shall set forth a definition of 'agent of a foreign government'.

"(c) The Attorney General shall upon receipt, promptly transmit one copy of every notification statement filed hereunder to the Secretary of State for such comment and use as the Secretary of State may determine to be appropriate from the point of view of the foreign relations of the United States. Failure of the Attorney General to do so shall not be a bar to prosecution under this Act.".

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CERTAIN SERVICE OF PROCESS BY MAIL

Mr. BAKER. Now, Mr. President, I would now invite the attention of the minority leader to the fact that I am about to propose a unanimous-consent request to discharge the Committee on the Judiciary from further consideration of H.R. 7154 and then to proceed to its immediate consideration, if I can clear that for action by unanimous consent.

Mr. ROBERT C. BYRD. There is no objection to either request.

Mr. BAKER. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of H.R. 7154, a bill to amend the Federal rules of civil procedure and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (H.R. 7154) to amend the Federal Rules of Civil Procedure with respect to certain service of process by mail, and for other purposes.

The Senate proceeded to consider the bill.

UP AMENDMENT NO. 1572

(Purpose: To improve the internal security of the United States by clarifying the notification requirements for foreign agents under section 951 of title 18, United States Code, and to increase the penalties for failure to notify)

Mr. BAKER. Mr. President, I send to the desk an amendment on behalf of the distinguished Senator from Alabama (Mr. DENTON).

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), for Mr. DENTON, proposes and unprinted amendment numbered 1572.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end thereof add the following:

Section 951 of title 18, United States Code, is amended by—

(1) striking out "Secretary of State" and inserting in lieu thereof "Attorney General if required in subsection (b)";

(2) striking out "$5,000" and inserting in lieu thereof "$50,000"; and

(3) inserting "(a)" before "Whoever" and adding at the end of such subsection the following new subsections:

"(b) The Attorney General shall promulgate rules and regulations establishing requirements for notification.

"(c) The Attorney General shall, upon receipts, promptly transmit one copy of each notificaiton statement filed under this section to the Secretary of State for such comment and use as the Secretary of State may determine to be appropriate from the point of view of the foreign relations of the United States. Failure of the Attorney General to do so shall not be a bar to prosecution under this section.

"(d) For purposes of this section, the term 'agent of a foreign government' means an individual who agrees to operate within the United States subject to the direction or control of a foreign government or official, except that such term does not include—

"(1) a duly accredited diplomatic or consular officer of a foreign government, who is so recognized by the Department of State;

"(2) any officially and publicly acknowledged and sponsored official or representative of a foreign government;

"(3) any officially and publicly acknowleged and sponsored member of the staff of, or employee of, an officer, official, or representative described in paragraph (1) or (2), who is not a United States citizen; or

"(4) any person engaged in a legal commerical transaction.".

Mr. DENTON. Mr. President, today I have submitted an amendment to H.R. 7154 which will serve to clarify the notification procedures for nondiplomatic foreign agents and to transfer the responsibility for receiving such notifications from the Secretary of State to the Attorney General.

Mr. President, title 18, United States Code, section 951 [1] is an act which in its present form requires nondiplomatic agents of foreign governments to notify the Secretary of State prior to their acting within the United States, on behalf of the foreign government which they represent.

The problem is this: In all the years the State Department has had responsibility for receiving these notifications, and this dates back to June 15, 1917, the Agency has never promulgated regulations nor formalized the procedures for receiving notifications. The State Department's view seems to have been that this act often puts the Agency at odds with representatives of "client" states and, therefore, is an impediment to foreign relations.

The Notification Act which this bill seeks to amend in its present form covers all activity performed by nondiplomatic agents who represent only foreign governments. It does not cover those who represent multinational corporations, foreign individuals, or political factions. In its present form, it requires no disclosure other than the mere fact of intention to act.

Mr. President, I believe the importance of 18 U.S.C. 951 should be apparent when we consider that the Department of Justice frequently utilizes it in the prosecution of major espionage cases and has found it to be a useful adjunct, especially in cases where it is difficult to establish the national defense character of classified materials transmitted by a defendant.

In transferring responsibility for the administration of this statute from the Department of State to the Department of Justice, I believe we allow for the creation of a mechanism whereby the Department of Justice is afforded an opportunity to monitor the activities of those who file notifications and thereby become informed when the activities cross the threshold which would trigger the registration and disclosure requirements of the Foreign Agents Registration Act, which it now administers. I would also hasten to add that this bill imposes upon the Attorney General the duty to keep the Department of State informed regarding notifications received.

On May 12, 1982, the Subcommittee on Security and Terrorism, which I chair, held a hearing on S. 1963, the measure from which this bill is derived. At that hearing, representatives from both the Department of Justice and the Department of State endorsed and supported the transfer of responsibility for receiving the notification, from the Secretary of State to the Attorney General, as provided for in S. 1963 and in the measure I am introducing today.

Both Departments also recommended that Congress should define the term "agent of a foreign government." The measure I am introducing today contains such a definition which is based on a proposed definition sent to the subcommittee by the Department of Justice subsequent to the hearing.

Mr. President, it should also be noted that while the period of imprisonment for violation of this 10-year statute is adequate, in my view, the financial sanctions have not kept up with inflation; therefore, my bill would increase the financial penalty from $5,000 to $50,000.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (UP No. 1572) was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be offered, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TO RECOGNIZE THE ORGANIZATION KNOWN AS FORMER MEMBERS OF CONGRESS

Mr. BAKER. Mr. President, I am prepared next to go to H.R. 7423, if the minority leader has no objection.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. There is no objection.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 7423, recognizing an organization known as Former Members of Congress.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7423) to recognize the organization known as Former Members of Congress.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

---

[1] 18 U.S.C 951 (June 25, 1981, c. 645 62 stat. 743.) Whoever, other than a diplomatic or consular officer or attache, acts in the U.S. as an agent of a foreign goverment without prior notification to the Secretary of State shall be fined not more than $5,000 or imprisoned not more than 10 years, or both.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REDUCTION, SUSPENSION, AND EXTENSION OF CERTAIN DUTIES

Mr. BAKER. Now Mr. President, next I would inquire of the minority leader if he is prepared to consider H.R. 4566 at this time.

Mr. ROBERT C. BYRD. No objection.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 829, H.R. 4566.

Mr. METZENBAUM. Mr. President, is this the tariff bill? Reserving the right to object, and I do not intend to object, providing there is an understanding with the manager of the bill that: First, the reciprocity provision will be dropped from the bill, and second, that the bill when it comes back from the conference will not contain any provisions other than similar tariff provisions that may presently be in the House bill, and that absent that, the manager of the bill on the House side will not ask the House to approve the conference report. Is that understood by the manager of the bill?

Mr. DOLE. That is understood by the manager of the bill.

Mr. METZENBAUM. I have no objection.

The Senate proceeded to consider the bill (H.R. 4566) to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes, which had been reported from the Committee on Finance with an amendment:

TITLE I—TARIFF PROVISIONS

SUBTITLE A—IN GENERAL

SEC. 101. AMENDMENT OF TARIFF SCHEDULES.

Except as otherwise expressly provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, an item or other provision, the reference shall be considered to be made to an item or other provision of the Tariff Schedules of the United States (19 U.S.C. 1202).

SEC. 102. REDUCTION IN RATE OF DUTY ON DICOFOL.

(a) IN GENERAL.—Item 408.24 is amended by inserting "1,1-Bis(4-Chlorophenyl)-2,2,2-trichloroethanol (Dicofol);" immediately under "N'-(4-Chloro-o-tolyl)-N,N-dimethylformamidine;".

(b) CONFORMING AMENDMENT.—The chemical appendix is amended by striking out "115-32-2".

SEC. 103. SUSPENSION OF DUTY ON COPPER SCALE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"911.05	Copper scale (provided for in item 603.70, part 1, schedule 6).	Free	No change	On or before 12/31/85.".

SEC. 104. LIMITATION ON IMPORTS OF SEED POTATOES.

The superior heading to items 137.20 and 137.21 is amended by inserting ", and imported for use as seed" after "tags".

SEC. 105. REDUCTION IN DUTY ON CERTAIN TEXTURING MACHINES.

Subpart E of part 4 of schedule 6 is amended by inserting immediately after item 670.02 the following new item:

"670.03	Specially designed for stretch or heat-set texturing of continuous manmade fibers.	Free	.....	40% ad val.".

SEC. 106. TEMPORARY SUSPENSION OF DUTY ON SMALL TOYS.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.20	Articles provided for in parts 5D and 5E of schedule 7 (except balloons, marbles, dice, and die-cast vehicles), valued not over five cents per unit; and jewelry provided for in part 6A of schedule 7 (except parts), valued not over 1.6 cents per piece.	Free	No change	On or before 12/31/86.".

SEC. 107. TEMPORARY SUSPENSION OF DUTIES ON CERTAIN RED PEPPERS.

Item 903.60 of subpart B of part 1 of the Appendix is amended by striking out "6/30/81" and inserting in lieu thereof "6/30/85".

SEC. 108. 2-YEAR EXTENSION OF THE INTERNATIONAL SUGAR AGREEMENT.

Section 2 of the Act entitled "An Act providing for the implementation of the International Sugar Agreement, 1977, and for other purposes" (Public Law 96-236; 7 U.S.C. 3602) is amended by striking out "1983" and inserting in lieu thereof "1985".

SEC. 109. 1-YEAR EXTENSION OF THE INTERNATIONAL COFFEE AGREEMENT.

Section 2 of the International Coffee Agreement Act of 1980 (19 U.S.C. 1356k) is amended by striking out "October 1, 1982" and inserting in lieu thereof "October 1, 1983".

SEC. 110. ELIMINATION OF DUTY ON CASEIN BLANKS.

(a) IN GENERAL.—Subpart A of part 7 of schedule 7 is amended—

(1) by striking out "(item 745.40)" in headnote 2(b) of such subpart and inserting in lieu thereof "in the superior heading to items 745.41 and 745.42"; and

(2) by striking out item 745.40 and inserting in lieu thereof the following:

	"Button blanks and molds, and parts of buttons:			
745.41	Button blanks of casein.	Free	.....	45% ad val.
745.42	Other	24.2% ad val.	11.4% ad val.	45% ad val.".

(b) APPLICATION WITH OTHER PROVISIONS.—(1) The rate of duty in column numbered 1 for item 745.42 of the Tariff Schedules of the United States (19 U.S.C. 1202) (as added by subsection (a)(2)) shall be subject to any staged rate reductions for item 745.40 which were proclaimed by the President before the date of the enactment of this Act.

(2) Whenever the rate of duty specified in the column numbered 1 for such item 745.42 is reduced to the same level as the corresponding rate of duty specified in the column entitled "LDDC" for such item, or to a lower level, the rate of duty in the column entitled "LDDC" shall be deleted from such Schedules.

(3) For purposes of the Trade Act of 1974, the amendments made by this section (not including the rates of duty in column numbered 2 of the Tariff Schedules of the United States) shall be considered to be trade agreement obligations entered into and proclaimed under the Trade Act of 1974 of benefit to foreign countries or instrumentalities.

SEC. 111. TEMPORARY SUSPENSION OF DUTY ON CERTAIN FREIGHT CONTAINERS.

Subpart B of part I of the Appendix is amended by inserting in numerical sequence the following new item:

"911.80	Freight containers specially designed and equipped to facilitate the carriage of goods by one or more modes of transport without intermediate reloading, each having a gross mass rating of at least 40,000 pounds (provided for in item 640.30, part 3A, schedule 6).	Free	No change	On or before 12/31/86.".

SEC. 112. TEMPORARY SUSPENSION OF DUTY ON CERTAIN PHOTOGRAPHIC COUPLERS.

Items 907.10 and 907.12 of the Appendix are amended by striking out "6/30/82" and inserting in lieu thereof "9/30/85".

SEC. 113. TEMPORARY SUSPENSION OF DUTY ON CERTAIN BULK FRESH CARROTS.

Subpart B of part 1 of the Appendix is amended—

(1) by striking out headnote 2 and inserting in lieu thereof the following:

"2. For purposes of item 903.25—

"(a) the term 'culled carrots' refers to those carrots which fail to meet the requirements of the United States Department of Agriculture for carrots of grades 'U.S. No. 1' or 'U.S. No. 2' (See 7 CFR sections 2851.4141 and 2851.4142); and

"(b) the total quantity of carrots which may be entered under item 903.25 during the period specified in that item shall not exceed 20,000 tons."; and

(2) by inserting in numerical sequence the following new item:

"903.25	Culled carrots, fresh or chilled in immediate containers each holding more than 100 pounds (provided for in item 135.42, part 8A, schedule 1) if entered for consumption during the period from August 15 in any year, to the 15th day of the following February, inclusive.	Free	No change	On or before 6/30/85.".

SEC. 114. TEMPORARY SUSPENSION OF DUTY ON HATTERS' FUR.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"903.85	Fur, not on the skin, prepared for hatters' use, provided for in item 186.20.	Free	No change	On or before 12/31/85.".

SEC. 115. WATCHES.

(a) PRODUCTS OF INSULAR POSSESSIONS DEFINED.—Paragraph (a)(i) of headnote 3 of the General Headnotes and Rules of Interpretation is amended by striking out "(or more

than 70 percent of the total value with respect to watches and watch movements)".

(b) RATE OF DUTY ON WATCHES.—Headnote 6 of schedule 7, part 2, subpart E is amended—

(1) by striking out "paragraph (b)" in paragraph (a) and inserting in lieu thereof "paragraphs (b) through (h)"; and

(2) by striking out "an insular possession of the United States outside the customs territory of the United States" in paragraph (a), and inserting in lieu thereof "the Virgin Islands, Guam, and American Samoa (hereinafter referred to as the 'insular possessions')"; and

(3) by striking out paragraphs (b) through (d) and inserting in lieu thereof the following new paragraphs:

"(b) Watches and watch movements produced or manufactured in a United States insular possession which contain any foreign component may be admitted free of duty without regard to the value of the foreign materials such watches contain if they conform with the provisions of this headnote, but the total quantity of such articles entered free of duty shall not exceed the amounts established by or pursuant to paragraph (c) of this headnote.

"(c)(i) In calendar year 1983 the total quantity of such articles which may be entered free of duty shall not exceed 7,000,000 units.

"(ii) In subsequent calendar years, the Secretary of Commerce and the Secretary of the Interior (hereinafter referred to as the "Secretaries"), acting jointly, shall establish a limit on the quantity which may be entered free of duty during the calendar year, and shall consider whether such limit is in the best interest of the insular possessions and not inconsistent with domestic or international trade policy considerations. The quantity the Secretaries establish in any calendar year under this paragraph shall not—

"(I) exceed 10,000,000 units, or one-ninth of apparent domestic consumption (as determined by the International Trade Commission pursuant to paragraph (d) of this headnote), whichever is greater;

"(II) be decreased by more than 10 percent of the quantity established for the immediately preceding calendar year; and

"(III) be increased to more than 7,000,000 units, or by more than 20 percent of the quantity established for the immediately preceding calendar year, whichever is greater.

"(d) On or before April 1 of each calendar year (beginning with the first year in which watch imports from the United States insular possessions exceed 9,000,000 units), the International Trade Commission shall determine the apparent United States consumption of watches and watch movements (including solid state timepieces) during the preceding calendar year, shall report such determination to the Secretaries, and shall publish such determination in the Federal Register.

"(e)(i) In calendar year 1983, not more than 5,200,000 units of the total quantity of articles described in paragraph (d) which may be entered free of duty shall be the product of the Virgin Islands, not more than 1,200,000 units shall be the product of Guam, and not more than 600,000 units shall be the product of American Samoa.

"(ii) For calendar year 1984 and thereafter, the Secretaries may establish new territorial shares of the total amount which may be entered free of duty, taking into account the capacity of each territory to produce and ship its assigned amounts. A territory's share in any year shall not be reduced—

"(I) by more than 200,000 units in calendar year 1984 or 1985, and

"(II) by more than 500,000 units in calendar year 1986 or thereafter, except that no territorial share shall be established at less than 500,000 units.

"(f) The Secretaries, acting jointly, shall allocate the calendar year duty exemptions provided by paragraphs (b), (c), and (e) of this headnote on a fair and equitable basis among producers located in the insular possessions, and shall issue appropriate licenses therefor. Allocations made by the Secretaries shall be final. In making the allocations, the Secretaries shall consider the potential impact of territorial production on domestic production of like articles and shall establish allocation criteria (including minimum assembly requirements) that will reasonably maximize the net amount of direct economic benefits to the insular possessions.

"(g)(i) In the case of each calendar year beginning after December 31, 1982, and before January 1, 1995, the Secretaries, acting jointly, shall—

"(I) verify the wages paid by each producer to permanent residents of the insular possessions during the preceding calendar year, and

"(II) issue to each producer (not later than March 1 of such year) a certificate for the applicable amount.

"(ii) For purposes of subparagraph (i), except as provided in subparagraphs (iii) and (iv), the term 'applicable amount' means an amount equal to the sum of—

"(I) 90 percent of the producer's creditable wages on the assembly during the preceding calendar year of the first 300,000 units, plus

"(II) the applicable graduated declining percentage (determined each year by the Secretaries) of the producer's creditable wages on the assembly during the preceding calendar year of units in excess of 300,000 but not in excess of 750,000.

"(iii) The aggregate amount of all certificates which are issued during any calendar year shall not exceed an amount which bears the same ratio to $5,000,000 as—

"(I) the gross national product of the United States (as determined by the Secretary of Commerce) for the preceding calendar year, bears to—

"(II) the gross national product of the United States (as so determined) for 1982.

"(iv)(I) Subject to the provision of clause (II), if the amount of the certificates issued under subparagraph (i) would exceed the limit under subparagraph (iii), the applicable amount of each producer's certificate shall be reduced proportionately by the amount of such excess.

"(II) The applicable amount of any producer's certificate shall not be reduced below the amount determined under subparagraph (ii)(I), except that if the application of this clause would result in the aggregate amount of the certificates exceeding the limit under subparagraph (iii), the applicable amount of each producer's certificate shall again be reduced proportionately by the amount of the excess determined after application of this clause.

"(v) Any certificate issued under subparagraph (i) shall entitle the certificate holder to secure the refund of duties equal to the face value of the certificate on watches, watch movements (including solid state timepieces) and, with the exception of discrete cases, parts therefor imported into the customs territory of the United States by the certificate holder. Such refunds shall be made under regulations issued by the Treasury Department. Not more than 5 percent of such refunds may be retained as a reimbursement to the Customs Service for the administrative costs of making the refunds.

"(vi) Any certificate issued under subparagraph (i), or any portion thereof, shall be negotiable.

"(vii) Any certificate issued under subparagraph (i) shall expire 1 year from the date of issuance and may be applied against duties on imports of watches and watch movements the entry of which were made within 2 years prior to the date of issuance of the certificate.

"(viii) For purposes of determining the applicable amount of any producer's certificate to be issued during calendar year 1983, the greater of—

"(I) the producer's creditable wages for calendar year 1982, or

"(II) 60 percent of the producer's creditable wages for calendar year 1981,

shall be considered the creditable wages for calendar year 1982.

"(h) The Secretaries are authorized to issue such regulations, not inconsistent with the provisions of this headnote, as they determine necessary to carry out their respective duties under this headnote. Such regulations shall include minimum assembly requirements. Any duty-free entry determined not to have been made in accordance with applicable regulations shall be subject to the applicable civil remedies and criminal sanctions, and, in addition, the Secretaries may cancel or restrict the license or certificate of any manufacturer found in willful violation of the regulations.

SEC. 116. TEMPORARY SUSPENSION OF DUTY ON CAFFEINE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.18	Caffeine (provided for in item 437.02, part 3B, schedule 4).	6% ad val...	No change...	On or before 12/31/83.".

SEC. 117. TEMPORARY SUSPENSION OF DUTY ON SULFAPYRIDINE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.19	Sulfapyridine (provided for in item 411.28, part 1C, schedule 4).	Free.....	Free.....	On or before 12/31/85.".

SEC. 118. TEMPORARY REDUCTION OF DUTY ON SULFATHIAZOLE.

(a) IN GENERAL.—Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.22	Sulfathiazole (provided for in item 411.80).	14.6% ad val..	7¢ per lb. + 80% ad val..	On or before 12/31/82.".

(b) SPECIAL RATE FOR LEAST DEVELOPED DEVELOPING COUNTRIES.—During such time as item 907.22 (as added by subsection (a)) is in effect, the rate of duty on sulfathiazole that is a product of a least developed developing country shall be 8 percent ad valorem.

(c) PHASE-DOWN OF TEMPORARY RATE.—

(1) With respect to articles entered after December 31, 1982, and before January 1, 1984, item 907.22 is amended by striking out "14.6% ad val." and inserting in lieu thereof "13.3% ad val.", and by striking out "12/31/82" and inserting in lieu thereof "12/31/83".

(2) With respect to articles entered after December 31, 1983, and before January 1, 1985, item 907.22 is amended by striking out

"13.3% ad val." and inserting in lieu thereof "11.9% ad val.", and by striking out "12/31/83" and inserting in lieu thereof "12/31/84".

(3) With respect to articles entered after December 31, 1984, and before January 1, 1986, item 907.22 is amended by striking out "11.9% ad val." and inserting in lieu thereof "10.6% ad val.", and by striking out "12/31/85".

SEC. 119. FISH NETTING AND NETS.

Item 355.45 of subpart C of part 4 of schedule 3 is amended by striking out "21¢ per lb. + 30.6% ad. val." in duty rate column numbered 1 and inserting in lieu thereof "17% ad. val.".

SEC. 120. EFFECTIVE DATES.

(a) IN GENERAL.—The amendments made by this subtitle shall apply to articles entered on or after the date of the enactment of this Act.

(b) RETROACTIVE APPLICATION.—

(1) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 or any other provision of law, upon proper request filed with the customs officer concerned on or before the 90th day after the date of the enactment of this Act, the application of the amendments made by this Act to the entry of any article described in paragraph (2) or (3) shall be treated as provided in such paragraphs.

(2) SECTION 102.—In the case of the application of the amendments made by section 102 to any entry—

(A) which was made before the date of the enactment of this Act;

(B) which was unliquidated, or the liquidation of which was not final, on such date of enactment; and

(C) with respect to which there would have been less duty if the amendments made by section 102 applied to such entry;

such entry shall be liquidated as though such entry had been made on the date of the enactment of this Act.

(3) CERTAIN OTHER PROVISIONS.—In the case of the application of the amendments made by sections 105, 107, 112, and 119 to any entry—

(A) which was made after the applicable date and before the date of the enactment of this Act; and

(B) with respect to which there would have been no duty or a lesser duty if the amendments made by such sections applied to such entry;

such entry shall be liquidated or reliquidated as though such entry had been made on the date of the enactment of this Act.

(4) APPLICABLE DATE.—For purposes of paragraph (3), the term "applicable date" means—

(A) in the case of section 105, March 1, 1982,

(B) in the case of section 107, June 30, 1981,

(C) in the case of section 112, June 30, 1982, and

(D) in the case of section 119, December 31, 1981.

(c) ENTERED AND ENTRY DEFINED.—For purposes of this subtitle—

(1) the term "entered" means entered, or withdrawn from warehouse for consumption, in the customs territory of the United States; and

(2) the term "entry" includes any withdrawal from warehouse for consumption.

SUBTITLE B—IMPLEMENTATION OF NAIROBI PROTOCOL

SEC. 131. SHORT TITLE, ETC.

(a) SHORT TITLE.—This subtitle may be cited as the "Educational, Scientific, and Cultural Materials Importation Act of 1982".

(b) PURPOSE.—The purpose of this subtitle is to enable the United States to give effect to the Nairobi Protocol to the Florence Agreement on the Importation of Educational, Scientific, and Cultural Materials (opened for signature on March 1, 1977) with a view to contributing to the cause of peace through freer exchange of ideas and knowledge across national boundaries.

SEC. 132. BOOKS, PUBLICATIONS, AND DOCUMENTS.

Part 5 of schedule 2 is amended—

(1) by inserting, in numerical sequence, the following new item:

"270.90	Catalogs of films, recordings or other visual and auditory material of an educational, scientific, or cultural character.	Free		Free";

(2) by striking out items 273.45 through 273.55, and the superior heading thereto, and inserting in lieu thereof the following:

"273.52	Architectural engineering, industrial, or commercial drawings and plans, whether originals or reproductions.	Free		Free";

and

(3) by inserting immediately below the phrase "Printed not over 20 years at time of importation:" and above (and at the same hierarchical level as) "Lithographs on paper:" the following new item:

"274.55	Loose illustrations, reproduction proofs or reproduction films used for the production of books..	Free		Free".

SEC. 133. VISUAL AND AUDITORY MATERIALS.

(a) PHOTOGRAPHIC FILM.—Part 5 of schedule 2 is amended—

(1) by inserting the phrase "(including developed photographic film; photographic slides; transparencies; holograms for laser projection; and microfilm, microfiche, and similar articles)" immediately after "Photographs" in the superior heading to items 274.50 through 274.70, and

(2) by adding, in numerical sequence, the following new item:

"274.67	Developed photographic film; photographic slides; transparencies; holograms for laser projection; and microfilm, microfiche, and similar articles.	Free		Free".

(b) MOTION PICTURE FILMS.—Subpart G of part 2 of schedule 7 is amended—

(1) by striking out "724.05 and 724.10" in headnote 1 and inserting in lieu thereof "724.07 and 724.22",

(2) by striking out headnote 2,

(3) by striking out items 724.05 and 724.10, and the superior heading thereto, and inserting in lieu thereof the following:

"724.07	Motion-picture films in any form on which pictures, or sound and pictures, have been recorded, whether or not developed.	Free		Free",

(4) by striking out items 724.15 through 724.40 and inserting in lieu thereof the following new item:

"724.22	Sound recordings, combination sound and visual recordings, and magnetic recordings not provided for in the foregoing provisions of this subpart.	Free		Free",

and

(5) by striking out the rates of duty appearing in rate columns 1, LDDC, and 2 for item 724.12 and inserting "Free" in rate columns numbered 1 and 2.

(c) PATTERNS, MODELS, ETC.—Part 7 of schedule 8 is amended—

(1) by striking out headnote 1 and redesignating headnote 2 as headnote 1,

(2) by striking out item 870.30, and

(3) by inserting, in numerical sequence, the following new item:

"870.35	Patterns, models (except toy models) and wall charts of an educational, scientific or cultural character; mock-up or visualizations of abstract concepts such as molecular structures or mathematical formulae; materials for programed instruction; and kits containing printed materials and audio materials and visual materials or any combination of two or more of the foregoing.	Free		Free".

SEC. 134. TOOLS FOR SCIENTIFIC INSTRUMENTS OR APPARATUS.

Part 4 of schedule 8 is amended by adding, in numerical sequence, the following new item:

"851.67	Tools specially designed to be used for the maintenance, checking, gauging or repair of instruments or apparatus admitted under item 851.60.	Free		Free".

SEC. 135. ARTICLES FOR THE BLIND OR OTHER HANDICAPPED PERSONS.

(a) ELIMINATION OF DUTY.—Subpart D of part 2 of schedule 8 is amended by striking out items 825.00, 826.10, and 826.20.

(b) SPECIALLY DESIGNED ARTICLES.—Part 7 of schedule 8 is amended—

(1) by inserting, in numerical sequence, the following new items:

	"Articles specially designed or adapted for the use or benefit of the blind or other physically or mentally handicapped persons:			
	Articles for the blind:			
870.50	Books, music, and pamphlets, in raised print, used exclusively by or for them.	Free		Free
870.55	Braille tablets, cubarithms, and special apparatus, machines, presses, and types for their use or benefit exclusively.	Free		Free
870.60	Other	Free		Free";

and

(2) by adding the following new headnote:

"2. For the purposes of items 870.50, 870.55, and 870.60—

"(a) The term 'physically or mentally handicapped persons' includes any person suffering from a permanent or chronic physical or mental impairment which substantially limits one or more major life activities, such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

"(b) These items do not cover—

"(i) articles for acute or transient disability;

"(ii) spectacles, dentures, and cosmetic articles for individuals not substantially disabled;

"(iii) therapeutic and diagnostic articles; or

"(iv) medicine or drugs.".

(c) STATISTICAL INFORMATION.—The Secretary of the Treasury, in conjunction with the Secretary of Commerce, shall take such actions as are necessary to obtain adequate statistical information with respect to articles to which the amendments made by this section apply.

SEC. 136. AUTHORITY TO LIMIT CERTAIN DUTY-FREE TREATMENT ACCORDED UNDER THIS ACT.

(a) AUTHORITY TO LIMIT.—

(1) IN GENERAL.—In addition to any authority under section 201 of the Trade Act of 1974 (19 U.S.C. 2251), the President may proclaim changes in the Tariff Schedules of the United States (19 U.S.C. 1202) to narrow the scope of, or place conditions upon, the duty-free treatment accorded under section 134, section 135, or section 137(b) (insofar as section 137(b) relates to temporary duty-free treatment of articles covered by sections 134 and 135) with respect to any type of article the duty-free treatment of which—

(A) has significant adverse impact on a domestic industry (or portion thereof) manufacturing or producing a like or directly competitive article, and

(B) is not provided for in the Florence Agreement or the Nairobi Protocol.

(2) RATES WHICH ARE TO TAKE EFFECT IF DUTY-FREE TREATMENT ELIMINATED.—If the President eliminates any duty-free treatment under paragraph (1), the rate of duty thereafter applicable to any article which is—

(A) affected by such action, and

(B) imported from any source,

shall be the rate proclaimed by the President as the rate applicable to such article from such source (determined without regard to this subtitle).

(b) RESTORATION OF TREATMENT.—If the President determines that any duty-free treatment which is no longer in effect because of action taken under subsection (a) could be restored in whole or in part without a resumption of significant adverse impact on a domestic industry or portion thereof, the President may proclaim changes to the Appendix to the Tariff Schedules of the United States to resume such duty-free treatment.

(c) OPPORTUNITY TO PRESENT VIEWS.—Before taking an action authorized by subsection (a) or (b), the President shall afford an opportunity for interested Government agencies and private persons to present their views concerning the proposed action.

SEC. 137. EFFECTIVE DATE; TEMPORARY DUTY-FREE TREATMENT.

(a) IN GENERAL.—The amendments made by sections 132, 133, 134, and 135 shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after the date which the President proclaims as the date on which he ratifies the Nairobi Protocol to the Florence Agreement on the Importation of Educational, Scientific, and Cultural Materials.

(b) TEMPORARY DUTY-FREE TREATMENT.—

(1) ARTICLES FOR THE BLIND OR OTHER HANDICAPPED PERSONS.—Subject to the provisions of paragraph (3) and section 136, the President shall proclaim changes to the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) to implement the provisions of section 135 with respect to articles entered, or withdrawn from warehouse for consumption, during the two and one-half-year period beginning on the thirtieth day following the date of the enactment of this subtitle.

(2) OTHER ARTICLES.—Subject to the provisions of paragraph (3) and section 136, the President, if he deems such action to be in the interest of the United States, may proclaim further changes to the Appendix to the Tariff Schedules of the United States to implement any provision of section 132, 133, or 134 with respect to articles entered, or withdrawn from warehouse for consumption, during any period beginning on or after the thirtieth day following the date of the enactment of this subtitle and ending not later than two and one-half years after such beginning date.

(3) TIME PROVISIONS CEASE TO HAVE EFFECT.—If any temporary duty-free treatment accorded under paragraph (1) or (2) has not yet expired, such treatment shall cease to be effective on and after the date proclaimed by the President pursuant to subsection (a).

TITLE II—IMPLEMENTATION OF CONVENTION ON CULTURAL PROPERTY

SEC. 201. SHORT TITLE.

This title may be cited as the "Convention on Cultural Property Implementation Act".

SEC. 202. DEFINITIONS.

For purposes of this title—

(1) The term "agreement" includes any amendment to, or extension of, any agreement under this title that enters into force with respect to the United States.

(2) The term "archaeological or ethnological material of the State Party" means—

(A) any object of archaeological interest;

(B) any object of ethnological interest; or

(C) any fragment or part of any object referred to in subparagraph (A) or (B);

which was first discovered within, and is subject to export control by, the State Party. For purposes of this paragraph—

(i) no object may be considered to be an object of archaeological interest unless such object—

(I) is of cultural significance;

(II) is at least two hundred and fifty years old, and

(III) was normally discovered as a result of scientific excavation, clandestine or accidental digging, or exploration on land or under water; and

(ii) no object may be considered to be an object of ethnological interest unless such object is—

(I) the product of a tribal or nonindustrial society, and

(II) important to the cultural heritage of a people because of its distinctive characteristics, comparative rarity, or its contribution to the knowledge of the origins, development, or history of that people.

(3) The term "Committee" means the Cultural Property Advisory Committee established under section 206.

(4) The term "consignee" means a consignee as defined in section 483 of the Tariff Act of 1930 (19 U.S.C. 1483).

(5) The term "Convention" means the Convention on the means of prohibiting and preventing the illicit import, export, and transfer of ownership of cultural property adopted by the General Conference of the United Nations Educational, Scientific, and Cultural Organization at its sixteenth session.

(6) The term "cultural property" includes articles described in article 1 (a) through (k) of the Convention whether or not any such article is specifically designated as such by any State Party for the purposes of such article.

(7) The term "designated archaeological or ethnological material" means any archaeological or ethnological material of the State Party which—

(A) is—

(i) covered by an agreement under this title that enters into force with respect to the United States, or

(ii) subject to emergency action under section 204, and

(B) is listed by regulation under section 205.

(8) The term "Secretary" means the Secretary of the Treasury or his delegate.

(9) The term "State Party" means any nation which has ratified, accepted, or acceded to the Convention.

(10) The term "United States" includes the several States, the District of Columbia, and any territory or area the foreign relations for which the United States is responsible.

(11) The term "United States citizen" means—

(A) any individual who is a citizen or national of the United States;

(B) any corporation, partnership, association, or other legal entity organized or existing under the laws of the United States or any State; or

(C) any department, agency, or entity of the Federal Government or of any government of any State.

SEC. 203. AGREEMENTS TO IMPLEMENT ARTICLE 9 OF THE CONVENTION.

(a) AGREEMENT AUTHORITY.—

(1) IN GENERAL.—If the President determines, after request is made to the United States under article 9 of the Convention by any State Party—

(A) that the cultural patrimony of the State Party is in jeopardy from the pillage of archaeological or ethnological materials of the State Party;

(B) that the State Party has taken measures consistent with the Convention to protect its cultural patrimony;

(C) that—

(i) the application of the import restrictions set forth in section 207 with respect to archaeological or ethnological material of the State Party, if applied in concert with similar restrictions implemented, or to be implemented within a reasonable period of time, by those nations (whether or not State Parties) individually having a significant import trade in such material, would be of substantial benefit in deterring a serious situation of pillage, and

(ii) remedies less drastic than the application of the restrictions set forth in such section are not available; and

(D) that the application of the import restrictions set forth in section 207 in the particular circumstances is consistent with the general interest of the international community in the interchange of cultural property among nations for scientific, cultural, and educational purposes;

the President may, subject to the provisions of this title, take the actions described in paragraph (2).

(2) AUTHORITY OF PRESIDENT.—For purposes of paragraph (1), the President may enter into—

(A) a bilateral agreement with the State Party to apply the import restrictions set forth in section 207 to the archaeological or ethnological material of the State Party the pillage of which is creating the jeopardy to the cultural patrimony of the State Party found to exist under paragraph (1)(A); or

(B) a multilateral agreement with the State Party and with one or more other na-

tions (whether or not a State Party) under which the United States will apply such restrictions, and the other nations will apply similar restrictions, with respect to such material.

(3) REQUESTS.—A request made to the United States under article 9 of the Convention by a State Party must be accompanied by a written statement of the facts known to the State Party that relate to those matters with respect to which determinations must be made under subparagraphs (A) through (D) of paragraph (1).

(4) IMPLEMENTATION.—In implementing this subsection, the President should endeavor to obtain the commitment of the State Party concerned to permit the exchange of its archaeological and ethnological materials under circumstances in which such exchange does not jeopardize its cultural patrimony.

(b) EFFECTIVE PERIOD.—The President may not enter into any agreement under subsection (a) which has an effective period beyond the close of the five-year period beginning on the date on which such agreement enters into force with respect to the United States.

(c) RESTRICTIONS ON ENTERING INTO AGREEMENTS.—

(1) IN GENERAL.—The President may not enter into a bilateral or multilateral agreement authorized by subsection (a) unless the application of the import restrictions set forth in section 207 with respect to archaeological or ethnological material of the State Party making a request to the United States under article 9 of the Convention will be applied in concert with similar restrictions implemented, or to be implemented, by those nations (whether or not State Parties) individually having a significant import trade in such material.

(2) EXCEPTION TO RESTRICTIONS.—Notwithstanding paragraph (1), the President may enter into an agreement if he determines that a nation individually having a significant import trade in such material is not implementing, or is not likely to implement, similar restrictions, but—

(A) such restrictions are not essential to deter a serious situation of pillage, and

(B) the application of the import restrictions set forth in section 207 in concert with similar restrictions implemented, or to be implemented, by other nations (whether or not State Parties) individually having a significant import trade in such material would be of substantial benefit in deterring a serious situation of pillage.

(d) SUSPENSION OF IMPORT RESTRICTIONS UNDER AGREEMENTS.—If, after an agreement enters into force with respect to the United States, the President determines that a number of parties to the agreement (other than parties described in subsection (c)(2)) having significant import trade in the archaeological and ethnological material covered by the agreement—

(1) have not implemented within a reasonable period of time import restrictions that are similar to those set forth in section 207, or

(2) are not implementing such restrictions satisfactorily with the result that no substantial benefit in deterring a serious situation of pillage in the State Party concerned is being obtained,

the President shall suspend the implementation of the import restrictions under section 207 until such time as the nations take appropriate corrective action.

(e) EXTENSION OF AGREEMENTS.—The President may extend any agreement that enters into force with respect to the United States for additional periods of not more than five years each if the President determines that—

(1) the factors referred to in subsection (a)(1) which justified the entering into of the agreement still pertain, and

(2) no cause for suspension under subsection (d) exists.

(f) PROCEDURES.—If any request described in subsection (a) is made by a State Party, or if the President proposes to extend any agreement under subsection (e), the President shall—

(1) publish notification of the request or proposal in the Federal Register;

(2) submit to the Committee such information regarding the request or proposal (including, if applicable, information from the State Party with respect to the implementation of emergency action under section 204) as is appropriate to enable the Committee to carry out its duties under section 206(f); and

(3) consider, in taking action on the request or proposal, the views and recommendations contained in any Committee report—

(A) required under section 206(f) (1) or (2), and

(B) submitted to the President before the close of the one-hundred-and-fifty-day period beginning on the day on which the President submitted information on the request or proposal to the Committee under paragraph (2).

(g) INFORMATION ON PRESIDENTIAL ACTION.—

(1) IN GENERAL.—In any case in which the President—

(A) enters into or extends an agreement pursuant to subsection (a) or (e), or

(B) applies import restrictions under section 204,

the President shall, promptly after taking such action, submit a report to the Congress.

(2) REPORT.—The report under paragraph (1) shall contain—

(A) a description of such action (including the text of any agreement entered into),

(B) the differences (if any) between such action and the views and recommendations contained in any Committee report which the President was required to consider, and

(C) the reasons for any such difference.

(3) INFORMATION RELATING TO COMMITTEE RECOMMENDATIONS.— If any Committee report required to be considered by the President recommends that an agreement be entered into, but no such agreement is entered into, the President shall submit to the Congress a report which contains the reasons why such agreement was not entered into.

SEC. 204. EMERGENCY IMPLEMENTATION OF IMPORT RESTRICTIONS.

(a) EMERGENCY CONDITION DEFINED.—For purposes of this section, the term "emergency condition" means, with respect to any archaeological or ethnological material of any State Party, that such material is—

(1) a newly discovered type of material which is of importance for the understanding of the history of mankind and is in jeopardy from pillage, dismantling, dispersal, or fragmentation;

(2) identifiable as coming from any site recognized to be of high cultural significance if such site is in jeopardy from pillage, dismantling, dispersal, or fragmentation which is, or threatens to be, of crisis proportions; or

(3) a part of the remains of a particular culture or civilization, the record of which is in jeopardy from pillage, dismantling, dispersal, or fragmentation which is, or threatens to be, of crisis proportions;

and application of the import restrictions set forth in section 207 on a temporary basis would, in whole or in part, reduce the incentive for such pillage, dismantling, dispersal, or fragmentation.

(b) PRESIDENTIAL ACTION.—Subject to subsection (c), if the President determines that an emergency condition applies with respect to any archaeological or ethnological material of any State Party, the President may apply the import restrictions set forth in section 207 with respect to such material.

(c) LIMITATIONS.—

(1) The President may not implement this section with respect to the archaeological or ethnological materials of any State Party unless the State Party has made a request described in section 203(a) to the United States and has supplied information which supports a determination that an emergency condition exists.

(2) In taking action under subsection (b) with respect to any State Party, the President shall consider the views and recommendations contained in the Committee report required under section 206(f)(3) if the report is submitted to the President before the close of the ninety-day period beginning on the day on which the President submitted information to the Committee under section 203(f)(2) on the request of the State Party under section 203(a).

(3) No import restrictions set forth in section 207 may be applied under this section to the archaeological or ethnological materials of any State Party for more than five years after the date on which the request of a State Party under section 203(a) is made to the United States. This period may be extended by the President for three more years if the President determines that the emergency condition continues to apply with respect to the archaeological or ethnological material. However, before taking such action, the President shall request and consider, if received within ninety days, a report of the Committee setting forth its recommendations, together with the reasons therefor, as to whether such import restrictions shall be extended.

(4) The import restrictions under this section may continue to apply in whole or in part, if before their expiration under paragraph (3), there has entered into force with respect to the archaeological or ethnological materials an agreement under section 203 or an agreement with a State Party to which the Senate has given its advice and consent to ratification. Such import restrictions may continue to apply for the duration of the agreement.

SEC. 205. DESIGNATION OF MATERIALS COVERED BY AGREEMENTS OR EMERGENCY ACTIONS.

After any agreement enters into force under section 203, or emergency action is taken under section 204, the Secretary, after consultation with the Director of the United States Information Agency, shall by regulation promulgate (and when appropriate shall revise) a list of the archaeological or ethnological material of the State Party covered by the agreement or by such action. The Secretary may list such material by type or other appropriate classification, but each listing made under this section shall be sufficiently specific and precise to insure that (1) the import restrictions under section 207 are applied only to the archaeological and ethnological material covered by the agreement or emergency action; and (2) fair notice is given to importers and other persons as to what material is subject to such restrictions.

SEC. 206. CULTURAL PROPERTY ADVISORY COMMITTEE.

(a) ESTABLISHMENT.—There is established the Cultural Property Advisory Committee.

(b) MEMBERSHIP.—

(1) The Committee shall be composed of eleven members appointed by the President as follows:

(A) Two members representing the interests of museums.

(B) Three members who shall be experts in the fields of archaeology, anthropology, ethnology, or related areas.

(C) Three members who shall be experts in the international sale of archaeological, ethnological, and other cultural property.

(D) Three members who shall represent the interest of the general public.

(2) Appointments made under paragraph (1) shall be made in such a manner so as to insure—

(A) fair representation of the various interests of the public sectors and the private sectors in the international exchange of archaeological and ethnological materials, and

(B) that within such sectors, fair representation is accorded to the interests of regional and local institutions and museums.

(3)(A) Members of the Committee shall be appointed for terms of two years and may be reappointed for 1 or more terms.

(B) A vacancy in the Commission shall be filled in the same manner in which the original appointment was made.

(c) EXPENSES.—The members of the Committee shall be reimbursed for actual expenses incurred in the performance of duties for the Committee.

(d) TRANSACTION OF BUSINESS.—Six of the members of the Committee shall constitute a quorum. All decisions of the Committee shall be by majority vote of the members present and voting.

(e) STAFF AND ADMINISTRATION.—

(1) The Director of the United States Information Agency shall make available to the Committee such administrative and technical support services and assistance as it may reasonably require to carry out its activities. Upon the request of the Committee, the head of any other Federal agency may detail to the Committee, on a reimbursable basis, any of the personnel of such agency to assist the Committee in carrying out its functions, and provide such information and assistance as the Committee may reasonably require to carry out its activities.

(2) The Committee shall meet at the call of the Director of the United States Information Agency, or when a majority of its members request a meeting in writing.

(f) REPORTS BY COMMITTEE.—

(1) The Committee shall, with respect to each request of a State Party referred to in section 203(a), undertake an investigation and review with respect to matters referred to in section 203(a)(1) as they relate to the Staie Party or the request and shall prepare a report setting forth—

(A) the results of such investigation and review;

(B) its findings as to the nations individually having a significant import trade in the relevant material; and

(C) its recommendation, together with the reasons therefor, as to whether an agreement should be entered into under section 203(a) with respect to the State Party.

(2) The Committee shall, with respect to each agreement proposed to be extended by the President under section 203(e), prepare a report setting forth its recommendations together with the reasons therefor, as to whether or not the agreement should be extended.

(3) The Committee shall in each case in which the Committee finds that an emergency condition under section 204 exists prepare a report setting forth its recommendations, together with the reasons therefor, as to whether emergency action under section 204 should be implemented. If any State Party indicates in its request under section 203(a) that an emergency condition exists and the Committee finds that such a condition does not exist, the Committee shall prepare a report setting forth the reasons for such finding.

(4) Any report prepared by the Committee which recommends the entering into or the extension of any agreement under section 203 or the implementation of emergency action under section 204 shall set forth—

(A) such terms and conditions which it considers necessary and appropriate to include within such agreement, or apply with respect to such implementation, for purposes of carrying out the intent of the Convention; and

(B) such archaeological or ethnological material of the State Party, specified by type or such other classification as the Committee deems appropriate, which should be covered by such agreement or action.

(5) If any member of the Committee disagrees with respect to any matter in any report prepared under this subsection, such member may prepare a statement setting forth the reasons for such disagreement and such statement shall be appended to, and considered a part of, the report.

(6) The Committee shall submit to the Congress and the President a copy of each report prepared by it under this subsection.

(g) COMMITTEE REVIEW.—

(1) IN GENERAL.—The Committee shall undertake a continuing review of the effectiveness of agreements under section 203 that have entered into force with respect to the United States, and of emergency action implemented under section 204.

(2) ACTION BY COMMITTEE.—If the Committee finds, as a result of such review, that—

(A) cause exists for suspending, under section 203(d), the import restrictions imposed under an agreement;

(B) any agreement or emergency action is not achieving the purposes for which entered into or implemented; or

(C) changes are required to this title in order to implement fully the obligations of the United States under the Convention;

the Committee may submit a report to the Congress and the President setting forth its recommendations for suspending such import restrictions or for improving the effectiveness of any such agreement or emergency action or this title.

(h) FEDERAL ADVISORY COMMITTEE ACT.—The provisions of the Federal Advisory Committee Act (Public Law 92-463; 5 U.S.C. Appendix I) shall apply to the Committee except that the requirements of subsections (a) and (b) of section 10 and section 11 of such Act (relating to open meetings, public notice, public participation, and public availability of documents) shall not apply to the Committee, whenever and to the extent it is determined by the President or his designee that the disclosure of matters involved in the Committee's proceedings would compromise the Government's negotiating objectives or bargaining positions on the negotiation of any agreement authorized by this title.

(i) CONFIDENTIAL INFORMATION.—

(1) IN GENERAL.—Any information (including trade secrets and commercial or financial information which is privileged or confidential) submitted in confidence by the private sector to officers or employees of the United States or to the Committee in connection with the responsibilities of the Committee shall not be disclosed to any person other than to—

(A) officers and employees of the United States designated by the Director of the United States Information Agency;

(B) members of the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate who are designated by the chairman of either such Committee and members of the staff of either such Committee designated by the chairman for use in connection with negotiation of agreements or other activities authorized by this title; and

(C) the Committee established under this title.

(2) GOVERNMENTAL INFORMATION.—Information submitted in confidence by officers or employees of the United States to the Committee shall not be disclosed other than in accordance with rules issued by the Director of the United States Information Agency, after consultation with the Committee. Such rules shall define the categories of information which require restricted or confidential handling by such Committee considering the extent to which public disclosure of such information can reasonably be expected to prejudice the interests of the United States. Such rules shall, to the maximum extent feasible, permit meaningful consultations by Committee members with persons affected by proposed agreements authorized by this title.

(j) NO AUTHORITY TO NEGOTIATE.—Nothing contained in this section shall be construed to authorize or to permit any individual (not otherwise authorized or permitted) to participate directly in any negotiation of any agreement authorized by this title.

SEC. 207. IMPORT RESTRICTIONS.

(a) DOCUMENTATION OF LAWFUL EXPORTATION.—No designated archaeological or ethnological material that is exported (whether or not such exportation is to the United States) from the State Party after the designation of such material under section 205 may be imported into the United States unless the State Party issues a certification or other documentation which certifies that such exportation was not in violation of the laws of the State Party.

(b) CUSTOMS ACTION IN ABSENCE OF DOCUMENTATION.—If the consignee of any designated archaeological or ethnological material is unable to present to the customs officer concerned at the time of making entry of such material—

(1) the certificate or other documentation of the State Party required under subsection (a); or

(2) satisfactory evidence that such material was exported from the State Party—

(A) not less than ten years before the date of such entry and that neither the person for whose account the material is imported (or any related person) contracted for or acquired an interest, directly or indirectly, in such material more than one year before that date of entry, or

(B) on or before the date on which such material was designated under section 205,

the customs officer concerned shall refuse to release the material from customs custody and send it to a bonded warehouse or store to be held at the risk and expense of the consignee, notwithstanding any other provision of law, until such documentation or evidence is filed with such officer. If such docu-

mentation or evidence is not presented within ninety days after the date on which such material is refused release from customs custody, or such longer period as may be allowed by the Secretary for good cause shown, the material shall be subject to seizure and forfeiture. The presentation of such documentation or evidence shall not bar subsequent action under section 210.

(c) DEFINITION OF SATISFACTORY EVIDENCE.—The term "satisfactory evidence" means—

(1) for purposes of subsection (b)(2)(A)—

(A) one or more declarations under oath by the importer, or the person for whose account the material is imported, stating that, to the best of his knowledge—

(i) the material was exported from the State Party not less than ten years before the date of entry into the United States, and

(ii) neither such importer or person (or any related person) contracted for or acquired an interest, directly or indirectly, in such material more than one year before the date of entry of the material; and

(B) a statement provided by the consignor, or person who sold the material to the importer, which states the date, or, if not known, his belief, that the material was exported from the State Party not less than ten years before the date of entry into the United States, and the reasons on which the statement is based; and

(2) for purposes of subsection (b)(2)(B)—

(A) one or more declarations under oath by the importer or the person for whose account the material is to be imported, stating that, to the best of his knowledge, the material was exported from the State Party on or before the date such material was designated under section 205, and

(B) a statement by the consignor or person who sold the material to the importer which states the date, or if not known, his belief, that the material was exported from the State Party on or before the date such material was designated under section 205, and the reasons on which the statement is based.

(d) RELATED PERSONS.—For purposes of subsections (b) and (c), a person shall be treated as a related person to an importer, or to a person for whose account material is imported, if such person—

(1) is a member of the same family as the importer or person of account, including, but not limited to, membership as a brother or sister (whether by whole or half blood), spouse, ancestor, or lineal descendant;

(2) is a partner or associate with the importer or person of account in any partnership, association, or other venture; or

(3) is a corporation or other legal entity in which the importer or person of account directly or indirectly owns, controls, or holds power to vote 20 percent or more of the outstanding voting stock or shares in the entity.

SEC. 208. STOLEN CULTURAL PROPERTY.

No article of cultural property documented as appertaining to the inventory of a museum or religious or secular public monument or similar institution in any State Party which is stolen from such institution after the effective date of this title, or after the date of entry into force of the Convention for the State Party, whichever date is later, may be imported into the United States.

SEC. 209. TEMPORARY DISPOSITION OF MATERIALS AND ARTICLES SUBJECT TO TITLE.

Pending a final determination as to whether any archaeological or ethnological material, or any article of cultural property, has been imported into the United States in violation of section 207 or section 208, the Secretary shall, upon application by any museum or other cultural or scientific institution in the United States which is open to the public, permit such material or article to be retained at such institution if he finds that—

(1) sufficient safeguards will be taken by the institution for the protection of such material or article; and

(2) sufficient bond is posted by the institution to ensure its return to the Secretary.

SEC. 210. SEIZURE AND FORFEITURE.

(a) IN GENERAL.—Any designated archaeological or ethnological material or article of cultural property, as the case may be, which is imported into the United States in violation of section 207 or section 208 shall be subject to seizure and forfeiture. All provisions of law relating to seizure, forfeiture, and condemnation for violation of the customs laws shall apply to seizures and forfeitures incurred, or alleged to have been incurred, under this title, insofar as such provisions of law are applicable to, and not inconsistent with, the provisions of this title.

(b) ARCHAEOLOGICAL AND ETHNOLOGICAL MATERIAL.—Any designated archaeological or ethnological material which is imported into the United States in violation of section 207 and which is forfeited to the United States under this title shall—

(1) first be offered for return to the State Party;

(2) if not returned to the State Party, be returned to a claimant with respect to whom the material was forfeited if that claimant establishes—

(A) valid title to the material,

(B) that the claimant is a bona fide purchaser for value of the material; or

(3) if not returned to the State Party under paragraph (1) or to a claimant under paragraph (2), be disposed of in the manner prescribed by law for articles forfeited for violation of the customs laws.

No return of material may be made under paragraph (1) or (2) unless the State Party or claimant, as the case may be, bears the expenses incurred incident to the return and delivery, and complies with such other requirements relating to the return as the Secretary shall prescribe.

(c) ARTICLES OF CULTURAL PROPERTY.—

(1) In any action for forfeiture under this section regarding an article of cultural property imported into the United States in violation of section 208, if the claimant establishes valid title to the article, under applicable law, as against the institution from which the article was stolen, forfeiture shall not be decreed unless the State Party to which the article is to be returned pays the claimant just compensation for the article. In any action for forfeiture under this section where the claimant does not establish such title but establishes that it purchased the article for value without knowledge or reason to believe it was stolen, forfeiture shall not be decreed unless—

(A) the State Party to which the article is to be returned pays the claimant an amount equal to the amount which the claimant paid for the article, or

(B) the United States establishes that such State Party, as a matter of law or reciprocity, would in similar circumstances recover and return an article stolen from an institution in the United States without requiring the payment of compensation.

(2) Any article of cultural property which is imported into the United States in violation of section 208 and which is forfeited to the United States under this title shall—

(A) first be offered for return to the State Party in whose territory is situated the institution referred to in section 208 and shall be returned if that State Party bears the expenses incident to such return and delivery and complies with such other requirements relating to the return as the Secretary prescribes; or

(B) if not returned to such State Party, be disposed of in the manner prescribed by law for articles forfeited for violation of the customs laws.

SEC. 211. EVIDENTIARY REQUIREMENTS.

Notwithstanding the provisions of section 615 of the Tariff Act of 1930 (19 U.S.C. 1615), in any forfeiture proceeding brought under this title in which the material or article, as the case may be, is claimed by any person, the United States shall establish—

(1) in the case of any material subject to the provisions of section 207, that the material has been listed by the Secretary in accordance with section 205; and

(2) in the case of any article subject to section 208, that the article—

(A) is documented as appertaining to the inventory of a museum or religious or secular public monument or similar institution in a State Party, and

(B) was stolen from such institution after the effective date of this title, or after the date of entry into force of the Convention for the State Party concerned, whichever date is later.

SEC. 212. CERTAIN MATERIAL AND ARTICLES EXEMPT FROM TITLE.

The provisions of this title shall not apply to—

(1) any archaeological or ethnological material or any article of cultural property which is imported into the United States for temporary exhibition or display if such material or article is immune from seizure under judicial process pursuant to the Act entitled "An Act to render immune from seizure under judicial process certain objects of cultural significance imported into the United States for temporary display or exhibition, and for other purposes", approved October 19, 1965 (22 U.S.C. 2459); or

(2) any designated archaeological or ethnological material or any article of cultural property imported into the United States if such material or article—

(A) has been held in the United States for a period of not less than three consecutive years by a recognized museum or religious or secular monument or similar institution, and was purchased by that institution for value, in good faith, and without notice that such material or article was imported in violation of this title, but only if—

(i) the acquisition of such material or article has been reported in a publication of such institution, any regularly published newspaper or periodical with a circulation of at least fifty thousand, or a periodical or exhibition catalog which is concerned with the type of article or materials sought to be exempted from this title,

(ii) such material or article has been exhibited to the public for a period or periods aggregating at least one year during such three-year period, or

(iii) such article or material has been cataloged and the catalog material made available upon request to the public for at least two years during such three-year period;

(B) if subparagraph (A) does not apply, has been within the United States for a period of not less than ten consecutive years and has been exhibited for not less than five years during such period in a recognized museum or religious or secular monument

or similar institution in the United States open to the public; or

(C) if subparagraphs (A) and (B) do not apply, has been within the United States for a period of not less than ten consecutive years and the State Party concerned has received or should have received during such period fair notice (through such adequate and accessible publication, or other means, as the Secretary shall by regulation prescribe) of its location within the United States; and

(D) if none of the preceding subparagraphs apply, has been within the United States for a period of not less than twenty consecutive years and the claimant establishes that it purchased the material or article for value without knowledge or reason to believe that it was imported in violation of law.

SEC. 213. REGULATIONS.

The Secretary shall prescribe such rules and regulations as are necessary and appropriate to carry out the provisions of this title.

SEC. 214. ENFORCEMENT.

In the customs territory of the United States, and in the Virgin Islands, the provisions of this title shall be enforced by appropriate customs officers. In any other territory or area within the United States, but not within such customs territory or the Virgin Islands, such provisions shall be enforced by such persons as may be designated by the President.

SEC. 215. EFFECTIVE DATE.

(a) IN GENERAL.—This title shall take effect on the ninetieth day after the date of the enactment of this Act or on any date which the President shall prescribe and publish in the Federal Register, if such date is—

(1) before such ninetieth day and after such date of enactment; and

(2) after the initial membership of the Committee is appointed.

(b) EXCEPTION.—Notwithstanding subsection (a), the members of the Committee may be appointed in the manner provided for in section 206 at any time after the date of the enactment of this Act.

TITLE III—RECIPROCAL TRADE AND INVESTMENT

SEC. 301. SHORT TITLE; AMENDMENT OF TRADE ACT OF 1974.

(a) SHORT TITLE.—This title may be cited as the "Reciprocal Trade and Investment Act of 1982".

(b) AMENDMENT OF TRADE ACT OF 1974.—Except as otherwise expressly provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Trade Act of 1974.

SEC. 302. STATEMENT OF PURPOSES.

The purposes of this title are—

(1) to foster the economic growth of, and full employment in, the United States by expanding competitive United States exports through the achievement of commercial opportunities in foreign markets substantially equivalent to those accorded by the United States;

(2) to improve the ability of the President—

(A) to identify and to analyze barriers to (and restrictions on) United States trade and investment, and

(B) to achieve the elimination of such barriers and restrictions;

(3) to encourage the expansion of international trade in services through the negotiation of agreements (both bilateral and multilateral) which reduce or eliminate barriers to international trade in services; and

(4) to enhance the free flow of foreign direct investment through the negotiation of agreements (both bilateral and multilateral) which reduce or eliminate the trade distortive effects of certain investment-related measures.

SEC. 303. ANALYSIS OF FOREIGN TRADE BARRIERS.

(a) IN GENERAL.—Title I (19 U.S.C. 2111 et seq.) is amended by adding at the end thereof the following new chapter:

"CHAPTER 8—BARRIERS TO MARKET ACCESS

"SEC. 181. ACTIONS CONCERNING BARRIERS TO MARKET ACCESS.

"(a) NATIONAL TRADE ESTIMATES.—

"(1) IN GENERAL.—Not later than the date on which the initial report is required under subsection (b)(1), the United States Trade Representative, through the interagency trade organization established pursuant to section 242(a) of the Trade Expansion Act of 1962, shall—

"(A) identify and analyze acts, policies, or practices which constitute significant barriers to, or distortions of—

"(i) United States exports of goods or services, and

"(ii) foreign direct investment by United States persons, especially if such investment has implications for trade in goods or services; and

"(B) make an estimate of the trade-distorting impact on United States commerce of any act, policy, or practice identified under subparagraph (A).

"(2) CERTAIN FACTORS TAKEN INTO ACCOUNT IN MAKING ANALYSIS AND ESTIMATE.—In making any analysis or estimate under paragraph (1), the Trade Representative shall take into account—

"(A) the relative impact of the act, policy, or practice on United States commerce;

"(B) the availability of information to document prices, market shares, and other matters necessary to demonstrate the effects of the act, policy, or practice;

"(C) the extent to which such act, policy, or practice is subject to international agreements to which the United States is a party; and

"(D) any advice given through appropriate committees established pursuant to section 135.

"(3) ANNUAL REVISIONS AND UPDATES.—The Trade Representative shall annually revise and update the analysis and estimate under paragraph (1).

"(b) REPORT TO CONGRESS.—

"(1) IN GENERAL.—On or before the date which is one year after the date of the enactment of the Reciprocal Trade and Investment Act of 1982, and each year thereafter, the Trade Representative shall submit the analysis and estimate under subsection (a) to the Committee on Finance of the Senate and to the Committee on Ways and Means of the House of Representatives.

"(2) REPORTS TO INCLUDE INFORMATION WITH RESPECT TO ACTION BEING TAKEN.—The Trade Representative shall include in each report submitted under paragraph (1) information with respect to any action taken to eliminate any act, policy, or practice identified under subsection (a), including, but not limited to—

"(A) any action under section 301, or

"(B) negotiations or consultations with foreign governments.

"(3) CONSULTATION WITH CONGRESS ON TRADE POLICY PRIORITIES.—The Trade Representative shall keep the committees described in paragraph (1) currently informed with respect to trade policy priorities for the purposes of expanding market opportunities.

"(c) ASSISTANCE OF OTHER AGENCIES.—

"(1) FURNISHING OF INFORMATION.—The head of each department or agency of the executive branch of the Government, including any independent agency, is authorized and directed to furnish to the Trade Representative or to the appropriate agency, upon request, such data, reports, and other information as is necessary for the Trade Representative to carry out his functions under this section.

"(2) RESTRICTIONS ON RELEASE OR USE OF INFORMATION.—Nothing in this subsection shall authorize the release of information to, or the use of information by, the Trade Representative in a manner inconsistent with law or any procedure established pursuant thereto.

"(3) PERSONNEL AND SERVICES.—The head of any department, agency, or instrumentality of the United States may detail such personnel and may furnish such services, with or without reimbursement, as the Trade Representative may request to assist in carrying out his functions.".

(b) CONFORMING AMENDMENT.—The table of contents for title I is amended by adding at the end thereof the following:

"CHAPTER 8—BARRIERS TO MARKET ACCESS

"Sec. 181. Actions concerning barriers to market access.".

SEC. 304. AMENDMENTS TO TITLE III OF THE TRADE ACT OF 1974.

(a) PRESIDENTIAL ACTION IN THE CASE OF UNFAIR TRADE PRACTICES.—Section 301(a)(19 U.S.C. 2411(a)) is amended to read as follows:

"(a) DETERMINATIONS REQUIRING ACTION.—

"(1) IN GENERAL.—If the President determines that action by the United States is appropriate—

"(A) to enforce the rights of the United States under any trade agreement; or

"(B) to respond to any act, policy, or practice of a foreign country or instrumentality that—

"(i) is inconsistent with the provisions of, or otherwise denies benefits to the United States under, any trade agreement, or

"(ii) is unjustifiable, unreasonable, or discriminatory and burdens or restricts United States commerce;

the President shall take all appropriate and feasible action within his power to enforce such rights or to obtain the elimination of such act, policy, or practice.

"(2) SCOPE OF ACTION.—The President may exercise his authority under this section with respect to any goods or sector—

"(A) on a nondiscriminatory basis or solely against the foreign country or instrumentality involved, and

"(B) without regard to whether or not such goods or sector were involved in the act, policy, or practice identified under paragraph (1).".

(b) OTHER ACTION BY PRESIDENT.—Section 301(b)(19 U.S.C. 2411(b)) is amended—

(1) by striking out "and" at the end of paragraph (1);

(2) in paragraph (2)—

(A) by inserting "notwithstanding any other provision of law," before "impose";

(B) by striking out "products" and inserting in lieu thereof "goods"; and

(C) by striking out the period and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end thereof the following:

"(3) propose legislation where necessary and appropriate to carry out the objectives of subsection (a).

Any legislation proposed under paragraph (3) shall be treated as an implementing bill pursuant to the provisions of section 151, except that, for purposes of section 151(c)(1), no trade agreement shall be required and the day on which the implementing bill is submitted shall be treated as the day on which the trade agreement is submitted. The President shall notify Congress, and publish notice in the Federal Register, of his intention to propose legislation under paragraph (3) at least 90 days before the implementing bill is submitted.".

(c) INITIATION OF INVESTIGATIONS BY OR ON MOTION OF TRADE REPRESENTATIVE.—

(1) IN GENERAL.—Section 302 (19 U.S.C. 2412) is amended to read as follows:

"SEC. 302. INITIATION OF INVESTIGATIONS BY UNITED STATES TRADE REPRESENTATIVE.

"(a) FILING OF PETITION.—

"(1) IN GENERAL.—Any interested person may file a petition with the United States Trade Representative (hereinafter in this chapter referred to as the 'Trade Representative') requesting the President to take action under section 301 and setting forth the allegations in support of the request.

"(2) REVIEW OF ALLEGATIONS.—The Trade Representative shall review the allegations in the petition and, not later than 45 days after the date on which he received the petition, shall determine whether to initiate an investigation.

"(b) DETERMINATIONS REGARDING PETITIONS.—

"(1) NEGATIVE DETERMINATION.—If the Trade Representative determines not to initiate an investigation with respect to a petition, he shall inform the petitioner of the reasons therefor and shall publish notice of the determination, together with a summary of such reasons, in the Federal Register.

"(2) AFFIRMATIVE DETERMINATION.—If the Trade Representative determines to initiate an investigation with respect to a petition, he shall initiate an investigation regarding the issues raised. The Trade Representative shall publish a summary of the petition in the Federal Register and shall, as soon as possible, provide opportunity for the presentation of views concerning the issues, including a public hearing—

"(A) within the 30-day period after the date of the determination (or on a date after such period if agreed to by the petitioner) if a public hearing within such period is requested in the petition; or

"(B) at such other time if a timely request therefor is made by the petitioner.

"(c) DETERMINATION TO INITIATE BY MOTION OF TRADE REPRESENTATIVE.—

"(1) DETERMINATION TO INITIATE.—If the Trade Representative determines with respect to any matter that an investigation should be initiated in order to advise the President concerning the exercise of the President's authority under section 301, the Trade Representative shall publish such determination in the Federal Register and such determination shall be treated as an affirmative determination under subsection (b)(2).

"(2) CONSULTATION BEFORE INITIATION.—The Trade Representative shall, before making any determination under paragraph (1), consult with appropriate committees established pursuant to section 135.".

(2) CONFORMING AMENDMENTS.—

(A) Section 141(d) is amended—

(i) by striking out "and" at the end of paragraph (6),

(ii) by striking out the period at the end of paragraph (7) and inserting in lieu thereof a semicolon and "and", and

(iii) by adding at the end thereof the following new paragraph:

"(8) provide, where authorized by law, copies of documents to persons at cost, except that any funds so received shall be credited to, and be available for use from, the account from which expenditures relating thereto were made.".

(B) Section 303 (19 U.S.C. 2413) is amended—

(i) by striking out "with respect to a petition";

(ii) by inserting "or the determination of the Trade Representative under section 302(c)(1)" after "in the petition"; and

(iii) by inserting "(if any)" after "petitioner".

(C) Section 304 (19 U.S.C. 2414) is amended by striking out "issues raised in the petition" and inserting in lieu thereof "matters under investigation" in paragraph (1) of subsection (a).

(D) The item relating to section 302 in the table of contents is amended to read as follows:

"Sec. 302. Initiation of investigations by United States Trade Representative.".

(d) EXTENSION OF TIME FOR REQUESTS FOR CONSULTATIONS.—Section 303 (19 U.S.C. 2413) is amended—

(1) by inserting "(a) IN GENERAL.—" before "On"; and

(2) by adding at the end thereof the following new subsection:

"(b) DELAY OF REQUEST FOR CONSULTATIONS FOR UP TO 90 DAYS.—

"(1) IN GENERAL.—Notwithstanding the provisions of subsection (a)—

"(A) the United States Trade Representative may delay for up to 90 days any request for consultations under subsection (a) for the purpose of verifying or improving the petition to ensure an adequate basis for consultation, and

"(B) if such consultations are delayed by reason of subparagraph (A), each time limitation under section 304 shall be extended for the period of such delay.

"(2) NOTICE AND REPORT.—The Trade Representative shall—

"(A) publish notice of any delay under paragraph (1) in the Federal Register, and

"(B) report to Congress on the reasons for such delay in the report required by section 306.".

(e) DEFINITIONS.—

(1) COMMERCE DEFINED.—Paragraph (1) of section 301(d) (19 U.S.C. 301(d)) is amended to read as follows:

"(1) DEFINITION OF COMMERCE.—The term 'commerce' includes, but is not limited to—

"(A) services associated with international trade, whether or not such services are related to specific goods, and

"(B) foreign direct investment by United States persons with implications for trade in goods or services.".

(2) UNREASONABLE, UNJUSTIFIABLE, AND DISCRIMINATORY DEFINED.—Section 301(d) (19 U.S.C. 2411(d)) is amended by adding at the end thereof the following new paragraphs:

"(3) DEFINITION OF UNREASONABLE.—The term 'unreasonable' means any act, policy, or practice which, while not necessarily in violation of or inconsistent with the international legal rights of the United States, is otherwise deemed to be unfair and inequitable. The term includes, but is not limited to, any act, policy, or practice which denies fair and equitable—

"(A) market opportunities;

"(B) opportunities for the establishment of an enterprise; or

"(C) provision of adequate protection of intellectual property rights.

"(4) DEFINITION OF UNJUSTIFIABLE.—

"(A) IN GENERAL.—The term 'unjustifiable' means any act, policy, or practice which is in violation of, or inconsistent with, the international legal rights of the United States.

"(B) CERTAIN ACTIONS INCLUDED.—The term 'unjustifiable' includes, but is not limited to, any act, policy, or practice described in subparagraph (A) which denies national or most-favored-nation treatment, the right of establishment, or protection of intellectual property rights.

"(5) DEFINITION OF DISCRIMINATORY.—The term 'discriminatory' includes where appropriate any act, policy, or practice which denies national or most-favored-nation treatment to United States goods, services, or investment.".

(3) CONFORMING AMENDMENT.—Section 301(d) (19 U.S.C. 2411(d)) is amended by striking out the heading and inserting in lieu thereof:

"(d) DEFINITIONS; SPECIAL RULE FOR VESSEL CONSTRUCTION SUBSIDIES.—For purposes of this section—".

(f) AMENDMENTS TO SECTION 305.—Section 305 of the Trade Act of 1974 (19 U.S.C. 2415) is amended by adding at the end thereof the following new subsection:

"(c) CERTAIN BUSINESS INFORMATION NOT MADE AVAILABLE.—

"(1) IN GENERAL.—Except as provided in paragraph (2), and notwithstanding any other provision of law (including section 552 of title 5, United States Code), no information requested and received by the Trade Representative in aid of any investigation under this chapter shall be made available to any person if—

"(A) the person providing such information certifies that—

"(i) such information is business confidential,

"(ii) the disclosure of such information would endanger trade secrets or profitability, and

"(iii) such information is not generally available;

"(B) the Trade Representative determines that such certification is well-founded; and

"(C) to the extent required in regulations prescribed by the Trade Representative, the person providing such information provides an adequate nonconfidential summary of such information.

"(2) USE OF INFORMATION.—The Trade Representative may—

"(A) use such information, or make such information available (in his own discretion) to any employee of the Federal Government for use, in any investigation under this chapter, or

"(B) may make such information available to any other person in a form which cannot be associated with, or otherwise identify, the person providing the information.".

SEC. 305. NEGOTIATING OBJECTIVES WITH RESPECT TO INTERNATIONAL TRADE IN SERVICES AND INVESTMENT AND HIGH TECHNOLOGY INDUSTRIES.

(a) NEGOTIATING OBJECTIVES.—

(1) IN GENERAL.—Chapter 1 of title I is amended by inserting immediately after section 104 the following new section:

"SEC. 104A. NEGOTIATING OBJECTIVES WITH RESPECT TO TRADE IN SERVICES, FOREIGN DIRECT INVESTMENT, AND HIGH TECHNOLOGY PRODUCTS.

"(a) TRADE IN SERVICES.—Principal United States negotiating objectives under section 102 shall be—

"(1) to reduce or to eliminate barriers to, or other distortions of, international trade in services (particularly United States service sector trade in foreign markets), including barriers that deny national treatment and the rights of establishment and operation in such markets; and

"(2) to develop internationally agreed rules, including dispute settlement procedures, which—

"(A) are consistent with the commercial policies of the United States, and

"(B) will reduce or eliminate such barriers or distortions and help ensure open international trade in services.

"(b) FOREIGN DIRECT INVESTMENT.—Principal United States negotiating objectives under section 102 shall be—

"(1) to reduce or to eliminate artificial or trade-distorting barriers to foreign direct investment, to expand the principle of national treatment, and to reduce unreasonable barriers to establishment; and

"(2) to develop internationally agreed rules, including dispute settlement procedures, which—

"(A) will help ensure a free flow of foreign direct investment, and

"(B) will reduce or eliminate the trade distortive effects of certain investment related measures.

"(c) HIGH TECHNOLOGY PRODUCTS.—Principal United States negotiating objectives shall be—

"(1) to obtain and preserve the maximum openness with respect to international trade and investment in high technology products and related services;

"(2) to obtain the elimination or reduction of, or compensation for, the significantly distorting effects of, foreign government acts, policies, or practices identified in section 181, with particular consideration given to the nature and extent of foreign government intervention affecting United States exports of high technology products or investments in high technology industries, including—

"(A) foreign industrial policies which distort international trade or investment;

"(B) measures which deny national treatment or otherwise discriminate in favor of domestic high technology industries;

"(C) measures which impair access to domestic markets for key commodity products; and

"(D) measures which facilitate or encourage anticompetitive market practices or structures;

"(3) to obtain commitments that official policy of foreign countries or instrumentalities will not discourage government or private procurement of foreign high technology products and related services;

"(4) to obtain the reduction or elimination of all tariffs on, and other barriers to, United States exports of high technology products and related services;

"(5) to obtain commitments to foster national treatment;

"(6) to obtain commitments to—

"(A) foster the pursuit of joint scientific cooperation between companies, institutions or governmental entities of the United States and those of the trading partners of the United States in areas of mutual interest through such measures as financial participation and technical and personnel exchanges, and

"(B) ensure that access by all participants to the results of any such cooperative efforts should not be impaired; and

"(7) to provide effective minimum safeguards for the acquisition and enforcement of intellectual property rights and the property value of proprietary data.

"(d) DEFINITION OF BARRIERS AND OTHER DISTORTIONS.—For purposes of subsection (a), the term 'barriers to, or other distortions of, international trade in services' includes, but is not limited to—

"(1) barriers to the right of establishment in foreign markets, and

"(2) restrictions on the operation of enterprises in foreign markets, including—

"(A) direct or indirect restrictions on the transfer of information into, or out of, the country or instrumentality concerned, and

"(B) restrictions on the use of data processing facilities within or outside of such country or instrumentality.".

(2) CONFORMING AMENDMENT.—The table of contents for chapter 1 of title I is amended by inserting after the item relating to section 104 the following new item:

"Sec. 104A. Negotiating objectives with respect to trade in services, foreign direct investment, and high technology products.".

SEC. 306. PROVISIONS RELATING TO INTERNATIONAL TRADE IN SERVICES.

(a) COORDINATION OF UNITED STATES POLICIES.—

(1) IN GENERAL.—The United States Trade Representative, through the interagency trade organization established pursuant to section 242(a) of the Trade Expansion Act of 1962 or any subcommittee thereof, shall, in conformance with other provisions of law, develop (and coordinate the implementation of) United States policies concerning trade in services.

(2) FEDERAL AGENCIES.—In order to encourage effective development and coordination of United States policies on trade in services, each department or agency of the United States responsible for the regulation of any service sector industry shall, as appropriate, advise and work with the United States Trade Representative concerning matters that have come to the department's or agency's attention with respect to—

(A) the treatment afforded United States service sector interests in foreign markets, or

(B) allegations of unfair practices by foreign governments or companies in a service sector.

(3) NO ALTERATION OF EXISTING AUTHORITY.—Nothing in this section shall be construed to alter any existing authority or responsibility with respect to any specific service sector.

(b) SERVICE INDUSTRIES DEVELOPMENT PROGRAM.—

(1) IN GENERAL.—The Secretary of Commerce is authorized to establish a service industries development program. Such program shall be designed to—

(A) promote the competitiveness of United States service firms and American employees through appropriate economic policies;

(B) promote actively the use and sale of United States services abroad and develop trade opportunities for United States service firms;

(C) develop a data base for policymaking pertaining to services;

(D) collect and analyze, in consultation with appropriate agencies, information pertaining to the international operations and competitiveness of United States service industries, including information with respect to—

(i) United States regulation of service industries;

(ii) tax treatment of services, with particular emphasis on the effect of United States taxation on the international competitiveness of United States firms and exports;

(iii) antitrust policies as such policies affect the competitiveness of United States firms;

(iv) treatment of services in international agreements of the United States; and

(v) adequacy of current United States export promotion activities in the service sector;

(E) provide, together with other appropriate agencies, staff support for negotiations on service-related issues by the United States Trade Representative and the domestic implementation of service-related agreements;

(F) collect such statistical information on the domestic service sector as may be necessary for the development of governmental policies toward the service sector;

(G) conduct sectoral studies of domestic service industries;

(H) collect comparative international information on service industries and policies of foreign governments toward services;

(I) develop policies to strengthen the export competitiveness of domestic service industries;

(J) conduct a program of research and analysis of service-related issues and problems, including forecasts and industrial strategies; and

(K) provide statistical, analytical, and policy information to State and local governments and service industries.

(2) AVAILABILITY OF FUNDS.—The Secretary of Commerce shall carry out the program under this subsection from funds otherwise made available to him which may be used for such purposes.

(c) COORDINATION WITH STATES.—

(1) STATEMENT OF POLICY.—It is the policy of Congress that the President shall, as he deems appropriate—

(A) consult with State governments on issues of trade policy affecting the regulatory authority of non-Federal governments, or their procurement of goods and services; and

(B) establish one or more intergovernmental policy advisory committees on trade which shall serve as a principal forum in which State and local governments may consult with the Federal Government with respect to the matters described in subparagraph (A).

(2) ESTABLISHMENT OF NON-FEDERAL GOVERNMENTAL TRADE ADVISORY COMMITTEES.—Section 135 (19 U.S.C. 2155) is amended—

(A) by inserting "and the non-Federal governmental sector" after "private sector" in subsection (a),

(B) by adding at the end of subsection (c) the following new paragraph:

"(3) The President—

"(A) may establish policy advisory committees representing non-Federal governmental interests to provide, where the President finds it necessary, policy advice—

"(i) on matters referred to in subsection (a), and

"(ii) with respect to implementation of trade agreements, and

"(B) shall include as members of committees established under paragraph (2) representatives of non-Federal governmental interests where he finds such inclusion appro-

priate after consultation by the Trade Representative with such representatives.";

(C) by inserting "or non-Federal government" after "private" each place it appears in subsections (g) and (j);

(D) by inserting "government," before "labor" in subsection (j); and

(E) by adding at the end thereof the following new subsection:

"(m) NON-FEDERAL GOVERNMENT DEFINED.—The term 'non-Federal government' means—

"(1) any State, territory or possession of the United States, or the District of Columbia, or any political subdivision thereof, or

"(2) any agency or instrumentality of any entity described in paragraph (1).''; and

(F) by inserting "or Public" after "Private" in the heading thereof.

(3) CONFORMING AMENDMENTS.—

(A) Section 104(c) (19 U.S.C. 2114(c)) is amended by inserting "or non-Federal governmental" after "private".

(B) Sections 303 (19 U.S.C. 2413) and 304(b)(2) (19 U.S.C. 2414(b)(2)) are each amended by striking out "private sector".

(C) The table of sections for chapter 3 of title I is amended by inserting "and public" after "private" in the item relating to section 135.

SEC. 307. NEGOTIATING AUTHORITY WITH RESPECT TO FOREIGN DIRECT INVESTMENT.

Paragraph (3) of section 102(g) (19 U.S.C. 2112(g)(3)) is amended to read as follows:

"(3) the term 'international trade' includes—

"(A) trade in both goods and services, and

"(B) foreign direct investment by United States persons, especially if such investment has implications for trade in goods and services.".

SEC. 308. NEGOTIATION OF AGREEMENTS CONCERNING HIGH TECHNOLOGY INDUSTRIES.

(a) AUTHORIZATION TO ENTER INTO AGREEMENTS.—The President may enter into such bilateral or multilateral agreements as may be necessary or appropriate to achieve the objectives of this section and the negotiating objectives under section 104A(c) of the Trade Act of 1974.

(b) ANALYSIS OF FACTORS WHICH INFLUENCE UNITED STATES COMPETITIVENESS IN HIGH TECHNOLOGY INDUSTRIES.—In order to maintain and enhance the competitiveness of United States high technology industries, the Department of Commerce shall submit a report to Congress within one year of the date of the enactment of this title analyzing factors not addressed in this title which significantly affect the competitiveness of United States high technology industries and which have a potential for high sales growth in world markets, including—

(1) United States and foreign economic policies, in particular macroeconomic, regulatory, and sector or factor specific policies; and

(2) the structure of markets which supply production factors to, and distribute the product of, such industries.

(c) MODIFICATION OR CONTINUANCE OF DUTIES.—

(1) IN GENERAL.—Chapter 2 of title I is amended by inserting at the end thereof the following new section:

"SEC. 128. MODIFICATION AND CONTINUANCE OF TREATMENT WITH RESPECT TO DUTIES ON HIGH TECHNOLOGY PRODUCTS.

"(a) In order to carry out any agreement concluded as a result of the negotiating objectives under section 104A(c), the President may proclaim, subject to the provisions of chapter 3—

"(1) such modification, elimination, or continuance of any existing duty, duty-free, or excise treatment, or

"(2) such additional duties,

as he deems appropriate.

"(b) The President shall exercise his authority under subsection (a) only with respect to the following items listed in the Tariff Schedules of the United States (19 U.S.C. 1202):

"(1) Accounting, computing, and other data processing machines provided for in item 676.15.

"(2) Data processing machines provided for in item 676.30.

"(3) Transistors provided for in item 687.70.

"(4) Monolithic integrated circuits provided for in item 687.74.

"(5) Integrated circuits provided for in item 687.77.

"(6) Electronic components provided for in item 687.81.

"(c) TERMINATION.—The President may exercise his authority under this section only during the 5-year period beginning on the date of the enactment of the Reciprocal Trade and Investment Act of 1982.".

(2) CONFORMING AMENDMENT.—The table of contents of chapter 1 of title I is amended by adding at the end thereof the following new item:

"Sec. 128. Modification and continuance of treatment with respect to duties on high technology products.".

UP AMENDMENT NO. 1573

Mr. DOLE. I send an amendment to the desk, Mr. President.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 1573.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 15, lines 16 and 17, strike out "October 1, 1982" and insert in lieu thereof "the expiration of this joint resolution".

On page 26, line 21, after "amended" insert "by striking out '12/31/84' and inserting in lieu thereof '12/31/85' and".

On page 27, strike out lines 2 through 5 and insert in lieu thereof the following:

(a) IN GENERAL.—The headnotes for subpart B of part 1 of the Appendix is amended by adding at the end thereof the following new headnote:

"(3) For purposes of item 905.30—

"(a) The term 'restricted amount' means, with respect to the 12-month period beginning on April 1 of any calendar year, the greater of—

"(A) 1,750,000 pounds, or

"(B) 28.5 percent of the aggregate apparent United States consumption of such netting and nets during the calendar year preceding such calendar year.

"(b) On or before April 1 of each calendar year (beginning with 1983), the International Trade Commission shall determine the aggregate apparent United States consumption of fish netting and fish nets, in pounds, during the preceding calendar year, shall report such determination to the Secretary of the Treasury and the Secretary of Commerce, and shall publish such determination in the Federal Register.".

(b) RATE OF DUTY.—Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"905.30	Fish netting and fishing nets (including sections thereof), of textile materials (provided for in item 355.45 of part 4C, schedule 3) not over the restricted amount entered during the 12-month period beginning April 1 of any calendar year.	17% ad val.	No change...	On or before 1/1/89".

On page 27, line 7, strike out "The" and insert in lieu thereof "Except as otherwise provided in this section, the".

On page 28, line 8, strike out "112, and 119" and insert in lieu thereof "and 112".

On page 28, line 23, insert "and" after "1981,".

On page 28, line 25, strike out ", and" and insert in lieu thereof a period.

On page 29, strike out lines 1 and 2 and insert in lieu thereof the following:

(c) Fish Netting and Fish Nets.—The amendments made by section 119 shall apply to articles entered after March 31, 1983.

On page 27, between lines 5 and 6, insert the following:

SEC. 120. CERTAIN FOURDRINIER WIRE.

(a) Subpart B of part 3 of schedule 6 is amended by striking out item 642.30 and inserting in lieu thereof the following:

"642.31	Fourdrinier wires, seamed or not seamed, suitable for use in papermaking machines (whether or not parts of, or fitted or attached to, such machines):			
	Of plastics	19.4% ad val..	10% ad val..	75% ad val.
	With 240 or more wires to the linear inch.	Free	10% ad val..	75% ad val.
	Other	19.4 ad val..	10% ad val..	75% ad val."

(b)(1) The rate of duty in column numbered 1 for item 642.32 (as added by subsection (a)) shall be subject to any staged rate reductions for item 642.30 which were proclaimed by the President before the effective date of the amendment made by subsection (a).

(2) Whenever the rate of duty specified in column numbered 1 for such item 642.32 is reduced to the same level as the corresponding rate of duty specified in the column entitled "LDDC" for such item, or to a lower level, the rate of duty in such "LDDC" column shall be deleted.

SEC. 121. NEEDLECRAFT DISPLAY MODELS.

Subpart B of part 1 of the Appendix is amended as follows:

(1) The headnotes to such subpart are amended by adding at the end thereof the following new headnote:

"5. For the purposes of the superior heading to items 906.10 and 906.12, the term 'mass-produced kits' includes only those which are designed to be sold in the customs territory of the United States exclusively in kit form.".

(2) The following new superior heading and new items are inserted in numerical sequence:

	"Needle-craft display models, primarily hand stitched, of completed mass-produced kits:			
906.10	Articles provided for in items 355.16, 360.70, 360.78, 364.18, 364.23, 364.30, 365.78, 365.84, 365.86, 366.79, 367.34, 367.55, 367.60, 386.04, 386.06, 386.09, 386.50 388.40, and 389.62 of schedule 3 (except shoe uppers and tents).	Free	No change	On or before 6/30/85
906.12	Aprons and baby bibs (provided for in items 383.03, 383,08, 383.20, and 383.50 of schedule 3).	Free	No change	On or before 6/30/85".

SEC. 122. NATURAL GRAPHITE.

Item 909.01 of the Appendix is amended by striking out "6/30/81" and inserting in lieu thereof "12/31/84".

SEC. MATERIALS CERTIFIED BY NASA.

(a) Subpart A of part 3 of schedule 8 is amended—

(1) by inserting immediately after "Subpart A—United States Government" the following headnote:

"Subpart A headnote:

"1. With respect to item 837.00, the return of materials from space by the National Aeronautics and Space Administration shall not be considered an importation, and an entry of such materials shall not be required."; and

(2) by adding immediately after item 836.00 the following new item:

	"Articles for the National Aeronautics and Space Administration and articles imported to be launched into space under launch services agreements with the National Aeronautics and Space Administration:		
837.00	Materials certified by it to the Commissioner of Customs to be imported to be launched into space, spare parts, or necessary and uniquely associated support equipment for use in connection with a launch into space.	Free	Free".

(b) Item 837.00 (as added by subsection (a)) shall not apply to articles entered, or withdrawn from warehouse for consumption, after December 31, 1994.

SEC. . (a) The superior heading for items 346.05 through 346.65 of part 4 of schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended to read as follows:

"Fabrics of pile construction, in which pile threads were inserted or knotted during the weaving or knitting, whether or not the pile threads cover the entire surface and whether the pile threads are wholly or partly cut or are not cut:".

(b) The superior heading for items 346.05 and 346.10 of part 4 of schedule 3 of such schedules is amended to read as follows:

"Fabric of corduroy construction, whether or not the filling floats are cut:".

(c) The superior heading for items 346.15 through 346.24 of part 4 of schedule 3 of such schedules is amended to read as follows:

"Fabric of velveteen construction, whether or not the filling floats are cut:".

SEC. 2. The amendments made by the first section of this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption on or after the date of the enactment of this Act.

Strike sections 114 and 115.

Strike title III.

SEC. . (a) Item 911.90 of subpart B of part 1 of the Appendix to the Tariff Schedules of the United States is amended by striking out "6/30/82" and inserting in lieu thereof "6/30/83".

(b) The amendments made by subsection (a) shall apply to articles entered on or after the date of enactment of this Act.

That subpart B of part 1 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) is amended—

(1) by adding at the end of the headnotes to such subpart the following new headnote:

"6. For the purposes of item 911.95, the term 'entertainment broadcast band receivers' means receivers designed principally to receive signals in the AM (530-1710 KHz) and FM (88-108 MHz) entertainment broadcast bands, whether or not capable of receiving signals on other bands such as aviation, television, marine, public safety, industrial, and citizens band."; and

(2) by inserting in numerical sequence the following new item:

"911.95	Entertainment broadcast band receivers valued not over $40 each (however provided for in schedule 6), incorporating timekeeping or time display devices, not in combination with any other article, and not designed for motor vehicle installation.	Free	No change	On or before 9/30/84".

Mr. DOLE. Mr. President, title I, part A of H.R. 4566, as amended by the Committee on Finance, contains 22 provisions. The majority of these provisions either temporarily or permanently suspend duties on a variety of articles. Although the duty reductions will reduce customs revenue by less than $14 million on an annual basis, many of the provisions are extremely important to small businesses and independent businessmen. One of these duty savings is estimated to be as low as $6,400. The biggest savings will accrue to vending machine operators and is estimated to be between $1 to $2 million annually.

This part also contains legislation implementing the international coffee and sugar agreements. The United States has joined both of these agreements, which basically seek to moderate extreme price fluctuations in the respective commodities. In order to implement these agreements the United States must be able to restrict the entry of noncertified, nonquota, coffee and sugar. Since the United States still represents the largest free markets for these products, we must be able to enforce the provisions of these agreements for them to function.

TITLE I—PART B

Mr. President, this title implements the Nairobi protocol to the Florence agreement. The protocol expands the duty-free entry currently provided for a broader range of educational, scientific, and cultural materials, and materials for the handicapped.

TITLE II

The cultural property convention title II includes provisions implementing the convention on the means of prohibiting and preventing the illicit import, export, and transfer of ownership of cultural property.

These provisions authorize the President to enter into agreements to restrict imports of illicitly traded artifacts when the major importing nations are implementing similar controls. The provisions also authorize the President to impose import controls unilaterally in an emergency, and they bar the importation of certain items identified as having been stolen from museums or similar institutions abroad.

Mr. President, in addition I have offered an amendment to the bill which will make certain technical corrections in the bill as originally reported by the committee. We have agreed to delete one provision which has now been brought to our attention as controversial. We have also added several new controversial provisions including one to relieve NASA of the obligation to pay duties on imported materials launched into space and articles recovered from space.

Finally title III, the so-called "reciprocity bill" has been deleted. I fully expect, however, that its author, Senator DANFORTH, will seek early consideration of this measure.

Mr. DANFORTH. Mr. President, I would just like to ask the Senator from Kansas, this bill did have the reciprocity bill as a major part of it. We came within one Senator, I think, of clearing this, and the U.S. Trade Representative called me yesterday asking if we could not pass the reciprocity bill. I would simply like the assurance of the chairman of the Finance Committee that the reciprocity bill will receive prime consideration.

Mr. DOLE. The Senator has that assurance, and we think it may even be a better, tougher, broader reciprocity bill next year, with the Senator's leadership.

Mr. BAKER. Mr. President, the hour of 6 o'clock has arrived and we will finish the list of items later.

Mr. President, before that, Was action completed on the bill now before us?

The PRESIDING OFFICER (Mr. COHEN). It was not.

Mr. BAKER. Mr. President, I ask unanimous consent that we complete action on that measure.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Kansas (Mr. DOLE).

The amendment (UP No. 1573) was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 4566), was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I move that the Senate insist on its amendments and request a conference with the House of Representatives.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee (Mr. BAKER).

The motion was agreed to.

(Later the following occurred.)

APPOINTMENT OF CONFEREES—H.R. 4566

Mr. BAKER. Next, Mr. President, in connection with H.R. 4566, I would propose to ask that the Chair be authorized to appoint conferees on the part of the Senate, if the minority leader has no objection.

Mr. ROBERT C. BYRD. I have no objection, Mr. President.

Mr. BAKER. I make that request.

The PRESIDING OFFICER. Without objections, the Chair appoints the following conferees: Senators DOLE, DANFORTH, HEINZ, LONG, and DENTON.

SURFACE TRANSPORTATION ACT OF 1982

The Senate resumed consideration of the bill (H.R. 6211).

CLOTURE MOTION

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on an amendment in the nature of a substitute, to be proposed by the Senator from Tennessee (Mr. BAKER), to HR. 6211, the Surface Transportation Assistance Act of 1982.

Howard H. Baker, Jr., Rudy Boschwitz, Strom Thurmond, Ted Stevens, Warren Rudman, Arlen Specter, Robert Dole, Slade Gorton, John H. Chafee, Bob Packwood, Robert T. Stafford, S. I. Hayakawa, Richard G. Lugar, James A. McClure, Dan Quayle, Frank H. Murkowski, David Durenberger, and Jennings Randolph.

VOTE

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that debate on the amendment in the nature of a substitute proposed by the Senator from Tennessee (Mr. BAKER) to H.R. 6211, the Surface Transportation Act of 1982, shall be brought to a close? The yeas and nays are mandatory under the rule, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Pennsylvania (Mr. HEINZ) are absent on official business.

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Washington (Mr. JACKSON), and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON) and the Senator from Rhode Island (Mr. PELL) would vote yea.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who have not voted who wish to do so?

The result was announced—yeas 89, nays 5, as follows:

[Rollcall Vote No. 456 Leg.]

YEAS—89

Abdnor	Exon	Metzenbaum
Andrews	Ford	Mitchell
Armstrong	Garn	Moynihan
Baker	Glenn	Murkowski
Baucus	Gorton	Nunn
Bentsen	Grassley	Packwood
Biden	Hart	Percy

Eagleton	Melcher	Zorinsky

NAYS—5

East	Humphrey	Proxmire
Helms	Nickles	

NOT VOTING—6

Cannon	Goldwater	Jackson
Cranston	Heinz	Pell

The PRESIDING OFFICER. On this vote, the yeas are 89, the nays are 5. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to.

The PRESIDING OFFICER. The amendments of the Senator from Kansas fall.

Mr. ROBERT C. BYRD. Mr. President, may we have order so that people can understand what is being said?

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I understand that the two amendments of the Senators from Kansas are now displaced or whatever. They are gone.

The PRESIDING OFFICER. They were ruled to be nongermane.

Mr. DOLE. Mr. President, I would say this: I would certainly urge Members of both sides again to stay on the floor and to assist us in an effort to complete this bill as quickly as we can. There may be germane amendments offered. They will have to be dealt with. I would hope if we all stayed on the floor, or as many as can stay on the floor, it would be very helpful.

AMENDMENT NO. 5009

(Purpose: To remove the section of the bill relating to the payment of the prevailing rate of wage on construction work performed on highway projects on the Federal-aid systems)

Mr. NICKLES. Mr. President, I call up amendment No. 5009 and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Oklahoma (Mr. NICKLES) proposes an amendment numbered 5009.

Mr. NICKLES. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out section 226(b) of unprinted amendment numbered 1440.

Mr. HELMS. Mr. President, will the Senator yield to me on my time?

Mr. NICKLES. I yield.

Mr. HELMS. I thank the Senator.

Mr. President, I would refer Senators to Senate procedure, page 243, where it says:

After the adoption of a cloture motion, "no Senator shall be entitled to speak in all more than 1 hour on the measure, motion, or other matter pending before the Senate, or the unfinished business, the amendments thereto, and motions affecting the same * * *,"[93] but no Senator is restricted to one speech; he may divide his time as he sees fit or proper,[94] but all time is charged to the Senator having the floor, even if he yields for an interruption.[95]

I want to say for the record that, according to my understanding of the rules:

A Senator may divide his time as convenient and as the time will permit, until his hour is consumed.

A Senator can parcel his 1 hour time only to himself. He cannot yield to another Senator.

After a cloture motion has been made, but before it has been adopted a Senator would then have, as a matter of right, the privilege, if he obtained the floor, of presenting and having read by the clerk an amendment to the so-called substitute pending before the Senate.

Mr. President, I ask unanimous consent that certain documentation be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Mr. SMITH. Mr. President, I rise to propound a parliamentary inquiry. As I understand the operation of Rule XXII, a Senator may speak in all one hour, but may divide his time, as is convenient and as the time will permit, until his hour is consumed. Am I correct in that?

The VICE PRESIDENT. That is my understanding.

Mr. HEFLIN. Mr. President, it is my understanding that a Senator can speak only once and not over an hour.

Mr. SMITH. My interpretation of the rule is that the Chair shall keep a record of the time consumed, and that a Senator may divide his time.

Mr. MANSFIELD. While a Senator can parcel out his time, he can parcel it out only to himself. Is that correct?

The VICE PRESIDENT. That is correct.

Mr. MANSFIELD. So far as amendments are concerned, if they are offered at the conclusion of the hour allocated to a Senator, they will then be nondebatable.

The Chair is further informed, however, that after a cloture motion has been made, but before it has been adopted, a Senator would then have, as a matter of right, the privilege, if he obtained the floor, of presenting and having read by the clerk an amendment to the so-called substitute pending before the Senate.

Mr. NICKLES. Mr. President, the amendment that I have called up is not a dilatory amendment. It is an amendment that is germane. It deals with the subject of Davis-Bacon. I will keep my remarks very brief.

Mr. President, I would like to take a few moments to discuss the Davis-Bacon extension to the 4-R—resurfacing, restoration, rehabilitation and reconstruction—construction program which is contained in the House-passed bill and is part of the Senate Public Works Committee bill.

Both these bills invalidate section 113 of the 1956 Highway Act that clearly states Davis-Bacon applies only to initial construction and not to post-Interstate 4-R construction.

SECTION 113—PREVAILING RATE OF WAGE, INTERSTATE SYSTEM

(a) The Secretary shall take such action as may be necessary to insure that all laborers and mechanics employed by contractors or subcontractors on the initial construction work performed on highway projects on the Interstate System authorized under section 108(b) of the Federal-Aid Highway Act of 1956, shall be paid wages at rates not less than those prevailing on the same type of work on similar construction in the immediate locality as determined by the Secretary of Labor in accordance with the Act of August 30, 1935, known as the Davis-Bacon Act (40 U.S.C., sec. 276a).

(b) In carrying out the duties of subsection (a) of this section, the Secretary of Labor shall consult with the highway department of the State in which a project on the Interstate System is to be performed. After giving due regard to the information thus obtained, he shall make a predetermination of the minimum wages to be paid laborers and mechanics in accordance with the provisions of subsection (a) of this section which shall be set out in each project advertisement for bids and in each bid proposal form and shall be made a part of the contract covering the project. Pub.L. 85-767, Aug. 27, 1958, 72 Stat. 895.

I would like to analyze briefly the legislative history of section 113 of the 1956 Highway Act.

ANALYSIS OF LEGISLATIVE HISTORY OF SECTION 113 OF THE 1956 HIGHWAY ACT

Section 113 of title 23 of the United States Code provides for prevailing wage rates to be paid to "all laborers and mechanics employed by contractors or subcontractors on *the initial construction* work performed on highway projects * * *" funded under federal-aid highway law (emphasis supplied).

During the House debate on H.R. 10660 (The Federal Highway and Highway Revenue Acts of 1956), Representative Smith of Mississippi stated certain limitations intended by the legislation, so that—

"In the future it will be clear what the intent of the Committee was in writing in those limitations. First of all, the application is limited to the Interstate Highway System. Second, it is limited to the initial construction of that highway—not the maintenance or repair of the highway * * *"

In 1968, the law was amended to expand the application of section 113 to also cover the primary, secondary and urban systems. An attempt was made to delete the term "initial" from section 113. This was met with strong opposition from Representative Cramer who stated that the effect would be to include under the coverage of Davis-Bacon previously excluded construction work "that is performed after the highway is built, such as minor reconstruction, major repairs, possibly some maintenance functions and other small improvement or betterment projects." The attempt to delete "initial" from the language of section 113 failed.

When Congress enacted the Federal-Aid Highway Act of 1976, it established the 3R program for the Interstate System (resurfacing, restoration and rehabilitation). On April 29, 1977, the Office of the Chief Counsel of the Federal Highway Administration issued a legal opinion which specifically addressed the applicability of section 113 to the 3R program:

"You are advised that 23 U.S.C. 113 requiring the application of Federally established wage rates to Federal-aid highway projects does not extend to the R-R-R program. That section 113, by its terms, is limited to initial construction and the R-R-R program is designed to improve or restore the usability of existing roads, being thus predicated upon the existence of a highway facility that has already been constructed. Thus the R-R-R program precludes the initial construction element upon which the application of section 113 of Title 23, United States Code, is based."

On May 14, 1981, the Federal Highway Administration issued information stating that "title 23, United States Code, does not require the application of a prevailing rate of wage to Federal-aid highway contracts for resurfacing, restoration and rehabilitation project," and this was published in the Federal Register. After the enactment of the Post-Interstate Construction Program (Resurfacing, Restoration, Rehabilitation and Reconstruction (4R)) established by the Federal-Aid Highway Act of 1981, another notice was published (January 11, 1982) by the Federal Highway Administration regarding limited applicability of prevailing wage requirements to that program. 3R projects continued to be exempt from Davis-Bacon coverage, but 4R (reconstruction) projects or projects with at least 50 percent of the cost of the project for reconstruction would be covered by Davis-Bacon.

It seems clear that the intent of the basic federal-aid highway law was to limit the application of Davis-Bacon wage requirements to first-time or initial construction of our Nation's highway system, and not to its maintenance or upkeep. The 3R program is intended to improve or restore the usability of existing roads. Therefore 3R projects, by their very nature, lack the "initial" construction element of section 113, and should not be covered by Davis-Bacon.

At the time the provision requiring the payment of Davis-Bacon wage rates (Section 113) was inserted into H.R. 10660 (The Federal Highway and Highway Revenue Acts of 1956) much debate focused on the issue of states' rights and specifically, the appropriateness of "federal wage protection" being applied to highway construction of which an individual state was a party. Many of these same arguments could be made today, especially in light of the Administration's New Federalism policy.

For example, House Report No. 2022 contained Supplemental Views at pages 25-32, which sharply criticized the Davis-Bacon provision. These views were signed by five members of the Committee on Public Works (the Committee which inserted the Davis-Bacon language). Simply, the members believed that for "highway construction of which the State was a party . . . wages and working conditions have been prescribed by the fine State highway departments or other appropriate State agencies of these 48 sovereign States in conformance with the local economies . . ." They also warned that "Members of Congress may well be alarmed at this attempt to put Federal wage fixing on the highway program as a violation of State's rights and the spirit underlying our Constitution."

During the House debate this issue was raised again. Representative Smith of Virginia stated:

". . . if you adopt the Davis-Bacon provision, what you are doing is to impose another step on the march to do away with the powers and the sovereignty of the States, because under this bill you not only impose the provisions of the Davis-Bacon Act on the Federal money which you are disposing of, but you are requring the States, out of their 10 percent, to fix the same wage that is required under the Davis-Bacon Act. There is a direct and positive invasion of the sovereignty of the States in telling them how they shall spend their own money and what rate of wage they shall pay."

The states' rights issue was also fiercely debated in the Senate. Senator Knowland

feared the implication of passage of the Davis-Bacon language:

"It seems to me that the fundamental constitutional principle at issue today is whether we are to apply for the first time in this type of program Federal regulations upon the 48 sovereign States. . . . However, let us not in the future hear the plea for States' rights or for sovereignty of States. If today we override those rights and the sovereignty of the States, by giving to any Federal official, I care not what his party political affiliation may be, the right to override State authority and override State-established customs and laws. And to do so without any right of appeal. That is the fundamental issue before the Senate today. I am proud as one Republican in the Senate to appeal to my Democratic friends on the other side of the aisle: 'If you want to uphold the rights of the states in this Chamber, now is the time, this is the place, and this is the issue.' "

The above legislative history may appear a bit extreme, as it has been many years since the passage of the H.R. 10660. However the basic concept so diligently articulated by many members of Congress must not be overlooked.

The purpose of federal-aid highway law was to build new and improved highways and complete the interstate system. Today, this nation's highway system is essentially in place and the current task is to maintain the substantial capital investment that has previously been made in that system by the federal government and administered by the states. Why should the Federal government dictate the wages and working conditions of workers on repair projects within the control of the various states? Particularly in light of the current Administration's policy of New Federalism, it would seen appropriate that Davis-Bacon not apply to 3R program projects and that wage rates be determined by the local marketplace.

Additionally the regulations promulgated in January 1982 by the Secretary of Transportation would also be made inapplicable by this extension of Davis-Bacon to the 4R program. For my colleagues who are not acquainted with these regulations, I will read the pertinent paragraphs into the RECORD.

[From the Federal Register, Vol. 47, No. 6, Jan. 11, 1982]

Summary: This notice provides information on implementation of the new Post-Interstate Construction Program (Resurfacing, Restoration, Rehabilitation, and Reconstruction (4R)) established by the Federal-Aid Highway Act of 1981 and the limited applicability of prevailing rate of wage requirements to that program. Public comments are requested.

Supplementary Information: The Federal-Aid Highway Act of 1981 was signed into law by the President on December 29, 1981. Under this law, a new Post-interstate Construction Program is established which includes reconstruction as an eligible item for Federal-aid highway funding. Accordingly, the new program encompasses resurfacing, restoration, rehabilitation, and reconstruction (4R) projects.

Reconstruction, as provided for by the Federal-Aid Highway Act of 1981, includes, but is not limited to, the addition of travel lanes, interchanges, and overcrossings not included in the Interstate cost estimate and added to existing Interstate routes. Reconstruction also includes work on the Interstate System which was originally included as an eligible item for construction but has yet to be undertaken.

In accordance with the provisions of Federal-aid highway law incorporated in title 23 of the United States Code (23 U.S.C.), the FHWA has apportioned the Interstate (4R) funds authorized for fiscal year 1983 by the Federal-Aid Highway Act of 1981. The apportionments were made to the States, the District of Columbia, and the Commonwealth of Puerto Rico and were effective December 31, 1981. Accordingly, Interstate 4R funds are now available for obligation.

The FHWA previously determined that the prevailing rate of wage requirements of 23 U.S.C. 113 do not apply to resurfacing, restoration, and rehabilitation projects (46 FR 28735, May 14, 1981). The establishment of the new Post-Interstate Construction Program required the FHWA to define the applicability of 23 U.S.C. 113 to projects funded under this new program. Accordingly, the following information has been provided to the States in order to provide for the timely implementation of post-Interstate construction (4R) projects:

a. Wage rates established by the United States Department of Labor in accordance with the Davis-Bacon Act and required by 23 U.S.C. 113 to be used for initial construction projects on the Federal-aid highway systems shall not be incorporated in post-Interstate construction (4R) project contracts, except for those projects that provide for new construction. New construction for the purposes of this determination shall be projects which add new facilities to the existing roadway. This work would include such things as the addition of travel lanes, interchanges, grade separations, rest areas, or truck weigh stations.

b. the provisions of 23 U.S.C. 113 normally should not apply to post-Interstate construction (4R) projects where the work accomplished does not provide any new facilities as such projects are not included within the term "initial construction." These projects would normally provide for resurfacing, restoration, or rehabilitation of facilities that are already in place or incidental construction such as landscaping or guardrail.

c. When an Interstate (4R) project consists of a combination of the work described in a. and b. above, 23 U.S.C. 113 is applicable if the new construction described in a. above is estimated to represent at least 50 percent of the cost of the total project.

R. A. BARNHART,
Federal Highway Administrator.

It is clear, then, despite claims from some members of the house that currently the 4-R program is exempt from Davis-Bacon prevailing wage requirements. This is as it should be. State highway officials do not want Davis-Bacon extended to the 4-R program, and in fact, do not want Davis-Bacon coverage at all. Mr. Richard Ward, director and chief engineer of the Oklahoma Department of Transportation, testified before the Labor Subcommittee in April 1981 and had this to say abut the Davis-Bacon Act:

Mr. Chairman and members of the Subcommittee, I am pleased to appear before you today to discuss the Davis-Bacon Act as it affects the contruction of transportation facilities in our states.

I am Richard A. Ward, Director and Chief Engineer of the Oklahoma Department of Transportation. I am appearing in my capacity as the chief administrative officer of that department and also as President of the American Association of State Highway and Transportation Officials, which represents my counterparts from across the nation.

To begin this testimony, I would first like to state for the record the official position of AASHTO on the Davis-Bacon Act. It was adopted by a unanimous vote of chief administrative officers comprising the Policy Committee at our meeting last November, and reads as follows:

"The protection of the Davis-Bacon Act are no longer necessary or appropriation in today's economy. In fact, those protections have significantly contributed to the rapid escalation of highway construction costs, thereby reducing projects and limiting employment opportunities".

I share that position, only after first reviewing its long history and my own experience with the Act. We took into consideration the original goals of the Davis-Bacon legislation, which was to ensure the payment of fair wages for public construction projects during the Great Depression. We found that the conditions leading to the legislation have long ceased to exist. We are aware of the protections now provided by our minimum wages, the strength today of the organized labor movement, the complexity of modern construction, the increasing requirements for skilled personnel and other factors which in our judgment combine to assure that adequate wages will be paid in transportation construction whether or not there is a Davis-Bacon Act. It was our conclusion that the Act has minimal justification in the world of the 1980's.

We also looked at the issue of added costs to our taxpayers from the Davis-Bacon Act. These costs are frankly very difficult to measure, and vary depending upon the part of the nation. It is difficult to find cost comparisons in that most transportation construction has been under the Act for a long time, and there are few comparable non-Davis-Bacon impacted projects.

We have found that the affects of the Act are more marked in our rural states, and for projects in rural areas. These projects should be the natural domain of the small contractor, using local labor that is commonly paid a wage commensurate with local living costs but below wage demands in large urban areas. The requirements of the Act will often prevent the small contractor from successfully bidding on a project, either because the wage rates required are too excessive for his financial capacity, or because the paperwork demands are excessive, or both.

Some of our member departments feel that the presence or absence of the Davis-Bacon Act would make little real difference in their contract prices, because of the presence of a strong local labor market receiving uniformly high wages in excess of union scale. Others see it differently, but in balance it is believed the Act does increase project costs. Part of that increase is caused by the peculiarities of the Act itself.

For example, consider what can occur when a federal determination is made that a higher rate class of work should be assigned to a given task, when the responsible state officials believe a lower rate is proper. Perhaps the class incident of this kind occurred in 1977 in the Metropolitan Washington area, when the state of Virginia faced this issue on a 1.6-mile section of Interstate 66. The Virginia State Highway Department believed certain workers should be paid "high-

way" wages, but the Department of Labor made an arbitrary judgement that "heavy" construction rates should apply instead. Virginia paid "highway" wages for the same work in the past, only the specific geographic area of the project varied. That situation was resolved, but if the Department of Labor's judgment was left to stand it would have heavily increased direct labor costs.

But the Virginia case serves to point up what are perhaps the most pervasive and unjustifiable indirect costs created by the Davis-Bacon Act, those associated with administering the Act, and the time delays that often result. These costs are not commonly recognized, but are well known to our member departments.

In the Virginia situation, a time delay naturally occurred because of the necessity to settle the dispute. That time delay translated into increased indirect project costs, because of inflation. As usual, the taxpayers paid those costs.

Beyond the time delay cost increases, the Virginia dispute also required the employment of lawyers by the state and the Federal Department of Transportation, along with other experts. The cost of this was also paid by the general public, in the form of higher taxation.

More routinely, I and all of my counterparts must employ a number of persons who do nothing but handle the paperwork required to administer the Davis-Bacon Act. From the standpoint of producing a mile of highway, a bus stop, a rail siding or the like, that time is totally unproductive. Nor does it end there.

On the contractor's side, there are also people working to handle the paperwork required under the Act. Those people are not paid by the contractor, but by the public as part of the bid price.

Finally, within the Federal government there are many persons whose job is to enforce the Davis-Bacon Act, and to make the countless rulings it requires. All of this could perhaps be justified, if the purpose for doing it was valid and meaningful results were obtained.

Our Policy Committee members weighed what we regard as the limited social need of today for the Davis-Bacon Act, against the increased direct costs that result from its provisions on some projects and the indirect administrative costs that are always present. In our judgement, those costs far outweigh any limited benefits that might result. Thus, we believe the Act has outlived its usefulness.

One of today's problems with the American economy is our lack of productivity. For my department, repeal of the Davis-Bacon Act, or at least a sharp decrease in the seemingly endless paperwork it requires, would increase our productivity. If I could utilize the person hours now spent on Davis-Bacon Act paperwork to design projects, repair old roads, or supervise the construction of new roads, then we would be more productive for the citizens of Oklahoma. The result would be that I could deliver more transportation facilities for the dollar, with essentially the same wages.

I hope these brief general comments are of use to this Subcommittee. To the extent possible, I will be pleased to respond to detailed questions you may have, either now or in writing at a later time.

In closing, we appreciate the opportunity to express our viewpoint on the Davis-Bacon Act.

Moreover, the small contractors who are excluded from bidding because of the outlandish Davis-Bacon prevailing wage requirements certainly are opposed to this extension of the Davis-Bacon Act to 4R work. This year the National Federation of Independent Business (NFIB) testified before the Senate Small Business Committee's Subcommittee on Government Procurement on the Davis-Bacon threshold which is currently a ridiculously low $2,000. Against, for the benefit of my colleagues, I will read the NFIB statement into the RECORD:

The National Federation of Independent Business (NFIB), which has in excess of 500,000 small business members, is pleased to participate in this hearing regarding the impact of the $2,000 Davis-Bacon contract threshold on small construction firms.

As of October, 1981, about 57,426 of NFIB's members were small construction firms. These firms employed a total of about 853,105 people. About one-third of these construction firms are on government contract. Because NFIB represents such a broad sampling of the small business community, and such a significant percentage of NFIB's members are subject to the Davis-Bacon Act, it is easy to see that the law can have an impressive affect on the economy.

NFIB members have voted overwhelmingly to support repeal of the Davis-Bacon Act not only because of regulatory, paperwork and other cost burdens imposed on contractors, but because the law is obsolete and inflationary.

The Act's requirement that federal contractors pay the "prevailing wage" was intended by Congress to mean that contractors pay the average wage paid to each trade on private "projects of a character similar to (the federal) contract work in the city, town, village or other civic subdivision", where the public project was to be located. Major problems that have arisen in the interpretation of this ambiguous statute, and that remain today, are: just what is "prevailing", what is "a character similar", and what is immediate "city, town . . ."?

The Department of Labor (DOL) has so misconstrued the law that implementation costs associated with paperwork, regulations regarding helpers and learners and inflationary formulas for determining the prevailing wage have driven the costs of federal construction to unprecedented levels.

IMPACT ON SMALL BUSINESS

The Act has proven to be especially burdensome to small businesses because it discourages them from bidding on federal projects. This is because the Department of Labor prevailing wage determination is more often than not higher than the true wage in an area. Once a business accepts a federal construction contract and agrees to pay the prevailing wage as determined by the Department of Labor, it often feels compelled to pay all of its employees the prevailing wage, whether or not they work on the federal project. Also, once the project is complete, the firm often feels that if it reduced wages to the level paid before it entered the federal contract, labor relations would be strained. As a result, only large businesses, usually located in urban areas, feel comfortable in bidding on a federal project.

In addition to disrupting wage scales, the current DOL implementing regulations severely limit the use of helpers and trainees. This limitation is costly to contractors because it necessitates paying wages that exceed the productivity yield of inexperienced workers.

The implementing regulations also require substantial paperwork. Perhaps the most burdensome is the requirement for a weekly submission of the contractor's payroll records to the Department of Labor. A small contractor cannot afford to hire the staff, or a specialized firm to do this work.

The costs of these inflated wages and paperwork requirements go far beyond the payroll. They increase an employer's unemployment compensation taxes, his workers' compensation taxes and his social security taxes. Some of these costs can be passed on to the customer (the Federal Government), and some can be accommodated for by hiring fewer people. The aggregate effect is a higher unemployment rate, a higher inflation rate and a bigger federal deficit.

RECOMMENDATIONS

The most desirable action Congress could take in regard to the Davis-Bacon Act is to repeal it. In the alternative, the Act should be amended so as to be applicable to firms that have a federal contract of $1,000,000 or more. This would have the effect of exempting from Davis-Bacon provisions the majority of federal construction contracts.

The Office of Federal Procurement Policy reports that in Fiscal Year 1981, the Federal Government was party to 7,906 construction contracts for over $10,000 (See Table I). Of these, about 822 (10.40%) were for more than $1,000,000. These projects are usually quite significant and employ many people. However, small companies (20 or fewer employees) rarely, if ever, enter into a contract of this size. They must confine their activities to smaller contracts or subcontracts. A large company, however, is capable of bidding on large contracts as well as small contracts. Consequently, the effect of a $1,000,000 threshold would be to exempt from Davis-Bacon requirements those contracts that small businesses are most likely to be awarded. This would eliminate small business inhabitions about bidding on a federal construction contract.

This exemption would cover about 85 to 90 percent of all the federal construction contracts. However, it would only cover about 15 to 20 percent of the total federal dollars obligated under federal construction contracts. We can fairly assume that because the 85 to 90 percent exempted contracts account for only 15 to 20 percent of the obligated federal dollars, the vast majority of workers on federal projects are employed by firms that have a federal contract over $1,000,000. This is because in the universe of federal construction contracts, the number of employed workers will be directly proportional to the size of the contract. The 822 federal contracts over $1,000,000 account for 84-46 percent of total obligated federal dollars. Consequently, the 822 federal contracts over $1,000,000 account for the vast majority of people employed and subject to the Davis-Bason Act.

A $1,000,000 Davis-Bacon contract threshold would eliminate a very costly burden to many small businesses. However, it would have no effect on the vast majority of workers on federal construction projects. If the small business sector of our economy is expected to continue to be the nation's economic foundation, then an amendment to this law is one of many legislative actions that are necessary.

So, over the objections of the State officials, the small contractors, and

numerous other concerned parties, we are faced with an extension of the Davis-Bacon Act—a costly, counterproductive extension—ridiculous during this time of belt tightening.

Both the Washington Post and New York Times have seen through this folly. Both papers have editorialized against this extension.

Mr. President, I would like to read from these editorials.

The Post editorial hits the nail on the head, and I quote again:

> The Davis-Bacon Act, which, as currently applied, significantly increases wage costs on many construction projects. * * * If the unions try to tell you that Davis-Bacon doesn't drive-up wages, ask them why they are pressing so hard to extend it.

Of course, who is the one party that benefits from an extension of the Davis-Bacon Act? The building trades unions, and I might point out, at the expense of their own members, as well as the taxpayers. Outlandish, artificially propped up Davis-Bacon wage rates only lead to a greater share of the market going non-union and fewer skilled union members working.

One only has to look at the sharp dropoff of the membership of the building trades in recent years to understand this. But of course, Davis-Bacon coverage makes the jobs of union business agents and their people here in Washington easy—they do not have to worry about productivity, work rules, and the give and take of collective bargaining because they are assured of a high wage floor.

Perhaps there is a real injustice here—high wages but no union jobs. I suspect that this proposed extension will indeed have a short-term benefit for the building trades—more union jobs now—at a future cost to the trades of both members and work once the nonunion competition adjusts to the situation. Only time will tell.

In any event, Mr. President, now that the Public Works Committee has seen fit to open up the question of Federal labor standards provisions, it is my intent to offer a choice to the Senate to expand Davis-Bacon coverage at great expense or to restrict the coverage and let the States determine their contracting policies.

The Senate should bite the bullet now, and settle this problem before the start of the fiscal year 1984 budget process. With a prospective budget deficit approaching $200 billion, we cannot afford to look the other way when sacred cows like Davis-Bacon are wasting billions of tax dollars annually. The Senate will act on Davis-Bacon sooner or later, and it clearly is to our advantage to do it now before the start of the next budget cycle.

I ask unanimous consent that the editorials be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 10, 1982]

IT ONLY LOOKS LIKE A JOBS BILL

For a brief moment it appeared that the lameduck session of Congress might produce a quick, clean bill to repair roadways and revive mass transit by increasing taxes on gasoline and heavy trucks. President Reagan and the Congressional leadership had all signed on. It looked like a sure thing—and a good one, too.

It doesn't look so good any more. The House has approved a version loaded with undesirable amendments, and the Senate Finance Committee has added another. The Senate would do well to adopt the far preferable substitute just proposed by its Democratic minority. Failing that, if the Senate has any pride it will produce a bill free of contaminating amendments.

The original proposal had four commendable goals: repair of rotting roads and bridges; improvements in mass transit; a 5-cent increase in the gasoline tax that would induce conservation, and higher taxes on heavy trucks. It also had a basic weakness: the idea that it would also meet a fifth goal by becoming a "jobs" program. It wouldn't have gotten anywhere politically without appearing to create jobs—320,000 of them in construction and related industries. But the increased taxes would probably kill off as many jobs in other industries.

Then the House compounded the problem, piling on noxious amendments in the name of creating more employment, but actually raising costs and reducing the net number of jobs created.

A "Buy American" amendment requires that road repair materials be bought in this country, even when cheaper foreign materials are available. A "domestic content" amendment requires that any buses or subway cars purchased have a specified amount of American components, also closing out lower-cost foreign suppliers. Both amendments follow a protectionist path that can only lead to trade war and fewer jobs.

Still another amendment expands the scope of the Davis-Bacon law, which would artificially inflate pay scales on public works projects.

Then the Senate Finance Committee got into the act by cutting the proposed increase in truck taxes. On the well-founded theory that heavy trucks do disproportionate damage, the Administration proposed taxing them more. Even that proposal was sugarcoated; it would have relaxed size and weight limits, changes long sought by the trucking industry. Truckers fought the tax increases anyhow, and succeeded in the Finance Committee.

If these amendments stand, they will turn a useful initiative into a solution that is worse than the problem. There's a better way. A bill proposed by Senate Democrats would create a broader public works bill providing twice as many jobs. It would be paid for in more appealing way—by trimming the tax cut next July for people with high incomes. This proposal would provide more stimulus on the jobs side and less negative effect on the tax side. Its weakness is that it leaves gasoline and truck taxes right where they are.

Congress is determined to do something quickly in response to rising unemployment. The realistic expectation is that the Democrats' proposal won't pass, and that the President would veto it if it did. Probably the best hope is that this Congress, in its dying days, and in the name of relieving hardship, will kill the amendments that pander to special interests. Lame duck need not mean lame law.

[From the Washington Post, Dec. 10, 1982]

THE GAS TAX—WITH DECORATIONS

The gas-tax-and-highway-repair bill is rapidly turning into this year's biggest Christmas tree. So far, there have been three especially damaging additions.

While creating new jobs is not the purpose or likely effect of this legislation, every effort should be made to get as many jobs out of the program as possible. The best way to do it would have been to amend the Davis-Bacon Act, which, as currently applied, significantly increases wage costs on many construction projects.

Instead, the bill would actually make the situation worse by extending Davis-Bacon requirements to repair work now primarily done by small contractors who pay lower wages. It means that perhaps 40,000 fewer jobs will be created each year. If the unions try to tell you that Davis-Bacon doesn't drive up wages, ask them why they are pressing so hard to extend it.

Another self-defeating provision of the House bill would stiffen the "Buy American" limits on imported construction materials and rolling stock. That would also drive up construction costs, ensuring that fewer repair and construction projects are completed.

Still worse, the Senate bill fully exempts gasohol from the tax. That is a truly destructive amendment. For years American farmers have dreamed of a boom in gasohol—one-tenth alcohol, nine-tenths gasoline—to eat up their surplus stocks of grain and do for their prices what the two great oil crises of the 1970's did for oil prices. The chairman of the Senate Finance Committee, Robert J. Dole, is from a farm state.

Gasohol is already exempt from the present 4-cent federal tax. If it is exempted from the next 5 cents as well, the total exemption is worth 90 cents a gallon for the grain alcohol going into the mixture. Cars with gasoline engines can run on gasohol without modification. If this enormous new subsidy becomes law, two things will happen. First, there will be a huge swing to gasohol simply because it will be, courtesy of the U.S. Treasury, cheaper than gasoline. It is quite possible that the swing would be large enough that, far from raising new revenue, the bill would reduce the amount raised by the present tax.

Next, in the longer run, the subsidy would divert very large amounts of grain from the food supply to the highway fuel supply. It is hard to imagine a more wanton misuse of food, or a more foolish way to raise grain prices. If the gasoline bill is passed with the gasohol exemption, President Reagan would do well to veto it.

Mr. NICKLES. Mr. President, in summary, to explain to my colleagues what this amendment will do, so they know a little bit of history, in 1956 when the Highway Act was initially passed, it stated that Davis-Bacon would apply but it would only apply to initial construction. We are talking about the initial construction of highways. What we have seen under the passage of the bill, both in the House and also as it came from the Public Works Committee, is the word "initial" was taken out, and Davis-Bacon would apply to the four R's.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. NICKLES. The administration on Monday, January 1, 1982, put in the Federal Register some rules whereby Davis-Bacon requirements would be exempt from the so-called four R's. I will read part of the rules. It says:

> The wage rates established by the United States Department of Labor in accordance with the Davis-Bacon Act and required by the U.S. Code to be used for initial construction projects on Federal highways systems shall not be incorporated in post interstate construction 4-R project contracts except for those projects that provide for new construction. New construction for purposes of this determination shall be projects which add facilities to the existing roadway. This work would include such things as additional travel lanes, interchanges, grade separations, restoration or truck weigh stations.

Mr. ARMSTRONG. Mr. President, the Senate is not in order.

The PRESIDING OFFICER. The Senate will be in order. Will conversations please cease among Senators in the Chamber?

Mr. NICKLES. I thank the Chair.

It also goes further in making the rules. It says:

> The provisions of Davis-Bacon normally should not apply to post interstate construction 4-R projects where the work accomplished does not provide any new facilities and such projects are not included within the term "initial construction." These projects would normally provide for resurfacing, restoration or rehabilitation of facilities that are already in place or incidental construction such as landscaping or guardrails.

Mr. President, that is a very commonsense, solid ruling that would be overturned if we leave the language as it is in the bill.

The amendment that I have offered would take it out and leave it exactly as it was in prior law.

Under the bill we have before us, and also as the bill was passed before, we have seen an expansion of Davis-Bacon coverage to projects, the so-called 4-R projects, restoration projects.

I think if one looks at it they will see it is commonsense. I think it will help and it will also make jobs. If we leave the provision as it is today, you cannot really say that is a jobs bill because it flies in the face of being a jobs bill. Actually, it is going to cost jobs. If we do not adopt this amendment you are going to have fewer jobs.

If you want to have a pro-job vote, regardless of whether or not the bill itself is, and that can be debated on its merits, certainly this is a pro-jobs amendment.

If you want more jobs, if you want to allow the marketplace to work, if you do not want to have the Department of Labor going in and saying, "Yes, you are going to fix some potholes or you are going to do some repair or restoration on the highway," if you do not think the Federal Department of Labor in Washington, D.C., should be going into your county in North Dakota or your county in southern Virginia to be telling your people what they should be making for a small project, I hope you will support this amendment.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GRASSLEY. Mr. President, I rise in support of Senator NICKLES' amendment which seeks to restore Davis-Bacon requirements on construction projects in this bill to existing coverage. As the Surface Transportation Act was approved in the House and also in the Senate version, Davis-Bacon requirements were substantially expanded to cover all rehabilitation, resurfacing and restoration. In the past, applicability of Davis-Bacon wage rate determinations have only been limited to new construction.

As my colleagues are aware, the Surface Transportation Act has the capacity to create 320,000 jobs in an economy suffering from 10.8 percent unemployment. However, I contend that we would create additional jobs if the inflated construction wages and restrictive practices of the Davis-Bacon Act were limited to existing coverage. Studies published by the General Accounting Office and the Council of Economic Advisers have conseratively estimated that Davis-Bacon requirements increase the cost of Federal and federally assisted construction by at least 10 percent. Applying this estimate to the number of jobs generated through the components of this bill, a significant number of additional jobs could be provided to the unemployed.

For those of us who have tried in the past to address the inequities in this outmoded law, it is disturbing to note that the needless expansion of this act is a step backward. It also seems ironic that this expansion of Davis-Bacon occurs in a bill which is supposed to provide employment opportunities for our unemployed.

The original intent of this law, to protect local contractors from unfair competition during the depression, is no longer valid. The practical effect of the Davis-Bacon Act has often been the establishment of artificially high wage determinations that do not truly reflect local wages. For 50 years, the act has increased the cost of Federal construction by billions of dollars and impeded the use of the unskilled, minorities and other highly unemployed work sectors.

We have the opportunity with this amendment to provide more jobs and make the greatest possible use of our limited resources. I urge my colleagues to join me in supporting this amendment which merely maintains existing coverage of Davis-Bacon requirements.

Mr. PACKWOOD. Mr. President, I rise in support of the Davis-Bacon provisions of H.R. 6211 for a number of reasons. We know very well that this law has the effect of protecting the standard of living of construction workers in their communities. But it is often overlooked that this law provides important benefits to small construction contractors attempting to survive in the very competitive construction business. In 1979 the Senate Committee on Labor and Human Resources confirmed that the Davis-Bacon Act is of particular importance to the smaller contractors, especially the small, minority contractor. Following hearings on the act, that committee stated:

> The testimony * * * made it clear that the smaller Federal construction jobs, because of the equality of bidding opportunity provided by Davis-Bacon, serve as entry for small contractors into the construction industry. The smaller contractor may compete with larger contractors because of the control upon wages. Because of the greater concentration of minority contractors in the ranks of these smaller contractors, the entry of minority contractors into the construction industry will be severely curtailed if the Davis-Bacon provisions are lifted from smaller Federal jobs (Senate Report No. 96-259, p. 15, July 26, 1979).

The contractor associations which represent the smaller construction contractors have recognized the special importance of Davis-Bacon for their members. Thus, the National Electrical Contractors Association has stated:

> If you eliminate the Davis-Bacon provisions * * * you have opened this up primarily where it affects small businesses very badly. And, you have unethical people bringing in unskilled labor and letting them into that whole area where the small business could do a very good job; and let the ethical contractors who would be employing people at the prevailing wage be subject to competition from more unethical and unscrupulous contractors. You are opening a great deal of possible liability there. * * *
>
> This is also probably the primary basis of what the original rationale for Davis-Bacon was. It is the employees of small business, the contractor on smaller jobs who are most liable to be hurt by the elimination of Davis-Bacon. (Senate Report No. 96-259, July 26, 1979, p. 11.)

It is clear, therefore, that the Davis-Bacon Act provides important protections to workers, the Government, and contractors. It is equally clear that Davis-Bacon is of particular importance to the small contractors, many of whom are also minority contractors.

If H.R. 6211 can be used as a vehicle to provide jobs and to create business opportunities for small contractors, I favor it. These businesses have been injured by the recession almost more than any other group. They need all the help they can receive and I sup-

port this measure as one small step in the march to do that.

Mr. President, I ask unanimous consent that a letter from Mr. Bob Georgine, president of the AFL-CIO Building Trades Union, be included at the end of my statement.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

BUILDING AND CONSTRUCTION TRADES DEPARTMENT—AFL-CIO, AMERICAN FEDERATION OF LABOR—CONGRESS OF INDUSTRIAL ORGANIZATIONS,

Washington, D.C., December 8, 1982.

Hon. BOB PACKWOOD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PACKWOOD: In the next several days, the Federal-Aid Highway Improvement Act of 1982 (S. 3043) will come before the Senate for your consideration. As you know, S. 3043 directs that the 5-cents-per gallon increase in the federal gas tax be used for construction on the Nation's highways, including the sorely needed resurfacing, restoration, rehabilitation and reconstruction of those highways and bridges.

The reported bill contains a provision to ensure that the status quo regarding Davis-Bacon labor-standards protections will be preserved for the construction workers performing the jobs created by this bill. This provison will not expand Davis-Bacon coverage, but will simply reassert that prevailing wage standards are to apply to federal highway reconstruction, rehabilitation, resurfacing and restoration.

By way of background, in 1956 the Congress enacted the original Federal-Aid Highway Act which authorized the construction of the Interstate Highway System. At that time, Congress carefully and thoroughly considered the manner in which the prevailing wage standards of the Davis-Bacon Act would apply to highway work. After extensive Congressional hearings and debate on this issue alone, the Congress tailored the Davis-Bacon provision to the unique nature of highway construction so as to ensure that prevailing wage determinations would accurately reflect local community labor standards. Thus Congress directed the Secretary of Labor to issue wage determinations based on the rate prevailing in the "immediate locality" and also directed the Secretary of Labor to consult with the highway department of the state in which the construction was to be performed and to give "due regard" to state wage information so provided.

The Congress also provided that the Davis-Bacon Act would apply to the "initial construction" of the interstate highway system. This language was inserted simply to indicate that the routine maintenance and repair of the system which was to be carried out by state highway departments with state funds would not be subject to the federal Davis-Bacon law, but rather would be carried out in accordance with applicable state labor standards. Therefore, the 1956 law provided that the initial federally financed construction of the system would be performed in accordance with the federal prevailing wage standards applicable to all other types of federally financed and assisted construction work. It was not contemplated by Congress in 1956 that the term "initial construction" was intended to exclude from prevailing wage protections any federally financed work.

In 1968, the Federal-Aid Highway Act was expanded to cover construction of primary and secondary systems as well as their extensions in urban areas. Congress once again applied Davis-Bacon to this type of construction. By 1976, it became clear that Congress would have to authorize additional funds for the restoration, resurfacing, rehabilitation and reconstruction of the system which had deteriorated in the previous twenty years. To ensure that there was no administrative misunderstanding as to the Congressional intent to apply Davis-Bacon to this work, Congress enacted a clarifying amendment in 1976 to specifically provide that resurfacing, rehabilitation and restoration work was included within the definition of construction. ("Reconstruction" had been placed in the definition in 1956).

This clarification was necessary to confirm that Davis-Bacon protections would continue to apply to all federally funded aspects of the work, while continuing to allow the states to perform routine repair and maintenance under applicable state labor protective statutes.

In accordance with the Congressional intent as expressed in 1956, 1968 and 1976, from 1956 to 1981 the Federal Highway Administration included prevailing wage requirements in all contracts for federally funded highway construction, reconstruction, resurfacing, rehabilitation and restoration. However, in May 1981, the Federal Highway Administration changed its policy and determined that Davis-Bacon coverage on restoration, rehabilitation and resurfacing work on the federal-aid systems would not be applicable. In January 1982, the Federal Highway Administration ruled that Davis-Bacon would also not apply to federally funded reconstruction unless it was commingled with at least 50 percent of so-called "new" construction. The FHA based both of these actions on an interpretation of the word "initial" which has the practical effect of eliminating Davis-Bacon coverage for reconstruction, resurfacing, rehabilitation and restoration work on the highway system.

We support the Committee bill that deletes the word "initial" from the Davis-Bacon provisions of the law in order to clarify this matter. The effect would not be to expand Davis-Bacon coverage, but simply will be to continue in force the status quo as it existed from 1956 to 1981. Without this provision, a significant part of the construction work authorized by S. 3034 could be performed by workers receiving substandard wages that would not be in accordance with rates prevailing in their immediate communities.

Therefore, on behalf of the Building and Construction Trades Department and the four million construction workers it represents, I urge you to support the provision in S. 3043 to preserve twenty-five years of Davis-Bacon protection for the workers engaged in constructing and rebuilding our Nation's highways and bridges and to vote for final passage of this measure with this protection.

Sincerely,

ROBERT A. GEORGINE,
President.

Mr. KENNEDY. Mr. President, the Senator from Oklahoma and the Senator from Colorado have asserted that we have acted to expand Davis-Bacon coverage under the highway act.

I want to clarify the record on this point. The Senate has tonight acted to restore the status quo with respect to Davis-Bacon which until May of 1981, had been applied to all federally funded highway construction for over 25 years.

The committee amendment does not expand Davis-Bacon coverage. It simply reaffirms the view that all Federal aid highway construction activity including resurfacing, restoration rehabilitation and reconstruction are subject to the Davis-Bacon Act.

That has been the law since 1956 when the Highway Act was first enacted. That position was reaffirmed in 1968 when the Highway Act was expanded to cover construction of primary and secondary systems and again in 1976 when a clarifying amendment specifically provided that resurfacing, rehabilitation and restoration work of the Interstate System was covered by Davis-Bacon.

In accordance with the congressisonal intent as expressed in 1956, 1968, and 1976, from 1956 to 1981 the Federal Highway Administration included prevailing wage requirements in all contracts for federally funded highway construction, reconstruction, resurfacing, rehabilitation, and restoration. Throughout this 24-year period, there was a clear understanding about the application of Davis-Bacon to federally funded work and little criticism of the provision. In May 1981, the Federal Highway Administration unilaterally decided to change the policy of 25 years of Davis-Bacon coverage on reconstruction, restoration, rehabilitation, and resurfacing work on the Federal-aid systems.

In January 1982, the Federal Highway Administration ruled that Davis-Bacon would cease to apply to federally funded reconstruction unless it was commingled with at least 50 percent of so-called new construction. The FHA based both of these actions on an erroneous and limiting interpretation of the word "initial" which has the practical effect of eliminating Davis-Bacon coverage for reconstruction, resurfacing, rehabilitation, and restoration work on the highway system.

But for this arbitrary, administrative action, it would not now be necessary to amend the language of the Federal-Aid Highway Act to delete the word "initial" from the Davis-Bacon provisions of the law. Some confusion has arisen because it has appeared that this provision would expand Davis-Bacon coverage to Federal construction hitherto not covered. This will not be its effect. The effect simply will be to continue in force the status quo as it existed from 1956 to 1981. If this provision is not enacted, the long-standing intent of Congress and the 25-year administrative practice of applying Davis-Bacon prevailing wage standards to federally funded highway reconstruction, resurfacing, rehabilita-

tion, and restoration work will be eliminated. It is unfortunate that the action of the Federal Highway Administration has made this provision necessary, but in practical terms, if it is not enacted, a substantial part of the construction work authorized by H.R. 6211 will be performed by workers receiving substandard wages that will not be in accord with rates prevailing in their immediate communities.

Mr. STAFFORD. Mr. President, I move to table the amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Oklahoma. The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona, (Mr. GOLDWATER) and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Washington (Mr. JACKSON) and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PELL) and the Senator from Washington (Mr. JACKSON) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 48, nays 46, as follows:

[Rollcall Vote No. 457 Leg.]

YEAS—48

Andrews	Eagleton	Metzenbaum
Baker	Ford	Mitchell
Baucus	Glenn	Moynihan
Bentsen	Hart	Murkowski
Biden	Hatfield	Packwood
Bradley	Heflin	Percy
Bumpers	Huddleston	Proxmire
Burdick	Inouye	Randolph
Byrd, Robert C.	Johnston	Riegle
Chafee	Kennedy	Sarbanes
D'Amato	Leahy	Sasser
Danforth	Levin	Specter
DeConcini	Long	Stafford
Dixon	Mathias	Stevens
Dodd	Matsunaga	Tsongas
Durenberger	Melcher	Weicker

NAYS—46

Abdnor	Gorton	Nunn
Armstrong	Grassley	Pressler
Boren	Hatch	Pryor
Boschwitz	Hawkins	Quayle
Brady	Hayakawa	Roth
Byrd, Harry F., Jr.	Helms	Rudman
	Hollings	Schmitt
Chiles	Humphrey	Simpson
Cochran	Jepsen	Stennis
Cohen	Kassebaum	Symms
Denton	Kasten	Thurmond
Dole	Laxalt	Tower
Domenici	Lugar	Wallop
East	Mattingly	Warner
Exon	McClure	Zorinsky
Garn	Nickles	

NOT VOTING—6

Cannon	Goldwater	Jackson
Cranston	Heinz	Pell

So the motion to lay on the table amendment No. 5009 was agreed to.

Mr. STAFFORD. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

Mr. ARMSTRONG addressed the Chair.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEFLIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama is recognized.

Mr HEFLIN. Mr. President, I call up printed amendment No.——

Mr. ARMSTRONG. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator from Alabama has the floor.

Mr. HEFLIN. I will take a minute or two and then the Senator can go after his point of order.

Mr. ARMSTRONG. Mr. President, I seek to make a point of order and ask to be recognized to debate this point of order at this time.

The PRESIDING OFFICER. Does the Senator from Alabama yield?

Mr. HEFLIN. I yield.

Mr. ARMSTRONG. Mr. President, at the time the motion to reconsider was before the body, I was on my feet seeking recognition. At the time the table motion was agreed to by unanimous consent, I was on my feet seeking to object to that unanimous-consent request, and therefore I ask the Chair to rule that the tabling motion has not been agreed to.

The PRESIDING OFFICER. If the Senator was seeking recognition at the time the vote was put, the Senator does have the right to be recognized.

Mr. ARMSTRONG. Is it the ruling of the Chair that the tabling motion then remains before the body?

The PRESIDING OFFICER. The Senator is correct.

Mr. ARMSTRONG. I thank the Chair, and I wish to speak to that motion, but I will be happy to defer to the Senator from Alabama so long as my right to do so is protected.

The PRESIDING OFFICER. The Chair would advise the Senator the motion to table is not debatable.

Mr. ARMSTRONG. Then I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is not a sufficient second. The question is on the motion. All in favor say "Aye."

Mr. ARMSTRONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Obviously, there is a quorum present. All those opposed?

Mr. ARMSTRONG. Mr. President, I ask for a division vote.

The PRESIDING OFFICER. A division is requested. Senators in favor of the motion will rise and stand until counted.

Mr. BAKER. In favor of the motion to table?

The PRESIDING OFFICER. In favor of the motion to table.

Mr. JEPSEN. Mr. President, point of order.

Mr. President, it appears to me that there are staff standing. I do not know how anyone could—unless Senators are at their chairs and staffs sit down on these votes, there is too much room for error.

The PRESIDING OFFICER. The Chair directs staff members who are present in the Senate Chamber to be seated. The count will not proceed until such time as they remain seated.

Those opposed will rise and stand until counted.

On a division, the motion to reconsider was agreed to.

Mr. ARMSTRONG. Mr. President, does the Senator from Alabama now seek the floor?

Mr. HEFLIN. Yes.

Mr. ARMSTRONG. If he does, I defer to him and will seek recognition at a later time.

The PRESIDING OFFICER. The Senator from Alabama does have the floor.

Mr. HEFLIN. I thank the Chair.

Mr. MELCHER. Mr. President, could we have the motion to table the motion to reconsider?

The PRESIDING OFFICER. It was just voted on.

The Senator from Alabama is recognized.

Mr. RIEGLE. Parliamentary inquiry. Would the Chair announce the vote on the division?

The PRESIDING OFFICER. The Chair did announce the vote.

Mr. RIEGLE. I mean the numerical vote.

The PRESIDING OFFICER. The Chair never announces the numerical division vote.

The Chair now recognizes the Senator from Alabama.

AMENDMENT NO. 4994

(Purpose: To delay the third-year tax cut to October 1, 1983, and transfer the revenue savings to the highway trust fund in place of increased gasoline, etc., taxes to expend for certain highway projects)

Mr. HEFLIN. Mr. President, I call up amendment No. 4994, which is a printed amendment, Calendar No. 987.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alabama (Mr. HEFLIN) proposes an amendment numbered 4994.

Strike out section 101 through section 132 and insert in lieu thereof the following new sections:

SEC. 101. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This title may be cited as the "Highway Revenue Act of 1982".

(b) TABLE OF CONTENTS.—

TITLE I—HIGHWAY REVENUE ACT OF 1982

SUBTITLE A—SHORT TITLE; TABLE OF CONTENTS; AMENDMENT OF 1954 CODE

Sec. 101. Short title; table of contents.
Sec. 102. Amendment of 1954 Code.

Subtitle B—Tax Changes

Sec. 111. Modification of tax cut.

Subtitle C—Highway Trust Fund

Sec. 121. Transfers to and expenditures from highway trust fund allocable to delay in tax cut.

SEC. 102. AMENDMENTS OF 1954 CODE.

Except as otherwise expressly provided therein, whenever in subtitle B an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SUBTITLE B—TAX CHANGES

SEC. 111. MODIFICATION OF TAX CUT.

(a) IN GENERAL.—Section 1 (relating to tax imposed) is amended—

(1) by striking out paragraph (2) of subsection (a) and inserting in lieu thereof the following new paragraph:

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $3,400	No tax.
Over $3,400 but not over $5,500	12% of the excess over $3,400.
Over $5,500 but not over $7,600	$252, plus 13% of the excess over $5,500.
Over $7,600 but not over $11,900	$525, plus 15% of the excess over $7,600.
Over $11,900 but not over $16,000	$1,170, plus 18% of the excess over $11,900.
Over $16,000 but not over $20,200	$1,908, plus 20% of the excess over $16,000.
Over $20,200 but not over $24,600	$2,748, plus 23% of the excess over $20,200.
Over $24,600 but not over $29,900	$3,760, plus 27% of the excess over $24,600.
Over $29,900 but not over $35,200	$5,191, plus 31% of the excess over $29,900.
Over $35,200 but not over $45,800	$6,834, plus 36% of the excess over $35,200.
Over $45,800 but not over $60,000	$10,650, plus 41% of the excess over $45,800.
Over $60,000 but not over $85,600	$16,472, plus 45% of the excess over $60,000.
Over $85,600 but not over $109,400	$27,992, plus 49% of the excess over $85,600.
Over $109,400	$39,654, plus 50% of the excess over $109,400.

(2) by striking out paragraph (2) of subsection (b) and inserting in lieu thereof the following new paragraph:

"(2) For taxable years beginning in 1983.—

"If taxable income is:	The tax is:
Not over $2,300	No Tax.
Over $2,300 but not ovr $4,400	12% of the excess over $2,300.
Over $4,400 but not over $6,500	$252, plus 13% of the excess over $4,400.
Over $6,500 but not over $8,700	$525, plus 15% of the excess over $6,500.
Over $8,700 but not over $11,800	$855, plus 18% of the excess over $8,700.
Over $11,800 but not over $15,000	$1,413, plus 20% of the excess over $11,800.
Over $15,000 but not over $18,200	$2,053, plus 22% of the excess over $15,000.
Over $18,200 but not over $23,500	$2,757, plus 26% of the excess over $18,200.
Over $23,500 but not over $28,800	$4,135, plus 30% of the excess over $23,500.
Over $28,800 but not over $34,100	$5,725, plus 35% of the excess over $28,800.
Over $34,100 but not over $44,700	$7,580, plus 38% of the excess over $34,100.
Over $44,700 but not over $60,600	$11,608 plus 45% of the excess over $44,700.
Over $60,600 but not over $81,800	$18,763, plus 49% of the excess over $60,600.
Over $81,800	$29,151, plus 50% of the excess over $81,800.",

(3) by striking out paragraph (2) of subsection (c) and inserting in lieu thereof the following new paragraph:

"(2) For taxable years beginning in 1983.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $3,400	12% of the excess over $2,300.
Over $3,400 but not over $4,400	$132, plus 13% of the excess over $3,400.
Over $4,400 but not over $6,500	$262, plus 15% of the excess over $4,400.
Over $6,500 but not over $8,500	$577, plus 16% of the excess over $6,500.
Over $8,500 but not over $10,800	$897, plus 18% of the excess over $8,500.
Over $10,800 but not over $12,900	$1,311, plus 20% of the excess over $10,800.
Over $12,900 but not over $15,000	$1,731, plus 22% of the excess over $12,900.
Over $15,000 but not over $18,200	$2,193, plus 25% of the excess over $15,000.
Over $18,200 but not over $23,500	$2,993, plus 28% of the excess over $18,200.
Over $23,500 but not over $28,800	$4,477, plus 33% of the excess over $23,500.
Over $28,800 but not over $34,100	$6,226, plus 37% of the excess over $28,800.
Over $34,100 but not over $41,500	$8,187, plus 41% of the excess over $34,100.
Over $41,500 but not over $55,300	$11,221, plus 46% of the excess over $41,500.
Over $55,300	$17,569, plus 50% of the excess over $55,300.",

(4) by striking out paragraph (2) of subsection (d) and inserting in lieu thereof the following new paragraph:

"(2) For taxable years beginning in 1983.—

"If taxable income is:	The tax is:
Not over $1,700	No tax.
Over $1,700 but not over $2,750	12% of the excess over $1,700.
Over $2,750 but not over $3,800	$126, plus 13% of the excess over $2,750
Over $3,800 but not over $5,950	$262.50, plus 15% of the excess over $3,800.
Over $5,950 but not over $8,000	$585, plus 18% of the excess over $5,950.
Over $8,000 but not over $10,100	$954, plus 20% of the excess over $8,000.
Over $10,100 but not over $12,300	$1,374, plus 23% of the excess over $10,100.
Over $12,300 but not over $14,950	$1,880, plus 27% of the excess over $12,300.
Over $14,950 but not over $17,600	$2,595.50, plus 31% of the excess over $14,950.
Over $17,600 but not over $22,900	$3,417, plus 36% of the excess over $17,600.
Over $22,900 but not over $30,000	$5,325, plus 41% of the excess over $22,900.
Over $30,000 but not over $42,800	$8,236, plus 45% of the excess over $30,000.
Over $42,800 but not over $54,700	$13,996, plus 49% of the excess over $42,800.
Over $54,700	$19,827, plus 50% of the excess over $54,700.".

(5) by striking out paragraph (2) of subsection (e) and inserting in lieu thereof the following new paragraph:

"(2) For taxable years beginning in 1983.—

"If taxable income is:	The tax is:
Not over $1,050	12 percent of taxable income.
Over $1,050 but not over $2,100	$126, plus 13 percent of the excess over $1,050.
Over $2,100 but not over $4,250	$262.50, plus 15 percent of the excess over $2,100.
Over $4,250 but not over $6,300	$585, plus 18 percent of the excess over $4,250.
Over $6,300 but not over $8,400	$954, plus 20 percent of the excess over $6,300.
Over $8,400 but not over $10,600	$1,374, plus 23 percent of the excess over $8,400.
Over $10,600 but not over $13,250	$1,880, plus 27 percent of the excess over $10,600.
Over $13,250 but not over $15,900	$2,595.50, plus 31 percent of the excess over $13,250.
Over $15,900 but not over $21,200	$3,417, plus 36 percent of the excess over $15,900.
Over $21,200 but not over $28,300	$5,325, plus 41 percent of the excess over $21,200.
Over $28,300 but not over $41,100	$8,236, plus 45 percent of the excess over $28,300.
Over $41,100 but not over $53,000	$13,996, plus 49 percent of the excess over $41,100.
Over $53,000	$19,827, plus 50 percent of the excess over $53,000.".

(b) CONFORMING AMENDMENT.—Clause (ii) of section 3402(a)(3)(B) of such Code (relating to tax collected at source) is amended by striking out "July 1, 1983" and inserting in lieu thereof "October 1, 1983".

SUBTITLE C—HIGHWAY TRUST FUND

SEC. 121. TRANSFERS TO AND EXPENDITURES FROM HIGHWAY TRUST FUND ALLOCABLE TO DELAY IN TAX CUT.

Section 209 of the Highway Revenue Act of 1956 is amended by adding at the end thereof the following new subsections:

"(h) ADDITIONAL TRANSFERS TO HIGHWAY TRUST FUND.—The Secretary of the Treasury shall transfer to the Highway Trust Fund, as provided by appropriation Acts, an amount equal to the increase in revenues during fiscal year 1983 which is allocable to the amendments to the tax tables of section 1 of the Internal Revenue Code of 1954 made by title I of the Highway Revenue Act of 1982.

"(i) EXPENDITURES FROM HIGHWAY TRUST FUND OF ADDITIONAL TRANSFERS.—Amounts in the Highway Trust Fund from additonal transfers pursuant to subsection (h) of this section shall be available, as provided by appropriation Acts, only for making expenditures to meet obligations of the United States which are attributable to Federal-aid highway projects which—

"(1) are authorized by law, and

"(2) are scheduled for completion within eighteen months of the date of the enactment of this subsection.".

Mr. HEFLIN. Mr. President, this amendment that I offer would delay the third year Kemp-Roth tax cut from July 1, 1983, to October 1, 1983—3 months. It would transfer the revenue savings to the highway trust fund in place of the increased gasoline taxes, in place of the 5-cent gasoline taxes and the other taxes contained in the proposal that is now pending. It would sunset the highway bill at 18 months.

The PRESIDING OFFICER. If the Senator will suspend for a moment until the Chamber is in order.

The Senator will proceed.

Mr. HEFLIN. It would in effect be a 3-month delay of the Kemp-Roth, which is to take place on July 1, and it would call for a highway construction program of 18 months. It would allow us during this period of time to be able to consider a long-range highway program where there would be no retrogressiveness in regard to taxation on the poor, those people who are unemployed and would have to drive their automobiles as they search for work, those people who will have to drive their automobiles in order to buy groceries, and other things, the poor people at the time.

I think this is a good substitute for the revenue-raising measure that is here. I do not care to debate this long. I have discussed it with a number of Senators. I doubt that I am going to

have enough votes to carry, but I should like to have a vote on it.

Mr. BRADLEY. Will the Senator yield for a question?

Mr. HEFLIN. Yes.

Mr. BRADLEY. This amendment delays the 10-percent tax cut effective July 1 by 3 months.

Mr. HEFLIN. Yes, sir.

Mr. BRADLEY. It does not remove the tax cut?

Mr. HEFLIN. It does not remove it. It only postpones it for 3 months.

Mr. BRADLEY. I thank the Senator.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. HEFLIN. Yes.

Mr. DOLE. Mr. President, I discussed this amendment with the distinguished Senator from Alabama. Obviously, I do not accept it. It does alter the third year of the tax cuts. It also alters the basic highway program.

I ask that the amendment be rejected, and I hope we might do that on a voice vote.

Mr. HEFLIN. I have no objection to doing it on a voice vote.

The PRESIDING OFFICER. The question is on the motion.

Mr. ARMSTRONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. ARMSTRONG. Mr. President, during the last several days there has been extensive discussion about this bill, but primarily in peripheral terms. Most of the discussion has not focused on the substance of the bill but, rather, upon the parliamentary situation, about the parliamentary tactics employed both by the advocates and the opponents of the legislation, about various political perceptions, particularly about whether or not at this moment of national unemployment Congress must be perceived as doing something about the problem, about questions of political loyalty, whether or not a vote for or against this legislation was a test of loyalty to the President or a test of loyalty to the leadership of the Senate.

There has been a substantial amount of discussion about whether or not this was even a good time to consider such a bill and about the procedures under which the measure has been brought to the floor and debated.

I think all of those are peripheral issues. I happen to have an opinion on every single one of those subjects. But I do not think any of those subjects should be determinative of how Senators vote on the passage of this legislation.

Now, I started off sympathetic to the idea of this bill. In fact, on the day it was announced I said, "That's a good idea and I am going to support it." In fact, this summer, long before the President embraced the idea, I joined with vitually every Republican member of the Senate Finance Committee in saying we ought to have an increase in the gas tax as a part of the overall revenue program of this year because I think we need to do something to fix up the roads and bridges of this country. It is obvious, and there is ample testimony to this effect, that the roads and bridges of America are crumbling and are in need of repair.

Moreover, there is an urgent nationwide priority to complete the Interstate Highway System. I believe, and I think practically every Senator believes, the way to do that is through the user fee concept, that is, through a highway use tax.

So when the President announced recently that he thought this would be a good idea, I wanted to support him. Everything that has happened since then persuades me that we are running off the rails.

I do not know how many actually listened to the presentation last night of the distinguished junior Senator from North Carolina (Mr. EAST). Most of the discussion about his extended remarks had to do with whether or not he was or was not justified in taking the floor at that hour to speak on this subject, but I urge my colleagues to go back and read his very thoughtful remarks because he was addressing himself to the issue which is whether or not this is a good bill, and it is exactly that same subject I want to speak to just momentarily.

I am convinced in its present form it is not a good piece of legislation, even though I favored the initial notion of raising some revenue to fix up the roads and bridges of this country.

First of all, I do not think it is a good bill because it fails to contain an offsetting tax reduction in some other area.

The President was right in the first place when he said what we ought to do is pass this highway bill to fix up roads and bridges and then, at the same time, to advance the third year of the tax cut from July 1 to January 1. Interestingly, that is about a wash in terms of its economic impact; about as many dollars sucked out of the private economy as would be replaced by moving forward the date of the tax cut.

We are not going to do that, nor are we going to do anything about dividend withholding. I had hoped we would have had an amendment. To vote on that would permit those of us who are not sold on the idea of the dividend withholding of savings in the Nation's banks and savings and loans, that we could vote to repeal that burden and, in my judgment, unwise provision. Again, in rough terms, that would be a tradeoff in terms of dollar revenue involved; about as many dollars extracted from the private sector from the gas tax as would be added back by repealing the existing dividend withholding provision. So I think, for that reason, we are making a mistake.

Second, I think we have erred seriously in introducing what I think is really an extraneous issue on this truck tax. Now, I will admit, there is a lot about the whole truck tax issue I do not understand. The initial thrust of this bill, as I understood it, was we were going to raise gasoline and diesel fuel a nickel using the money for roads and bridges. The things I heard were a series of very technical and extraordinarily emotional arguments over changes in the regulations of trucks and truck taxes.

There is a study which has been published which purports to show that trucks do not pay their fair share of the use of the Nation's highways. In general, I am disposed to think that that study is corrct; that, in some way or another, those great big huge mammoth trucks have more of a wear-and-tear effect on the highways than they are probably paying. But I must say to my colleagues that, in talking to truckers, they have raised serious doubts about the accuracy of that study, even though I am instinctively inclined to believe it.

They point out that perhaps weather conditions were not taken adequately into account. They point out that, while maybe they are not paying enough, the idea of a 13-fold increase, which was contained in the House bill, or a 6-fold increase, which I understand to be in the Senate bill at the present time, is not justified on the basis of the amount of wear and tear which the large trucks put on the highways.

Now, I am not saying they are right. I am saying they have raised a substantial doubt and have raised it at a time when, as a practical matter, it is impossible for us to resolve those doubts because we are in the middle of a lameduck session at a very late hour.

Now, as I understand it, Mr. President, the amount of revenues which is raised by that portion of this bill is less than 10 percent of the total, and yet it engenders a very, very large percentage of the controversy.

I will admit that my attitude toward the truck tax is heavily colored by the conversations I have had with truckers from my own home State, many of whom are already losing money; a number of whom—particularly the smaller ones who depend primarily on shipping agriculture commodities—tell me that they may be forced out of business by this increase of a couple of hundred dollars a year on some of the trucks to as much as $1,200, $1,300, $1,400 per year.

I am not sure where the justice lies, but I am confident that this is the wrong time to take up an issue that has this many ramifications with as

little information as is available to most Senators. I predict we will rue the day we enact this particular portion of the bill.

Third, Mr. President, I am appalled by the vote which has just occured in this Senate. There are people who thought, at the outset, we ought to use this bill as the vehicle to repeal Davis-Bacon. And there is ample evidence from impartial sources to suggest that the Davis-Bacon Act, as it applies not just to highway construction, but, my colleagues, to construction of all kinds in this country, is one of the most outmoded, extravagant, wasteful pieces of legislation on the books.

The General Accounting Office has railed against the costs imposed upon the taxpayers of this country as a result of Davis-Bacon—in housing, in military construction, in highways, in all kinds of Federal projects.

But I do not think it would have been wise for Senators to try to use this legislation to repeal the basic Davis-Bacon legislation. That is a controversy that has been raging in this country for years. To try to use what started out to be a relatively simple and, at the outset, not very controversial piece of legislation having to do with raising some money to fix up the Nation's roads and bridges, to try to use that legislation to resolve a longstanding dispute on Davis-Bacon seemed unwise to me.

But I cannot believe that tonight this Senate has voted to use this same legislation to expand the scope of Davis-Bacon to an area not now covered. Now, I am not sure whether every Senator realizes that that was the import of the vote we have just had. There was a great deal of noise in the Chamber when the Senator from Oklahoma was speaking. It was difficult for him to obtain order so that he could be heard. There was little time for debate. He was the only Senator to speak on it.

But I hope Senators now realize that that is the issue. The bill, as it presently stands before us, extends the Davis-Bacon principle, with all its potential for abuse, extravagance, for the reduction in the amount of highways we are going to get for our money, for the interference, as the Senator from Oklahoma has pointed out, in local projects, extends that principle to areas not presently covered. And the Senate, by a very narrow margin—as I heard the Chair, by just two votes—has declined to take out of the bill and then, in an immediate subsequent vote, has declined to reconsider that decision.

That means that we are going to spend not next year or the year after, but until this legislation is repealed—if it is indeed enacted—billions and billions and billions of dollars unnecessarily.

Mr. President, I am not in any doubt as to what is going to happen. In a short time, the Senate is going to vote to approve this bill. And if it is approved in more or less this same form by the House, it will go to the President, and he will probably sign it, although those who have listened to what Ronald Reagan has said on such subjects in the past I think will find it hard to believe that he would sign legislation containing the kind of shortcomings I have just mentioned. Yet, that is what is in prospect.

They will probably think they stepped through the looking glass. But, in its present form, I suppose the President will sign it if we pass it.

I just did not want to let the moment pass to explain why I, as a Senator who initially supported this motion, am going to vote against it.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER (Mrs. KASSEBAUM). The Senator from Kansas.

Mr. DOLE. Madam President, I make a point of order against the amendment as not being germane.

The PRESIDING OFFICER. The point of order is well taken.

Mr. DOLE. Third reading.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Madam President, early on, after I examined this bill, I made a statement to the press, offhand, that this may be the first time that a lameduck had given birth to a turkey. I want to apologize to the turkey.

Now, what we have going on here this evening, Madam President, may be high theater, but it is not legislating. I do not want to offend my colleagues, and especially I do not want to offend the majority leader, but the very idea, on a two-vote margin vote, to deny a rollcall on a motion to reconsider and a motion to table—I remember Mike Mansfield standing in the middle of the aisles one day saying, "What has happened to comity in the Senate?"

I believe that if Mike Mansfield were here tonight, though he might be totally in favor of this bill, he would say, "What has happened to comity in the Senate?"

Let us look at the scenario. A Senator cannot get a sufficient second for the request for yeas and nays unless the leadership consents. Now the Senator from North Carolina acknowledges that used to be the case, but this is the first time it has been imposed since I have been in the Senate.

This Senator has never failed to raise his hand to give a Senator a rollcall vote. I remember the occasion when the distinguished Senator from South Dakota (Mr. Abourezk) was conducting an extended debate and I was diametrically opposed to the position he was taking. But I thought he was entitled to a rollcall vote.

Senator METZENBAUM has been denied from time to time a rollcall vote, but I will say to Senator METZENBAUM that I never failed to raise my hand.

But I will tell you Senators, when you refuse to have a rollcall vote on a motion to reconsider and a motion to table a motion to reconsider on a vote that had only a two-vote margin, you have made a mistake.

You have made a mistake and you may rue it.

And no leadership ought to shake its head and say no rollcall vote under such circumstances like that.

The Senator from Colorado is absolutely correct about the Davis-Bacon Act. We are throwing the taxpayers' money out with a shovel by allowing this extension of that very bad law and we are perpetrating a ruse and a fraud on the taxpayers of America when we refuse to gut up to the implication of Davis-Bacon. I know the power of the labor unions in this country. All Senators do, including those who are the beneficiaries.

This is not quite a day of infamy as Franklin Roosevelt said. But I was amazed when the Senator from Colorado was denied a rollcall vote. I hope Senators will think about it, what they did.

I love you all. I respect you all. But the very idea of going this far in trying to crush an effort by a very few of us to point out that this bill is a turkey. I wish we could have a division, a show of hands on how many Senators have read this bill. It would be interesting to note.

The danger we run in trying to protect the interest of the American people is that by calling up amendments and raising points of order and that sort of thing we may set the precedents which will be injurious to the proper conduct of this Senate.

I am at this moment contemplating whether I should call up an amendment in anticipation of what the Chair will rule. But I say to Senators that we are making some bad mistakes. Senators can go ahead and steamroll if they want to. But I will say to them that the opera is not over until the fat lady sings. Do as you please. But I want to say again that I am appalled that there was not a sufficient second for Mr. ARMSTRONG's call for a rollcall on the motion to table the motion to reconsider the vote by which the amendment was defeated.

Mr. SYMMS. Madam President, am I recognized for purposes of debate?

The PRESIDING OFFICER. Yes.

Mr. SYMMS. Madam President, I say to my good friend, and I think that I have been associated with Senator ARMSTRONG since the days we both came to the other body in January of

1973, I probably have voted with him 90 percent of the time. We voted the same way in our years in the other body and since we have been here.

Senator HELMS came here and I think he has played a very important part in my political growth by the things that he has done and the image that he has created in the country as a standard bearer, a touchstone, if you will, for conservative principles.

I have a great deal of respect and affection for both of these Senators.

I only say to Senator ARMSTRONG that he was quite right when he made the point that the roads and bridges in the country are crumbling. It is never going to be a good time to do this. You do not shoot your dog because it has fleas. And it is not a perfect bill.

I can assure you, I do not like the Davis-Bacon aspect of this bill. The fact is I voted against it in the subcommittee; several of us did. But this is politics and we do not have it all the way we want it. There is a big divergence in this Senate from someone who represents the State of Idaho and someone else on the committee, Senator MOYNIHAN, who represents New York City. I think that our subcommittee and our committee——

Mr. MOYNIHAN. Madam President, will the Senator yield?

Mr. SYMMS. I yield.

Mr. MOYNIHAN. I represent New York State.

Mr. SYMMS. Excuse me. I apologize to my good friend.

I have to say to my good friend there are some of the issues in our committee on which I sometimes fail to separate the difference, and I apologize to my good friend from New York.

Anyway, you never can get it all quite the way you want in a bill like this because there is no way when you have a government system of roads. We have already gotten away from the market so the solutions to the highways are going to be done through the political side instead of through the voluntary side of the market.

So I am sympathetic to my colleagues from the conservative side of the aisle who are concerned about the issues that are before us. But I do think that overall it is not a bad bill for the needs that are in front of this country.

I am happy to yield to my distinguished friend, the former chairman of this committee and one who have been a great deal of help to us in this committee to formulate this legislation. I am sure he has comments to make that will tell us some of the reasons why it is important to get started now because it is going to be harder later. The longer we let the roads and bridges in this country go the more costly it will be. It is tough for us now but if you wait 5 years to start this program, it is going to be much, much tougher. I said this last night. Those of us from the conservative side have always complained about grafting on legislation, and so we passed a little piece of legislation last summer that took away indexing of the Tax Code. We have had just the opposite of indexing with respect to the amendment to the trust funds of the roads and bridges for the last 25 years. You do not ever hear anyone going out and telling the taxpayers that without any laws we have been lowering your taxes on the highways.

We have more cars and more trucks, and more roads to fix, and less money to do it with as time has gone on and that is why I support this legislation.

I yield to my good friend from West Virginia.

Mr. RANDOLPH. Madam President, there are differences of opinion and understandably so on one and maybe many amendments which will be offered here tonight.

I have the best of feelings for my colleague from North Carolina. I want to put into perspective perhaps the expression that he made about Franklin Delano Roosevelt speaking of a day of infamy, indicating that this might be in some way a day of infamy.

I remind the Senator that in 1933, under Franklin Delano Roosevelt, we brought into being collective bargaining for the first time in the history of this country. Men and women in industry, business, and commerce, giving to them the right and the responsibility to be able to negotiate on matters in which they and management were concerned.

That was trailblazing legislation in 1933.

In 1935 we passed the Davis-Bacon Act. I, of course, was not a Member of the Senate, but as on the earlier vote on the measure, the National Labor Relations Act, I was voting in the House of Representatives.

I voted for the National Labor Relations Act. Also, in my capacity as a Representative of the second district of West Virginia I voted for the Davis-Bacon Act.

Now I must add one more piece of legislation to that, I think, referring to the administration of Franklin Roosevelt at that time.

In 1938 we passed the Fair Labor Standards Act. I will not discuss that matter here tonight except to say that we found children, 8, 9, 10 years of age, working in the lofts of Brooklyn and other places. They were being paid 10, 12, and 15 cents an hour. We found the elderly of this country, including many thousands who were women, working in the garment industry with very poor light, working for a very small pittance.

So we brought into being what became known not so much as the Fair Labor Standards Act but as the Wage and Hour Act.

What did the Wage and Hour Act do? It simply set a ceiling on the number of hours that could be worked, and it set a floor on the amount of pay that could go to workers.

What were we trying to have? Twenty-five cents an hour. That was the floor. At that time, we could not do anything on the bill in reference to what we call employment in intrastate industry business or commerce. It was only that we passed it in connection with products in interstate commerce that we could bring it about. That was 1938.

I have respect, of course, for the eloquence of our colleague from Colorado (Mr. ARMSTRONG), and often do agree with him. But as he speaks, and as our able colleague from North Carolina also speaks, I must remind you that what we are doing is not to tear apart the fabric of a country where labor and management, very largely, cooperate and work together when we incorporate in this measure even the clarification of the Davis-Bacon Act.

I know that will not suit the membership entirely, but I do say to you that even though we do not call this a jobs bill, it is a bill that will employ some 320,000 workers as we attempt to do what we must do, regardless of the lateness of the hour. That is to pass the legislation.

I said earlier today—I do not want to be misunderstood so I now repeat it—I do not support this legislation because I necessarily am supporting the President of the United States. I do not support the legislation because necessarily, it is a so-called administration measure which is on the floor.

I am supporting this legislation because the Senator now speaking believes in it. That is why I am supporting it. Having had, I hope, a knowledgeable experience over a long period of years, I speak in this vein tonight.

I tried in 1937, when a Member of the House, to bring into being what later became in 1956 the Interstate System. I called it the transcontinental highway system.

I saw then, as I am sure many of you would have seen had you been a member of the Roads Committee of the House, an America which was going to have a great part of its development on wheels in this country; people going to and from their jobs would be on wheels.

I saw that product from the mine, the factory, and the fields that would move by wheels from where the manufacturing took place or the processing took place to the ultimate consumer thousands of miles away in this country.

So I basically believe in what we are doing, but I always have followed the practice of giving to every Member of this body every opportunity under the

rules to develop opposition to a bill that I favored, or, if he was for a bill, I wanted to have the opportunity to speak for or against it.

Perhaps I have taken too much time this evening, but I do it because I think this bill, although it does not have to pass now, in the waning hours of a so-called lameduck Congress.

So I am in good intent. I have no feeling of animosity toward any person. I have spoken vigorously for months and months about the need to rebuild the roads and the bridges, this network of transportation.

The chairman of our Subcommittee on Transportation (Mr. SYMMS) feels as I do. Not every provision in the measure as it now is before us is acceptable to us. But under the able, capable leadership and chairmanship of Senator STAFFORD, of Vermont, we worked very diligently to bring this bill to the Senate floor.

I say to you that it was not a cursory look at the need for such legislation. We had hearings within the subcommittee and within the committee.

I remind you what I earlier said today which perhaps few Members heard. We brought this bill into the Senate by a vote of 16 to 0.

I ask the chairman, is that not true?

Mr. STAFFORD. If my distinguished friend will yield, yes, it is. I might point out, if he will yield briefly, essentially title II of this bill is a somewhat expanded version because of the anticipated additional revenues of the bill we brought out of committee and, if my recollection is correct, passed in this body as a highway bill be a unanimous vote back in May.

Mr. RANDOLPH. Mr. President, before taking my seat, I may be treading on territory that I should not walk, but I read the Bible, and here tonight I remember the words that "A way shall be there for the redemption of his people," words spoken by the Prophet Isaiah. The highway system of this Nation is the way of the people.

I am no prophet in any way, but I have tried to look ahead through the years and envision an America stronger and better than in years past.

So I believe, in a sense, this program is not a way for redemption of our people but the development of this highway system and keeping it intact is certainly the right way for America to proceed.

Mr. President, I oppose the amendment to limit Davis-Bacon coverage on the highway bill. This act, adopted in 1935 during the Roosevelt administration, is important to the workers and the highway program. The committee bill contains a provision which makes clear that Davis-Bacon's prevailing wage protections apply to the construction work proposed to be done under the Federal-Aid Highway Act including restoration, resurfacing, rehabilitation and reconstruction activity.

The basic controversy relates to the meaning of the term "initial construction" as presently contained in section 113 of the Federal-Aid Highway Act which is the prevailing wage provision. The Federal Highway Administration has said that restoration, resurfacing and rehabilitation is not "initial construction" under the law but constitutes a rebuilding activity.

The legislative history clearly reflects that Congress intended for such work to fall within the Davis-Bacon protection. The only line that has been drawn on work not subject to the Federal Davis-Bacon Act is routine repair and maintenance work undertaken by a State and for which Federal funds were not available.

The legislative history since 1956 is replete with testimony from Government officials, contractors, and others that resurfacing, restoration and rehabilitation construction work under the Federal-Aid Highway Act meant substantially more than routine repair and maintenance.

The definition of "construction" contained in section 101 of the act was amended in 1976 to include the terms restoration, rehabilitation and resurfacing and the conference report on the Federal Highway Act of 1975 supports my view that the Davis-Bacon Act should apply to the work covered by this bill. If I may quote briefly from that report:

> The conference substitute contains the definition of "urban areas" from the House bill and "public road" from the Senate amendment and amends the definition of "construction" to authorize resurfacing, restoration and rehabilitation."
>
> The addition of the word "resurfacing" will make clear that Federal-aid funds may be used to restore existing road pavements to a smooth, safe, usuable condition even though further reconstruction is not feasible. "Resurfacing" may be expected to include strengthening or reconditioning of deteriorated or weakened sections of existing pavement, replacement of malfuctioning joints, pavement undersealing, and similar operations necessary to assure adequate structural support for the new surface course.
>
> The definition as amended, coupled with the Secretary's existing authority on standards, would permit Federal funding of such projects as: resurfacing or widening and resurfacing, of existing rural and urban pavements with or without revision of horizontal or vertical alignment or other geometric features.
>
> This change confirms policy established by the Federal Highway Administration, and evidences no intent to fund normal periodic maintenance activities which remain a State responsibility. (Emphasis added.) Conference Report No. 94-107 to accompany H.R. 8235 (April 1976) pp. 42-43.

In short, the legislative history is clear that the use of the term "initial" was designed to make sure that the Davis-Bacon labor standards provision did not apply to such work as the traditionally State-run process of routine repair and maintenance. It is also evident that Congress was not in doubt that Federal money available for resurfacing, restoration and rehabilitation would be considered the same as any other construction activity. All the highway bill provision does is to make clear the longstanding view that requires prevailing wage protection where Federal funds are involved.

The traditional state right to handle routine repair and maintenance under its relevant labor standards is preserved.

Mr. DOLE. Madam President, I want to remind our colleagues, our friends are not supposed to speak. It is the others who are supposed to speak. We have this mixed up. We have the wrong group filibustering. [Laughter.]

I appreciate all the statements which have been made, and they will look better in the morning, but we would like to finish this bill this evening. I know some have serious statements to make. I do not know anyone in the Chamber who knows more about this legislation than the distinguished junior Senator from West Virginia, so I do not say it lightly. But we do have a job to do. I would say those who are concerned about it should proceed. I voted for the Senator from Oklahoma; I held up my hand for the Senator from Colorado. We had a vote on that and we are ready for a vote on anything else.

We want to get this bill to final disposition. I do not suggest that everyone will vote for the bill. I hope a majority will vote for the bill. It seems to me that notwithstanding different views, that if, in fact, we really want to finish this bill and get home for New Year's, then we ought to move ahead because it is the intention of the leadership and the President of the United States that we finish this bill, as bad as some may think it is.

We just cannot design legislation that totally satisfies every Member of the Senate. It would be my hope that we could move quickly to the amendments. Some may have merit and some may not. I am going to try to set an example by only speaking when necessary. I yield the floor.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Madam President, I will speak a shorter length of time than the distinguished Senator from Kansas in urging us not to speak.

I urge the committee in conference to give consideration to two issues on amendments which I plan not to introduce. One relates to the issue of the funding for bridge levels. I urge that it be set with the House at the State-by-State unit price instead of the national unit price, because the real costs are State-by-State, and my State has a much higher cost than some others,

and I think that being the case, it should be the basis for allocation.

I similarly will not introduce an amendment on the formula for apportionment of funds for the Federal aid primary road system but would urge in conference that consideration be given to the House-passed formula which was the administration formula. I desist from pushing these amendments out of deference to the importance of this legislation. It has been crafted carefully over many months with strenous effort by the distinguished Secretary of Transportation, Drew Lewis, and I concur that we ought to move for final passage and therefore say no more.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Madam President, I rise only briefly to compliment the Senator from Pennsylvania for the statement he has just made. The amendments that he has in mind are important amendments. His position is an important contribution to the future deliberations on this bill. I wish to say that I especially appreciate him forbearing to offer those amendments at this time, and I assure him that I will urge the conferees to carefully consider his point of view as they finally arrive at the determination of these issues.

Mr. SPECTER. I thank the distinguished majority leader.

Mr. DOLE. Madam President, are there any amendments pending?

The PRESIDING OFFICER. No. The question is on the Baker substitute to H.R. 6211.

Mr. HUMPHREY addressed the Chair.

Mr. RIEGLE. Madam President, I have an amendment at the desk.

The PRESIDING OFFICER. The Senator from Michigan.

AMENDMENT NO. 5613

Mr. RIEGLE. I thank the Chair. I will only talk briefly on this amendment, which is amendment No. 5613 being offered by myself and Senator BRADLEY.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Michigan (Mr. RIEGLE), for himself Mr. BRADLEY and Mr. SASSER proposes a printed amendment numbered 5613:

At the appropriate place in the amendment insert the following new section:

GASOLINE TAX SHALL NOT APPLY

SEC. . The tax emposed by section 111 shall not apply to individuals eligible for a credit under section 43 of the Internal Revenue Code of 1954.

Mr. RIEGLE. Mr. President, this amendment is an amendment that was filed several days ago and had to be put in revised form in order to be germane under the cloture rules, but Senator BRADLEY and I, like many others who had amendments to offer early in this debate, were unable to get indexed to the top of the queue for amendments actually being called up, and when the bill was taken down we were caught like others having been unable to have this issue brought before the Senate and resolved So we bring it now. and I think we can minimize the debate time on it.

Very simply, what this amendment would do is as follows:

The working poor in this country who earn $10,000 a year or less—and this would be families with children—today in the law receive an earned income tax credit as a matter of existing national policy, and we would like in the instance of those persons who have already been designated in our country as the working poor and who we want to have continue to be able to work and to have the motivation to work be exempt from this additional gasoline tax, and that can be accomplished by adjusting the earned income tax credit in a fashion that would offset the estimated $25 a year in increased gasoline taxes that they otherwise will be required to pay.

I note in passing that these families are the ones who have absolutely a bare minimum in terms of disposable income, because, as I say, the law defines them as families with children and so to the working family on an income, the highest level of which would be $10,000, in many cases a good deal less than that, the imposition of this gas tax is really a burden that I think they ought to be spared. I think it is not a matter of ideology. I think it is a matter of equity and just practical commonsense in terms of not applying additional financial burdens on people in our society who are barely able to function as it is. We find that most often it is the families in this circumstance who tend to have the oldest cars that get the lowest gas mileage. In many instances they are the families who have to locate far away from the jobs that they have so that getting to and from the job site is a more expensive proposition than it might be for others. The weight of this gas tax on them at this time would be something that I think we ought to avoid, and we can avoid through this means.

And so by the means of this amendment we would be instructing the IRS to see to it that in the administration of the earned income tax credit an additional allowance is given for that narrow class of working poor in this country, so that they would not feel the additional weight of the gas tax.

Now, the revenue implications, the outlays over a period of years would be zero in fiscal year 1983, about $65 million in 1984, $60 million in 1985, $55 million in 1986, and $50 million in 1987. Now, you might say, "Well, $65 million sounds like a big number in fiscal year 1984."

Well, in one sense it is, another sense it is not. I think in terms of the aggregate amounts we are talking about being raised by the gas tax this amount of money raised from this tax on taxpayers, I think, is an amount of money that we are well advised not to collect in order to enable them to have both an opportunity to continue to function in this society and to be able to continue as working people and as working families.

If one thinks now over the years of this tax running on an annual basis, the revenue impact being somewhere between $50 and $65 million per year out over the next 4 years starting with 1984, the question that I would pose is, Do we really want to take that amount of revenue away, spending power away, economic survival power away from those families across the country with incomes below $10,000 who we have already officially designated in other areas of the tax laws, the working poor in this country, do we really want to extract that money from them at this time in this form?

I just think we ought not to do that. I do not think it is a partisan issue. I do not think it is an ideological issue. I think it is a matter of simple equity, and it is a matter of the practical effect of weight of this tax coming down on people who are really not in a position to bear it and ought not to bear it.

Mr. BRADLEY. Madam President, will the Senator yield?

Mr. RIEGLE. I yield to the Senator from New Jersey.

Mr. BRADLEY. I join the Senator from Michigan in cosponsorship of this amendment. He stated very clearly what it is. It is an attempt to make the gas tax less onerous on those with the lower incomes. It is an attempt to remove the argument against the tax which has frequently been made on this side of the aisle and that is it is regressive. It is straightforward and clear, and I am pleased to join the Senator in offering the amendment.

Mr. RIEGLE. I thank the Senator for his cosponsorship and his comments.

I must say to the chairman of the Committee on Finance and others, I have chatted with him about this amendment, so it is no surprise. I hope the committee can feel it can accept this amendment, and I say accept it not just in terms of the spirit of the year that it is but in the spirit of the meaning of the amendment, and I say that in a very direct fashion.

I think this is a sound step we could take that we could be proud of as a Senate regardless of party, regardless of ideology.

I do not think we really want to impose this tax at this time as long as we have a mechanism for avoiding it on the poorest of our people who are

out there and who are still working, who are self-supporting, who are working and supporting their families, and we want them to continue to be able to do that and, hopefully, to be able to work up to even higher income levels.

I do not think we want to extract that tax from them, and I would ask my colleagues on both sides of this aisle to ponder it carefully, and I hope if it comes to a vote they will vote for it.

My hope would be that we could avoid a vote and that the committee would accept the amendment and endeavor to hold it in the bill in conference.

SEVERAL SENATORS addressed the Chair.

Mr. EAST. Mr. President, would the Senator yield for a question?

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. I would be happy to yield for that purpose without losing my right to the floor.

Mr. EAST. I wanted to be yielded to on the time of the Senator from Michigan if he would like to do that.

Mr. RIEGLE. I would for the purpose of entertaining a direct question but not for the purpose of delay. I would be happy to respond to a question that goes to the issue itself.

Mr. EAST. I will do that, Senator, and I appreciate your allowing me just to ask a brief question.

As I understand what you are saying is you feel that the bill as it currently exists is putting a regressive tax burden on the working people of this country, and you would like to see that moderated by the inclusion of an amendment that would shift that burden from the working people of this country to those who are in stronger position to pay. Is that the sum and substance of what the Senator is proposing?

Mr. RIEGLE. I would say to the Senator from North Carolina that this is exactly right, and I might further say that I thought as I listened to his remarks last night that on the point which he addressed very clearly and forcefully himself, I found his remarks on that subject and on that question to be very persuasive, and I think very important remarks, and regardless of how one feels about the parliamentary procedure or how we finally dispose of this issue, I thought the contribution he made on that set of issues was an important contribution, and I think was stated as well on that point as I have heard anybody on the floor on either side speak to it, and you are exactly right.

But I would hasten to add I am not trying here to in any massive way deal with all of the issues of equity that one might raise here. I am deeply troubled about the equity issues. But I think as a practical matter if we could just chip off a piece of this that goes onto the poorest of the working families of this country, and only families with children who have already been designated under the law as being deserving of special consideration taxwise, because they are barely able to function in our society as working and contributing members, that they ought to be held harmless, those with $10,000 a year of income or lower ought to be held harmless by this bill.

I think that small measure of equity would be something that would stamp this measure, if it is to pass in the end, with a measure of fairness that it does not presently have and which it ought to have. That is precisely the aim of the amendment, I might say.

Mr. EAST. I thank the Senator.

Mr. DOLE. Madam President, I hope we would not accept this amendment, and I hope we can do it without a rollcall, but we will see what happens there.

First of all, I might suggest that gas prices have gone down about 7 cent a gallon in the past year, 3 cents in the past month, in this area. If you are going to do this for this tax, you maybe ought to have a little extra credit for the cigarette tax we imposed earlier this year. A lot of poor people smoke. Not all poor people have cars, not all poor people drive. This is a user tax, and there is no reason for other users to subsidize those in this category.

Finally, I will say, with all due respect to my colleagues, and I do not question their motives, it says that the gasoine tax shall not apply to "the tax imposed by section 111 to individuals." Well, individuals do not pay the tax, the companies pay the tax. So I say the amendment is not properly drawn. It is an area that we might want to consider. Maybe we ought to increase the earned income tax credit for other reasons, but I hope we will not do it at this time on the this bill, and I would suggest that we not adopt this amendment and that we move on to other amendments that directly relate to the gas tax, trucks, weights, lengths, and a lot of other things that are in the bill that directly affect the user fee, highways, byways. I ask that the amendment be rejected.

Mr. HARRY F. BYRD, JR. Before doing that, this does not deal with the gasoline tax. This increases the earned income tax credit, something entirely different, and I do not see how this is germane.

The amendment says that a certain individual shall not pay the extra 5 cents gasoline tax, but the Senator from Michigan, the author of the amendment, has stated that the way the individual will get back the tax is by increasing his earned income tax credit. So this does not put any restriction on the gasoline tax. The gasoline tax is going to be paid, and the Senator from Kansas is absolutely correct that this is a very wrong amendment to try to put on this bill, and I do not even think—I am confident it is not germane, and I will address a query to the Chair as to a point of order as to whether this amendment is germane. It deals with the earned income tax credit according to the author of the amendment.

The PRESIDING OFFICER. Under the precedents of the Senate, an amendment which is restrictive of the language of the bill or the Baker substitute is germane, so it is germane.

Mr. HARRY F. BYRD, JR. May I ask the author of the amendment, this does not prevent the person purchasing gasoline from paying the tax, does it?

Mr. RIEGLE. I wish we could define it in such a way as to abolish that, but the only way we can get that is by means of making them whole again through the earned income tax credit, as the Chair said, so it is the only way to address this situation we find ourselves in.

Mr. HARRY F. BYRD, JR. It does not do what the Parliamentarian says it does, it does not restrict payment of that tax, does it?

Mr. RIEGLE. I think the Senator—I will respond on my own time if he wishes—but the fact of the matter is what it does is that it makes that person whole in terms of the additional tax, and over the course of the year they will be made whole for the $25 it is estimated they will spend on the gas tax.

Mr. HARRY F. BYRD, JR. Under another part of the Tax Code.

Mr. RIEGLE. Under the part of the Tax Code that presently exists.

Mr. HARRY F. BYRD, JR. Correct.

Mr. RIEGLE. For this precise purpose. So we make the adjustment, suggesting the adjustment be made there to keep these people whole and to hold them harmless, just this narrow group, from the imposition of this particular tax.

Mr. HARRY F. BYRD, JR. Correct, under another part of the Tax Code which is not involved in the bill tonight. I join with the Senator from Kansas in urging the defeat of the amendment.

Mr. BRADLEY. Mr. President, will the Senator yield? Let me make just one brief point, and that is in 1980 the Committee on Finance reported on a tax cut bill that by a vote of 19 to 1 increased the earned income tax credit from 10 to 11 percent.

This is a bill in which we had exempted from the tax—taxicab owners, bus owners, varieties of trucks. It seems to me the least we could do is also exempt from the tax those families earning under $10,000 in income.

Mr. DOLE. Madam President, I am ready to vote.

Mr. RIEGLE. Madam President, if I may, I would like to make a brief additional comment.

I want to appeal to the body as earnestly as I am able to do to support the amendment. As I look around the body here now, it is not exactly on the eve of Christmas, but we are awfully close to it. I know everybody in this Chamber has deep humanitarian feelings about others in our society who are not very well situated. This amendment addresses people in our society—may I have order, Madam President?

The PRESIDING OFFICER. The Senate will be in order.

Mr. RIEGLE. This amendment addresses people in our society who, right now, are barely scraping by. They are the working poor of our country, people whose incomes are less than $10,000 a year. We have had a lot of controversy, a lot of feeling in this Chamber that we have expressed because the pay raise has become a great issue in the country, there is a lot of controversy about it, and so forth. The amount of pay raise being talked about is something on the order of $9,000-plus. That is an amount that is roughly equal to the entire income of these families, families with children.

As I look around the floor, I just hope that my colleagues who are here will be persuaded that this small piece of equity that we are capable of doing is something we ought to do. It is something we can do. We have an established mechanism for doing it and I think it is a step that we can take that will reflect some credit on this institution.

Mr. DOLE. Madam President, let me say very briefly that I would not like the RECORD's silence to indicate we are not concerned about the very thing the Senator from Michigan is concerned about. I hope we all understand that. But we are trying to pass a major piece of legislation. This is an important amendment, something that probably should be considered maybe in the whole UITC, the unearned income tax credit, next year in the Finance Committee.

I plead with my colleagues, let us try to move this legislation. It does not indicate that we are insensitive; it indicates that we have a major piece of legislation before us that should be passed.

I hope the Senator from Michigan will appreciate our concern and not only our concern, our actions in the past to address concerns of this kind—whether it is disability insurance payments or food stamps or whether it is in some other area.

Mr. RIEGLE. Madam President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment. The clerk will call the roll.

Mr. DOLE. Madam President, I move to table the amendment.

Mr. HUMPHREY. I ask for the yeas and nays, Madam President.

Mr. RIEGLE. I ask for the yeas and nays on that, Madam President.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. RIEGLE. Parliamentary inquiry, Madam President: If there is not a second on the tabling motion, will the vote occur up or down on the amendment itself?

The PRESIDING OFFICER. No; there will be a voice vote on the motion to table.

Mr. RIEGLE. I ask for the yeas and nays on the tabling motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay the amendment on the table. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), and the Senator from Pennsylvania (Mr. HEINZ) are necessarily absent.

I also announce that the Senator from Utah (Mr. HATCH) is absent due to illness.

Mr. ROBERT C. BYRD. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Nevada, (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Washington (Mr. JACKSON), and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PELL) and the Senator from Washington (Mr. JACKSON), would each vote "nay."

The PRESIDING OFFICER (Mr. DURENBERGER). Are there any Senators in the Chamber who desire to vote who have not yet voted?

The result was announced—yeas 50, nays 42, as follows:

[Rollcall Vote No. 458 Leg.]

YEAS—50

Abdnor	Gorton	Packwood
Andrews	Grassley	Percy
Armstrong	Hatfield	Pressler
Baker	Hawkins	Quayle
Boschwitz	Hayakawa	Roth
Brady	Helms	Rudman
Byrd, Harry F., Jr.	Jepsen	Schmitt
	Kassebaum	Simpson
Chafee	Kasten	Stafford
Cochran	Laxalt	Stevens
D'Amato	Lugar	Symms
Danforth	Mathias	Thurmond
Denton	Mattingly	Tower
Dole	McClure	Wallop
Domenici	Melcher	Warner
Durenberger	Murkowski	Weicker
Garn	Nickles	Zorinsky

NAYS—42

Baucus	Exon	Matsunaga
Biden	Ford	Metzenbaum
Boren	Glenn	Mitchell
Bradley	Hart	Moynihan
Bumpers	Heflin	Nunn
Burdick	Hollings	Proxmire
Byrd, Robert C.	Huddleston	Pryor
Chiles	Humphrey	Randolph
Cohen	Inouye	Riegle
DeConcini	Johnston	Sarbanes
Dixon	Kennedy	Sasser
Dodd	Leahy	Specter
Eagleton	Levin	Stennis
East	Long	Tsongas

NOT VOTING—8

Bentsen	Goldwater	Jackson
Cannon	Hatch	Pell
Cranston	Heinz	

So the motion to lay on the table amendment No. 5613 was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. STAFFORD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ILLINOIS BRIDGES

Mr. PERCY. Mr. President, the committee report accompanying the Senate highway bill assigns priority in the use of discretionary bridge funds for the Franklin Street Bridge in Peoria and the Staley Viaduct in Decatur. My distinguished colleague from Illinois, Senator DIXON, and myself appreciate the committee's effort on behalf of these two Illinois projects, but it is our understanding that both bridge projects would not benefit from the committee's action. The Congress has already addressed the Peoria project in previous legislation, and the design and plans for the repair of the Decatur bridge project have not been agreed to by the State transportation agency, local officials and industries, and others concerned with the bridge. In line with this, the Decatur project could not take advantage of its designation as a Federal priority. Once the project's design has been agreed to by State and local interests, I would hope the committee would favorably consider our request that it be assigned priority in the use of discretionary bridge funds.

Mr. DIXON. Mr. President, I wish to associate myself with the remarks of my senior colleague from Illinois. We certainly appreciate the committee's effort to accommodate the needs of our State, but understand that the action by the committee would serve no useful purpose since the one bridge has already been established as a priority, and controversy surrounding the design of the other bridge is not yet resolved.

Mr. SYMMS. I understand the concerns of the Senators from Illinois concerning these two bridges, the Franklin Street Bridge in Peoria and

the Staley Viaduct in Decatur. In line with your concern, I will ask the committee to delete references to the two projects from the House and Senate conference report. It is my intent to vitiate the language in the Senate report concerning the bridge projects.

Mr. PERCY. Under the new bridge formula in the legislation presently under consideration by the Senate, Illinois' apportionment of the nationwide funding could be reduced by nearly 50 percent. Thus, despite the increase in Federal bridge funds, Illinois may see insufficient funding to repair its aging bridges—2,200 of which were constructed before the 1930's. For this reason, I would like to urge the committee to consider two bridges in Illinois that could receive priority consideration under the discretionary bridge program.

The Dan Ryan Bridge is part of the Dan Ryan Expressway—the world's busiest highway—in Chicago between 18th Street and 29th Street, crossing over the Illinois Central Gulf Railroad, the Chicago River, and the Stevenson Expressway. The bridge is eight lanes wide and serves an average of 225,000 vehicles per day—a volume which exceeds its original design capacity. The poor operating characteristics, as evidenced by the low level of service, congestion, traffic delays, and the narrow 2 foot right-of-way, contribute to a high accident rate. The pavement sufficiency rating is 4.4, and the estimated cost to improve the bridge ranges from $60 to $70 million.

The Clark Bridge was built in 1928 to carry traffic on U.S. 67 over the Mississippi River at Alton, Ill. The two-lane bridge is functionally obsolete and has a Federal sufficiency rating of 38.4. Illinois is proposing to replace the present two-lane structure with a four-lane structure estimated at $80 million.

Mr. DIXON. Mr. President, I support the designation of these two bridges as priority projects under the Federal discretionary bridge program. The Dan Ryan Bridge funding could extend the service life of this important structure an additional 20 to 25 years, and improve upon on the hazardous driving environment. The Clark Street Bridge in Alton is similarly in need of repair. It is a bridge that subjects motorists to very lengthy traffic delays.

Mr. SYMMS. In response to the concerns raised by the gentlemen from Illinois, I would agree that these bridges should receive priority consideration for discretionary bridge funding. The Dan Ryan Bridge in Chicago and the Clark Street Bridge in Alton will be designated as priorities for Federal funding in the Senate and House conference committee report on this legislation.

Mr. PERCY. We certainly appreciate this accommodation by the Senator from Idaho.

Mr. DIXON. We thank the distinguished Senator.

CARBONDALE RAIL RELOCATION

Mr. DIXON. Mr. President, H.R. 6211 contains a provision that attempts to insure that railroad relocation demonstration projects around the country that are now under construction will be able to be completed. It reduced the current $100 million a year authorization level to $50 million, and directs that projects not under construction by September 1986, will be phased out.

I believe we should allow those areas that have used railroad relocation demonstration program funds to being their projects to have a reasonable period of time to complete them. We have two projects in Illinois, in Carbondale and in east St. Louis that are well along in construction. State and local officials went forward with the projects in reliance on the availability of these funds. Abruptly terminating funds, rather than phasing out the program in an orderly way, could endanger the ability of the States and local governments involved to complete the projects that are now underway.

I would like to offer a similar amendment to the Senate bill, to insure that this problem is taken care of. I understand the problems facing the committee with respect to this bill, and I will not press an amendment at this time since the issue will be addressed in the Senate-House conference on the bill.

I hope the managers of the bill, however, will give this issue their closest attention in the conference, keeping in mind the importance of retaining a mechanism to complete projects now under construction.

Mr. PERCY. Mr. President, I agree with my distinguished colleague from Illinois. I believe it is vital to keep our commitments to the rail relocation projects now under construction. If Federal financing is cut off precipitiously, projects now underway in Carbondale and East St. Louis may not be able to be completed.

H.R. 6211 provides a reasonable way to address this problem. I urge the managers of the bill to do all they can in conference to insure that rail relocation demonstration projects now underway will be able to be completed.

Mr. STAFFORD. I understand the concerns of the two distinguished Senators from Illinois. This matter is addressed in the House bill, and I can assure my colleagues that the issue will get my closest attention in conference.

Mr. DIXON. Mr. President, I thank my colleague for this assurances. I know he understands and is sympathetic to the concerns Senator PERCY and I have raised and I appreciate his consideration.

TOLL ROADS

Mr. PERCY. Mr. President, I had intended to offer an amendment, to be cosponsored by my distinguished colleague from Illinois (Mr. DIXON), to allow new toll highways constructed in Illinois to receive Federal highway funding.

Under existing law, Federal highway funds may be used only in the construction of toll tunnels and bridges. Although the administration's proposed highway legislation included a provision allowing for Federal participation in toll highways, the Senate bill lacks such a provision. The amendment which I would offer essentially includes the elements of the administration's proposal on tollways, but restricts those provisions to Illinois only. Under my amendment, no tolls may be charged for the use of the Illinois highways after their construction costs have been repaid. Thus, the tollways would eventually be free highways. In addition, my amendment would not require the State to construct new toll highways, but rather simply provide the State the option to do so.

Mr. President, the Du Page County Board, the Du Page mayors and managers conference, and Du Page County residents have long urged the construction of a north/south expressway in central Du Page County. A proposed 18-mile, $190 million project for Illinois Route 53 would extend the expressway from Army Trail Road to the Stevenson Expressway, and provide the crticially needed North/South Expressway.

Existing Federal funds, and funds to be provided under this highway bill, however, are insufficient to complete construction of this expressway. Furthermore, according to the Illinois State Toll Highway Authority, it would not be feasible to construct this expressway (FAP 431) solely from the sale of revenue bonds that would be repaid with toll revenues; and an analysis by the county concluded that additional public funding would be necessary. For these reasons, they have requested assistance to eliminate legal barriers which might prevent the use of Federal funds on the proposed tollway extension.

Additionally, local Illinois officials are contemplating the use of toll revenues to construct the proposed Elgin-O'Hare Expressway (FAP 426). This approximately 22-mile project would cost an estimated $200 million to $220 million, providing an important western access to Chicago's O'Hare Airport—the world's busiest airport. The

Illinois General Assembly has approved resolutions calling for the State to study the feasibility of turning each of the proposed expressways into tollways. It should also be noted that my amendment would permit any new toll highway in Illinois to receive Federal funds, not only the two projects that I have mentioned.

Mr. President, as Du Page County Board Chairman Jack Knuepfer has pointed out, the concept of having toll revenues construct a road project is entirely consistent with the administration's policy of requiring users to make an investment in public facilities. Du Page County officials have expressed an interest in using toll revenues, and have implied that Du Page motorists would be willing to pay tolls, to construct critical expressways. The Congress should allow Illinois to explore this avenue.

Allowing Federal participation in Illinois tollways would serve as a useful demonstration project to assess the existing Federal policy prohibiting highways from receiving Federal funds. Since the administration is pressing for legislation to allow Federal tollways in all 50 States, this single State case study serves as a useful first step before the Congress considers the broader administration proposal.

Mr. President, I ask unanimous consent that a letter from the Du Page County Board chairman and two editorials from the Chicago Tribune be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DU PAGE COUNTY, ILL., *June 24, 1982.*

Hon. CHARLES H. PERCY,
Washington, D.C.

DEAR SENATOR PERCY: As you are aware, the Du Page County Board, the Du Page Mayors and Managers Conference, Inc. and many communities in the Illinois 53 corridor, have long supported the extension of FAR 431, a critical north-south freeway in Du Page County, from Army Trail Road to I-55. With the redesignation of the Crosstown Expressway in the Chicago Region, interstate transfer money was programmed for a partial freeway extension to Butterfield Road. Although we have received more Crosstown money than we thought might be released by the Federal government, it is still not sufficient to complete the partial extension, and the design study for the freeway extension has been stopped by the Illinois Department of Transportation.

In response to this action, the County Board, Du Page Mayors and Managers Conference, Inc. and individual municipalities recommended a study of the feasibility of constructing FAP 431 as a toll facility. We are pleased that the Illinois Legislature has passed a joint resolution authorizing a cost-revenue study, and have requested prompt action by IDOT to initiate this analysis.

In a report prepared by our Development Department, a "sketch" analysis of tollroad feasibility was made, with the conclusion that at present toll levels it would probably not be feasible to construct and maintain the FAP 431 extension without additional public funding. At the time our report was research, we did find reference to an agreement between the Federal government and the State of Louisiana for the use of Federal funds on a toll facility in that state.

The concept of having user fees (tolls) maintain and partially construct such a facility appears to be very consistent with the present Administration's desire for "users" to play an important role in funding public investments. At the local level, the utilization of Federal (i.e., Crosstown) funding would allow potential for the full extension of FAP 431 to I-55, as opposed to the Butterfield Road terminus now proposed, thereby avoiding the congestion problems experienced at the present terminus of the freeway at Army Trail Road (an arterial road).

I would therefore like to enlist your support to help eliminate any legal or regulatory barriers at the Federal level which might prevent use of Federal funds on our proposed tollway extension.

Sincerely,

JACK T. KNUEPFER,
County Board Chairman.

[From the Hinsdale (Ill.) Daily Suburban Trib, June 22, 1982]

HOPE FOR A HIGHWAY

An innovative idea for completing Ill. Hwy. 53 as a major thoroughfare has revived hopes for clearing the bottlenecks from Du Page County's congested north-south highways.

Completion of the freeway [known as FAP 431] south to Int. Hwy. 55 has been at issue ever since money ran out, leaving a dead end at Army Trail Road in Addison and resulting in massive traffic snarls and further overburdening of inadequate secondary roads.

In 1980, the Illinois Department of Transportation proposed a $120 million compromise—extending the expressway south to Butterfield Road and widening Ill. 53 to four lanes from Butterfield Road to Royce Road in Bolingbrook. But this would merely have substituted one bottleneck for another, and failed to ease the county's urgent need for a major north-south thoroughfare capable of moving traffic to and from I-55.

An alternative was suggested last week by State Rep. Beverly Fawell [R., Glen Ellyn] at a meeting with representatives of U.S. Sen. Charles Percy [R., Ill.] and the Illinois Toll Highway Authority.

Fawell has proposed combining federal, state and local funds with toll road funds—something now prohibited by federal law. If Congress lifted this restriction, however, federal funds from the abandoned Crosstown Expressway project could be combined with toll road funds to build the $325 million extension to I-55. The new road would run parallel to the existing two-lane portion of Ill. 53 south of Army Trail Road.

The prospect of completing Ill. 53 as a toll road was raised in 1980 but abandoned when high toll rates—two 60-cent toll plazas and three 10-cent exit ramps—made it doubtful that enough traffic could be attracted. If the Fawell plan is approved, tolls presumably could be reduced to the standard 30 cents.

If feasible, this alternative would remove the need to widen Ill. 83 in eastern Du Page County, a plan bitterly opposed by nearby residents and municipalities. It also would ease road congestion by providing the county with its first major north-south route. Such relief offers intriguing possibilities and merits further consideration by county, state and congressional leaders.

[From the Hinsdale (Ill.) Daily Suburban Trib, May 11, 1982]

ROAD PLAN NO SOLUTION

Wringing hands and searching for scapegoats is not going to clear the bottlenecks from Du Page County's north-south highway, regardless of who is to blame for the years of delay, indecision and poor planning that created them. The money simply isn't there any more.

Why, then, does the Illinois Department of Transportation propose spending money in a manner that would only make a bad situation worse? Lacking the funds to build an expressway known as FAP 431 south to Int. Hwy. 55 as originally planned, it proposes widening Ill. 53 south from Army Trail Road, where four-lane traffic now ends, to Butterfield Road, where it would create yet another bottleneck on already overcrowded secondary roads.

To ease inevitable congestion, the state proposes a $33 milion project for widening Butterfield to three lanes in each direction east of Ill. 53 and converting Ill. 53 to four lanes south to Royce Road in Bolingbrook.

Where are the planners? What happened to reason and common sense? The traffic snarls merely are being shifted from Army Trail Road to Butterfield Road with yet more bottlenecks at Royce Road, where the widened Ill. 53 would revert to two lanes.

Clearly, the State transportation department cannot be expected to spend funds it doesn't have. But, just as clearly, it can disburse wisely what it does have. If FAP 431 is to be extended, it makes more sense to add another mile and end it at the East-West Tollway, the one terminus capable of handling the heavy volume of traffic that would pour off of FAP 431.

Regardless, western Du Page County's urgent problem remains—the lack of any major north-south thoroughtfare capable of moving traffic to and from Int. 55.

County and municipal officials last year proposed completing FAP 431 as a toll road. Although the economic feasibility was questioned, circumstances have changed—including the hope that the state transportation department would have funds. It may be worthwhile to reconsider this option, starting with an updated projection of traffic volume, to determine if the project might indeed be self-supporting.

Mr. DIXON. Mr. President, I am pleased to join my colleague, the distinguished senior Senator from Illinois, Senator PERCY, in raising this issue.

Existing law permits Federal highway fund to be used only for the construction of toll bridges and tunnels. The administration bill, however, would permit Federal highway funds to be used in the construction of toll facilities. Further, the 1973 highway bill did permit certain toll roads in Louisiana to receive Federal funds.

I realize we are considering a major expansion of Federal assistance for highways. However, even with the new funds, there will not be enough money to complete construction of two major express routes in northeastern Illinois, the North/South Expressway in central Du Page County and the Elgin-O'Hare Expressway.

Construction of these routes is essential to the transportation system in

this part of Illinois. However, they would not generate sufficient toll revenues, with tolls at reasonable rates, to permit complete toll financing. Supplementary Federal highway financing is essential.

The amendment we would have liked to offer would permit mixed toll Federal highway program financing in Illinois as a demonstration program. Once construction costs were recovered, the routes would have to become freeways. The amendment would not have required the construction of any toll routes; it merely would have made that option available to the State.

The amendment is supported by the Illinois Department of Transportation, the Du Page County Board, the Du Page majors and managers conference, and by residents of the areas involved. I urge the managers of the bill to consider carefully the issues raised by the amendment.

Mr. PERCY. Mr. President, I will not press for the adoption of this amendment at this time, however, if the distinguished chairman of the subcommittee on transportation would be willing to provide certain assurances. Would the gentleman agree to schedule a field hearing in Illinois—after the completion of the studies on the Illinois tollways authorized by the Illinois General Assembly—on my amendment, which I may introduce as a clean bill during the next Congress.

Mr. SYMMS. I would agree to the Senator's request to schedule field hearings. His proposal is a matter in which he has expressed great interest, and the committee would surely give it the fullest consideration.

Mr. PERCY. I appreciate the Senator's accommodation, and will not offer the amendment.

Mr. THURMOND. Mr. President, I rise today in support of the amendment offered by my good friend and distinguished colleague from Oklahoma, of which I am a cosponsor.

Mr. President, this amendment would strike the language in section 154 of S. 3043, the Federal-Aid Highway Improvement Act of 1982 extending the prevailing wage provisions of the Davis-Bacon Act beyond the initial construction of our Nation's Federal-aid highways, perhaps even to the most minor repairs and resurfacing.

Mr. President, I can think of no more counterproductive step Congress could take in the context of this legislation. We have for the past few days been debating major increases in the Federal motor fuels, excise and highway use taxes. A major impetus behind consideration of these increases during the lameduck session has been the high rate of unemployment in the road construction and repair industry. It is my sincere belief that the proposed extension of the prevailing wage provisions of the Davis-Bacon Act would result in less employment opportunities for workers in this industry.

Mr. President, I hope my colleagues will read and reread the perceptive editorials from our Nation's premier newspapers read into the RECORD, by my distinguished colleague from Oklahoma. They make a convincing argument for the rejection of any further extension of the Davis-Bacon prevailing wage provisions. I congratulate the Senator from Oklahoma for his wisdom and courage in opposing such an extension, and I call upon the other Members of this body to follow his lead.

Mr. WEICKER. At this time, more than 600 bridges and viaducts cross over Amtrak's rail lines between Boston and Washington, D.C. I and my colleague from Connecticut (Mr. DODD) are very concerned with 209 of these bridges, which have come to be called the orphan bridges. These 209 bridges, of which 64 are in my State of Connecticut, are distinguished by the fact that neither Amtrak nor the States accept the responsibility for their upkeep and maintenance, because the ownership of these bridges cannot be determined from the legislation or deeds which provided for Amtrak to take over the right-of-way of the Northeast corridor. Consequently, these bridges have fallen into a severe state of disrepair and constitute major safety hazards to the affected communities and to rail passengers, who utilize Northeast rail corridor service.

Although the States do not claim responsibility for the upkeep of these bridges, they do include the bridges in their bridge inventories upon which State apportionments for Federal bridge assistance are calculated. To date, the States have been reluctant to use their limited bridge funds for the repair of these bridges. Amtrak, too, has a very limited capital budget. The result has been, therefore, that bridge problems are addressed on an emergency basis, with repair costs usually being the subject of lengthy battles among States, Amtrak, and local communities.

The bill before us today establishes a new strong Federal commitment to bridge rehabilitation and replacement. Under the Surface Transportation Act of 1982, $1.7 billion is authorized for fiscal years 1983 and 1984, $1.8 billion for fiscal year 1985, and $2 billion for fiscal years 1986 and 1987. Mr. STAFFORD, do you agree that the States, in expending their apportioned bridge funds, should give strong consideration to these bridges which overpass the Northeast corridor improvement project and which a State or Amtrak identify as constituting a potential danger to motorists, pedestrians, or rail operations?

Mr. STAFFORD. Yes; I agree that States should give these bridges strong consideration.

Mr. WEICKER. Do you agree that the following bridges which have been identified as orphan bridges should qualify for funding under the bridge replacement and rehabilitation program authorized under section 203(a)(7) of the Surface Transportation Act of 1982, if States included them in their bridge inventories?

Mr. STAFFORD. Yes; I do agree with the Senator from Connecticut that these bridges would qualify for funding under section 203(a)(7) of the Surface Transportation Act.

Mr. WEICKER. Since the aforementioned bridges are eligible for bridge rehabilitation and replacement funds, would the chairman of the Environment and Public Works Committee agree that these bridges pose a serious safety problem and that States, in expending funds apportioned under section 203(a)(7) for replacement or rehabilitation of eligible bridges, should give strong consideration to highway bridges which overpass the Northeast corridor improvement project and which a State or Amtrak identifies as constituting a potential danger to motorists, pedestrians, or rail operations?

Mr. STAFFORD. Yes; I agree to recommend to the conferees that these bridges constitute a safety problem. Furthermore, I agree that States, in expending their bridge funds, should give strong consideration to the aforementioned bridges.

Mr. WEICKER. I thank the chairman of the Committee on Environment and Public Works for his assistance and cooperation on this critical matter.

Mr. STAFFORD. I thank the Senator from Connecticut, Mr. WEICKER, for bringing to my attention this critical problem and for his cooperation.

TERRITORIAL HIGHWAYS PROGRAM

Mr. WEICKER. H.R. 6211 is a bill to provide jobs and assistance in the repair of roads and highways. Would you agree that the U.S. territories have been at least as hard hit as the States by unemployment and a deteriorating infrastructure?

Mr. STAFFORD. Yes; I generally agree with what the Senator has said.

Mr. WEICKER. I understand your interest in consolidating highway programs and controlling highway expeditures. However, since no authorizing legislation exists to transfer the function of the territorial highways program to the Department of Interior, and since it is crucial to the fragile economies of the territories to have a continuing highways program, would you agree that it is appropriate to include the territories in this bill?

Mr. STAFFORD. Yes; I believe that it makes sense to continue to fund

road repair and development in the territories in this legislation.

Mr. WEICKER. The House language is consistent with your interest in consolidating highways programs. It treats the Virgin Islands, Guam, and American Samoa as one State for one-half of 1 per centum of each years apportionment. However, it separately authorizes the Commonwealth of the Northern Mariana Islands for $1 million annually. Do you agree that it would further consolidate the program and save $1 million each year to include the Marianas together with the Virgin Islands, Guam, and American Samoa for a minimum State's share?

Mr. STAFFORD. Yes; it would be consistent with my concerns, here, to include the Commonwealth of the Northern Marianas with the Virgin Islands, Guam, and American Samoa as one State for a minimum State's share.

Mr. WEICKER. Would you agree to support this position in conference?

USE OF FEDERAL TRANSIT FUNDS FOR NEW CONSTRUCTION

Mr. TOWER. I would like to ask the Senator from Indiana if the proceeds of the 1 penny set-aside for mass transit will be available for service expansion and new construction in rapidly growing cities such as Houston?

Mr. LUGAR. The answer to the Senator's question is "yes". The bill before us contains no restrictions on the use of funds for needed bus fleet expansion or cost-effective new rail construction.

Let me also say, that in developing the mass transit title which we are considering today, the Committee on Banking, Housing, and Urban Affairs worked dilegently to insure that a fair share of funds be available to meet the transit needs of rapidly growing cities. While recognizing the importance of rehabilitating existing transit facilities which may be in disrepair, the committee believes it is equally important that pressing needs for new facilities in other areas of the country also receive due consideration. In this regard, I would point to recent statements by Transportation Secretary Lewis that the administration also is prepared to permit the availability of funds for cost-effective new rail construction.

In approving capital expenditures for new transit systems, however, it is the committee's belief that the relative cost of such systems should be looked at carefully. The committee believes that preference should be given to projects which maximize the cost effectiveness of the Federal investment through substantial non-Federal capital contributions or through the use of existing track or other facilities.

Mr. TOWER. I appreciate the Senator's remarks and would like to take this opportunity to compliment him as well as the very able chairman of the full committee for their fairness in producing a balanced bill which adequately addresses the needs of all regions of the country.

AMENDMENT NO. 4998 TO H.R. 6211

Mr. DANFORTH. Mr. President, the amendment we are considering to H.R., 6211, the Surface Transportation Assistance Act of 1982, is important legislation to the people of the State of Missouri. Missouri highways and bridges are in need of repair, and the construction industry in Missouri will receive a significant economic stimulus from its enactment. However, it would also force Missourians to accept bigger trucks on their highways.

The people of the State of Missouri have told their legislators, by referendum, that they are opposed to bigger trucks. In service to them, Senator EAGLETON and I consistently have voted against increased truck widths, increased truck lengths and increased truck weights every time these issues have come before this body, or before committees on which we serve.

But it is now clear that we are outnumbered. Further attempts to address this issue would be futile. The Senate has already voted to increase the uniform width of trucks, and in doing so rebuffed a valiant attempt by Senator EAGLETON to even so much as delay action on this part of the truck size issue until consideration of H.R. 6211. On the issue of truck weight, Missouri, Arkansas, and Illinois are the only continental States that presently do not allow 80,000 pound trucks. They are considered "barrier States" by the Senators from the other 45. Finally increased uniform truck trailer length enjoys similar broad support. Fortunately, this particular aspect of the truck size issue is of no real consequence to Missouri since State law already allows certain truck combinations to have trailers exceeding the new Federal lengths.

Mr. President, it is very disappointing that Missouri is going to be forced by the Federal Government to accept bigger trucks as part of this highway funding legislation. On the other hand the funding bill is necessary, and I do appreciate that my Senate colleagues and the administration have been willing to work with me to address the two biggest concerns that Missourians have about bigger trucks—that they cause expensive damage to bridges and roadbeds, and they create serious safety hazards to passenger cars.

Mr. President, Missourians do not want to pay for highway damage caused by interstate trucking operations; they want the trucking companies to pay the costs. As a member of the Senate Finance Committee, I have joined with those seeking that a fair user fee be paid by truck companies for their commercial use of the highways. I believe we have achieved that goal, and that the excess road repair necessitated by heavy trucks will be paid for by heavy trucks.

The safety issue is of even greater concern to many Missourians. Motor carrier safety is already a serious problem. There is a general fear that bigger trucks will make it worse. In 1982, 32,306 truck accidents were reported to the Bureau of Motor Carrier Safety of the Department of Transportation. These accidents resulted in over 2,800 fatalities, more than 28,500 injuries and $355 million in property damage. Fewer bus accidents were reported, but bus safety is related, and therefore also of significant concern.

As a member of the Senate Commerce Committee, I have been involved in the examination of this issue for several years. Hearings conducted in the 95th Congress and the 96th Congress on motor carrier legislation introduced by my colleague, Senator PERCY, demonstrated the need for comprehensive restructuring of commercial motor vehicle safety regulations. These hearings underscored the fact that Federal commercial motor vehicle safety rules are being flagrantly ignored. Random inspections by Federal and State law enforcement officials in various parts of the country uniformly found widespread violation of safety regulations, requiring numberous commercial vehicles to be put "out of service" due to defective brakes or other serious deficiencies in major safety equipment.

This pattern of noncompliance with commercial motor vehicle safety requirements demonstrates that Federal enforcement efforts have proven ineffective. This pattern will continue when violations go undetected, and when penalty levels are so small that they are easily absorbed as a cost of doing business.

Mr. President, when we move to increase truck size, we have an obligation to increase truck safety. Therefore I am grateful to Commerce Committee Chairman PACKWOOD, and to Secretary of Transportation Drew Lewis, for the support they have given me in seeking appropriate safety reforms as part of this legislative package.

Title IV of this amendment, as reported by the Commerce Committee, takes what I consider to be important steps toward improving highway safety. The grant program established under section 406 should increase enforcement of commercial motor vehicle safety regulations by strengthening State enforcement programs. Increased enforcement will assure that there is a far greater chance of detection of safety violations.

Section 407 expands DOT's civil penalty authority to prosecute a variety of violations of commerical motor vehicle safety regulations. Since increased penalties will be easier to en-

force, it will no longer be cost effective to keep a truck on the road if it is unsafe.

Title IV also protects motor carrier employees from discipline, discharge, or discrimination for refusing to drive an unsafe vehicle or for reporting safety violations. I believe the employee protection provisions are vital to insure that employees will not be harassed for not being willing to perpetuate safety violations.

Mr. President, perhaps the good people of Missouri can take some solace in the fact that, although they are being forced to accept bigger trucks, they are not having to do so without additional safety provisions within the bill.

I would ask unanimous consent to submit for the RECORD a summary of the major safety-related provisions of the committee reported version of title IV.

There being no objection, the Summary was ordered to be printed in the RECORD, AS FOLLOWS:

SUMMARY OF MOTOR CARRIER SAFETY PROVISIONS OF TITLE IV OF PRINTED AMENDMENT NO. 4998 AS REPORTED BY THE SENATE COMMERCE COMMITTEE

The motor carrier safety provisions of Title IV are designed to combat the increasing number of deaths, injuries, and property damage due to commercial motor vehicle accidents. These provisions aim to promote highway safety, encourage the safe operation and maintenance of commerical motor vehicles, and protect the health and safety of commercial motor vehicle operators.

These provisions develop new regulatory authority and enforcement tools to promote commercial motor vehicle safety.

1. APPLICABILITY.

Sections 401 through 417 provide for coverage under Title IV of specified commercial motor vehicles. These vehicles include:

a. all commercial motor vehicles that are 10,000 pounds gross vehicle weight rating or more;

b. all commercial motor vehicles used in the transportation of materials found by the Secretary of Transportation to be hazardous for the purposes of the Hazardous Materials Transportation Act (49 U.S.C. 1801 et seq.); and

c. any commerical motor vehicle used on the highways that is designed to carry ten or more persons. The legislation provides an exemption from the application of the act for any vehicle engaged in farming activities or logging operations as defined by the Secretary of Transportation.

2. PENALITIES.

At present, DOT has civil penalty authority only with regard to reporting and filing violations. The Committee expanded DOT's civil penalty authority and provided increased civil and criminal penalties for the commercial motor vehicle health and safety area. These penalties are designed to assure widespread compliance with truck and bus safety requirements. Failure to meet recordkeeping requirements are to punished by up to $500 per violation. Each day of a violation constitutes a separate offense. Systematic recordkeeping is essential in order for DOT to set priorities for enforcement and to adequately monitor person in the commercial motor vehicle safety area. The Committee, however, set a penalty ceiling for separate offenses concerning a single violation of recordkeeping requirements of up to $10,000. This ceiling is considered sufficient to assure compliance with the recordkeeping requirements.

The Committee particularly wished to increase enforcement in circumstances in which the Secretary of Transportation determines that a substantial health or safety violation could reasonably lead to or has resulted in serious personal injury or death. It is important to provide substantially improved protection to drivers and the public in the commercial motor vehicle health and safety area. Therefore, the Secretary's determinations should be given great weight. DOT should focus its enforcement priorities on violations which can lead to death or injury.

In regard to all civil penalties, the Secretary of Transportation is directed to take into account: The nature, circumstances, extent, and gravity of the violation committed and, with respect to the violation, the degree of culpability, history of prior offenses, ability to pay, effect on ability to continue to do business, and such other matters as justice and safety may require.

These criteria can assist in assuring that the civil penalties provisions are imposed in a fair and equitable manner. The primary focus of the penalty provisions, however, is to improve the enforcement of essential health and safety requirements. Therefore, these criteria should not be utilized to minimize penalties to the point where they do not assure adequate compliance by violators. In regard to these criteria, the Secretary of Transportation may not be able in every instance to make a determination in regard to each of these factors. Rather, it is expected that the violators may bring this information to the attention of the Secretary of Transportation to assist the Secretary in making a fair determination.

The legislation also increases penalties for specified safety violations by operators of commercial motor vehicles. These penalties, although lower than for employers, are believed sufficient to create significant disincentives against violation of highway safety requirements.

3. INVESTIGATION OF COMPLAINTS

The legislation requires the Secretary of Transportation to investigate any non-frivolous complaint alleging that a material violation of any rule, regulation, standard, or order issued under Title IV, is occurring or has occurred in the preceding 60 days. This provision recognizes that complaints from motor carrier employees and other complaints can significantly assist DOT in quickly detecting violations of safety and health requirements. Although the bill requires an investigation of all such non-frivolous written complaints alleging a material violation, it is expected that the Secretary of Transportation also will investigate other complaints if they appear to be legitimate and serious violations of health and safety regulations.

4. EMPLOYEE PROTECTION PROVISIONS

The employee protection provisions in this legislation underscore the strong Congressional policy that persons reporting health and safety violations should not suffer because of this action. However, the bill is designed to assure that employers are provided protection from unjustified refusal by their employees to perform legitimate assigned tasks.

To protect employees, the bill provides that: "No person shall discharge, discipline, or in any manner discriminate against any employee with respect to the employee's compensation, terms, conditions, or privileges of employment because such employee (or any person acting pursuant to the request of the employee) has filed any complaint or instituted or caused to be instituted a proceeding under or related to this title or other authorities of the Secretary of Transportation in the commercial motor vehicle safety area."

Employees are also protected from discharge, discipline, or discrimination if an employee refuses to operate a vehicle due to the employee's reasonable apprehension of serious injury to himself or to the public due to the unsafe condition of such equipment. The Department of Labor is to investigate employee complaints when such discriminatory activitiy is alleged. If a violation is discovered, the Secretary of Labor is directed to order affirmative action to abate the violation, including such remedies as reinstatement and specified compensation and damages.

5. GRANTS TO STATES AND STATE ENFORCEMENT

The Federal Government has an extremely limited number of enforcement personnel in the commercial motor vehicle safety area. Title IV, as reported, therefore, will provide grants to the States both to develop implementation plans and to assist the States in the enforcement of Federal rules, regulations, standards, and orders applicable to commercial motor vehicle safety. The Secretary of Transportation is directed to formulate procedures for the States to submit a plan and criteria for acceptance of the State plan. The legislation makes clear that these grants will be provided to develop additional programs over and above those already underway within a State. It is believed that only with increased State enforcement will there be a major improvement in commercial motor vehicle safety. While the bill is directed towards upgrading State enforcement powers, the Secretary of Transportation will retain all of his own authority and is directed to ensure that the State plans are being properly carried out.

6. ADVISORY COMMITTEE

Title IV established a Commercial Motor Vehicle Safety Advisory Committee. This Committee is to be composed of the Secretary of Transportation and 15 members appointed by the Secretary. The advisory committee appointees are to be experienced in the safety regulation of commercial motor vehicles or technically qualified by training, experience, or knowledge to evaluate commercial motor vehicle safety requirements. The Secretary of Transportation is directed to consult with public and private agencies and organizations concerned with commercial motor vehicle safety before making appointments to the advisory committee. Members are to include representatives of State governments, the motor carrier industry, shippers, union drivers, independent owner-operators, and the public.

7. AUTHORIZATION

The Legislation provides for Federal/State matching grant funding on an up to 80/20 basis. It is emphasized that the States must maintain their present efforts and the grant levels are for additional or expanded programs by the States. A total of $150 million is authorized to be appropriated out of the Highway Trust Fund over fiscal years 1984 through 1988.

COMMERCIAL MOTOR VEHICLE SAFETY

Mr. PERCY. Mr. President, I am concerned with one point which needs to be clarified. Although the Commerce Committee hearings concerning the Truck Safety Act demonstrated that existing remedies of law were inadequate to protect truckdrivers, I am nonetheless worried that the job protection, or whistle-blower, provision of the legislation might have the effect of preempting other avenues of relief, and remedies which might be available to employees under union contracts, or statutory or common law.

Mr. DANFORTH. I am glad that you raised this point and I do want to recognize the invaluable assistance you rendered to the committee in connection with its consideration of this legislation. The driver protection provisions of title IV are most certainly intended to strengthen, not displace any existing remedies employees may have at law.

Mr. LEVIN. Mr. President, section 422 of the Commerce Committee's amendment to H.R. 6211 prohibits the States from banning "double" combination trailers on the interstate and Federal-aid highway system. There are a number of States, including the State of Michigan, which have passed laws regulating the use of tractor double-trailer units in response to serious accidents involving these vehicles on State roads.

Although title IV of the administration's bill originally preempted State laws regulating the use of double-bottom trucks only on the interstate system, an amendment offered by Senator CANNON in the Commerce Committee markup expanded this preemption to include "any qualifying Federal-aid highway," except for roads designated by the States or the Secretary under subsection (e) of section 422.

As I understand it, subsection (e)(1) directs the Secretary of Transportation to promulgate guidelines setting forth specific factors that the States should consider in designating certain roads unsafe for trailer combination vehicles. Subsection (e)(2) provides that the Secretary can also designate certain roads upon which these vehicles cannot travel, if he determines that "public safety would be significantly and adversely affected."

While I am relieved that the bill establishes some mechanism for identifying roads which would not be safe for the motoring public if double-bottom vehicles are granted an unlimited right to use Federal aid highways, I am concerned that section 422 does not provide adequate assurances that unsafe roads will be properly identified. Studies have indicated that double-bottom vehicles are unsafe, regardless of the road they are traveling on. But if we are to preempt State laws prohibiting their use on State highways, we should at least establish a proper procedure for prohibiting them from traveling on two-lane roads or roads in urban areas, where there is an even greater risk of accidents involving fatalities. I have a number of questions related to my concern about the mechanism which has been established in section 422 for designating unsafe roads. First, I would inquire of my colleague whether the provision contained in this section prohibiting the States from banning double-bottom trucks on roads will take effect before the Secretary and/or the States have designated roads which would be a hazard to the public safety if these vehicles are permitted to use them?

Mr. CANNON. The new rules will become effective 180 days after enactment. That should be sufficient time for DOT to set forth initial guidelines and for the States to make their initial determinations. In special circumstances, the States would be able to go directly to DOT to request the designation of specific highways even before the guidelines are issued. As the author of this provision, I can assure the Senator from Michigan that it is my intent and the intent of the Commerce Committee that this matter be of the highest priority for DOT. They should complete the initial guidelines promptly.

Mr. LEVIN. Second, with respect to subsection (e)(1), which allows the States to prohibit double bottoms on Federal-aid roads pursuant to guidelines to be developed by the Secretary of Transportation, can you respond to the following questions: If under the guidelines established by the Secretary, the States determine that certain roads are unsafe and the Secretary disagrees with the State's determination, who prevails? Assuming the Secretary's determination prevails, will that be judicially reviewable?

Mr. CANNON. There is no provision in the legislation for the Secretary to overrule a determination by an individual State. The Secretary, in my judgment, would have standing to seek judicial review of a State decision, but could not overrule it on his own. In fact, any highway user would probably be able to challenge a State decision, but the courts, not DOT would decide the issue.

Mr. LEVIN. Third, what power do the States really have under subsection (1)(e)?

Mr. CANNON. I would say that the States have very substantial discretion, so long as they stick within the general guidelines of DOT. I would also hope that where the guidelines are not yet developed or where the States have special concerns, that the Secretary would be responsive to requests for specific designations by DOT. I also think that the Secretary should and will err on the side of caution in making designations. He can always change his mind on the specific designations, but if he has any doubts, he should declare the highway in question to be nonqualifying.

Mr. LEVIN. Fourth, with respect to the guidelines, I wonder whether it might not be possible to set forth specific factors which should be considered by the Secretary in developing the guidelines under subsection (e)(1). For example, data compiled by the National Center for Statistics and Analysis in the DOT that compares fatality rates among different types of vehicles on the roads at issue here could be an important source of information for the Secretary in developing the guidelines. Specifically, is it the Senator's intent that the following factors be taken into account by the Secretary in developing the guidelines?

Type of vehicle; the material being transported in the vehicle; conditions and dimensions and terrain of the road; weather conditions; and level of traffic on the road.

If so, will the Senator work to insure that the conference report on the gas tax bill requires the Secretary to rely on these factors in setting the guidelines under this subsection?

Mr. CANNON: The factors listed by the Senator from Michigan are precisely those that are intended to be considered. I can assure you that I will do everything I can to insure that the conference report specifies that these are among the factors to be considered. I thank the Senator for his concern about this issue. I think he has added a great deal to it.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, If I could have the attention of Members for a moment, I wish to apprise them of the unanimous-consent request that I wish to put in a few moments, but I shall not put it at this time.

The purpose of this announcement is to give all of those who may hear me on the floor or elsewhere by our public address system notice of what we are about.

First, let say that the National Weather Service has notified me that beginning at about 9 p.m. or 9:30 p.m. tonight they expect a second winter storm and snow accumulation in the Washington area of an additional 3 to 6 inches. Knowing the Weather Service as we do, that may mean it is going to be bright and sunny tomorrow. But taking it a face value, it means we may have trouble getting home if we stay very late.

I have consulted with Members on this side, principally the distinguished Senator from North Carolina, and I think perhaps he has consulted with others, and I am encouraged to think that if we can get out of here like the next 5 or 10 minutes and come in tomorrow at a decent time, say, 11 or 12

o' clock, so we miss the snow traffic in the morning, we could get a time certain to vote on the Baker substitute at either 5 or 6 p.m. tomorrow afternoon.

Senators should understand that that means that the matter is still not disposed of because assuming that the Baker substitute is passed we still have the bill to deal with and perhaps cloture to invoke on that measure as well.

But I strongly urge Senators to consider that a time certain for a vote on the Baker substitute is a great step forward and if we can get that at a time certain tomorrow I think it is a huge accommodation to the entire Senate, and my special gratitude would go to those who are involved in the opposition to this bill and if we can get out of here in the next 15 or 20 minutes I think we should do it.

That is my recommendation. It is not yet my unanimous-consent request.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. BAKER. I yield.

Mr. ROBERT C. BYRD. I think this is a good proposal. I think we should explore it just a little bit.

First, once the Baker substitute is agreed to and no amendments to the bill are in order—I do not know how many Senators on our side have amendments. I gather very few in number.

And the second thing is I am told that the conferees are supposed to go back to meet at 9 p.m. this evening on the continuing resolution.

The third question I ask is this: If the continuing resolution comes back, if the conference report on the continuing resolution comes back to the Senate, say, at 3 p.m. tomorrow afternoon or 4 p.m., and we are supposed to vote on the Baker amendment at 6 p.m. or whatever, what is the majority leader's intention? Is it his intention to immediately go to the continuing resolution?

Mr. BAKER. Mr. President, I have indicated previously that I am going to take up that continuing resolution conference report as soon as I can get it, and the answer to the minority leader is that means as soon as someone walks through the door with a message from the House of Representatives or soon thereafter.

I say that will not abandon nor vitiate the vote on the Baker substitute at 6 p.m.

But his query is, Am I going to go to the conference report immediately? And the answer is "yes."

Mr. ROBERT C. BYRD. I am glad to have that answer. That was one of the things I insisted on in the agreement last night and heretofore that the majority leader have the right to go immediately to that continuing resolution.

Mr. BAKER. That was granted last evening.

Mr. ROBERT C. BYRD. Notwithstanding cloture being invoked. I was very supportive of that.

Mr. BUMPERS. Mr. President, will the majority leader yield for a question?

Mr. BAKER. I am glad to yield.

Mr. BUMPERS. I make it on behalf of my wife and three children. They would like to know when I am going to join them in Arkansas. Could the majority leader give me any news that I could give them?

Mr. BAKER. Mr. President, I hardly know how to answer the Senator. I know he passes through Tennessee on his way to Arkansas. I always try to encourage tourism. [Laughter.]

And we will say to my friend we are going to make it. But as to when we are going to make it I do not know. I hope we make it tomorrow. I said this morning that we will make it tonight. One of my friends and colleagues on the other side of the aisle wanted to know if he could have a puff on my cigarette. [Laughter.]

I do not know what he meant by that, I hasten to say.

But, Mr. President, seriously, this is a major step forward. If we can get a time certain for the vote on the Baker substitute we have the conferees within striking distance of completing the matter. It is going to take 10 to 16 hours, I am told, to get the conference report in shape to deliver it to the House of Representatives.

The clock is going to require us to be in here all day tomorrow and probably late into the evening just to get the continuing resolution out of the way.

That is another reason why we should try to get out of here tonight so we do not once again have 2 late nights back to back.

So I say to my friend I hope we can finish this thing tomorrow night and he can be on his way through Tennessee at a leisurely pace and on to Arkansas on Tuesday.

Mr. ROBERT C. BYRD. Through West Virginia on his way to Tennessee.

Mr. President, has the Senator from Arkansas finished?

Mr. BUMPERS. I have finished.

Mr. ROBERT C. BYRD. Mr. President, if the majority leader will yield, we have run a hotline and we find no objection to this request. My suggestion would be that the majority leader put us in at noon tomorrow. We will have icy roads in the morning. We will be here and there be a vote no later than 6 p.m. on the majority leader's substitute, no later than 6 p.m. with the understanding that if the conference report on the continuing resolution comes in in the midst of that debate the majority leader will, as he has assured us, take up the conference report on the continuing resolution.

Mr. BAKER. I am sorry. I was momentarily diverted on the part of the continuing resolution on the continuing resolution.

Mr. ROBERT C. BYRD. My suggestion was that the Senator go ahead and propound his request. I find no objection on this side, but that he have the Senate come in tomorrow at noon because the House of Representatives is not going to come in until noon, it is my understanding, and that we vote no later than 6 p.m. on the Baker substitute with the understanding that when the conference report comes in, the majority leader, with the authority already given by the order of the Senate, call up that conference report.

ORDER FOR RECESS UNTIL TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 12 noon tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR VOTE TO OCCUR NO LATER THAN 6 P.M. BAKER SUSTITUTE ON TOMORROW

Mr. BAKER. Mr. President, I further ask unanimous consent that not later than 6 p.m. tomorrow a vote occur on the Baker substitue.

Mr. President, I assure the Senator that when the conference report on the continuing resolution reaches the door I will consult with him as the order requires and ask the Senate to proceed to that matter as the Senate has already authorized me to do.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have one modification that the Senator from North Carolina suggests, that the vote on the Baker substitute would occur not eariler than 5 p.m. and not later than 6 p.m.

Mr. ROBERT C. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, there will be no more record votes tonight.

Mr. STAFFORD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. As in morning business, Mr. President, I have another matter to take care of that I believe has been cleared, and I should like to state it now for the consideration of the minority leader and other Senators.

Mr. President, there is a conference report here and available. If the minority leader is prepared to do so, I would like to proceed to the consideration of the false identification conference report to accompany H.R. 6946.

Mr. ROBERT C. BYRD. Mr. President, I have no objection.

PENALTIES FOR FALSE IDENTIFICATION — CONFERENCE REPORT

Mr. BAKER. I ask the Chair to lay before the Senate that conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6946) to amend title 18 of the United States Code to provide penalties for certain false identification related crimes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 17, 1982.)

The PRESIDING OFFICER. The question is on ageeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REGULATORY REFORM

Mr. LEAHY. Mr. President, one major issue before the Senate was the Laxalt-Leahy regulatory reform bill.

Mr. President, during the last 2 years many of us devoted much of our energies to framing a regulatory reform bill that would make our administrative agencies more efficient servants of the public, without weakening their effectiveness.

I want to call the attention of my colleagues to an article in yesterday's Christian Science Monitor reviewing the history of this legislation from its origins in the 96th Congress. The piece is by Stuart E. Eizenstat, who was President Carter's chief domestic policy adviser. During Mr. Eizenstat's tenure in the White House, he was a strong and effective spokesman for a more rational regulatory system. The article deftly summarizes the arguments in favor of the bill. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, Dec. 17, 1982]

PASS THE REGULATORY REFORM BILL

(By Stuart E. Eizenstat)

It is time for Congress to pass the regulatory reform bill. It is a sound and valuable proposal, assigned top priority by Presidents Carter and Reagan, with broad support from all sides in the Congress. It is already sufficiently advanced—unanimously approved by the Senate and by the House Judiciary Committee—that it could pass without crowding the appropriations and employment bills that should be the chief preoccupation of the lame-duck session.

The bill is designed to make individual regulatory programs more orderly, open, and commonsensical—not to gut useful health, safety, and environmental legislation. Its passage can help calm the vexations and distracting national debate about whether regulation is good or bad, on terms that all sides, including the business community, should accept.

It is one administration priority in which the House leadership and the President can readily concur.

The bill that will have the blessing of the House leadership, if one reaches the floor, is the product of four months of negotiations between representatives of the business community, the Speaker's staff, and relevant House and Senate committee staffs. In substance, it differs little from the original regulatory reform proposal that President Carter sent to the Congress in March 1979.

The heart of the bill is a straightforward requirement that agencies analyze the costs and benefits of "major" new proposed rules, and the comparative cost-effectiveness of the realistic alternatives to them. The bill also requires a reappraisal of major existing rules to see if they should be retained, changed, or dropped.

The 96th and 97th Congress have added some features to the original proposal, sponsored mainly by prominent Democrats. Amendments by Senators Kennedy, Leahy, and Laxalt, and by Representatives Danielson and McClory promote disclosure of agency decision processes, including their written communications with the White House. Senator Bumpers has directed federal courts to take a "hard look" at agency decisions and not automatically defer to presumed agency "expertise"—something that good federal judges already do anyway. Senators Levin and Boren have contributed a procedure for congressional review of major agency rules, that preserves the President's constitutional authority to veto any legislative veto of any agency decision.

As President Carter said when he submitted it—and as the recent elections clearly confirm—the American people want "responsible regulations to provide equal opportunity for employment, a clean environment, safe drugs and food, a healthy workplace, and a competitive marketplace." But we also need, as Carter added, a device to enable us to stop and say: "Does each of these rules make sense? Does it do the job? How much does it cost, and is there a cheaper way to achieve goals just as effectively?"

I know that these concepts trouble some whom I greatly respect in the public interest and labor communities. As they observe, excessive new red tape could hamper the government's ability to respond to serious social problems. But this bill will require minimal new formality and procedural rigor.

Moreover, assuring reasoned agency decisionmaking and judicial scrutiny can help environmental and consumer advocates in court as much as industry lawyers. Earlier this year, for example, a federal court ordered administration deregulators to reinstate the Department of Transportation's auto passive restraint rule. The court held that DOT had failed to prove that scuttling the rule would cut new car prices more than it would increase medical, insurance, and social service costs.

In sum, the regulatory reform bill deserves the broad-based support it enjoys. But two caveats should be noted. First, the House should seek an understanding with the Senate that will preclude a lengthy conference and will assure a final product that, like the House bill, will not dilute substantive health and safety standards in existing laws. In practice, this may mean that the Senate will simply have to accept the House bill intact.

Second, the old bugaboo of a constitutionally defective government-wide legislative veto rider, with no presidential veto provision, could be added to the bill on the House floor. To be sure, courts have recently struck down legislative vetoes that do not preserve the President's veto power, and there are good indications that the Supreme Court would invalidate such a rider, if it were adopted. Still, it would be very risky and unwise policy to pass a regulatory reform bill that includes an unconstitutional legislative veto provision. The scarce time and resources of the lame-duck session should not be squandered on controversial proposals of questionable merit, that were at preliminary stages of the legislative process before the recess.

Regulatory reform has none of those deficiencies. Passing it now would be a big step in the direction of good government.

A TRIBUTE TO COL. JOHN G. CAMPBELL

Mr. HEFLIN. Mr. President, in our service here in the U.S. Senate, there are many persons to whom we should be indebted for the help and assistance they provide to us, as well as to our staffs.

By this, I mean to refer mainly to the people who you see in the many different offices, lining the halls of the Senate Office Buildings, serving as liaison offices for all the different branches and agencies of the Federal Government. Each of us is fully aware of the hard work done by staff members of these liaison offices, all done in an effort to assist us, in whatever ways possible, in the operation of the U.S. Senate.

Today, I am pleased to have the opportunity to pay tribute to one par-

ticular staff member of one particular liaison office. That individual is one who has been of great help to my office since I first came to the U.S. Senate some 4 years ago. His name is Col. John G. Campbell, who has recently retired as Chief of the Army's Senate Liaison Office.

I feel sure that all of my colleagues are well aware of the great deal of assistance and support that are provided by the Senate's military liaison offices. We all know that we each have many constituents who are in our Armed Forces, and who contact our offices for assistance with various problems. Additionally, it always seems that we, or our legislative assistants, are in need of quick assistance with facts or figures on military legislation.

The ease we all have in dealing with the Army Liaison Office is, in large part, due to the leadership of Colonel Campbell. He is retiring from the Army after some 22 years of outstanding and distinguished service. For the last few years of this service, Colonel Campbell has been assisting us here in the U.S. Senate, and it is indeed a great assistance that he and his colleagues have been.

Colonel Campbell has been not only a dedicated Army officer, but, through his work in the Army Liaison Office, a distinguished public servant. In his Army career, he has been decorated for his gallant and heroic actions in times of war, as well as for his highly meritorious service in peacetime.

We each owe a greal deal to Colonel Campbell. My staff and I wish him well during his retirement, and know he will go on to distinguish himself in all of his future endeavors.

Thank you, Mr. President.

THE RETIREMENT OF COACH PAUL "BEAR" BRYANT

Mr. HEFLIN. Mr. President, there are very few men of whom it may be said that they truly become legends in their own time. On Wednesday, November 15, 1982, Paul "Bear" Bryant, a man who is truly a legend in his own lifetime, retired as head football coach at the University of Alabama. He will remain as athletic director for another year.

Since 1945, Coach Bryant has had an unbelievably successful coaching career, and has, indeed, become probably more widely identifiable with the sport of college football than has any other individual.

During this career, Coach Bryant has coached 1 year at the University of Maryland, 8 years at the University of Kentucky, 4 years at Texas A&M University, and 25 years at the University of Alabama.

Through these moves, and all of the changes that 38 years have seen, one thing has remained constant—Coach Bryant and his teams have always been winners. His record as a head coach is 322 wins, 85 losses, and 17 ties. At Alabama, Bryant has coached the Crimson Tide to 231 wins against only 46 losses, and 9 ties. He has only one game remaining as head coach—the Liberty Bowl in Memphis, Tenn., on December 29, when he will lead the Crimson Tide against the University of Illinois.

Coach Bryant has been named National Coach of the Year three times. No other coach has been named more than twice. Seven times he has been named Southeastern Conference Coach of the Year, three more than any other coach. He has coached teams to 12 Southeastern Conference championships—1 at Kentucky and 11 at Alabama. His teams have won or shared six national championships. No other coach has led teams to more than four national titles.

Coach Bryant has been named Southeastern Conference Coach of the Century, and NCAA Coach of the Decade for the period 1960–69. After winning that honor, he swept through the 1970's, becoming the first coach to ever win 100 games in a decade.

The numbers can go on endlessly, it seems, but the dimensions of the man go far beyond mere numbers. Coach Bryant is the only coach or athletic director I know of to establish a scholarship fund with personal donations. He has given over $300,000 to the university to be used for scholarships for handicapped and needy students. None of the money may be used for athletic purposes.

As athletic director, Coach Bryant has built an athletic program which is financially sound, while also building an athletic dormitory, a coliseum, a track stadium, a tennis stadium, a natatorium, a club house for the golf course, and enlarging the football stadium. Additionally, acres of tennis courts and recreational facilities for student use have been constructed. All this has been done with athletic receipts, without the use of State funds.

His list of honors goes on and on—University Administrator of the Year, charter member of the Alabama and Arkansas Sports Halls of Fame, the National Award from the Fellowship of Christians and Jews, the National American Legion Commander's Public Relations Award, and only the third athletic figure to be named to the American Award of Achievement.

There are those who complain that football is only a sport, and that too much emphasis is given to winning. But while we are impressed by the number of wins Coach Bryant has achieved as a coach, we should be equally impressed by the impact he has had upon the lives of those who have come in contact with him.

Coach Bryant is a winner not only because he is a tough taskmaster, but also because he cares about the welfare of each athlete. He is involved in each player's future, as he teaches them as much about life as he does about football.

In his 38 years of coaching, Coach Bryant has had a remarkable effect upon the people with whom he has come in contact and who have been entrusted to his care.

Coach Bryant sets an example. The lines on his face, his expressions, his figures of speech, all reflect a history of practicing what he preaches. It has been said that, even if you have never met Bear Bryant, the first time you see him walk into a room, he has the kind of face that makes you want to stand up and cheer.

Coach Bryant is a humble person. He sees his many accomplishments not as personal triumphs for which he alone is responsible, but as collective achievements, in which his players, his coaching staff, their families and friends, and the fans have played a role.

He is a man of few words, of a solid philosophy. He has become not just a coach of a great football team, but he has become a true leader. More than that, he has become a legend and a folk hero of this great country of ours.

A true leader is someone who can inspire others to do great things, and, by this standard, coach Bryant is a truly gifted leader of men. More than 60 of his players have been named to the first team All-American teams. Almost 50 of his former players of assistant coaches have gone on to become head coaches in either college or professional football.

Among the coaches who he has tutored, as a player or assistant coach, or both, are Danny Ford of Clemson, Jackie Sherrill of Texas A&M, Howard Schnellenberger of Miami, Steve Sloan of Duke, and Pat Dye of Auburn.

Among the outstanding players he has coached are many familiar names: Joe Namath, Ken Stabler, Richard Todd, John Hannah, Lee Roy Jordan, Ozzie Newsome, and countless others.

Keeping all of this in mind, I guess it is not at all surprising that the person chosen to succeed Coach Bryant at Alabama is another of his proteges, a former All-American receiver for the Crimson Tide, and now head coach of the New York Giants, Ray Perkins.

Paul "Bear" Bryant—the winningest, and quite possibly the most famous, college football coach of all time. Still, this man who outfought, outcoached, oughtthought, or outlived his peers should be remembered not only for his winning record, but also for his record away from the football field.

I wish Coach Bryant the best in his retirement from coaching. I know that his lovely wife Mary Harmon will certainly enjoy having a little more time

with her husband than his career allowed.

Speaking, however, for all fans of Alabama football, we will miss Coach Bryant, a true legend in his own time.

Thank you, Mr. President.

MESSAGES FROM THE HOUSE

At 4:09 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its clerks, announced that the House disagrees to the amendments of the Senate to the joint resolution (H.J. Res. 631) making further continuing appropriations and providing for productive employment for fiscal year 1983, and for other purposes; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. WHITTEN, Mr. BOLAND, Mr. NATCHER, Mr. SMITH of Iowa, Mr. ADDABBO, Mr. LONG of Maryland, Mr. YATES, Mr. ROYBAL, Mr. BEVILL, Mr. DICKS, Mr. GINN, Mr. SABO, Mr. DIXON, Mr. FAZIO, Mr. CONTE, Mr. MCDADE, Mr. EDWARDS of Alabama, Mr. MEYERS, Mr. ROBINSON, Mr. COUGHLIN, Mr. KEMP, and Mr. LEWIS as managers of the conference on the part of the House.

ENROLLED BILLS SIGNED

At 4:35 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its clerks, announced that the Speaker has signed the following enrolled bills:

S. 1340. An act to provide for the use and distribution of Clallam judgment funds in docket numbered 134 before the Indian Claims Commission, and for other purposes;

S. 2611. An act to amend the Peace Corps Act; and

S. 3073. An act to provide for the distribution within the United States the U.S. Information Agency film entitled "Dumas Malone: A Journey With Mr. Jefferson."

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

ADDITIONAL COSPONSORS

S. 2930

At the request of Mr. HATCH, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 2930, a bill to provide for the protection of migrant and seasonal agricultural workers and for the registration of contractors of migrant and seasonal agricultural labor, and for other purposes.

AMENDMENTS SUBMITTED FOR PRINTING

SURFACE TRANSPORTATION ACT OF 1982

AMENDMENT NO. 5629

(Ordered to be printed and to lie on the table.)

Mr. ROBERT C. BYRD submitted an amendment intended to be proposed by him to an amendment to the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23 of the United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

NATURAL AREAS TAX PROTECTION ACT OF 1982

AMENDMENT NO. 5630

(Ordered to be printed and lie on the table.)

Mr. BOREN submitted an amendment intended to be proposed by him to the bill (S. 3024) to amend the Internal Revenue Code of 1954 to promote transfers of real property interests to certain organizations for use for conservation purposes.

ADDITIONAL STATEMENTS

VIOLENT CRIME AND DRUG ENFORCEMENT IMPROVEMENTS ACT

● Mr. MATHIAS. Mr. President, the last days of this Congress have been extraordinarily busy. We in the Senate and our colleagues in the other body have had to make an enormous number of difficult decisions about the legislation before us. The number of rollcall votes over the past few days is indicative of the volume of those legislative decisions. But the record should reflect that many important choices have been made without a formal vote. That does not make those decisions any less significant.

In my view, one of the most important decisions which we have made in recent days is not clearly reflected in the pages of the CONGRESSIONAL RECORD. I rise, therefore, to point it out to my colleagues, and to the American people. I refer to the decision not to press forward in this Congress with the Violent Crime and Drug Enforcement Improvements Act of 1982, which came before this body on September 30 as S. 2572.

That bill did not excite much controversy on the floor of the Senate. I believe that it should have, but, in fact it passed the Senate after relatively brief debate, without attracting much attention to itself. It did, however, attract the attention of some outside the Senate, including the editors of the New York Times.

The Times printed an editorial on December 8, 1982, which included some rather harsh language directed against S. 2572. It called the bill "a 232-page prosecutor's Christmas tree." It said that "the only kind of attention this bill deserves is contempt." And it continued, "Those who support it are kidding themselves, as well as the country, about crime."

I opposed this bill on the Senate floor, but I do not believe that the supporters of this bill, including the distinguished chairman and ranking minority member of the Judiciary Committee, are "kidding themselves, as well as the country, about crime." The best refutation of that charge is the decision by the bill's supporters not to press forward with it in the waning days of this lameduck session.

The issues which S. 2572 addresses are real ones. The bail process, the sentencing decision, the handling of drug cases—all these aspects of our criminal justice system need improvement. I look forward to working with the Senator from South Carolina, the Senator from Delaware, and other Senators, to see what we can do during the 98th Congress to make the system work better.

Our chances of success in that endeavor will be enhanced if we can avoid two pitfalls into which S. 2572 stumbled. One is the omnibus approach to criminal legislation. Although the Violent Crime and Drug Enforcement Improvements Act was itself a slimmed-down version of the mammoth Criminal Code Reform Act, it still tried to address too many complex issues at once. Enactment of a useful statute in any one of the areas addressed by this bill would have required hard work, attention to detail, and the resolution of numerous important policy questions. The history of attempts at criminal code legislation over the past decade ought to teach us that any multiissue, comprehensive legislative initiative in this field is destined to collapse under its own weight. I hope that we can learn and apply that lesson in the next Congress.

Second, I hope that any criminal legislation which we consider next year will give due weight to the necessity to preserve judicial independence, particularly in the area of sentencing. The sentencing decision is perhaps the hardest that any judge has to make. For many judges, all the shortcomings and frustrations of our criminal justice system are epitomized in the moment when a decision must be made as to the disposition of a convicted criminal. Each criminal is different from any other; so is every crime. The sentencing decision has always been an individualized one; it must remain so. Certainly it is important for the Congress to give guidance to judges in passing sentence, and to take steps to reduce unwarranted disparities. But I hope that we can resist the temptation to hedge the sentencing process about with a proliferation of guidelines, policy statements, definitional standards, and other restrictions, all emanating from a body that lacks the independence and freedom from politi-

cal pressure that characterizes the Federal bench. This, in my view, was one of the principal defects in the system envisioned in S. 2572.

Mr. President, I ask that the times editorial be printed at this point in the RECORD.

The editorial follows:

[From the New York Times, Dec. 8, 1982]

KIDDING AROUND ABOUT CRIME

Just before the election, the Senate tried to show voters how tough Congress could be about crime. Never mind constitutional niceties like the presumption of innocence; in the name of public safety it passed a preventive detention bill that would make it national policy to jail people who can't prove they won't commit a violent crime.

Now in the lameduck session, the bill's supporters want the House of Representatives to accept the bill, a 232-page prosecutor's Christmas tree, without hearings on preventive detention or a dozen other of its provisions. The only kind of attention this bill deserves is contempt. Those who support it are kidding themselves, as well as the country, about crime.

When it comes to depriving suspects of bail, Congress has already stated an admirable Federal policy in the 1966 Bail Reform Act. Acknowledging the Constitution's commitment to reasonable bail and due process, it requires pretrial release for those accused of Federal crimes unless they are likely to flee to avoid trial. That policy recognizes that the accused hasn't been convicted of the crime charged, much less any future crime that prosecutors suspect he might commit.

That policy is not only constitutional, it is also practical. There is no Federal bail problem so pressing that Congress must address it now. The Reagan Administration has complained of bail-jumping, especially in narcotics cases. But that can be solved by pressing judges to set higher bail for well-financed narcotics suspects.

Other parts of the bill have merit. They would combat disparities in criminal sentencing, help crime victims and support drug enforcement. But many provisions have had scant attention in the Senate and none in the House. There's no reason to rush them into law. There's every reason not to tarnish the Constitution by plunging ahead. Preventive detention is useful only as a political trophy for the Reagan Administration. As a crime-fighting measure, it is unnecessary.●

RUSSELL BAKER ON NUCLEAR STRATEGY

● Mr. KENNEDY. Mr. President, in a recent article in the New York Times, Russell Baker makes the important point that nuclear strategy is too important to be left to the experts, and that the constant participation of the American people in the debate is essential to keep the experts in touch with reality.

At this critical stage in the debate, the commonsense of the American people is more important than ever. At the present time, the administration's experts are trying to convince us that building more and more nuclear warheads is the key to nuclear arms control. They urge us not to question their plans for the largest peacetime military buildup in our history. An Under Secretary of Defense claims that everyone can make it through a nuclear war, if only there are enough shovels to go around. And most recently, the administration has been trying to persuade us that the way to protect our strategic missiles from Soviet attack is to pack them all together in the same place.

Russell Baker's comments on the excesses of nuclear strategy are stated with his characteristic eloquence and humor, but his underlying message is of vital importance to all of us as Congress and the country continue to deal with these complex issues. I ask that Mr. Baker's article may be printed in the RECORD.

The article follows:

[From the New York Times, Dec. 12, 1982]

NUCLEAR FREEZE FRAME

(By Russell Baker)

My position on the nuclear freeze is that the Government ought to stop telling me I'm too dumb to have an opinion on it.

Of course it's a complicated business, but it's nowhere near as hard to understand as economics, and during the elections this fall President Reagan urged everybody in the country to have an opinion about his economic policy. So did every other politician in the Government, as well as all of those who hoped to get into the Government.

Not a single one of them said, "National economic policy is so complicated that only a handful of scholars can hope to understand it, so we'd appreciate it if the rest of you would realize that you're too dumb to get involved, and leave it up to the experts."

The reason nobody said this, I suppose, was fear that the whole country might collapse laughing at the suggestion that the experts understand the economy better than us dumbbells. The politicians know as well as the rest of us that in economics an expert is just another fellow waiting for events to make a monkey of him.

This sensible view of experts has never extended to nuclear policy. There, a small group of "strategic thinkers" has been elevated above mere experthood to a kind of secular priesthood. To suggest that they may be just as wrong about their business as economists usually are about theirs is treated, if not as an act of heresy, at least as an impudence silly in the extreme.

Why "strategic thinkers" should be immune to the skepticism to which all other experts are subjected is a mystery. For a long time, I thought it was because some many of them spoke with Middle European accepts. There is something intimidating about a man who can talk about "mutual assured destruction" in a Middle European accent. It sounds so much more profound than it does when discussed in a Middle Wester drawl.

I abandoned this theory after noting that many delicatessen countermen in New York also speak in Middle European accents, yet have trouble making change. And anyhow, what had Middle Europe ever produced except incessant warfare?

Gradually, I evolved another theory; namely, that nobody bothers to challenge them because nobody has yet had provocation to do so. When an economist's theory puts you out of work you're likely to look at him with a skeptical eye. In the same way, I suppose, if the nuclear philosophers got us all blown to pieces we would revise our respect for their credentials. But of course, by that time, there wouldn't be must point in it.

This being the case, it seems to me that the time to start treating the "strategic thinkers" priesthood as just another bunch of experts is right now. In this belief, I urge them to persuade their political front man to quit telling us we are too dumb to understand nuclear strategy.

Over 30 years their theories, aimed at protecting the country from destruction, have produced arsenals here and abroad sufficient to destroy civilization several times more than necessary to preserve it. Maybe this makes sense, but I doubt it. In any case, if you ask, "Are you guys sure you know what you're doing?" is it a satisfactory answer to be told, "Shut up, dummy, and worry about something like economics"?

Personally, I worry when I hire somebody to do a job like, say, putting on a new roof. If he puts on a layer of shingles and then starts putting on another, I'm apt to say, "What do you think you're doing?" And he'll probably say, "Two layers of shingles will give you a lot more insulation."

If he goes on to third, fourth and fifth layers, sooner or later I'm going to say, "Are you sure you know what you're doing?" and if he says, "Shut up, dummy, and worry about something like plumbing," I'm going to develop some strong roofing theories of my own, the first one being that I don't need a 30-story pile of shingles to keep me adequately insulated.

Now nuclear strategy is more complicated than roofing, and I don't want to suggest it isn't. On the other hand, economic policy is more complicated than nuclear strategy (if you think it isn't, just send me your formula for achieving full employment without inflation while rectifying the balance of trade throughout the world), yet how many of us would hesitate to tell an economist he doesn't know what he's doing?

Sure, we're dumb about economics and dumb about nuclear strategy too, but genuine unforgivable dumbness consists in letting ourselves be persuaded that the experts don't need us shouting at them to keep them in touch with human reality.●

THE SECOND AMENDMENT OF THE U.S. CONSTITUTION GUARANTEES THE INDIVIDUAL RIGHT TO KEEP AND BEAR ARMS

● Mr. SYMMS. Mr. President, these days it seems that any mention of the second amendment of the U.S. Constitution and the constitutional guarantee of the individual right to keep and bear arms will inevitably result in an energetic debate. In view of this continuing and heated controversy, the recently released report of the U.S. Senate Committee on the Judiciary, Subcommittee on the Constitution, entitled "The Right To Keep and Bear Arms," is both timely and informational.

I urge my colleagues in the Senate to read this report which provides a careful analysis of the history, intent and purpose of the second amendment to the Constitution. Further, I would

like to draw my colleagues' attention to the preface of this report and its outstanding history of the development and intent of the second amendment's individual guarantee of the right to keep and bear arms, written by the distinguished Senator from Utah (Mr. HATCH), chairman of the Senate Judiciary Subcommittee on the Constitution. Senator HATCH had this report initiated as the first order of business on assuming chairmanship of the subcommittee. He is to be commended for his wisdom and foresight in carrying this project to fruition.

In addition, you may wish to inform your constituents about this report. For their convenience, the report is available from the Government Printing Office, Superintendent of Documents. Further, it can be read at any one of the numerous depository libraries within each of your respective States.

I ask that the following preface be inserted at this point in the RECORD.

The preface follows:

U.S. SENATE REPORT OF THE COMMITTEE ON THE JUDICIARY, SUBCOMMITTEE ON THE CONSTITUTION, WASHINGTON, D.C., MARCH 1, 1982

"THE RIGHT TO KEEP AND BEAR ARMS"

Preface

"To preserve liberty, it is essential that the whole body of the people always possess arms, and be taught alike, especially when young, how to use them." (Richard Henry Lee, Virginia delegate to the Continental Congress, initiator of the declaration of Independence, and member of the first Senate, which passed the Bill of Rights.)

"The great object is that every man be armed . . . Everyone who is able may have a gun." (Patrick Henry, in the Virginia Convention on the ratification of the Constitution.)

"The advantage of being armed . . . the Americans possess over the people of all other nations . . . Notwithstanding the military establishments in the several Kingdoms of Europe, which are carried as far as the public resources will bear, the governments are afraid to trust the people with arms." (James Madison, author of the Bill of Rights, in his Federalist Paper No. 26.)

"A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed." (Second Amendment to the Constitution.)

In my studies as an attorney and as a United States Senator, I have constantly been amazed by the indifference or even hostility shown the Second Amendment by courts, legislatures, and commentators. James Madison would be startled to hear that his recognition of a right to keep and bear arms, which passed the House by a voice vote without objection and hardly a debate, has since been construed in but a single, and most ambiguous, Supreme Court decision, whereas his proposals for freedom of religion, which he made reluctantly out of fear that they would be rejected or narrowed beyond use, and those for freedom of assembly, which passed only after a lengthy and bitter debate, are the subject of scores of detailed and favorable decisions. Thomas Jefferson, who kept a veritable armory of pistols, rifles and shotguns at Monticello, and advised his nephew to forsake other sports in favor of hunting, would be astounded to hear supposed civil libertarians claim firearm ownership should be restricted. Samuel Adams, a handgun owner who pressed for an amendment stating that the "Constitution shall never be construed . . . to prevent the people of the United States who are peaceable citizens from keeping their own arms," would be shocked to hear that his native state today imposes a year's sentence, without probation or parole, for carrying a firearm without a police permit.

This is not to imply that courts have totally ignored the impact of the Second Amendment in the Bill of Rights. No fewer than twenty-one decisions by the courts of our states have recognized an individual right to keep and bear arms, and a majority of these have not only recognized the right but invalidated laws or regulations which abridged it. Yet in all too many instances, courts or commentators have sought, for reasons only tangentially related to constitutional history, to construe this right out of existence. They argue that the Second Amendment's words "right of the people" mean "a right of the state"—apparently overlooking the impact of those same words when used in the First and Fourth Amendments. The "right of the people" to assemble or to be free from unreasonable searches and seizures is not contested as an individual guarantee. Still they ignore consistency and claim that the right to "bear arms " relates only to military uses. This not only violates a consistent constitutional reading of "right of the people" but also ignores that the second amendment protects a right to "keep" arms. These commentators contend instead that the amendment's preamble regarding the necessity of a "well regulated militia . . . to a free state" means that the right to keep and bear arms applies only to a National Guard. Such a reading fails to note that the Framers used the term "militia" to relate to every citizen capable of bearing arms, and that Congress has established the present National Guard under its power to raise armies, expressly stating that it was not doing so under its power to organize and arm the militia.

When the first Congress convened for the purpose of drafting a Bill of Rights, it delegated the task to James Madison. Madison did not write upon a blank tablet. Instead, he obtained a pamphlet listing the State proposals for a bill of rights and sought to produce a briefer version incorporating all the vital proposals of these. His purpose was to incorporate, not distinguish by technical changes, proposals such as that of the Pennsylvania minority, Sam Adams, or the New Hampshire delegates. Madison proposed among other rights that "That right of the people to keep and bear arms shall not be infringed; a well armed and well regulated militia being the best security of a free country; but no person religiously scrupulous of bearing arms shall be compelled to render military service in person." In the House, this was initially modified so that the militia clause came before the proposal recognizing the right. The proposals for the Bill of Rights were then traimmed in the interests of brevity. The conscientious objector clause was removed following objections by Elbridge Gerry, who complained that future Congresses might abuse the exemption to excuse everyone from military service.

The proposal finally passed the House in its present form: "A well regulated militia, being necessary to the security of a free state, the right of the people to keep and bear arms, shall not be infringed.:" In this form it was submitted into the Senate, which passed it the following day. The Senate in the process indicated its intent that the right be an individual one, for private purposes, by rejecting an amendment which would have limited the keeping and bearing of arms to bearing "For the common defense".

The earliest American constitutional commentators concurred in giving this broad reading to the amendment. When St. George Tucker, later Chief Justice of the Virginia Supreme Court, in 1803 published an edition of Blackstone annotated to American law, he followed Blackstone's citation of the right of the subject "of having arms suitable to their condition and degree and such as are allowed by law" with a citation to the Second Amendment, "And this without any qualification as to their condition or degree, as is the case in the British government." William Rawle's "View of the Constitution" published in Philadelphia in 1825 noted that under the Second Amendment: "The prohibition is general. No clause in the Constitution could by a rule of construction be conceived to give to Congress a power to disarm the people. Such a flagitious attempt could only be made under some general pretense by a state legislature. But if in blind pursuit of inordinate power, either should attempt it, this amendment may be appealed to as a restraint on both." The Jefferson papers in the Library of Congress show that both Tucker and Rawle were friends of, and corresponded with, Thomas Jefferson. Their views are those of contemporaries of Jefferson, Madison and others, and are entitled to special weight. A few years later, Joseph Story in his "Commentaries on the Constitution" considered the right to keep and bear arms as "the palladium of the liberties of the republic", which deterred tyranny and enabled the citizenry at large to overthrow it should it come to pass.

Subsequent legislation in the second Congress likewise supports the interpretation of the Second Amendment that creates an individual right. In the Militia Act of 1792, the second Congress defined "militia of the United States" to include almost every free adult male in the United States. These persons were obligated by law to possess a firearm and a minimum supply of ammunition and military equipment. This statute, incidentally, remained in effect into the early years of the present century as a legal requirement of gun ownership for most of the population of the United States. There can be little doubt from this that when the Congress and the people spoke of a "militia", they had reference to the traditional concept of the entire populace capable of bearing arms, and not to any formal group such as what is today called the National Guard. The purpose was to create an armed citizenry, which the political theorists at the time considered essential to ward off tyranny. From this militia, appropriate measures might create a "well regulated militia" of individuals trained in their duties and responsibilities as citizens and owners of firearms.

If gun laws in fact worked, the sponsors of this type of legislation should have no difficulty drawing upon long lists of examples of crime rates reduced by such legislation. That they cannot do so after a century and a half of trying—that they must sweep under the rug the southern attempts at gun control in the 1870–1910 period, the northeastern attempts in the 1920–1939 period,

the attempts at both Federal and State levels in 1965-1976—establishes the repeated, complete and inevitable failure of gun laws to control serious crime.

Immediately upon assuming chairmanship of the Subcommittee on the Constitution, I sponsored the report which follows as an effort to study, rather than ignore, the history of the controversy over the right to keep and bear arms. Utilizing the research capa- bilities of the Subcommittee on the Constitution, the resources of the Library of Congress, and the assistance of constitutional scholars such as Mary Kaaren Jolly, Steven Halbrook, and David T. Hardy, the subcommittee has managed to uncover information on the right to keep and bear arms which documents quite clearly its status as a major individual right of American citizens. We did not guess at the purpose of the British 1689 Delclaration of Rights; we located the Journals of the House of Commons and private notes of the Declaration's sponsors, now dead for two centuries. We did not make suppositions as to colonial interpretations of that Declaration's right to keep arms; we examined colonial newspapers which discussed it. We did not speculate as to the intent of the framers of the second amendment; we examined James Madison's drafts for it, his handwritten outlines of speeches upon the Bill of Rights, and discussions of the second amendment by early scholars who were personal friends of Madison, Jefferson, and Washington and wrote while these still lived. What the Subcommittee on the Constitution uncovered was clear—and long-lost—proof that the second amendment to our Constitution was intended as an individual right of the American citizen to keep and carry arms in a peaceful manner, for protection of himself, his family, and his freedoms. The summary of our research and findings forms the first portion of this report.

In the interest of fairness and the presentation of a complete picture, we also invited groups which were likely to oppose this recognition of freedoms to submit their views. The statements of two associations who replied are reproduced here following the report of the Subcommittee. The Subcommittee also invited statements by Messrs. Halbrook and Hardy, and by the National Rifle Association, whose statements likewise follow our report.

When I became chairman of the Subcommittee on the Constitution, I hoped that I would be able to assist in the protection of the constitutional rights of American citizens, rights which have too often been eroded in the belief that government could be relied upon for quick solutions to difficult problems.

Both as an American citizen and as a United States Senator I repudiate the view. I likewise repudiate the approach of those who believe to solve American problems you simply become something other than American. To my mind, the uniqueness of our free institutions, the fact that an American citizen can boast freedoms unknown in any other land, is all the more reason to resist any erosion of our individual rights. When our ancestors forged a land "conceived in liberty", they did so with musket and rifle. When they reacted to attempts to dissolve their free institutions, and established their identity as a free nation, they did so as a nation of armed freemen. When they sought to record forever a guarantee of their rights, they devoted one full amendment out of ten to nothing but the protection of their right to keep and bear arms against government interference. Under my chairmanship the Subcommittee on the Constitution will concern itself with a proper recognition of, and respect for, this right most valued by free men.

JANUARY 20, 1982.

ORRIN G. HATCH.
Chairman, Subcommittee on the Constitution, Committee on the Judiciary, U.S. Senate.●

RECESS UNTIL 12 NOON TOMORROW

Mr. BAKER. Mr. President, I see no Senators seeking recognition. I move, in accordance with the order previously entered, that the Senate stand in recess until 12 noon tomorrow.

The motion was agreed to and, at 8:34 p.m., the Senate recessed until Monday, December 20, 1982, at 12 noon.

SENATE—*Monday, December 20, 1982*

(Legislative day of Tuesday, November 30, 1982)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D. offered the following prayer:

Let us pray.

Almighty God, Sovereign Lord of history, we thank Thee that Thou art a God of things as they are, not as we wish they were. Thou art a God of realism, not of fantasy. Thou hast not given us a faith that is so heavenly minded it is no earthly good. Thou didst sovereignly move Emperor Caesar Augustus, the most powerful man of his day, supreme ruler of Pax Romana, to order a census so Thy Son would be born in Bethlehem. Thy Son, whose birth split history into B.C. and A.D.—who was destined to be a king—was not born in a palace, but in a stable. Thou didst announce this cosmic event, not to the Roman senate, or the civilized elite, but to a handful of shepherds in the field.

Gracious Father, there is nothing about this powerful Senate, collectively or individually, which Thou dost not know. Our secret thoughts, desires, aspirations, and ambitions are known to Thee. Thou knowest the compounding frustration felt by Senators and their families as Christmas draws near and they are unable to be involved in arrangements that demand the attention of mothers and fathers. Practical, down-to-earth Heavenly Father, manifest Thy power and grace in this place today. Help the Senators to finish the 97th Congress in an honorable way that will please Thee and bless the people. Fill this place with Thy love and peace. Dissolve any lingering enmity between Members as the Senate comes to adjournment. We pray in the name of Him whose sacrificial love includes the least as well as the greatest. Amen....SENATE... A20DE6 #53793 Lankford 12-20-82 A20DE6.002 f. %131.5

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT Pro Tempore. The majority leader is recognized.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, am I correct that the provisions of rule XXII postcloture debate do not extinguish the time allocated to the two leaders under the standing order?

The PRESIDENT Pro Tempore. The Senator is correct.

REDUCTION OF LEADER TIME

Mr. BAKER. There are a few things that might be taken care of before we go back to the debate on the Baker substitute to the gas tax bill, and in order to make room for that, I ask unanimous consent, if the distinguished minority leader has no objection, that the time be reduced to not more than 5 minutes each.

Mr. ROBERT C. BYRD. I agree.

The PRESIDENT Pro Tempore. Without objection, it is so ordered.

PEOPLE WHO WENT BY IN WINTER

Mr. BAKER. Mr. President, today is a perfect day for this week's poem which was written by William Stafford. It is entitled "People Who Went By in Winter," and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

PEOPLE WHO WENT BY IN WINTER

The morning man came in to report
that something had crossed the field
in the night during the storm. He heard
ribbons of wind snap at their tether
and a sound like some rider saying
the ritual for help, a chant or a song.
When we went out all we found
were deep, slow tracks in freezing mud
and some sticks tied together hanging
from the lowest branch of the oldest
tree by the river.

While beginning snow eddied and curtained
thicker and thicker on, we looked.
The grass hurried by, seething, then silent,
brown, all the way to the west, a little
touch-by-touch trail to the mountains.
Our boss turned back: "No.
We can't help them. They sing till
they find a place to winter. They have
tents. They make it, somehow." He
looked off that long way, where
the grass tossed.

Riding home, he told us:
"My people were like them,
over around Grand Prairie—slaves once,
then landowners. Now they pass like
this, and I hear them, because
I wake up and am partly theirs."
He looked at every man, and
he put his hand on the neck of his horse:
"They are our people, yours and mine,
all of us," he said.
"In every storm I hear them pass."

—WILLIAM STAFFORD.

RECYCLING AND RECOVERY OF VALUABLE RESOURCES

Mr. BAKER. Mr. President, for nearly a century, recycling or recovering valuable materials such as paper from solid waste, has made an important contribution to the economic strength of America by helping to reduce solid waste disposal problems, providing income to civic and charitable organizations, generating tax revenues, and extending our natural resources.

Accordingly, under the Resource Conservation and Recovery Act of 1976 the Congress called for solid waste management planning activities to promote both materials recovery or recycling and energy recovery.

Toward this end, one of the stated objectives of the act is to foster "a cooperative effort among Federal, State, and local governments and private enterprise in order to recover valuable materials and energy from solid waste." The act further states that millions of tons of recoverable materials which could be used are needlessly buried each year; methods are available to separate usable materials from solid waste and the recovery and conservation of such materials can reduce the dependence of the United States on foreign resources and ease our balance-of-payments problems.

Paper recycling, for example, is technically and economically feasible as evidenced by the fact that the paper industry is currently collecting over 18 million tons of recycled paper annually to meet the demand of some 600 papermills in the United States.

In my own State of Tennessee, three large papermills manufacture new paper exclusively from recycled paper.

Despite the Congress historic commitment to recycling or materials recovery, there is growing concern that as government moves to develop alternate sources of energy, paper recycling is threatened by some plans to turn all solid waste into energy. These plans in many cases do not make adequate provisions for preserving the collection system for recyclable paper.

To address this concern and to clarify the original intent of the Congress under the act that solid waste management planning efforts adequately consider both materials recovery and energy recovery, the Resource Conservation and Recovery Act Reauthorization Act of 1982 (H.R. 6307), as approved by the U.S. House of Representatives, contains certain provisions

designed to protect the interests of recycling.

The House adopted provisions which provide that State solid waste management plans and energy recovery system contracts should adequately provide for the present and reasonably anticipated future needs of recycling in the area encompassed by the planning process.

This issue will be considered next year when the Resource Conservation and Recovery Act is up for reauthorization. It is my belief that this provision will be enacted in the next Congress to foster the continued compatibility of materials recovery and energy recovery.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I am told there is some possibility we can do a nuclear waste bill. I do not believe that is quite yet cleared, but I am told there is some possibility we can. I am willing to do that before we get on this other measure, if we do so by unanimous consent, which is the only way we could do it. But the reason for abbreviating leader time, to which the minority leader agreed, is that we might take some action on matters which have been cleared.

I inquire of the minority leader if he is similarly inclined to take up matters that have unanimous consent during the next 15 minutes or so?

Mr. ROBERT C. BYRD. I am inclined to take up this measure only if it is by—there is a problem on the nuclear waste matter.

Mr. STENNIS. Mr. President, will the floor leader yield to me for a question?

Mr. BAKER. Yes, I am pleased to yield.

Mr. STENNIS. I was as anxious as you to set a time. I am interested, too, in a matter that may come up. We do not yet know. If you want to have a quorum call, that is all right. The Senator from Idaho had asked for me to meet him here.

Mr. BAKER. Mr. President, the Senator from Mississippi has been in the very forefront of those who have concern, interested concern, on this measure because I know it has a major impact potentially on his State. I think his suggestion is a good suggestion, and during leader time which still remains I suggest the absence of a quorum.

Mr. ROBERT C. BYRD. Mr. President, will the Senator withhold?

Mr. BAKER. Yes, I withhold.

Mr. President, I ask unanimous consent that I may suggest the absence of a quorum, and that the quorum shall not extend beyond the hour of 12:15 p.m.

Mr. ROBERT C. BYRD. Mr. President, there is no way that that can be enforced because any Senator who wishes to object can do so, and there are a lot of Senators who are not on the floor.

Mr. BAKER. Mr. President, may I inquire, is the constitutional right to establish the presence of a quorum of such magnitude and stature that a unanimous-consent agreement could not terminate the time in which the agreement was made?

The PRESIDENT pro tempore. The Senator is correct.

Mr. BAKER. I thank the Chair.

RECESS FOR 5 MINUTES

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate stand in recess for 5 minutes.

There being no objection, the Senate, at 12:09 p.m., recessed until 12:21 p.m., whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. BOSCHWITZ).

ORDER OF BUSINESS

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I gather from the continuing negotiations that are going on behind me on the nuclear waste bill that we have not yet obtained an agreement on that, so I will not try to make any arrangements for it at this time. I would encourage Senators to continue to explore that possibility. If they can work out an agreed time period, I will ask unanimous consent to take it up later today if the minority leader is agreeable.

At this particular time I do not see any point in delaying the Senate. We have only a certain length of time to continue the debate on the gas tax bill.

I believe leader time has expired, is that correct?

The PRESIDING OFFICER (Mr. BOSCHWITZ). The Senator is correct.

Mr. BAKER. Would the Chair state the business before the Senate?

SURFACE TRANSPORTATION ACT OF 1982

The PRESIDING OFFICER. The clerk will report the pending business.

The assistant legislative clerk read as follows:

A bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with Title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

The Senate resumed consideration of the bill.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. Chairman, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—H.R. 3809

Mr. BAKER. Mr. President, we have tried two or three times, but I am inclined to believe there may now be some chance we could dispose of the nuclear waste bill. I am not certain we can, but I think it is worth an effort. I am going to put this unanimous-consent request, and before I do it should be understood that I am not providing for final passage. I am providing in this request I am about to make for a time in which this matter can be considered.

Mr. President, I ask unanimous consent that the pending measure be temporarily laid aside so that the Senate may proceed to the consideration of the nuclear waste bill and that there be a time limitation on the consideration of that measure of 15 minutes to be equally divided and controlled in the usual form.

A further proviso, Mr. President: That if the bill is passed, the Senate will resume consideration of the pending measure, which is the highway tax bill, but that in any event, at the expiration of 15 minutes, whether the bill has been passed or not, the bill will be laid aside and the Senate will resume consideration of the highway tax measure.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. I thank all Senators.

Mr. McCLURE. addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. I ask unanimous consent to proceed to the immediate consideration of Calendar No. 968, H.R. 3809.

Mr. BAKER. Mr. President, before the clerk reports, will the Senator yield to me?

Mr. McCLURE. Yes, I yield.

Mr. BAKER. It has been brought to my attention by the minority leader that one Senator is willing to go forward with this bill in his absence, but if a rollcall vote is ordered—and we do not anticipate that—that it be stacked until he returns.

I ask unanimous consent, Mr. President, that if a rollcall vote is ordered on, or in relation to this measure, or any amendment to this measure during the 15-minute period when it is up for consideration, that rollcall vote not occur until 2:30 p.m. today.

Mr. ROBERT C. BYRD. Mr. President, further reserving the right to object, will the leader include in his proposal that any amendment to this measure be germane?

Mr. BAKER. Yes, Mr. President, I include that in my request.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

NUCLEAR WASTE POLICY ACT OF 1982

Mr. McCLURE. Now, Mr. President, I ask that the clerk report Calendar No. 968, H.R. 3809.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 3809) to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 4983

(Purpose: To provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel to establish a program of research development and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel and for other purposes)

Mr. McCLURE. Mr. President, I call up Senate amendment No. 4983, the McClure substitute, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), for himself and Mr. SIMPSON, Mr. JACKSON, Mr. JOHNSTON, and Mr. DOMENICI proposes an amendment numbered 4983, in the nature of a substitute.

The amendment is as follows:

Strike all after the enacting clause and insert in lieu thereof, the following:

SHORT TITLE AND TABLE OF CONTENTS

SECTION 1. This Act may be cited as the "Nuclear Waste Policy Act of 1982".

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
Sec. 2. Definitions.
Sec. 3. Separability.
Sec. 4. Territories and possessions.
Sec. 5. Ocean disposal.
Sec. 6. Limitation on spending authority.
Sec. 7. Protection of classified national security information.
Sec. 8. Applicability.

TITLE I—DISPOSAL AND STORAGE OF HIGH-LEVEL RADIOACTIVE WASTE, SPENT NUCLEAR FUEL, AND LOW-LEVEL RADIOACTIVE WASTE

Sec. 101. State and affected Indian tribe participation in development of proposed repositories for defense waste.

SUBTITLE A—REPOSITORIES FOR DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE AND SPENT NUCLEAR FUEL

Sec. 111. Findings and purposes.
Sec. 112. Recommendation of candidate sites for site characterization.
Sec. 113. Site characterization.
Sec. 114. Site approval and construction authorization.
Sec. 115. Review of repository site selection.
Sec. 116. Participation of States.
Sec. 117. Consultation with States and Indian tribes.
Sec. 118. Participation of Indian tribes.
Sec. 119. Judicial review of agency actions.
Sec. 120. Expedited authorizations.
Sec. 121. Certain standards and criteria.
Sec. 122. Disposal of spent nuclear fuel.
Sec. 123. Title to material.
Sec. 124. Consideration of effect of acquisition of water rights.
Sec. 125. Termination of certain provisions.

SUBTITLE B—INTERIM STORAGE PROGRAM

Sec. 131. Findings and purposes.
Sec. 132. Available capacity for interim storage of spent nuclear fuel.
Sec. 133. Interim at-reactor storage.
Sec. 134. Licensing of facility expansions and transshipments.
Sec. 135. Storage of spent nuclear fuel.
Sec. 136. Interim Storage Fund.
Sec. 137. Transportation.

SUBTITLE C—MONITORED RETRIEVABLE STORAGE

Sec. 141. Monitored retrievable storage.

SUBTITLE D—LOW-LEVEL RADIOACTIVE WASTE

Sec. 151. Financial arrangements for site closure.

TITLE II—RESEARCH, DEVELOPMENT, AND DEMONSTRATION REGARDING DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE AND SPENT NUCLEAR FUEL

Sec. 211. Purpose.
Sec. 212. Applicability.
Sec. 213. Identification of sites.
Sec. 214. Siting research and related activities.
Sec. 215. Test and evaluation facility siting review and reports.
Sec. 216. Federal agency actions.
Sec. 217. Research and development on disposal of high-level radioactive waste.
Sec. 218. Research and development on spent nuclear fuel.
Sec. 219. Payments to States and affected Indian tribes.
Sec. 220. Study of research and development needs for monitored retrievable storage proposal.
Sec. 221. Judicial review.
Sec. 222. Research on alternatives for the permanent disposal of high-level radioactive waste.

TITLE III—OTHER PROVISIONS RELATING TO RADIOACTIVE WASTE

Sec. 301. Mission plan.
Sec. 302. Nuclear Waste Fund.
Sec. 303. Alternate means of financing.
Sec. 304. Office of Civilian Radioactive Waste Management.
Sec. 305. Location of test and evaluation facility.

DEFINITIONS

SEC. 2. For purposes of this Act:

(1) The term "Administrator" means the Administrator of the Environmental Protection Agency.

(2) The term "affected Indian tribe" means any Indian tribe—

(A) within whose reservation boundaries a monitored retrievable storage facility, test and evaluation facility, or a repository for high-level radioactive waste or spent fuel is proposed to be located;

(B) whose federally defined possessory or usage rights to other lands outside of the reservation's boundaries arising out of congressionally ratified treaties may be substantially and adversely affected by the locating of such a facility: *Provided*, That the Secretary of the Interior finds, upon the petition of the appropriate governmental officials of the tribe, that such effects are both substantial and adverse to the tribe;

(3) The term "atomic energy defense activity" means any activity of the Secretary performed in whole or in part in carrying out any of the following functions:

(A) naval reactors development;

(B) weapons activities including defense inertial confinement fusion;

(C) verification and control technology;

(D) defense nuclear materials production;

(E) defense nuclear waste and materials byproducts management;

(F) defense nuclear materials security and safeguards and security investigations; and

(G) defense research and development.

(4) The term "candidate site" means an area, within a geologic and hydrologic system, that is recommended by the Secretary under section 112 for site characterization, approved by the President under section 112 for site characterization, or undergoing site characterization under section 113.

(5) The term "civilian nuclear activity" means any atomic energy activity other than an atomic energy defense activity.

(6) The term "civilian nuclear power reactor" means a civilian nuclear powerplant required to be licensed under section 103 or 104 b. of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134(b)).

(7) The term "Commission" means the Nuclear Regulatory Commission.

(8) The term "Department" means the Department of Energy.

(9) The term "disposal" means the emplacement in a repository of high-level radioactive waste, spent nuclear fuel, or other highly radioactive material with no foreseeable intent of recovery, whether or not such emplacement permits the recovery of such waste.

(10) The terms "disposal package" and "package" mean the primary container that holds, and is in contact with, solidified high-level radioactive waste, spent nuclear fuel, or other radioactive materials, and any overpacks that are emplaced at a repository.

(11) The term "engineered barriers" means manmade components of a disposal system designed to prevent the release of radionuclides into the geologic medium involved. Such term includes the high-level radioactive waste form, high-level radioactive waste canisters, and other materials placed over and around such canisters.

(12) The term "high-level radioactive waste" means—

(A) the highly radioactive material resulting from the reprocessing of spent nuclear fuel, including liquid waste produced directly in reprocessing and any solid material derived from such liquid waste that contains fission products in sufficient concentrations; and

(B) other highly radioactive material that the Commission, consistent with existing law, determines by rule requires permanent isolation.

(13) The term "Federal agency" means any Executive agency, as defined in section 105 of title 5, United States Code.

(14) The term "Governor" means the chief executive officer of a State.

(15) The term "Indian tribe" means any Indian tribe, band, nation, or other organized group or community of Indians recog-

nized as eligible for the services provided to Indians by the Secretary of the Interior because of their status as Indians, including any Alaska Native village, as defined in section 3(c) of the Alaska Native Claims Settlement Act (43 U.S.C. 1602(c)).

(16) The term "low-level radioactive waste" means radioactive material that—

(A) is not high-level radioactive waste, spent nuclear fuel, transuranic waste, or by-product material as defined in section 11e(2) of the Atomic Energy Act of 1954 (42 U.S.C. 2014(e)(2)): and

(B) the Commission, consistent with existing law, classifies as low-level radioactive waste.

(17) The term "Office" means the Office of Civilian Radioactive Waste Management established in section 305.

(18) The term "repository" means any system licensed by the Commission that is intended to be used for, or may be used for, the permanent deep geologic disposal of high-level radioactive waste and spent nuclear fuel, whether or not such system is designed to permit the recovery, for a limited period during initial operation, of any materials placed in such system. Such term includes both surface and subsurface areas at which high-level radioactive waste and spent nuclear fuel handling activities are conducted.

(19) The term "reservation" means—

(A) any Indian reservation or dependent Indian community referred to in clause (a) or (b) of section 1151 of title 18, United States Code; or

(B) any land selected by an Alaska Native village or regional corporation under the provisions of the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.).

(20) The term "Secretary" means the Secretary of Energy.

(21) The term "site characterization" means—

(A) siting research activities with respect to a test and evaluation facility at a candidate site; and

(B) activities, whether in the laboratory or in the field, undertaken to establish the geologic condition and the ranges of the parameters of a candidate site relevant to the location of a repository, including borings, surface excavations, excavations of exploratory shafts, limited subsurface lateral excavations and borings, and in situ testing needed to evaluate the suitability of a candidate site for the location of a repository, but not including preliminary borings and geophysical testing needed to assess whether site characterization should be undertaken.

(22) The term "siting research" means activities, including borings, surface excavations, shaft excavations, subsurface lateral excavations and borings, and in situ testing, to determine the suitability of a site for a test and evaluation facility.

(23) The term "spent nuclear fuel" means fuel that has been withdrawn from a nuclear reactor following irradiation, the constituent elements of which have not been separated by reprocessing.

(24) The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States.

(25) The term "storage" means retention of high-level radioactive waste, spent nuclear fuel, or transuranic waste with the intent to recover such waste or fuel for subsequent use, processing, or disposal.

(26) The term "Storage Fund" means the Interim Storage Fund established in section 137(c).

(27) The term "test and evaluation facility" means an at-depth, prototypic, underground cavity with subsurface lateral excavations extending from a central shaft that is used for research and development purposes, including the development of data and experience for the safe handling and disposal of solidified high-level radioactive waste, transuranic waste, or spent nuclear fuel.

(28) The term "unit of general local government" means any borough, city, county, parish, town, township, village, or other general purpose political subdivision of a State.

(29) The term "Waste Fund" means the Nuclear Waste Fund established in section 302(c).

SEPARABILITY

SEC. 3. If any provision of this Act, or the application of such provision to any person or circumstance, is held invalid, the remainder of this Act, or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

TERRITORIES AND POSSESSIONS

SEC. 4. Nothing in this Act shall be deemed to repeal, modify, or amend the provisions of section 605 of the Act of March 12, 1980 (48 U.S.C. 1491).

OCEAN DISPOSAL

SEC. 5. Nothing in this Act shall be deemed to affect the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1401 et seq.).

LIMITATION ON SPENDING AUTHORITY

SEC. 6. The authority under this Act to incur indebtedness, or enter into contracts, obligating amounts to be expended by the Federal Government shall be effective for any fiscal year only to such extent or in such amounts as are provided in advance by appropriation Acts.

PROTECTION OF CLASSIFIED NATIONAL SECURITY INFORMATION

SEC. 7. Nothing in this Act shall require the release or disclosure to any person or to the Commission of any classified national security information.

APPLICABILITY

SEC. 8. (a) ATOMIC ENERGY DEFENSE ACTIVITIES.—Subject to the provisions of subsection (c), the provisions of this Act shall not apply with respect to any atomic energy defense activity or to any facility used in connection with any such activity.

(b) EVALUATION BY PRESIDENT.—(1) Not later than 2 years after the date of the enactment of this Act, the President shall evaluate the use of disposal capacity at one or more repositories to be developed under subtitle A of title I for the disposal of high-level radioactive waste resulting from atomic energy defense activities. Such evaluation shall take into consideration factors relating to cost efficiency, health and safety, regulation, transportation, public acceptability, and national security.

(2) Unless the President finds, after conducting the evaluation required in paragraph (1), that the development of a repository for the disposal of high-level radioactive waste resulting from atomic energy defense activities only is required, taking into account all of the factors described in such subsection, the Secretary shall proceed promptly with arrangement for the use of one or more of the repositories to be developed under subtitle A of title I for the disposal of such waste. Such arrangements shall include the allocation of costs of developing, constructing, and operating this repository or repositories between the Federal Government and the separate account established by section 302. The costs resulting from permanent disposal of high-level radioactive waste from atomic energy defense activities shall be paid by the Federal Government, and not from the special account established under section 302.

(3) Any repository for the disposal of high-level radioactive waste resulting from atomic energy defense activities only shall (A) be subject to licensing under section 202 of the Energy Reorganization Act of 1973 (42 U.S.C. 5842); and (B) comply with all requirements of the Commission for the siting, development, construction, and operation of a repository.

(c) APPLICABILITY TO CERTAIN REPOSITORIES.—The provisions of this Act shall apply with respect to any repository not used exclusively for the disposal of high-level radioactive waste or spent nuclear fuel resulting from atomic energy defense activities, research and development activities of the Secretary, or both.

TITLE I—DISPOSAL AND STORAGE OF HIGH-LEVEL RADIOACTIVE WASTE, SPENT NUCLEAR FUEL, AND LOW-LEVEL RADIOACTIVE WASTE

STATE AND AFFECTED INDIAN TRIBE PARTICIPATION IN DEVELOPMENT OF PROPOSED REPOSITORIES FOR DEFENSE WASTE

SEC. 101. (a) NOTIFICATION TO STATES AND AFFECTED INDIAN TRIBES.—Notwithstanding the provisions of section 8, upon any decision by the Secretary or the President to develop a repository for the disposal of high-level radioactive waste or spent nuclear fuel resulting exclusively from atomic energy defense activities, research and development activities of the Secretary, or both, and before proceeding with any site-specific investigations with respect to such repository, the Secretary shall notify the Governor and legislature of the State in which such repository is proposed to be located, or the governing body of the affected Indian tribe on whose reservation such repository is proposed to be located, as the case may be, of such decision.

(b) PARTICIPATION OF STATES AND AFFECTED INDIAN TRIBES.—Following the receipt of any notification under subsection (a), the State or Indian tribe involved shall be entitled, with respect to the proposed repository involved, to rights of participation and consultation identical to those provided in sections 115 through 118, except that any financial assistance authorized to be provided to such State or affected Indian tribe under section 116(c) or 118(b) shall be made from amounts appropriated to the Secretary for purposes of carrying out this section.

SUBTITLE A—REPOSITORIES FOR DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE AND SPENT NUCLEAR FUEL

FINDINGS AND PURPOSES

SEC. 111. (a) FINDINGS.—The Congress finds that—

(1) radioactive waste creates potential risks and requires safe and environmentally acceptable methods of disposal;

(2) a national problem has been created by the accumulation of (A) spent nuclear fuel from nuclear reactors; and (B) radioactive waste from (i) reprocessing of spent nuclear fuel; (ii) activities related to medical re-

search, diagnosis, and treatment; and (iii) other sources;

(3) Federal efforts during the past 30 years to devise a permanent solution to the problems of civilian radioactive waste disposal have not been adequate;

(4) while the Federal Government has the responsibility to provide for the permanent disposal of high-level radioactive waste and such spent nuclear fuel as may be disposed of in order to protect the public health and safety and the environment, the costs of such disposal should be the responsibility of the generators and owners of such waste and spent fuel;

(5) the generators and owners of high-level radioactive waste and spent nuclear fuel have the primary responsibility to provide for, and the responsibility to pay the costs of, the interim storage of such waste and spent fuel until such waste and spent fuel is accepted by the Secretary of Energy in accordance with the provisions of this Act;

(6) State and public participation in the planning and development of repositories is essential in order to promote public confidence in the safety of disposal of such waste and spent fuel; and

(7) high-level radioactive waste and spent nuclear fuel have become major subjects of public concern, and appropriate precautions must be taken to ensure that such waste and spent fuel do not adversely affect the public health and safety and the environment for this or future generations.

(b) PURPOSES.—The purposes of this subtitle are—

(1) to establish a schedule for the siting, construction, and operation of repositories that will provide a reasonable assurance that the public and the environment will be adequately protected from the hazards posed by high-level radioactive waste and such spent nuclear fuel as may be disposed of in a repository;

(2) to establish the Federal responsibility, and a definite Federal policy, for the disposal of such waste and spent fuel;

(3) to define the relationship between the Federal Government and the State governments with respect to the disposal of such waste and spent fuel; and

(4) to establish a Nuclear Waste Fund, composed of payments made by the generators and owners of such waste and spent fuel, that will ensure that the costs of carrying out activities relating to the disposal of such waste and spent fuel will be borne by the persons responsible for generating such waste and spent fuel.

RECOMMENDATION OF CANDIDATE SITES FOR SITE CHARACTERIZATION

SEC. 112. (a) GUIDELINES.—Not later than 180 days after the date of the enactment of this Act, the Secretary, following consultation with the Council on Environmental Quality, the Administrator of the Environmental Protection Agency, the Director of the Geological Survey, and interested Governors, and the concurrence of the Commission shall issue general guidelines for the recommendation of sites for repositories. Such guidelines shall specify detailed geologic considerations that shall be primary criteria for the selection of sites in various geologic media. Such guidelines shall specify factors that qualify or disqualify any site from development as a repository, including factors pertaining to the location of valuable natural resources, hydrology, geophysics, seismic activity, and atomic energy defense activities, proximity to water supplies, proximity to populations, the effect upon the rights of users of water, and proximity to components of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, the National Wilderness Preservation System, or National Forest Lands. Such guidelines shall take into consideration the proximity to sites where high-level radioactive waste and spent nuclear fuel is generated or temporarily stored and the transportation and safety factors involved in moving such waste to a repository. Such guidelines shall specify population factors that will disqualify any site from development as a repository if any surface facility of such repository would be located in a highly populated area. Such guidelines also shall require the Secretary to consider the cost and impact of transporting to the repository site the solidified high-level radioactive waste and spent fuel to be disposed of in the repository and the advantages of regional distribution in the siting of repositories. Such guidelines shall require the Secretary to consider the various geologic media in which sites for repositories may be located and, to the extent practicable, to recommend sites in different geologic media. The Secretary shall use guidelines established under this subsection in considering candidate sites for recommendation under subsection (b). The Secretary may revise such guidelines from time to time, consistent with the provisions of this subsection.

(b) RECOMMENDATION BY SECRETARY TO THE PRESIDENT.—(1)(A) Following the issuance of guidelines under subsection (a) and consultation with the Governors of affected States, the Secretary shall recommend to the President at least 3 candidate sites that he determines suitable for site characterization for selection of the first repository site. Such sites shall be recommended by the Secretary not later than July 1, 1984. Not later than July 1, 1987, the Secretary shall recommend to the President at least 3 additional candidate sites the Secretary determines for possible subsequent selection as repository sites are suitable for site characterization. The Secretary shall not recommend for characterization any area of a site used for the test and evaluation facility pursuant to title II that the Secretary determines would permit the physical integration of the test and evaluation facility and a proposed repository.

Each recommendation of a candidate site under this subsection shall be accompanied by an environmental impact statement prepared pursuant to subsection (g) and the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

(B) Each environmental impact statement prepared under this paragraph shall be made available to the public.

(C) Before recommending a candidate site to the President, the Secretary shall notify the Governor and legislature of the State in which such candidate site is located, or the governing body of the affected Indian tribe where such candidate site is located, as the case may be, of such recommendation and the basis for such recommendation.

(2) Before recommending to the President any candidate site for site characterization, the Secretary shall hold public hearings in the vicinity of such candidate site to inform the residents of the area in which such candidate site is located of the proposed recommendation of such candidate site and to receive their comments. At such hearings, the Secretary shall also solicit and receive any recommendations of such residents with respect to issues that should be addressed in the environmental impact statement described in paragraph (1) and the site characterization plan described in section 113(b)(1).

(c) PRESIDENTIAL REVIEW OF RECOMMENDED CANDIDATE SITES.—(1) The President shall review each candidate site recommendation made by the Secretary under subsection (b). Not later than 60 days after the submission by the Secretary of a recommendation of a candidate site, the President, in his discretion, may either approve or disapprove such candidate site, and shall transmit any such decision to the Secretary and to either the Governor and legislature of the State in which such candidate site is located, or the governing body of the affected Indian tribe where such candidate site is located, as the case may be. If, during such 60-day period, the President fails to approve or disapprove such candidate site, or fails to invoke his authority under paragraph (2) to delay his decision, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the affected Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(2) The President may delay for not more than 6 months his decision under paragraph (1) to approve or disapprove a candidate site, upon determining that the information provided with the recommendation of the Secretary is insufficient to permit a decision within the 60-day period referred to in paragraph (1). The President may invoke his authority under this paragraph by submitting written notice to the Congress, within such 60-day period, of his intent to invoke such authority. If the President invokes such authority, but fails to approve or disapprove the candidate site involved by the end of such 6-month period, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the affected Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(d) CONTINUATION OF CANDIDATE SITE SCREENING.—After the required recommendation of candidate sites under subsection (b), the Secretary may continue, as he determines necessary, to identify and study other sites to determine their suitability for recommendation for site characterization, in accordance with the procedures described in this section.

(e) PRELIMINARY ACTIVITIES.—Except as otherwise provided in this section, each activity of the President or the Secretary under this section shall be considered to be a preliminary decisionmaking activity. No such activity shall require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.

(f) TIMELY SITE CHARACTERIZATION.—Nothing in this section may be construed as prohibiting the Secretary from continuing ongoing or presently planned site characterization at any site on Department of Energy land for which the location of the principal borehole has been approved by the Secretary by August 1, 1982, except that (1) the environmental impact statement described in subsection (g) shall be prepared within one year of the date of enactment of this Act; and (2) the Secretary shall not continue site characterization at any such site unless such site is among the candidate sites

recommended by the Secretary under the first sentence of subsection (b) for site characterization and approved by the President under subsection (c); and (3) the Secretary shall conduct public hearings under 113(b)(2) and comply with requirements under section 117 of this Act within 1 year of the date of enactment.

If site characterization is discontinued at any site under the second clause of the first sentence of this subsection, site characterization at such site may be continued by the Secretary if such site is subsequently approved by the President under subsection (c).

(g) ENVIRONMENTAL IMPACT STATEMENT.—Any recommendation of a candidate site under subsection (b) shall be accompanied by an environmental impact statement. With respect to the requirements imposed by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), compliance with the procedures and requirements of this Act shall be deemed adequate consideration of the need for a repository, the time of the initial availability of a repository, and all alternatives to the isolation of high-level radioactive waste and spent nuclear fuel in a repository. For purposes of complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and this section, all consideration of alternative sites by the Secretary, shall be considered adequate if the statement provides an explanation of the process and reasons for the elimination of other sites for recommendation for site characterization pursuant to this section.

SITE CHARACTERIZATION

SEC. 113. (a) IN GENERAL.—The Secretary shall carry out, in accordance with the provisions of this section, appropriate site characterization activities beginning with the candidate sites that have been approved under section 112 and are located in various geologic media. The Secretary shall consider fully the comments received under subsection (b)(2) and section 112(b)(2) and shall, to the maximum extent practicable and in consultation with the Governor of the State involved or the governing body of the affected Indian tribe involved, conduct site characterization activities in a manner that minimizes any significant adverse environmental impacts identified in such comments or in the environmental assessment submitted under subsection (b)(1).

(b) COMMISSION AND STATES.—(1) Before proceeding to sink shafts at any candidate site, the Secretary shall submit for such candidate site to the Commission and to either the Governor and legislature of the State in which such candidate site is located, or the governing body of the affected Indian tribe on whose reservation such candidate site is located, as the case may be, for their review and comment—

(A) a general plan for site characterization activities to be conducted at such candidate site, which plan shall include—

(i) a description of such candidate site;

(ii) a description of such site characterization activities, including the following: the extent of planned excavations, plans for any onsite testing with radioactive or nonradioactive material, plans for any investigation activities that may affect the capability of such candidate site to isolate high-level radioactive waste and spent nuclear fuel, and plans to control any adverse, safety-related impacts from such site characterization activities;

(iii) plans for the decontamination and decommissioning of such candidate site, and for the mitigation of any significant adverse environmental impacts caused by site characterization activities if it is determined unsuitable for application for a construction authorization for a repository;

(iv) criteria to be used to determine the suitability of such candidate site for the location of a repository, developed pursuant to section 112(a); and

(v) any other information required by the Commission;

(B) a description of the possible form or packaging for the high-level radioactive waste and spent nuclear fuel to be emplaced in such repository, a description, to the extent practicable, of the relationship between such waste form or packaging and the geologic medium of such site, and a description of the activities being conducted by the Secretary with respect to such possible waste form or packaging or such relationship; and

(C) a conceptual repository design that takes into account likely site-specific requirements.

(2) Before proceeding to sink shafts at any candidate site, the Secretary shall (A) make available to the public the site characterization plan described in paragraph (1); and (B) hold public hearings in the vicinity of such candidate site to inform the residents of the area in which such candidate site is located of such plan, and to receive their comments.

(3) During the conduct of site characterization activities at a candidate site, the Secretary shall report not less than once every 6 months to the Commission and to either the Governor and legislature of the State in which such candidate site is located, or the governing body of the affected Indian tribe where such candidate site is located, as the case may be, on the nature and extent of such activities and the information developed from such activities.

(c) RESTRICTIONS.—(1) The Secretary may conduct at any candidate site only such site characterization activities as the Secretary considers necessary to provide the data required for evaluation of the suitability of such candidate site for an application to be submitted to the Commission for a construction authorization for a repository at such candidate site, and for compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

(2) In conducting site characterization activities—

(A) the Secretary may not use any radioactive material at a candidate site unless the Commission concurs that such use is necessary to provide data for the preparation of the required environmental reports and an application for a construction authorization for a repository at such candidate site; and

(B) if any radioactive material is used at a candidate site—

(i) the Secretary shall use the minimum quantity necessary to determine the suitability of such candidate site for a repository, but in no event more than the curie equivalent of 10 metric tons of spent nuclear fuel; and

(ii) such radioactive material shall be fully retrievable.

(3) If site characterization activities are terminated at a candidate site for any reason, the Secretary shall (A) notify the Congress, the Governors and legislatures of all States in which candidate sites are located, and the governing bodies of all affected Indian tribes where candidate sites are located, of such termination and the reasons for such termination; and (B) remove any high-level radioactive waste, spent nuclear fuel, or other radioactive materials at or in such candidate site as promptly as practicable.

(4) If a site is determined to be unsuitable for application for a construction authorization for a repository, the Secretary shall take reasonable and necessary steps to reclaim the site and to mitigate any significant adverse environmental impacts caused by site characterization activities.

(d) PRELIMINARY ACTIVITIES.—Each activity of the Secretary under this section that is in compliance with the provisions of subsection (c) shall be considered a preliminary decisionmaking activity. No such activity shall require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.

SITE APPROVAL AND CONSTRUCTION AUTHORIZATION

SEC. 114. (a) HEARINGS AND PRESIDENTIAL RECOMMENDATION.—(1) The Secretary shall hold public hearings in the vicinity of each site under consideration for recommendation to the President under this paragraph as a site for the development of a repository, for the purposes of informing the residents of the area in which such site is located of such consideration and receiving their comments regarding the possible recommendation of such site. If, upon completion of such hearings and completion of site characterization activities at not less than 3 candidate sites for the first proposed repository, or from all of the characterized sites for the development of subsequent respositories, under section 113, the Secretary decides to recommend approval of such site to the President, the Secretary shall notify the Governor and legislature of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, as the case may be, of such decision. No sooner than the expiration of the 30-day period following such notification, the Secretary shall submit to the President a recommendation that the President approve such site for the development of a repository. Any such recommendation by the Secretary shall be based on the record of information developed by the Secretary under section 113 and this section, including the information described in subparagraph (A) through subparagraph (G). In making site recommendations and approvals subsequent to the first site recommendation, the Secretary and the President, respectively, shall also consider the need for regional distribution of repositories and the need to minimize, to the extent practicable, the impacts and cost of transporting spent fuel and solidified high-level radioactive waste. Together with any recommendation of a site under this paragraph, the Secretary shall make available to the public, and submit to the President, a comprehensive statement of the basis of such recommendation, including the following:

(A) a description of the proposed repository, including preliminary engineering specifications for the facility;

(B) a description of the waste form or packaging proposed for use at such repository, and an explanation of the relationship between such waste form or packaging and the geologic medium of such site;

(C) a discussion of data, obtained in site characterization activities, relating to the safety of such site;

(D) a final environmental impact statement prepared pursuant to subsection (f) and the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), including an analysis of the consideration given by the Secretary to not less than 3 candidate sites for the first proposed respository or to all of the characterized sites for the development of subsequent repositories, with respect to which site characterization is completed under section 113, together with comments made concerning such environmental impact statement by the Secretary of the Interior, the Council on Environmental Quality, the Administrator, and the Commission, except that any such environmental impact statement concerning the first repository to be developed under this Act shall not be required to consider the need for a repository or the alternatives to geologic disposal;

(E) preliminary comments of the Commission concerning the extent to which the at-depth site characterization analysis and the waste form proposal for such site seem to be sufficient for inclusion in any application to be submitted by the Secretary for licensing of such site as a repository;

(F) the views and comments of the Governor and legislature of any State, or the governing body of any affected Indian tribe, as determined by the Secretary, together with the response of the Secretary to such views;

(G) such other information as the Secretary considers appropriate; and

(H) any impact report submitted under section 116(c)(2)(B) by the State in which such site is located, or under section 118(b)(3)(B) by the affected Indian tribe where such site is located, as the case may be.

(2)(A) Not later than March 31, 1987, the President shall submit to the Congress a recommendation of one site from the three sites initially characterized that the President considers qualified for application for a construction authorization for a repository. Not later than March 31, 1990, the President shall submit to the Congress a recommendation of a second site from any sites already characterized that the President considers qualified for a construction authorization for a second repository. The President shall submit with such recommendation a copy of the report for such site prepared by the Secretary under paragraph (1).

(B) The President may extend the deadlines described in subparagraph (A) by not more than 12 months if, before March 31, 1986, for the first site, and March 31, 1989, for the second site, (i) the President determines that such extension is necessary; and (ii) transmits to the Congress a report setting forth the reasons for such extension.

(3) If approval of any such site recommendation does not take effect as a result of a disapproval by the Governor or legislature of a State under section 116 or the governing body of an affected Indian tribe under section 118, the President shall submit to the Congress, not later than 1 year after the disapproval of such recommendation, a recommendation of another site for the first or subsequent repository.

(4)(A) The President may not recommend the approval of any site under this subsection unless the Secretary has recommended to the President under paragraph (1) approval of such site and has submitted to the President a report for such site as required under such paragraph.

(B) No recommendation of a site by the President under this subsection shall require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.

(b) SUBMISSION OF APPLICATION.—If the President recommends to the Congress a site for a repository under subsection (a) and the site designation is permitted to take effect under section 115, the Secretary shall submit to the Commission an application for a construction authorization for a repository at such site not later than 90 days after the date on which the recommendation of the site designation is effective under such section and shall provide to the Governor and legislature of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, as the case may be, a copy of such application.

(c) STATUS REPORT ON APPLICATION.—Not later than 1 year after the date on which an application for a construction authorization is submitted under subsection (b), and annually thereafter until the date on which such authorization is granted, the Commission shall submit a report to the Congress describing the proceedings undertaken through the date of such report with regard to such application, including a description of—

(1) any major unresolved safety issues, and the explanation of the Secretary with respect to design and operation plans for resolving such issues;

(2) any matters of contention regarding such application; and

(3) any Commission actions regarding the granting or denial of such authorization.

(d) COMMISSION ACTION.—The Commission shall consider an application for a construction authorization for all or part of a repository in accordance with the laws applicable to such applications, except that the Commission shall issue a final decision approving or disapproving the issuance of a construction authorization not later than—

(1) January 1, 1989, for the first such application, and January 1, 1992, for the second such application; or

(2) the expiration of 3 years after the date of the submission of such application, except that the Commission may extend such deadline by not more than 12 months if, not less than 30 days before such deadline, the Commission complies with the reporting requirements established in subsection (e)(2);

whichever occurs later. The Commission decision approving the first such application shall prohibit the emplacement in the first repository of a quantity of spent fuel containing in excess of 70,000 metric tons of heavy metal or a quantity of solidified high-level radioactive waste resulting from the reprocessing of such a quantity of spent fuel until such time as a second repository is in operation. In the event that a monitored retrievable storage facility, approved pursuant to subtitle C of this Act, shall be located, or is planned to be located, within 50 miles of the first repository, then the Commission decision approving the first such application shall prohibit the emplacement of a quantity of spent fuel containing in excess of 70,000 metric tons of heavy metal or a quantity of solidified high-level radioactive waste resulting from the reprocessing of spent fuel in both the repository and monitored retrievable storage facility until such time as a second repository is in operation.

(e) PROJECT DECISION SCHEDULE.—(1) The Secretary shall prepare and update, as appropriate, in cooperation with all affected Federal agencies, a project decision schedule that portrays the optimum way to attain the operation of the repository involved, within the time periods specified in this subtitle. Such schedule shall include a description of objectives and a sequence of deadlines for all Federal agencies required to take action, including an identification of the activities in which a delay in the start, or completion, of such activities will cause a delay in beginning repository operation.

(2) Any Federal agency that determines that it cannot comply with any deadline in the project decision schedule, or fails to so comply, shall submit to the Secretary and to the Congress a written report explaining the reason for its failure or expected failure to meet such deadline, the reason why such agency could not reach an agreement with the Secretary, the estimated time for completion of the activity or activities involved, the associated effect on its other deadlines in the project decision schedule, and any recommendations it may have or actions it intends to take regarding any improvements in its operation or organization, or changes to its statutory directives or authority, so that it will be able to mitigate the delay involved. The Secretary, within 30 days after receiving any such report, shall file with the Congress his response to such report, including the reasons why the Secretary could not amend the project decision schedule to accommodate the Federal agency involved.

(f) ENVIRONMENTAL IMPACT STATEMENT.—Any recommendation made by the Secretary under this section shall be considered a major Federal action significantly affecting the quality of the human environment for purposes of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.). A final environmental impact statement prepared by the Secretary under such Act shall accompany any recommendation to the President to approve a site for a repository. With respect to the requirements imposed by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), compliance with the procedures and requirements of this Act shall be deemed adequate consideration of the need for a repository, the time of the initial availability of a repository, and all alternatives to the isolation of high-level radioactive waste and spent nuclear fuel in a repository. For purposes of complying with the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and this section, the Secretary shall consider as alternate sites for the first repository to be developed under this subtitle 3 candidate sites recommended by the Secretary pursuant to the first sentence of section 112(b) and approved by the President for site characterization, pursuant to section 112(c), for which (1) site characterization has been completed under section 113; and (2) the Secretary has made a preliminary determination, including a statement of the reasons for such determination, of the suitability of each site for development as a repository. The Secretary shall consider as alternative sites for subsequent repositories those sites recommended by the Secretary by July 1, 1984, and by July 1, 1987, pursuasnt to section 112(b) and approved by the President for site characterization pursuant to seciton 112(c) for which (1) site characterization has been completed under section 113; and (2) the Secretary has made a preliminary determination, including a statement of the reasons for such determination, of the suitability of each site for development as a repository. Any environmen-

tal impact statement prepared in connection with a repository proposed to be constructed by the Secretary under this subtitle shall, to the extent practicable, be adopted by the Commission in connection with the issuance by the Commission of a construction authorization and license for such repository. To the extent such statement is adopted by the Commission, such adoption shall be deemed to also satisfy the responsibilities of the Commission under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and no further consideration shall be required, except that nothing in this subsection shall affect any independent responsibilities of the Commission to protect the public health and safety under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.). In any such statement prepared with respect to the first repository to be constructed under this subtitle, the need for a repository or nongeologic alternatives to the site of such repository shall not be considered.

REVIEW OF REPOSITORY SITE SELECTION

SEC. 115. (a) IN GENERAL.—The designation of a site as suitable for application for a construction authorization for a repository shall be effective at the end of the 60-day period beginning on the date that the President recommends such site to the Congress under section 114, unless the Governor of the State in which such site is located, or the governing body of an affected Indian tribe where such site is located, as the case may be, submits to the Congress a notice of disapproval under section 116 or 118. If any such notice of disapproval is submitted, the designation of such site shall not be effective except as provided under subsection (b).

(b) CONGRESSIONAL REVIEW OF SITES.—If any notice of disapproval of a repository site designation is submitted to the Congress under section 116 or 118 after a recommendation for approval of such site is made by the President under section 114, the designation of such site as suitable for license application as a repository shall be effective upon the expiration of the first period of 90 calendar days of continuous session of the Congress following the date of the receipt by the Congress of such notice of disapproval unless, during such period, either House of the Congress passes a resolution in accordance with this subsection disapproving such site designation.

(c) DEFINITION.—For purposes of this subsection, the term "resolution under this section" means a resolution of either House of the Congress, the matter after the resolving clause of which is as follows: "That hereby approves the notice of disapproval submitted by regarding the disapproval of the site at for a repository for the disposal of high-level radio-active waste and spent nuclear fuel.". The first blank space in such resolution shall be filled with the designation of the appropriate House of the Congress; the second blank space in such resolution shall be filled with the designation of the State Governor or Indian tribe governing body submitting the notice of disapproval involved; and the last blank space in such resolution shall be filled with the geographic location of the proposed repository site involved.

(d) PROCEDURES APPLICABLE TO THE SENATE.—(1) The provisions of this subsection are enacted by the Congress—

(A) as an exercise of the rulemaking power of the Senate, and as such they are deemed a part of the rules of the Senate, but applicable only with respect to the procedure to be followed in the Senate in the case of resolutions under this section, and such provisions supersede other rules of the Senate only to the extent that they are inconsistent with such other rules; and

(B) with full recognition of the constitutional right of the Senate to change the rules (so far as relating to the procedure of the Senate) at any time, in the same manner and to the same extent as in the case of any other rule of the Senate.

(2)(A) Not later than the first day of session following the day on which any notice of disapproval of a repository site selection is submitted to the Congress under section 116 or 118, a resolution under this section shall be introduced (by request) in the Senate by the chairman of the committee to which such notice of disapproval is referred, or by a Member or Members of the Senate designated by such chairman.

(B) Upon introduction, a resolution under this section shall be referred to the appropriate committee or committees of the Senate by the President of the Senate, and all such resolutions with respect to the same repository site shall be referred to the same committee or committees. Upon the expiration of 60 calendar days of continuous session after the introduction of the first resolution under this section with respect to any site, each committee to which such resolution was referred shall make its recommendations to the Senate.

(3) If any committee to which is referred a resolution introduced under paragraph (2)(A), or, in the absence of such a resolution, any other resolution under this section introduced with respect to the site involved, has not reported such resolution at the end of 45 days of continuous session of Congress after introduction of such resolution, such committee shall be deemed to be discharged from further consideration of such resolution, and such resolution shall be placed on the appropriate calendar of the Senate.

(4)(A) When each committee to which a resolution under this section has been referred has reported, or has been deemed to be discharged from further consideration of, a resolution described in paragraph (3), it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) for any Member of the Senate to move to proceed to the consideration of such resolution. Such motion shall be highly privileged and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which such motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of such resolution is agreed to, such resolution shall remain the unfinished business of the Senate until disposed of.

(B) Debate on a resolution under this section and on all debatable motions and appeals in connection with such resolution shall be limited to not more than 10 hours, which shall be divided equally between Members favoring and Members opposing such resolution. A motion further to limit debate shall be in order and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business, and a motion to recommit such resolution shall not be in order. A motion to reconsider the vote by which such resolution is agreed to or disagreed to shall not be in order.

(C) Immediately following the conclusion of the debate on a resolution under this section and a single quorum call at the conclusion of such debate if requested in accordance with the rules of the Senate, the vote on final approval of such resolution shall occur.

(D) Appeals from the decisions of the Chair relating to the application of the rules of the Senate to the procedure relating to a resolution under this section shall be decided without debate.

(e) PROCEDURES APPLICABLE TO THE HOUSE OF REPRESENTATIVES.—(1) The provisions of this section are enacted by the Congress.—

(A) as an exercise of the rulemaking power of the House of Representatives, and as such they are deemed a part of the rule of the House, but applicable only with respect to the procedure to be followed in the House in the case of resolutions under this section and such provisions supersede other rules of the House only to the extent that they are inconsistent with such other rules; and

(B) with full recognition of the constitutional right of the House to change the rules (so far as relating to the procedure of the House) at any time, in the same manner and to the same extent as in the case of any other rule of the House.

(2) Resolutions of repository siting approval shall upon introduction be immediately referred by the Speaker of the House to the appropriate committee or committees of the House. Any such resolution received from the Senate shall be held at the Speaker's table.

(3) Upon the expiration of 45 days of continuous session after the introduction of the first resolution under this section with respect to any site, each committee to which such resolution was referred shall be discharged from further consideration of such resolution, and such resolution shall be referred to the appropriate calendar, unless such resolution or an identical resolution was previously reported by each committee to which it was referred.

(4) It shall be in order for the Speaker to recognize a Member favoring a resolution to call up a resolution under this section after it has been on the appropriate calendar for 5 legislative days. When any such resolution is called up, the House shall proceed to its immediate consideration and the Speaker shall recognize the Member calling up such resolution and a Member opposed to such resolution for 2 hours of debate in the House, to be equally divided and controlled by such Members. When such time has expired, the previous question shall be considered as ordered on the resolution without intervening motion. No amendment to any such resolution shall be in order, nor shall it be in order to move to reconsider the vote by which such resolution is agreed to or disagreed to.

(f) COMPUTATION OF DAYS.—For purposes of this section—

(1) continuity of session of Congress is broken only by an adjournment sine die; and

(2) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 90-day period referred to in subsection (c) and the 45-day period referred to in subsection (d) and (e).

(g) INFORMATION PROVIDED TO CONGRESS.—In considering any notice of disapproval submitted to the Congress under section 116 or 118, the Congress may obtain any comments of the Commission with respect to such notice of disapproval. The provision of

such comments by the Commission shall not be construed as binding the Commission with respect to any licensing or authorization action concerning the repository involved.

PARTICIPATION OF STATES

SEC. 116. (a) NOTIFICATION OF STATES AND AFFECTED TRIBES.—The Secretary shall identify the States with one or more potentially acceptable sites for a repository within 90 days after the date of enactment of this Act. Within 90 days of such identification, the Secretary shall notify the Governor, the State legislature, and the tribal council of any affected Indian tribe in any State of the potentially acceptable sites within such State. For the purposes of this title, the term "potentially acceptable site" means any site at which, after geologic studies and field mapping but before detailed geologic data gathering, the Department undertakes preliminary drilling and geophysical testing for the definition of site location.

(b) STATE PARTICIPATION IN REPOSITORY SITING DECISIONS.—(1) Unless otherwise provided by State law, the Governor or legislature of each State shall have authority to submit a notice of disapproval to the Congress under paragraph (2). In any case in which State law provides for submission of any such notice of disapproval by any other person or entity, any reference in this subtitle to the Governor or legislature of such State shall be considered to refer instead to such other person or entity.

(2) Upon the submission by the President to the Congress of a recommendation of a site for a repository, the Governor or legislature of the State in which such site is located may disapprove the site designation and submit to the Congress a notice of disapproval. Such Governor or legislature may submit such a notice of disapproval to the Congress not later than the 60 days after the date that the President recommends such site to the Congress under section 114. A notice of disapproval shall be considered to be submitted to the Congress on the date of the transmittal of such notice of disapproval to the Speaker of the House and the President pro tempore of the Senate. Such notice of disapproval shall be accompanied by a statement of reasons explaining why such Governor or legislature disapproved the recommended repository site involved.

(3) The authority of the Governor or legislature of each State under this subsection shall not be applicable with respect to any site located on a reservation.

(b) FINANCIAL ASSISTANCE.—(1)(A) The Secretary shall make grants to each State notified under subsection (a) for the purpose of participating in activities required by sections 116 and 117 or authorized by written agreement entered into pursuant to subsection 117(c). Any salary or travel expense that would ordinarily be incurred by such State, or by any political subdivision of such State, may not be considered eligible for funding under this paragraph.

(B) The Secretary shall make grants to each State in which a candidate site for a repository is approved under section 112(c). Such grants may be made to each such State only for purposes of enabling such State—

(i) to review activities taken under this subtitle with respect to such site for purposes of determining any potential economic, social, public health and safety, and environmental impacts of such repository on the State and its residents;

(ii) to develop a request for impact assistance under paragraph (2);

(iii) to engage in any monitoring, testing, or evaluation activities with respect to site characterization programs with regard to such site;

(iv) to provide information to its residents regarding any activities of such State, the Secretary, or the Commission with respect to such site; and

(v) to request information from, and make comments and recommendations to, the Secretary regarding any activities taken under this subtitle with respect to such site.

(C) Any salary or travel expense that would ordinarily be incurred by such State, or by any political subdivision of such State, may not be considered eligible for funding under this paragraph.

(2)(A) The Secretary shall provide financial and technical assistance to any State requesting such assistance in which there is a site with respect to which the Commission has authorized construction of a repository. Such assistance shall be designed to mitigate the impact on such State of the development of such repository. Such assistance to such State shall commence within 6 months following the granting by the Commission of a construction authorization for such repository and following the initiation of construction activities at such site.

(B) Any State desiring assistance under this paragraph shall prepare and submit to the Secretary a report on any economic, social, public health and safety, and environmental impacts that are likely as a result of the development of a repository at a site in such State. Such report shall be submitted to the Secretary following the completion of site characterization activities at such site and before the recommendation of such site to the President by the Secretary for application for a construction authorization for a repository. As soon as practicable following the granting of a construction authorization for such repository, the Secretary shall seek to enter into a binding agreement with the State involved setting forth the amount of assistance to be provided to such State under this paragraph and the procedures to be followed in providing such assistance.

(3) The Secretary shall also grant to each State and unit of general local government in which a site for a repository is approved under section 112(c) an amount each fiscal year equal to the amount such State and unit of general local government, respectively, would receive were they authorized to tax site characterization activities at such site, and the development and operation of such repository, as such State and unit of general local government tax the other real property and industrial activities occurring within such State and unit of general local government. Such grants shall continue until such time as all such activities, development, and operation are terminated at such site.

(4)(A) A State may not receive any grant under paragraph (1) after the expiration of the 1-year period following—

(i) the date on which the Secretary notifies the Governor and legislature of the State involved of the termination of site characterization activities at the candidate site involved in such State;

(ii) the date on which the site in such State is disapproved under section 115; or

(iii) the date on which the Commission disapproves an application for a construction authorization for a repository at such site;

whichever occurs first, unless there is another candidate site in the State approved under section 112(c) with respect to which the actions described in clauses (i), (ii), and (iii) have not been taken.

(B) A State may not receive any further assistance under paragraph (2) with respect to a site if repository construction activities at such site are terminated by the Secretary or if such activities are permanently enjoined by any court.

(C) At the end of the 2-year period beginning on the effective date of any license to receive and possess for a repository in a State, no Federal funds shall be made available to such State under paragraph (1) or (2), except for—

(i) such funds as may be necessary to support State activities related to any other repository located in, or proposed to be located in, such State, and for which a license to receive and possess has not been in effect for more than 1 year; and

(ii) such funds as may be necessary to support State activities pursuant to agreements or contracts for impact assistance entered into, under paragraph (2), by such State with the Secretary during such 2-year period.

(5) Financial assistance authorized in this subsection shall be made out of amounts held in the Nuclear Waste Fund established in section 302.

(d) ADDITIONAL NOTIFICATION AND CONSULTATION.—Whenever the Secretary is required under any provision of this Act to notify or consult with the governing body of an affected Indian tribe where a site is located, the Secretary shall also notify or consult with, as the case may be, the Governor of the State in which such reservation is located.

CONSULTATION WITH STATES AND AFFECTED INDIAN TRIBES

SEC. 117. (a) PROVISION OF INFORMATION.—(1) The Secretary, the Commission, and other agencies involved in the construction, operation, or regulation of any aspect of a repository in a State shall provide to the Governor and legislature of such State, and to the governing body of any affected Indian tribe, timely and complete information regarding determinations or plans made with respect to the site characterization siting, development, design, licensing, construction, operation, regulation, or decommissioning of such repository.

(2) Upon written request for such information by the Governor or legislature of such State, or by the governing body of any affected Indian tribe, as the case may be, the Secretary shall provide a written response to such request within 30 days of the receipt of such request. Such response shall provide the information requested or, in the alternative, the reasons why the information cannot be so provided. If the Secretary fails to so respond within such 30 days, the Governor or legislature of such State, or the governing body of any affected Indian tribe, as the case may be, may transmit a formal written objection to such failure to respond to the President. If the President or Secretary fails to respond to such written request within 30 days of the receipt by the President of such formal written objection, the Secretary shall immediately suspend all activities in such State authorized by this subtitle, and shall not renew such activities until the Governor or legislature of such State, or the governing body of any affected Indian tribe, as the case may be, has received the written response to such written request required by this subsection.

(b) CONSULTATION AND COOPERATION.—In performing any study of an area within a State for the purpose of determining the suitability of such area for a repository pursuant to section 112(c), and in subsequently developing and loading any repository within such State, the Secretary shall consult and cooperate with the Governor and legislature of such State and the governing body of any affected Indian tribe in an effort to resolve the concerns of such State and any affected Indian tribe regarding the public health and safety, environmental, and economic impacts of any such repository. In carrying out his duties under this subtitle, the Secretary shall take such concerns into account to the maximum extent feasible and as specified in written agreements entered into under subsection (c).

(c) WRITTEN AGREEMENT.—Not later than 60 days after (1) the approval of a site for site characterization for such a repository under section 112(c), or (2) the written request of the State or Indian tribe in any affected State notified under section 116(a) to the Secretary, whichever, first occurs, the Secretary shall seek to enter into a binding written agreement, and shall begin negotiations, with such State and, where appropriate, to enter into a separate binding agreement with the governing body of any affected Indian tribe, setting forth (but not limited to) the procedures under which the requirements of subsections (a) and (b), and the provisions of such written agreement, shall be carried out. Any such written agreement shall not affect the authority of the Commission under existing law. Each such written agreement shall, to the maximum extent feasible, be completed not later than 6 months after such notification. If such written agreement is not completed within such period, the Secretary shall report to the Congress in writing within 30 days on the status of negotiations to develop such agreement and the reasons why such agreement has not been completed. Prior to submission of such report to the Congress, the Secretary shall transmit such report to the Governor of such State or the governing body of such affected Indian tribe, as the case may be, for their review and comments. Such comments shall be included in such report prior to submission to the Congress. Such written agreement shall specify procedures—

(1) by which such State or governing body of an affected Indian tribe, as the case may be, may study, determine, comment on, and make recommendations with regard to the possible public health and safety, environmental, social, and economic impacts of any such repository;

(2) by which the Secretary shall consider and respond to comments and recommendations made by such State or governing body of an affected Indian tribe, including the period in which the Secretary shall so respond;

(3) by which the Secretary and such State or governing body of an affected Indian tribe may review or modify the agreement periodically;

(4) by which such State or governing body of an affected Indian tribe is to submit an impact report and request for impact assistance under section 116(c) or section 118(b), as the case may be;

(5) by which the Secretary shall assist such State, and the units of general local government in the vicinity of the repository site, in resolving the offsite concerns of such State and units of general local government, including, but not limited to, questions of State liability arising from accidents, necessary road upgrading and access to the site, ongoing emergency preparedness and emergency response, monitoring of transportation of high-level radioactive waste and spent nuclear fuel through such State, conduct of baseline health studies of inhabitants in neighboring communities near the repository site and reasonable periodic monitoring thereafter, and monitoring of the repository site upon any decommissioning and decontamination;

(6) by which the Secretary shall consult and cooperate with such State on a regular, ongoing basis and provide for an orderly process and timely schedule for State review and evaluation, including identification in the agreement of key events, milestones, and decision points in the activities of the Secretary at the potential repository site;

(7) by which the Secretary shall notify such State prior to the transportation of any high-level radioactive waste and spent nuclear fuel into such State for disposal at the repository site;

(8) by which such State may conduct reasonable independent monitoring and testing of activities on the repository site, except that such monitoring and testing shall not unreasonably interfere with or delay onsite activities;

(9) for sharing, in accordance with applicable law, of all technical and licensing information, the utilization of available expertise, the facilitating of permit procedures, joint project review, and the formulation of joint surveillance and monitoring arrangements to carry out applicable Federal and State laws;

(10) for public notification of the procedures specified under the preceding paragraphs; and

(11) for resolving objections of a State and affected Indian tribes at any stage of the planning, siting, development, construction, operation, or closure of such a facility within such State through negotiation, arbitration, or other appropriate mechanisms.

PARTICIPATION OF INDIAN TRIBES

SEC. 118. (a) PARTICIPATION OF INDIAN TRIBES IN REPOSITORY SITING DECISIONS.—Upon the submission by the President to the Congress of a recommendation of a site for a repository located on the reservation of an affected Indian tribe, the governing body of such Indian tribe may disapprove the site designation and submit to the Congress a notice of disapproval. The governing body of such Indian tribe may submit such a notice of disapproval to the Congress not later than the 60 days after the date that the President recommends such site to the Congress under section 114. A notice of disapproval shall be considered to be submitted to the Congress on the date of the transmittal of such notice of disapproval to the Speaker of the House and the President pro tempore of the Senate. Such notice of disapproval shall be accompanied by a statement of reasons explaining why the governing body of such Indian tribe disapproved the recommended repository site involved.

(b) FINANCIAL ASSISTANCE.—(1) The Secretary shall make grants to each affected tribe notified under section 116(a) for the purpose of participating in activities required by section 117 or authorized by written agreement entered into pursuant to section 117(c). Any salary or travel expense that would ordinarily be incurred by such tribe, may not be considered eligible for funding under this paragraph.

(2)(A) The Secretary shall make grants to each affected Indian tribe where a candidate site for a repository is approved under section 112(c). Such grants may be made to each such Indian tribe only for purposes of enabling such Indian tribe—

(i) to review activities taken under this subtitle with respect to such site for purposes of determining any potential economic, social, public health and safety, and environmental impacts of such repository on the reservation and its residents;

(ii) to develop a request for impact assistance under paragraph (2);

(iii) to engage in any monitoring, testing, or evaluation activities with respect to site characterization programs with regard to such site;

(iv) to provide information to the residents of its reservation regarding any activities of such Indian tribe, the Secretary, or the Commission with respect to such site; and

(v) to request information from, and make comments and recommendations to, the Secretary regarding any activities taken under this subtitle with respect to such site.

(B) The amount of funds provided to any affected Indian tribe under this paragraph in any fiscal year may not exceed 100 percent of the costs incurred by such Indian tribe with respect to the activities described in clauses (i) through (v) of subparagraph (A). Any salary or travel expense that would ordinarily be incurred by such Indian tribe may not be considered eligible for funding under this paragraph.

(3)(A) The Secretary shall provide financial and technical assistance to any affected Indian tribe requesting such assistance and where there is a site with respect to which the Commission has authorized construction of a repository. Such assistance shall be designed to mitigate the impact on such Indian tribe of the development of such repository. Such assistance to such Indian tribe shall commence within 6 months following the granting by the Commission of a construction authorization for such repository and following the initiation of construction activities at such site.

(B) Any affected Indian tribe desiring assistance under this paragraph shall prepare and submit to the Secretary a report on any economic, social, public health and safety, and environmental impacts that are likely as a result of the development of a repository at a site on the reservation of such Indian tribe. Such report shall be submitted to the Secretary following the completion of site characterization activities at such site and before the recommendation of such site to the President by the Secretary for application for a construction authorization for a repository. As soon as practicable following the granting of a construction authorization for such repository, the Secretary shall seek to enter into a binding agreement with the Indian tribe involved setting forth the amount of assistance to be provided to such Indian tribe under this paragraph and the procedures to be followed in providing such assistance.

(4) The Secretary shall grant to each affected Indian tribe where a site for a repository is approved under section 112(c) an amount each fiscal year equal to the amount such Indian tribe would receive were it authorized to tax site characterization activities at such site, and the development and operation of such repository, as such Indian tribe taxes the other commercial activities occurring on such reservation. Such grants shall continue until such time as all such activities, development, and operation are terminated at such site.

(5) An affected Indian tribe may not receive any grant under paragraph (1) after the expiration of the 1-year period following—

(i) the date on which the Secretary notifies such Indian tribe of the termination of site characterization activities at the candidate site involved on the reservation of such Indian tribe;

(ii) the date on which such site is disapproved under section 115; or

(iii) the date on which the Commission disapproves an application for a construction authorization for a repository at such site;

whichever occurs first, unless there is another candidate site on the reservation of such Indian tribe that is approved under section 112(c) and with respect to which the actions described in clauses (i), (ii), and (iii) have not been taken.

(B) An affected Indian tribe may not receive any further assistance under paragraph (2) with respect to a site if repository construction activities at such site are terminated by the Secretary or if such activities are permanently enjoined by any court.

(C) At the end of the 2-year period beginning on the effective date of any license to receive and possess for a repository at a site on the reservation of an affected Indian tribe, no Federal funds shall be made available under paragraph (1) or (2) to such Indian tribe, except for—

(i) such funds as may be necessary to support activities of such Indian tribe related to any other repository where a license to receive and possess has not been in effect for more than 1 year; and

(ii) such funds as may be necessary to support activities of such Indian tribe pursuant to agreements or contracts for impact assistance entered into, under paragraph (2), by such Indian tribe with the Secretary during such 2-year period.

(6) Financial assistance authorized in this subsection shall be made out of amounts held in the Nuclear Waste Fund established in section 302.

JUDICIAL REVIEW OF AGENCY ACTIONS

SEC. 119. (a) JURISDICTION OF UNITED STATES COURTS OF APPEALS.—(1) Except for review in the Supreme Court of the United States, the United States courts of appeals shall have original and exclusive jurisdiction over any civil action—

(A) for review of any final decision or action of the Secretary, the President, or the Commission under this subtitle;

(B) alleging the failure of the Secretary, the President, or the Commission to make any decision, or take any action, required under this subtitle;

(C) challenging the constitutionality of any decision made, or action taken, under any provision of this subtitle;

(D) for review of any environmental impact statement prepared pursuant to the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) with respect to any action under this subtitle, or as required under section 135(c)(1), or alleging a failure to prepare such statement with respect to any such action;

(E) for review of any environmental assessment prepared under section 135(c)(2); or

(F) for review of any research and development activity under title II.

(2) The venue of any proceeding under this section shall be in the judicial circuit in which the petitioner involved resides or has its principal office, or in the United States Court of Appeals for the District of Columbia.

(c) DEADLINE FOR COMMENCING ACTION.—A civil action for judicial review described under subsection (a)(1) may be brought not later than the 180th day after the date of the decision or action or failure to act involved, as the case may be, except that if a party shows that he did not know of the decision or action complained of (or of the failure to act), and that a reasonable person acting under the circumstances would not have known, such party may bring a civil action not later than the 180th day after the date such party acquired actual or constructive knowledge of such decision, action, or failure to act.

EXPEDITED AUTHORIZATIONS

SEC. 120. (a) ISSUANCE OF AUTHORIZATIONS.—(1) To the extent that the taking of any action related to the site characterization of a site or the construction or initial operation of a repository under this subtitle requires a certificate, right-of-way, permit, lease, or other authorization from a Federal agency or officer, such agency or officer shall issue or grant any such authorization at the earliest practicable date, to the extent permitted by the applicable provisions of law administered by such agency or officer. All actions of a Federal agency or officer with respect to consideration of applications or requests for the issuance or grant of any such authorization shall be expedited, and any such application or request shall take precedence over any similar applications or requests not related to such repositories.

(2) The provisions of paragraph (1) shall not apply to any certificate, right-of-way, permit, lease, or other authorization issued or granted by, or requested from, the Commission.

(b) TERMS OF AUTHORIZATIONS.—Any authorization issued or granted pursuant to subsection (a) shall include such terms and conditions as may be required by law, and may include terms and conditions permitted by law.

CERTAIN STANDARDS AND CRITERIA

SEC. 121. (a) ENVIRONMENTAL PROTECTION AGENCY STANDARDS.—Not later than 1 year after the date of the enactment of this Act, the Administrator, pursuant to authority under other provisions of law, shall, by rule, promulgate generally applicable standards for protection of the general environment from offsite releases from radioactive material in repositories.

(b) COMMISSION REQUIREMENTS AND CRITERIA.—(1)(A) Not later than January 1, 1984, the Commission, pursuant to authority under other provisions of law, shall, by rule, promulgate technical requirements and criteria that it will apply, under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) and the Energy Reorganization Act of 1974 (42 U.S.C. 5801 et seq.), in approving or disapproving—

(i) applications for authorization to construct repositories;

(ii) applications for licenses to receive and possess spent nuclear fuel and high-level radioactive waste in such repositories; and

(iii) applications for authorization for closure and decommissioning of such repositories.

(B) Such criteria shall provide for the use of a system of multiple barriers in the design of the repository and shall include such restrictions on the retrievability of the solidified high-level radioactive waste and spent fuel emplaced in the repository as the Commission deems appropriate.

(C) Such requirements and criteria shall not be inconsistent with any comparable standards promulgated by the Administrator under subsection (a).

(2) For purposes of this Act, nothing in this section shall be construed to prohibit the Commission from promulgating requirements and criteria under paragraph (1) before the Administrator promulgates standards under subsection (a). If the Administrator promulgates standards under subsection (a) after requirements and criteria are promulgated by the Commission under paragraph (1), such requirements and criteria shall be revised by the Commission if necessary to comply with paragraph (1)(C).

(c) ENVIRONMENTAL IMPACT STATEMENT.—The promulgation of standards or criteria in accordance with the provisions of this section shall not require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.

DISPOSAL OF SPENT NUCLEAR FUEL

SEC. 122. Notwithstanding any other provision of this subtitle, any repository constructed on a site approved under this subtitle shall be designed and constructed to permit the retrieval of any spent nuclear fuel placed in such repository, during an appropriate period of operation of the facility, for any reason pertaining to the public health and safety, or the environment, or for the purpose of permitting the recovery of the economically valuable contents of such spent fuel. The Secretary shall specify the appropriate period of retrievability with respect to any repository at the time of design of such repository, and such aspect of such repository shall be subject to approval or disapproval by the Commission as part of the construction authorization process under subsections (b) through (d) of section 114.

TITLE TO MATERIAL

SEC. 123. Delivery, and acceptance by the Secretary, of any high-level radioactive waste or spent nuclear fuel for a repository constructed under this subtitle shall constitute a transfer to the Secretary of title to such waste or spent fuel.

CONSIDERATION OF EFFECT OF ACQUISITION OF WATER RIGHTS

SEC. 124. The Secretary shall give full consideration to whether the development, construction, and operation of a repository may require any purchase or other acquisition of water rights that will have a significant adverse effect on the present or future development of the area in which such repository is located. The Secretary shall mitigate any such adverse effects to the maximum extent practicable.

TERMINATION OF CERTAIN PROVISIONS

SEC. 125. Sections 119 and 120 shall cease to have effect at such time as a repository developed under this subtitle is licensed to receive and possess high-level radioactive waste and spent nuclear fuel.

SUBTITLE B—INTERIM STORAGE PROGRAM

FINDINGS AND PURPOSES

SEC. 131. (a) FINDINGS.—The Congress finds that—

(1) the persons owning and operating civilian nuclear power reactors have the primary responsibility for providing interim storage of spent nuclear fuel from such reactors, by maximizing, to the extent practical, the effective use of existing storage facilities at

the site of each civilian nuclear power reactor, and by adding new onsite storage capacity in a timely manner where practical;

(2) the Federal Government has the responsibility to encourage and expedite the effective use of existing storage facilities and the addition of needed new storage capacity at the site of each civilian nuclear power reactor; and

(3) the Federal Government has the responsibility to provide, in accordance with the provisions of this subtitle, not more than 1,900 metric tons of capacity for interim storage of spent nuclear fuel for civilian nuclear power reactors that cannot reasonably provide adequate storage capacity at the sites of such reactors when needed to assure the continued, orderly operation of such reactors.

(b) PURPOSES.—The purposes of this subtitle are—

(1) to provide for the utilization of available spent nuclear fuel pools at the site of each civilian nuclear power reactor to the extent practical and the addition of new spent nuclear fuel storage capacity where practical at the site of such reactor; and

(2) to provide, in accordance with the provisions of this subtitle, for the establishment of a federally owned and operated system for the interim storage of spent nuclear fuel at one or more facilities owned by the Federal Government with not more than 1,900 metric tons of capacity to prevent disruptions in the orderly operation of any civilian nuclear power reactor that cannot reasonably provide adequate spent nuclear fuel storage capacity at the site of such reactor when needed.

AVAILABLE CAPACITY FOR INTERIM STORAGE OF SPENT NUCLEAR FUEL

SEC. 132. The Secretary, the Commission, and other authorized Federal officials shall each take such actions as such official considers necessary to encourage and expedite the effective use of available storage, and necessary additional storage, at the site of each civilian nuclear power reactor consistent with—

(1) the protection of the public health and safety, and the environment;

(2) economic considerations;

(3) continued operation of such reactor;

(4) any applicable provisions of law; and

(5) the views of the population surrounding such powerplant.

INTERIM AT REACTOR STORAGE

SEC. 133. The Commission shall, by rule, establish procedures for the licensing of any technology approved by the Commission under section 219(a) for use at the site of any civilian nuclear power reactor. The establishment of such procedures shall not preclude the licensing, under any applicable procedures or rules of the Commission in effect prior to such establishment, of any technology for the storage of civilian spent nuclear fuel at the site of any civilian nuclear power reactor.

LICENSING OF FACILITY EXPANSIONS AND TRANSSHIPMENTS

SEC. 134. (a) ORAL ARGUMENT.—In any Commission hearing under section 189 of the Atomic Energy Act of 1954 (42 U.S.C. 2239) on an application for a license, or for an amendment to an existing license, filed after the date of the enactment of this Act, to expand the spent nuclear fuel storage capacity at the site of a civilian nuclear power reactor, through the use of high-density fuel storage racks, fuel rod compaction, the transshipment of spent nuclear fuel to another civilian nuclear power reactor within the same utility system, the construction of additional spent nuclear fuel pool capacity or dry storage capacity, or by other means, the Commission shall, at the request of any party, provide an opportunity for oral argument with respect to any matter which the Commission determines to be in controversy among the parties. The oral argument shall be preceded by such discovery procedures as the rules of the Commission shall provide. The Commission shall require each party, including the Commission staff, to submit in written form, at the time of the oral argument, a summary of the facts, data, and arguments upon which such party proposes to rely that are known at such time to such party. Only facts and data in the form of sworn testimony or written submission may be relied upon by the parties during oral argument. Of the materials that may be submitted by the parties during oral argument, the Commission shall only consider those facts and data that are submitted in the form of sworn testimony or written submission.

(b) ADJUDICATORY HEARING.—(1) At the conclusion of any oral argument under subsection (a), the Commission shall designate any disputed question of fact, together with any remaining questions of law, for resolution in an adjudicatory hearing only if it determines that—

(A) there is a genuine and substantial dispute of fact which can only be resolved with sufficient accuracy by the introduction of evidence in an adjudicatory hearing; and

(B) the decision of the Commission is likely to depend in whole or in part on the resolution of such dispute.

(2) In making a determination under this subsection, the Commission—

(A) shall designate in writing the specific facts that are in genuine and substantial dispute, the reason why the decision of the agency is likely to depend on the resolution of such facts, and the reason why an adjudicatory hearing is likely to resolve the dispute; and

(B) shall not consider—

(i) any issue relating to the design, construction, or operation of any civilian nuclear power reactor already licensed to operate at such site, or any civilian nuclear power reactor for which a construction permit has been granted at such site, unless the Commission determines that any such issue substantially affects the design, construction, or operation of the facility or activity for which such license application, authorization, or amendment is being considered; or

(ii) any siting or design issue fully considered and decided by the Commission in connection with the issuance of a construction permit or operating license for a civilian nuclear power reactor at such site, unless (I) such issue results from any revision of siting or design criteria by the Commission following such decision; and (II) the Commission determines that such issue substantially affects the design, construction, or operation of the facility or activity for which such license application, authorization, or amendment is being considered.

(3) The provisions of paragraph (2)(B) shall apply only with respect to licenses, authorizations, or amendments to licenses or authorizations, applied for under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) before December 31, 2005.

(c) JUDICIAL REVIEW.—No court shall hold unlawful or set aside a decision of the Commission in any proceeding described in subsection (a) because of a failure by the Commission to use a particular procedure pursuant to this section unless—

(1) an objection to the procedure used was presented to the Commission in a timely fashion or there are extraordinary circumstances that excuse the failure to present a timely objection; and

(2) the court finds that such failure has precluded a fair consideration and informed resolution of a significant issue of the proceeding taken as a whole.

STORAGE OF SPENT NUCLEAR FUEL

SEC. 135. (a) STORAGE CAPACITY.—(1) Subject to section 8, the Secretary shall provide, in accordance with paragraph (5), not more than 1,900 metric tons of capacity for the storage of spent nuclear fuel from civilian nuclear power reactors. Such storage capacity shall be provided through any one or more of the following methods, used in any combination determined by the Secretary to be appropriate:

(A) use of available capacity at one or more facilities owned by the Federal Government on the date of the enactment of this Act, including the modification and expansion of any such facilities, if the Commission determines that such use will adequately protect the public health and safety, except that such use shall not—

(i) render such facilities subject to licensing under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) or the Energy Reorganization Act of 1974 (42 U.S.C. 5801 et seq.); or

(ii) except as provided in subsection (c) require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), such facility is already being used, or has previously been used, for such storage or for any similar purpose.

(B) acquisition of any modular or mobile spent nuclear fuel storage equipment, including spent nuclear fuel storage casks, and provision of such equipment, to any person generating or holding title to spent nuclear fuel, at the site of any civilian nuclear power reactor operated by such person or at any Federal site;

(C) construction of storage capacity at any site of a civilian nuclear power reactor.

(2) Storage capacity authorized by paragraph (1) shall not be provided at any Federal or non-Federal site within which there is a candidate site for a repository.

(3) In selecting methods of providing storage capacity under paragraph (1), the Secretary shall consider the timeliness of the availability of each such method and shall seek to minimize the transportation of spent nuclear fuel, the public health and safety impacts, and the costs of providing such storage capacity.

(4) In providing storage capacity through any method described in paragraph (1), the Secretary shall comply with any applicable requirements for licensing or authorization of such method, except as provided in paragraph (1)(A)(i).

(5) The Secretary shall ensure that storage capacity is made available under paragraph (1) when needed, as determined on the basis of the storage needs specified in contracts entered into under section 136(a), and shall accept upon request any spent nuclear fuel as covered under such contracts.

(6) For purposes of paragraph (1)(A), the term "facility" means any building or structure.

(b) CONTRACTS.—(1) Subject to the capacity limitation established in subsections (a)(1) and (d), the Secretary shall offer to enter into, and may enter into, contracts

under section 136(a) with any person generating or owning spent nuclear fuel for purposes of providing storage capacity for such spent fuel under this section only if the Commission determines that—

(A) adequate storage capacity to ensure the continued orderly operation of the civilian nuclear power reactor at which such spent nuclear fuel is generated cannot reasonably be provided by the person owning and operating such reactor at such site, or at the site of any other civilian nuclear power reactor operated by such person, and such capacity cannot be made available in a timely manner through any method described in subparagraph (B); and

(B) such person is diligently pursuing licensed alternatives to the use of Federal storage capacity for the storage of spent nuclear fuel expected to be generated by such person in the future, including—

(i) expansion of storage facilities at the site of any civilian nuclear power reactor operated by such person;

(ii) construction of new or additional storage facilities at the site of any civilian nuclear power reactor operated by such person;

(iii) acquisition of modular or mobile spent nuclear fuel storage equipment, including spent nuclear fuel storage casks, for use at the site of any civilian nuclear power reactor operated by such person; and

(iv) transshipment to another civilian nuclear power reactor owned by such person.

(2) In making the determination described in paragraph (1)(A), the Commission shall ensure maintenance of a full core reserve storage capability at the site of the civilian nuclear power reactor involved unless the Commission determines that maintenance of such capability is not necessary for the continued orderly operation of such reactor.

(3) The Commission shall complete the determinations required in paragraph (1) with respect to any request for storage capacity not later than 6 months after receipt of such request by the Commission.

(c) ENVIRONMENTAL REVIEW.—(1) The provision of 300 or more metric tons of storage capacity at any one Federal site under subsection (a)(1)(A) shall be considered to be a major Federal action requiring preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

(2)(A) The Secretary shall prepare, and make available to the public, an environmental assessment of the probable impacts of any provision of less than 300 metric tons of storage capacity at any one Federal site under subsection (a)(1)(A) that requires the modification or expansion of any facility at site, and a discussion of alternative activities that may be undertaken to avoid such impacts. Such environmental assessment shall include—

(i) an estimate of the amount of storage capacity to be made available at such site;

(ii) an evaluation as to whether the facilities to be used at such site are suitable for the provision of such storage capacity;

(iii) a description of activities planned by the Secretary with respect to the modification or expansion of the facilities to be used at such site;

(iv) an evaluation of the effects of the provision of such storage capacity at such site on the public health and safety, and the environment;

(v) a reasonable comparative evaluation of current information with respect to such site and facilities and other sites and facilities available for the provision of such storage capacity;

(vi) a description of any other sites and facilities that have been considered by the Secretary for the provision of such storage capacity; and

(vii) an assessment of the regional and local impacts of providing such storage capacity at such site, including the impacts on transportation.

(B) The issuance of any environmental assessment under this paragraph shall be considered to be a final agency action subject to judicial review in accordance with the provisions of chapter 7 of title 5, United States Code. Such judicial review shall be limited to the sufficiency of such assessment with respect to the items described in clauses (i) through (vii) of subparagraph (A).

(3) Judicial review of any environmental impact statement or environmental assessment prepared pursuant to this subsection shall be conducted in accordance with the provisions of section 119.

(d) REVIEW OF SITES.—(1) Upon deciding to provide an aggregate of 300 or more metric tons of storage capacity under section (a)(1) at any one site, the Secretary shall notify the Governor and legislature of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, as the case may be, of such decision.

(2)(A) During the 60-day period following receipt of such notification, such Governor or legislature or governing body may disapprove the provision of 300 or more metric tons of storage capacity at the site involved and submit to the Congress a notice of such disapproval. A notice of disapproval shall be considered to be submitted to the Congress on the date of the transmittal of such notice of disapproval to the Speaker of the House and the President pro tempore of the Senate. Such notice of disapproval shall be accompanied by a statement of reasons explaining why the provision of such storage capacity at such site was disapproved by such Governor or legislature or the governing body of such Indian tribe.

(B) Unless otherwise provided by State law, the Governor or legislature of each State shall have authority to submit a notice of disapproval to the Congress under subparagraph (A). In any case in which State law provides for submission of any such notice of disapproval by any other person or entity, any reference in this subtitle to the Governor or legislature of such State shall be considered to refer instead to such other person or entity.

(C) The authority of the Governor and legislature of each State under this paragraph shall not be applicable with respect to any site located on a reservation.

(3)(A) If any notice of disapproval is submitted to the Congress under paragraph (2), the proposed provision of 300 or more metric tons of storage capacity at the site involved shall be disapproved unless, during the first period of 90 calendar days of continuous session of the Congress following the date of the receipt by the Congress of such notice of disapproval, the Congress passes a resolution approving such proposed provision of storage capacity in accordance with the procedures established in this paragraph and subsections (d) through (f) of section 115 and such resolution thereafter becomes law. For purposes of this paragraph, the term "resolution" means a joint resolution of either House of the Congress, the matter after the resolving clause of which is as follows: "That there hereby is approved the provision of 300 or more metric tons of spent nuclear fuel storage capacity at the site located at , with respect to which a notice of disapproval was submitted by on .". The first blank space in such resolution shall be filled with the geographic location of the site involved; the second blank space in such resolution shall be filled with the designation of the State Governor and legislature or affected Indian tribe governing body submitting the notice of disapproval involved; and the last blank space in such resolution shall be filled with the date of submission of such notice of disapproval.

(B) For purposes of the consideration of any resolution described in subparagraph (A), each reference in subsections (d) and (e) of section 115 to a resolution of repository siting approval shall be considered to refer to the resolution described in such subparagraph.

(e) LIMITATIONS.—Any spent nuclear fuel stored under this section shall be removed from the storage site or facility involved as soon as practicable following the date on which a repository developed under this Act is available for disposal of such spent fuel.

(f) REPORT.—The Secretary shall annually prepare and submit to the Congress a report on any plans of the Secretary for providing storage capacity under this section. Such report shall include a description of the specific manner of providing such storage selected by the Secretary, if any. The Secretary shall prepare and submit the first such report not later than 1 year after the date of the enactment of this Act.

(g) CRITERIA FOR DETERMINING ADEQUACY OF AVAILABLE STORAGE CAPACITY.—Not later than 90 days after the date of the enactment of this Act, the Commission pursuant to section 553 of the Administrative Procedures Act, shall propose, by rule, procedures and criteria for making the determination required by subsection (b) that a person owning and operating a civilian nuclear power reactor cannot reasonably provide adequate spent nuclear fuel storage capacity at the civilian nuclear power reactor site when needed to ensure the continued orderly operation of such reactor. Such criteria shall ensure the maintenance of a full core reserve storage capability at the site of such reactor unless the Commission determines that maintenance of such capability is not necessary for the continued orderly operation of such reactor. Such criteria shall identify the feasibility of reasonably providing such adequate spent nuclear fuel storage capacity, taking into account economic, technical, regulatory, and public health and safety factors, through the use of high-density fuel storage racks, fuel rod compaction, transshipment of spent nuclear fuel to another civilian nuclear power reactor within the same utility system, construction of additional spent nuclear fuel pool capacity, or such other technologies as may be approved by the Commission.

(h) APPLICATION.—Notwithstanding any other provision of law, nothing in this Act shall be construed to encourage, authorize, or require the private or Federal use, purchase, lease, or other acquisition of any storage facility located away from the site of any civilian nuclear power reactor and not owned by the Federal Government on the date of the enactment of this Act.

(i) COORDINATION WITH RESEARCH AND DEVELOPMENT PROGRAM.—To the extent available, and consistent with the provisions of this section, the Secretary shall provide spent nuclear fuel for the research and de-

velopment program authorized in section 217 from spent nuclear fuel received by the Secretary for storage under this section. Such spent nuclear fuel shall not be subject to the provisions of subsection (e).

INTERIM STORAGE FUND

SEC. 136. (a) CONTRACTS.—(1) During the period following the date of the enactment of this Act, but not later than January 1, 1990, the Secretary is authorized to enter into contracts with persons who generate or own spent nuclear fuel resulting from civilian nuclear activities for the storage of such spent nuclear fuel in any storage capacity provided under this subtitle: *Provided, however,* That the Secretary shall not enter into contracts for spent nuclear fuel in amounts in excess of the available storage capacity specified in section 135(a). Those contracts shall provide that the Federal Government will (1) take title at the civilian nuclear power reactor site, to such amounts of spent nuclear fuel from the civilian nuclear power reactor as the Commission determines cannot be stored onsite, (2) transport the spent nuclear fuel to a federally owned and operated interim away-from-reactor storage facility, and (3) store such fuel in the facility pending further processing, storage, or disposal. Each such contract shall (A) provide for payment to the Secretary of fees determined in accordance with the provisions of this section; and (B) specify the amount of storage capacity to be provided for the person involved.

(2) The Secretary shall undertake a study and, not later than 180 days after the date of the enactment of this Act, submit to the Congress a report, establishing payment charges that shall be calculated on an annual basis, commencing on or before January 1, 1984. Such payment charges and the calculation thereof shall be published in the Federal Register, and shall become effective not less than 30 days after publication. Each payment charge published in the Federal Register under this paragraph shall remain effective for a period of 12 months from the effective date as the charge for the cost of the interim storage of any spent nuclear fuel. The report of the Secretary shall specify the method and manner of collection (including the rates and manner of payment) and any legislative recommendations determined by the Secretary to be appropriate.

(3) Fees for storage under this subtitle shall be established on a nondiscriminatory basis. The fees to be paid by each person entering into a contract with the Secretary under this subsection shall be based upon an estimate of the pro rata costs of storage and related activities under this subtitle with respect to such person, including the acquisition, construction, operation, and maintenance of any facilities under this subtitle.

(4) The Secretary shall establish in writing criteria setting forth the terms and conditions under which such storage services shall be made available.

(5) Except as provided in sections 137, nothing in this or any other Act requires the Secretary, in carrying out the responsibilities of this section, to obtain a license or permit to possess or own spent nuclear fuel.

(b) LIMITATION.—No spent nuclear fuel generated or owned by any department of the United States referred to in section 101 or 102 of title 5, United States Code may be stored by the Secretary in any storage capacity provided under this subtitle unless such department transfers to the Secretary, for deposit in the Interim Storage Fund, amounts equivalent to the fees that would be paid to the Secretary under the contracts referred to in this section if such spent nuclear fuel were generated by any other person.

(c) ESTABLISHMENT OF INTERIM STORAGE FUND.—There hereby is established in the Treasury of the United States a separate fund, to be known as the Interim Storage Fund. The Storage Fund shall consist of—

(1) all receipts, proceeds, and recoveries realized by the Secretary under subsections (a), (b), and (e), which shall be deposited in the Storage Fund immediately upon their realization;

(2) any appropriations made by the Congress to the Storage Fund; and

(3) any unexpended balances available on the date of the enactment of this Act for functions or activities necessary or incident to the interim storage of civilian spent nuclear fuel, which shall automatically be transferred to the Storage Fund on such date.

(d) USE OF STORAGE FUND.—The Secretary may make expenditures from the Storage Fund, subject to subsection (e), for any purpose necessary or appropriate to the conduct of the functions and activities of the Secretary, or the provision or anticipated provision of services, under this subtitle, including—

(1) the identification, development, licensing, construction, operation, decommissioning, and post-decommissioning maintenance and monitoring of any interim storage facility provided under this subtitle;

(2) the administrative cost of the interim storage program;

(3) the costs associated with acquisition, design, modification, replacement, operation, and construction of facilities at an interim storage site, consistent with the restrictions in section 135; and

(4) the cost of transportation of spent nuclear fuel.

(e) ADMINISTRATION OF STORAGE FUND.—(1) The Secretary of the Treasury shall hold the Storage Fund and, after consultation with the Secretary, annually report to the Congress on the financial condition and operations of the Storage Fund during the preceding fiscal year.

(2) The Secretary shall submit the budget of the Storage Fund to the Office of Management and Budget triennially along with the budget of the Department of Energy submitted at such time in accordance with chapter 11 of title 31, United States Code. The budget of the Storage Fund shall consist of estimates made by the Secretary of expenditures from the Storage Fund and other relevant financial matters for the succeeding 3 fiscal years, and shall be included in the Budget of the United States Government. The Secretary may make expenditures from the Storage Fund, subject to appropriations which shall remain available until expended. Appropriations shall be subject to triennial authorization.

(3) If the Secretary determines that the Storage Fund contains at any time amounts in excess of current needs, the Secretary may request the Secretary of the Treasury to invest such amounts, or any portion of such amounts as the Secretary determines to be appropriate, in obligations of the United States—

(A) having maturities determined by the Secretary of the Treasury to be appropriate to the needs of the Storage Fund; and

(B) bearing interest at rates determined to be appropriate by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturities of such investments, except that the interest rate on such investments shall not exceed the average interest rate applicable to existing borrowings.

(4) Receipts, proceeds, and recoveries realized by the Secretary under this section, and expenditures of amounts from the Storage Fund, shall be exempt from annual apportionment under the provisions of subchapter II of chapter 15 of title 31, United States Code.

(5) If at any time the moneys available in the Storage Fund are insufficient to enable the Secretary to discharge his responsibilities under this subtitle, the Secretary shall issue to the Secretary of the Treasury obligations in such forms and denominations, bearing such maturities, and subject to such terms and conditions as may be agreed to by the Secretary and the Secretary of the Treasury. The total of such obligations shall not exceed amounts provided in appropriation Acts. Redemption of such obligations shall be made by the Secretary from moneys available in the Storage Fund. Such obligations shall bear interest at a rate determined by the Secretary of the Treasury, which shall be not less than a rate determined by taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the obligations under this paragraph. The Secretary of the Treasury shall purchase any issued obligations, and for such purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under chapter 31 of title 31, United States Code, and the purposes for which securities may be issued under such Act are extended to include any purchase of such obligations. The Secretary of the Treasury may at any time sell any of the obligations acquired by him under this paragraph. All redemptions, purchases, and sales by the Secretary of the Treasury of obligations under this paragraph shall be treated as public debt transactions of the United States.

(6) Any appropriations made available to the Storage Fund for any purpose described in subsection (d) shall be repaid into the general fund of the Treasury, together with interest from the date of availability of the appropriations until the date of repayment. Such interest shall be paid on the cumulative amount of appropriations available to the Storage Fund, less the average undisbursed cash balance in the Storage Fund account during the fiscal year involved. The rate of such interest shall be determined by the Secretary of the Treasury taking into consideration the average market yield during the month preceding each fiscal year on outstanding marketable obligations of the United States of comparable maturity. Interest payments may be deferred with the approval of the Secretary of the Treasury, but any interest payments so deferred shall themselves bear interest.

SEC. 137. (a) TRANSPORTATION.—(1) Transportation of spent nuclear fuel under section 136(a) shall be subject to licensing and regulation by the Commission and by the Secretary of Transportation as provided for transportation of commercial spent nuclear fuel under existing law.

(2) The Secretary, in providing for the transportation of spent nuclear fuel under this Act, shall utilize by contract private industry to the fullest extent possible in each

aspect of such transportation. The Secretary shall use direct Federal services for such transportation only upon a determination of the Secretary of Transportation, in consultation with the Secretary, that private industry is unable or unwilling to provide such transportation services at reasonable cost.

SUBTITLE C—MONITORED RETRIEVABLE STORAGE

MONITORED RETRIEVABLE STORAGE

SEC. 141. (a) FINDINGS.—The Congress finds that—

(1) the Federal Government has the responsibility to provide for long-term storage of high-level radioactive waste and spent nuclear fuel;

(2) the executive branch and the Congress should proceed as expeditiously as possible to consider fully a proposal for construction of one or more monitored retrievable storage facilities to provide such long-term storage;

(3) the Federal Government has the responsibility to ensure that such facilities are available with sufficient capacity when needed;

(4) the generators and owners of the high-level radioactive waste and spent nuclear fuel to be stored in such facilities have primary responsibility to provide for, and the responsibility to pay the costs of, the long-term storage of such waste and spent fuel until such waste and spent fuel is accepted by the Secretary in accordance with the provisions of this title; and

(5) disposal of high-level radioactive waste and spent nuclear fuel in a repository developed under this Act should proceed regardless of any construction of a monitored retrievable storage facility pursuant to this section.

(b) SUBMISSION OF PROPOSAL BY SECRETARY.—(1) On or before June 1, 1985, the Secretary shall complete a detailed study of the need for and feasibility of, and shall submit to the Congress a proposal for, the construction of one or more monitored retrievable storage facilities for high-level radioactive waste and spent nuclear fuel. Each such facility shall be designed—

(A) to accommodate spent nuclear fuel and high-level radioactive waste resulting from civilian nuclear activities;

(B) to permit continuous monitoring, management, and maintenance of such spent fuel and waste for the foreseeable future;

(C) to provide for the ready retrieval of such spent fuel and waste for further processing or disposal; and

(D) to safely store such spent fuel and waste as long as may be necessary by maintaining such facility through appropriate means, including any required replacement of such facility.

(2) Such proposal shall include—

(A) the establishment of a Federal program for the siting, development, construction, and operation of facilities capable of safely storing high-level radioactive waste and spent nuclear fuel, which facilities are to be licensed by the Commission;

(B) a plan for the funding of the construction and operation of such facilities, which plan shall provide that the costs of such activities shall be borne by the generators and owners of the high-level radioactive waste and spent nuclear fuel to be stored in such facilities;

(C) site-specific designs, specifications, and cost estimated sufficient to (i) solicit bids for the construction of the first such facility; (ii) support congressional authorization of the construction of such facility; and (iii) enable completion and operation of such facility as soon as practicable following congressional authorization of such facility; and

(D) a plan for integrating facilities constructed pursuant to this section with other storage and disposal facilities authorized in this Act.

(3) In formulating such proposal, the Secretary shall consult with the Commission and the Administrator, and shall submit their comments on such proposal to the Congress at the time such proposal is submitted.

(4) The proposal shall include, for the first such facility, at least five alternative combinations of proposed sites and facility designs consistent with the criteria of paragraph (b)(1). The Secretary shall recommend the combination among the alternatives that the Secretary deems preferable. The environmental assessment under subsection (c) shall include a full such analysis of the relative advantage and disadvantages of all five such alternative combinations of proposed sites and proposed facility designs.

(c) ENVIRONMENTAL IMPACT STATEMENTS.—(1) Preparation and submission to the Congress of the proposal required in this section shall not require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)). The Secretary shall prepare, in accordance with regulations issued by the Secretary implementing such Act, an environmental assessment with respect to such proposal. Such environmental assessment shall be based upon available information regarding alternative technologies for the storage of spent nuclear fuel and high-level radioactive waste. The Secretary shall submit such environmental assessment to the Congress at the time such proposal is submitted.

(2) If the Congress by law, after review of the proposal submitted by the Secretary under subsection (b), specifically authorizes construction of a monitored retrievable storage facility, the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) shall apply with respect to construction of such facility, except that any environmental impact statement prepared with respect to such facility shall not be required to consider the need for such facility, alternate sites for such facility, or any alternative to the design criteria for such facility set forth in subsection (b)(1).

(d) LICENSING.—Any facility authorized pursuant to this section shall be subject to licensing under section 202(3) of the Energy Reorganization Act of 1974 (42 U.S.C. 5842(3)). In reviewing the application filed by the Secretary for licensing of the first such facility, the Commission may not consider the need for such facility, alternate sites for such facility, or any alternative to the design criteria for such facility set forth in subsection (b)(1).

(e) CLARIFICATION.—(1) Nothing in this section limits the consideration of alternative facility designs consistent with the criteria of paragraph (b)(1) in any environmental impact statement, or in any licensing procedure of the Commission, with respect to any monitored, retrievable facility authorized pursuant to this section.

(2) If Congress by law after review of the proposal submitted by the Secretary under subsection (b), authorizes construction of a monitored retrievable storage facility without specifying the site for such facility, any environmental impact statement, and any licensing procedure of the Commission, with respect to the facility shall consider alternate sites to the site selected for the facility pursuant to law.

(f) IMPACT ASSISTANCE.—(1) Upon receipt by the Secretary of congressional authorization to construct a facility described in subsection (b), the Secretary shall commence making annual impact aid payments to appropriate units of general local government in order to mitigate any social or economic impacts resulting from the construction and subsequent operation of any such facility within the jurisdictional boundaries of any such unit.

(2) Payments made available to units of general local government under this subsection shall be—

(A) allocated in a fair and equitable manner, with priority given to units of general local government determined by the Secretary to be most severely affected; and

(B) utilized by units of general local government only for planning, construction, maintenance, and provision of public services related to the siting of such facility.

(3) Such payments shall be subject to such terms and conditions as the Secretary determines are necessary to ensure achievement of the the purposes of this subsection. The Secretary shall issue such regulations as may be necessary to carry out the provisions of this subsection.

(4) Such payments shall be made available entirely from funds held in the Nuclear Waste Fund established in this Act and shall be available only to the extent provided in advance in appropriation Acts.

(5) The Secretary may consult with appropriate units of general local government in advance of commencement of construction of any such facility in an effort to determine the level of payments each such unit is eligible to receive under this subsection.

(f) LIMITATION.—No monitored retrievable storage facility developed pursuant to this section may be constructed in any State in which there is located any site approved for site characterization under section 112. No repository may be developed under this Act in any State in which there is located any monitored retrievable storage facility developed pursuant to this section.

(g) PARTICIPATION OF STATES AND INDIAN TRIBES.—Any facility authorized pursuant to this section shall be subject to the provisions of sections 115, 116(a), 116(b), 116(d), 117, and 118. For purposes of carrying out the provisions of this subsection, any reference in sections 115 through 118 to a repository shall be considered to refer to a monitored retrievable storage facility.

SUBTITLE D—LOW-LEVEL RADIOACTIVE WASTE

FINANCIAL ARRANGEMENTS FOR LOW-LEVEL RADIOACTIVE WASTE SITE CLOSURE

SEC. 151. (a) FINANCIAL ARRANGEMENTS.—(1) The Commission shall establish by rule, regulation, or order, after public notice, and in accordance with section 181 of the Atomic Energy Act of 1954 (42 U.S.C. 2231), such standards and instructions as the Commission may deem necessary or desirable to ensure in the case of each license for the disposal of low-level radioactive waste that an adequate bond, surety, or other financial arrangement (as determined by the Commission) will be provided by a licensee to permit completion of all requirements established by the Commission for the decontamination, decommissioning, site closure, and reclamation of sites, structures, and equipment used in conjunction with such low-level radioactive waste. Such financial

arrangements shall be provided and approved by the Commission, or, in the case of sites within the boundaries of any agreement State under section 274 of the Atomic Energy Act of 1954 (42 U.S.C. 2021), by the appropriate State or State entity, prior to issuance of licenses for low-level radioactive waste disposal or, in the case of licenses in effect on the date of the enactment of this Act, prior to termination of such licenses.

(2) If the Commission determines that any long-term maintenance or monitoring, or both, will be necessary at a site described in paragraph (1), the Commission shall ensure before termination of the license involved that the licensee has made available such bonding, surety, or other financial arrangements as may be necessary to ensure that any necessary long-term maintenance or monitoring needed for such site will be carried out by the person having title and custody for such site following license termination.

(b) TITLE AND CUSTODY.—(1) The Secretary shall have authority to assume title and custody of low-level radioactive waste and the land on which such waste is disposed of, upon request of the owner of such waste and land and following termination of the license issued by the Commission for such disposal, if the Commission determines that—

(A) the requirements of the Commission for site closure, decommissioning, and decontamination have been met by the licensee involved and that such licensee is in compliance with the provisions of subsection (a);

(B) such title and custody will be transferred to the Secretary without cost to the Federal Government; and

(C) Federal ownership and management of such site is necessary or desirable in order to protect the public health and safety, and the environment.

(2) If the Secretary assumes title and custody of any such waste and land under this subsection, the Secretary shall maintain such waste and land in a manner that will protect the public health and safety, and the environment.

(c) SPECIAL SITES.—If the low-level radioactive waste involved is the result of a licensed activity to recover zirconium, hafnium, and rare earths from source material, the Secretary, upon request of the owner of the site involved, shall assume title and custody of such waste and the land on which it is disposed when such site has been decontaminated and stabilized in accordance with the requirements established by the Commission and when such owner has made adequate financial arrangements approved by the Commission for the long-term maintenance and monitoring of such site.

TITLE II—RESEARCH, DEVELOPMENT, AND DEMONSTRATION REGARDING DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE AND SPENT NUCLEAR FUEL

PURPOSE

SEC. 211. It is the purpose of this title—

(1) to provide direction to the Secretary with respect to the disposal of high-level radioactive waste and spent nuclear fuel;

(2) to authorize the Secretary, pursuant to this title—

(A) to provide for the construction, operation, and maintenance of a deep geologic test and evaluation facility; and

(B) to provide for a focused and integrated high-level radioactive waste and spent nuclear fuel research and development program, including the development of a test and evaluation facility to carry out research and provide an integrated demonstration of the technology for deep geologic disposal of high-level radioactive waste, and the development of the facilities to demonstrate dry storage of spent nuclear fuel; and

(3) to provide for an improved cooperative role between the Federal Government and States, affected Indian tribes, and units of general local government in the siting of a test and evaluation facility.

APPLICABILITY

SEC. 212. The provisions of this title are subject to section 8 and shall not apply to facilities that are used for the disposal of high-level radioactive waste, low-level radioactive waste transuranic waste, or spent nuclear fuel resulting from atomic energy defense activities.

IDENTIFICATION OF SITES

SEC. 213. (a) GUIDELINES.—Not later than 6 months after the date of the enactment of this Act and notwithstanding the failure of other agencies to promulgate standards pursuant to applicable law, the Secretary, in consultation with the Commission, the Director of the Geological Survey, the Administrator, the Council on Environmental Quality, and such other Federal agencies as the Secretary considers appropriate, is authorized to issue, pursuant to section 553 of title 5, United States Code, general guidelines for the selection of a site for a test and evaluation facility. Under such guidelines the Secretary shall specify factors that qualify or disqualify a site for development as a test and evaluation facility, including factors pertaining to the location of valuable natural resources, hydrogeophysics, seismic activity, and atomic energy defense activities, proximity to water supplies, proximity to populations, the effect upon the rights of users of water, and proximity to components of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, the National Wilderness Preservation System, or National Forest Lands. Such guidelines shall require the Secretary to consider the various geologic media in which the site for a test and evaluation facility may be located and, to the extent practicable, to identify sites in different geologic media. The Secretary shall use guidelines established under this subsection in considering and selecting sites under this title.

(b) SITE IDENTIFICATION BY THE SECRETARY.—(1) Not later than 1 year after the date of the enactment of this Act, and following promulgation of guidelines under subsection (a), the Secretary is authorized to identify 3 or more sites, at least 2 of which shall be in different geologic media in the continental United States, and at least 1 of which shall be in media other than salt. Subject to Commission requirements, the Secretary shall give preference to sites for the test and evaluation facility in media possessing geochemical characteristics that retard aqueous transport of radionuclides. In order to provide a greater possible protection of public health and safety as operating experience is gained at the test and evaluation facility, and with the exception of the primary areas under review by the Secretary on the date of the enactment of this Act for the location of a test and evaluation facility or repository, all sites identified under this subsection shall be more than 15 statute miles from towns having a population of greater than 1,000 persons as determined by the most recent census unless such sites contain high-level radioactive waste prior to identification under this title. Each identification of a site shall be supported by an environmental assessment, which shall include a detailed statement of the basis for such identification and of the probable impacts of the siting research activities planned for such site, and a discussion of alternative activities relating to siting research that may be undertaken to avoid such impacts. Such environmental assessment shall include—

(A) an evaluation by the Secretary as to whether such site is suitable for siting research under the guidelines established under subsection (a);

(B) an evaluation by the Secretary of the effects of the siting research activities at such site on the public health and safety and the environment;

(C) a reasonable comparative evaluation by the Secretary of such site with other sites and locations that have been considered;

(D) a description of the decision process by which such site was recommended; and

(E) an assessment of the regional and local impacts of locating the proposed test and evaluation facility at such site.

(2) When the Secretary identifies a site, the Secretary shall as soon as possible notify the Governor of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, of such identification and the basis of such identification. Additional sites for the location of the test and evaluation facility authorized in section 302(d) may be identified after such 1 year period, following the same procedure as if such sites had been identified within such period.

SITING RESEARCH AND RELATED ACTIVITIES

SEC. 214. (a) IN GENERAL.—Not later than 30 months after the date on which the Secretary completes the identification of sites under section 213, the Secretary is authorized to complete sufficient evaluation of 3 sites to select a site for expanded siting research activities and for other activities under section 218. The Secretary is authorized to conduct such preconstruction activities relative to such site selection for the test and evaluation facility as he deems appropriate. Additional sites for the location of the test and evaluation facility authorized in section 302(d) may be evaluated after such 30-month period, following the same procedures as if such sites were to be evaluated within such period.

(b) PUBLIC MEETINGS AND ENVIRONMENTAL ASSESSMENT.—Not later than 6 months after the date on which the Secretary completes the identification of sites under section 213, and before beginning siting research activities, the Secretary shall hold at least 1 public meeting in the vicinity of each site to inform the residents of the area of the activities to be conducted at such site and to receive their views.

(c) RESTRICTIONS.—Except as provided in section 218 with respect to a test and evaluation facility, in conducting siting research activities pursuant to subsection (a)—

(1) the Secretary shall use the minimum quantity of high-level radioactive waste or other radioactive materials, if any, necessary to achieve the test or research objectives;

(2) the Secretary shall ensure that any radioactive material used or placed on a site shall be fully retrievable; and

(3) upon termination of siting research activities at a site for any reason, the Secre-

tary shall remove any radioactive material at or in the site as promptly as practicable.

(d) TITLE TO MATERIAL.—The Secretary may take title, in the name of the Federal Government, to the high-level radioactive waste, spent nuclear fuel, or other radioactive material emplaced in a test and evaluation facility. If the Secretary takes title to any such material, the Secretary shall enter into the appropriate financial arrangements described in subsections (a) or (b) of section 302 for the disposal of such material.

TEST AND EVALUATION FACILITY SITING REVIEW AND REPORTS

SEC. 215. (a) CONSULTATION AND COOPERATION.—The Governor of a State, or the governing body of an affected Indian tribe, notified of a site identification under section 213 shall have the right to participate in a process of consultation and cooperation as soon as the site involved has been identified pursuant to such section and throughout the life of the test and evaluation facility. For purposes of this section, the term "process of consultation and cooperation" means a methodology—

(1) by which the Secretary—

(A) keeps the Governor or governing body involved fully and currently informed about any potential economic or public health and safety impacts in all stages of the siting, development, construction, and operation of a test and evaluation facility;

(B) solicits, receives, and evaluates concerns and objections of such Governor or governing body with regard to such test and evaluation facility on an ongoing basis; and

(C) works diligently and cooperatively to resolve such concerns and objections; and

(2) by which the State or affected Indian tribe involved can exercise reasonable independent monitoring and testing of onsite activities related to all stages of the siting, development, construction and operation of the test and evaluation facility, except that any such monitoring and testing shall not unreasonably interfere with onsite activities.

(b) WRITTEN AGREEMENTS.—The Secretary shall enter into written agreements with the Governor of the State in which an identified site is located or with the governing body of any affected Indian tribe where an identified site is located in order to expedite the consultation and cooperation process. Any such written agreement shall specify—

(1) procedures by which such Governor or governing body may study, determine, comment on, and make recommendations with regard to the possible health, safety, and economic impacts of the test and evaluation facility;

(2) procedures by which the Secretary shall consider and respond to comments and recommendations made by such Governor or governing body, including the period in which the Secretary shall so respond;

(3) the documents the Department is to submit to such Governor or governing body, the timing for such submissions, the timing for such Governor or governing body to identify public health and safety concerns and the process to be followed to try to eliminate those concerns;

(4) procedures by which the Secretary and either such Governor or governing body may review or modify the agreement periodically; and

(5) procedures for public notification of the procedures specified under subparagraphs (A) through (D).

(c) LIMITATION.—Except as specifically provided in this section, nothing in this title is intended to grant any State or affected Indian tribe any authority with respect to the siting, development, or loading of the test and evaluation facility.

FEDERAL AGENCY ACTIONS

SEC. 216. (a) COOPERATION AND COORDINATION.—Federal agencies shall assist the Secretary by cooperating and coordinating with the Secretary in the preparation of any necessary reports under this title and the mission plan under section 301.

(b) ENVIRONMENTAL REVIEW.—(1) No action of the Secretary or any other Federal agency required by this title or section 301 with respect to a test and evaluation facility to be taken prior to the initiation of onsite construction of a test and evaluation facility shall require the preparation of an environmental impact statement under section 102(2)(C) of the Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require the preparation of environmental reports, except as otherwise specifically provided for in this title.

(2) The Secretary and the heads of all other Federal agencies shall, to the maximum extent possible, avoid duplication of efforts in the preparation of reports under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

RESEARCH AND DEVELOPMENT ON DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE

SEC. 217. (a) PURPOSE.—Not later than 64 months after the date of the enactment of this Act, the Secretary is authorized to, to the extent practicable, begin at a site evaluated under section 214, as part of and as an extension of siting research activities of such site under such section, the mining and construction of a test and evaluation facility. Prior to the mining and construction of such facility, the Secretary shall prepare an environmental assessment. The purpose of such facility shall be—

(1) to supplement and focus the repository site characterization process;

(2) to provide the conditions under which known technological components can be integrated to demonstrate a functioning repository-like system;

(3) to provide a means of identifying, evaluating, and resolving potential repository licensing issues that could not be resolved during the siting research program conducted under section 212;

(4) to validate, under actual conditions, the scientific models used in the design of a repository;

(5) to refine the design and engineering of repository components and systems and to confirm the predicted behavior of such components and systems;

(6) to supplement the siting data, the generic and specific geological characteristics developed under section 214 relating to isolating disposal materials in the physical environment of a repository;

(7) to evaluate the design concepts for packaging, handling, and emplacement of high-level radioactive waste and spent nuclear fuel at the design rate; and

(8) to establish operating capability without exposing workers to excessive radiation.

(b) DESIGN.—The Secretary shall design each test and evaluation facility—

(1) to be capable of receiving not more than 100 full-sized canisters of solidified high-level radioactive waste (which canisters shall not exceed an aggregate weight of 100 metric tons), except that spent nuclear fuel may be used instead of such waste if such waste cannot be obtained under reasonable conditions;

(2) to permit full retrieval of solidified high-level radioactive waste, or other radioactive material used by the Secretary for testing, upon completion of the technology demonstration activities; and

(3) based upon the principle that the high-level radioactive waste, spent nuclear fuel, or other radioactive material involved shall be isolated from the biosphere in such a way that the initial isolation is provided by engineered barriers functioning as a system with the geologic environment.

(c) OPERATION.—(1) Not later than 88 months after the date of the enactment of this Act, the Secretary shall begin an in situ testing program at the test and evaluation facility in accordance with the mission plan developed under section 301, for purposes of—

(A) conducting in situ tests of bore hole sealing, geologic media fracture sealing, and room closure to establish the techniques and performance for isolation of high-level radioactive waste, spent nuclear fuel, or other radioactive materials from the biosphere;

(B) conducting in situ tests with radioactive sources and materials to evaluate and improve reliable models for radionuclide migration, absorption, and containment within the engineered barriers and geologic media involved, if the Secretary finds there is reasonable assurance that such radioactive sources and materials will not threaten the use of such site as a repository;

(C) conducting in situ tests to evaluate and improve models for ground water or brine flow through fractured geologic media;

(D) conducting in situ tests under conditions representing the real time and the accelerated time behavior of the engineered barriers within the geologic environment involved;

(E) conducting in situ tests to evaluate the effects of heat and pressure on the geologic media involved, on the hydrology of the surrounding area, and on the integrity of the disposal packages;

(F) conducting in situ tests under both normal and abnormal repository conditions to establish safe design limits for disposal packages and to determine the effects of the gross release of radionuclides into surroundings, and the effects of various credible failure modes, including—

(i) seismic events leading to the coupling of aquifers through the test and evaluation facility;

(ii) thermal pulses significantly greater than the maximum calculated; and

(iii) human intrusion creating a direct pathway to the biosphere; and

(G) conducting such other research and development activities as the Secretary considers appropriate, including such activities necessary to obtain the use of high-level radioactive waste, spent nuclear fuel, or other radioactive materials (such as any highly radioactive material from the Three Mile Island nuclear powerplant or from the West Valley Demonstration Project) for test and evaluation purposes, if such other activities are reasonably necessary to support the repository program and if there is reasonable assurance that the radioactive sources involved will not threaten the use of such site as a repository.

(2) The in situ testing authorized in this subsection shall be designed to ensure that the suitability of the site involved for licensing by the Commission as a repository will not be adversely affected.

(d) USE OF EXISTING DEPARTMENT FACILITIES.—During the conducting of siting research activities under section 214 and for

such period thereafter as the Secretary considers appropriate, the Secretary shall use Department facilities owned by the Federal Government on the date of the enactment of this Act for the conducting of generically applicable tests regarding packaging, handling, and emplacement technology for solidified high-level radioactive waste and spent nuclear fuel from civilian nuclear activities.

(e) ENGINEERED BARRIERS.—The system of engineered barriers and selected geology used in a test and evaluation facility shall have a design life at least as long as that which the Commission requires by regulations issued under this Act, or under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.), for repositories.

(f) ROLE OF COMMISSION.—(1)(A) Not later than 1 year after the date of the enactment of this Act, the Secretary and the Commission shall reach a written understanding establishing the procedures for review, consultation, and coordination in the planning, construction, and operation of the test and evaluation facility under this section. Such understanding shall establish a schedule, consistent with the deadlines set forth in this subtitle, for submission by the Secretary of, and review by the Commission of and necessary action on—

(i) the mission plan prepared under section 301; and

(ii) such reports and other information as the Commission may reasonably require to evaluate any health and safety impacts of the test and evaluation facility.

(B) Such understanding shall also establish the conditions under which the Commission may have access to the test and evaluation facility for the purpose of assessing any public health and safety concerns that it may have. No shafts may be excavated for the test and evaluation until the Secretary and the Commission enter into such understanding.

(2) Subject to section 305, the test and evaluation facility, and the facilities authorized in section 217, shall be constructed and operated as research, development, and demonstration facilities, and shall not be subject to licensing under section 202 of the Energy Reorganization Act of 1974 (42 U.S.C. 5842).

(3)(A) The Commission shall carry out a continuing analysis of the activities undertaken under this section to evaluate the adequacy of the consideration of public health and safety issues.

(B) The Commission shall report to the President, the Secretary, and the Congress as the Commission considers appropriate with respect to the conduct of activities under this section.

(g) ENVIRONMENTAL REVIEW.—The Secretary shall prepare an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) prior to conducting tests with radioactive materials at the test and evaluation facility. Such environmental impact statement shall incorporate, to the extent practicable, the environmental assessment prepared under section 217(a). Nothing in this subsection may be construed to limit siting research activities conducted under section 214. This subsection shall apply only to activities performed exclusively for a test and evaluation facility.

(h) LIMITATIONS.—(1) If the test and evaluation facility is not located at the site of a repository, the Secretary shall obtain the concurrence of the Commission with respect to the decontamination and decommissioning of such facility.

(2) If the test and evaluation facility is not located at a candidate site or repository site, the Secretary shall conduct only the portion of the in situ testing program required in subsection (c) determined by the Secretary to be useful in carrying out the purposes of this Act.

(3) The operation of the test and evaluation facility shall terminate not later than—

(A) 5 years after the date on which the initial repository begins operation; or

(B) at such time as the Secretary determines that the continued operation of a test and evaluation facility is not necessary for research, development, and demonstration purposes;

whichever occurs sooner.

(4) Notwithstanding any other provisions of this subsection, as soon as practicable following any determination by the Secretary, with the concurrence of the Commission, that the test and evaluation facility is unsuitable for continued operation, the Secretary shall take such actions as are necessary to remove from such site any radioactive material placed on such site as a result of testing and evaluation activities conducted under this section. Such requirement may be waived if the Secretary, with the concurrence of the Commission, finds that short-term testing and evaluation activities using radioactive material will not endanger the public health and safety.

RESEARCH AND DEVELOPMENT ON SPENT NUCLEAR FUEL

SEC. 218. (a) DEMONSTRATION AND COOPERATIVE PROGRAMS.—The Secretary shall establish a demonstration program, in cooperation with the private sector, for the dry storage of spent nuclear fuel at civilian nuclear power reactor sites, with the objective of establishing one or more technologies that the Commission may, by rule, approve for use at the sites of civilian nuclear power reactors without, to the maximum extent practicable, the need for additional site-specific approvals by the Commission. Not later than 1 year after the date of the enactment of this Act, the Secretary shall select at least 1, but not more than 3, sites evaluated under section 214 at such power reactors. In selecting such site or sites, the Secretary shall give preference to civilian nuclear power reactors that will soon have a shortage of interim storage capacity for spent nuclear fuel. Subject to reaching agreement as provided in subsection (b), the Secretary shall undertake activities to assist such power reactors with demonstration projects at such sites, which may use one of the following types of alternate storage technologies: spent nuclear fuel storage casks, caissons, or silos. The Secretary shall also undertake a cooperative program with civilian nuclear power reactors to encourage the development of the technology for spent nuclear fuel rod consolidation in existing power reactor water storage basins.

(b) COOPERATIVE AGREEMENTS.—To carry out the programs described in subsection (a), the Secretary shall enter into a cooperative agreement with each utility involved that specifies, at a minimum, that—

(1) such utility shall select the alternate storage technique to be used, make the land and spent nuclear fuel available for the dry storage demonstration, submit and provide site-specific documentation for a license application to the Commission, obtain a license relating to the facility involved, construct such facility, operate such facility after licensing, pay the costs required to construct such facility, and pay all costs associated with the operation and maintenance of such facility;

(2) the Secretary shall provide, on a cost-sharing basis, consultative and technical assistance, including design support and generic licensing documentation, to assist such utility in obtaining the construction authorization and appropriate license from the Commission; and

(3) the Secretary shall provide generic research and development of alternative spent nuclear fuel storage techniques to enhance utility-provided, at-reactor storage capabilities, if authorized in any other provision of this Act or in any other provision of law.

(c) DRY STORAGE RESEARCH AND DEVELOPMENT.—(1) The consultative and technical assistance referred to in subsection (b)(2) may include, but shall not be limited to, the establishment of a research and development program for the dry storage of not more than 300 metric tons of spent nuclear fuel at facilities owned by the Federal Government on the date of the enactment of this Act. The purpose of such program shall be to collect necessary data to assist the utilities involved in the licensing process.

(2) To the extent available, and consistent with the provisions of section 135, the Secretary shall provide spent nuclear fuel for the research and development program authorized in this subsection from spent nuclear fuel received by the Secretary for storage under section 135. Such spent nuclear fuel shall not be subject to the provisions of section 135(e).

(d) FUNDING.—The total contribution from the Secretary from Federal funds and the use of Federal facilities or services shall not exceed 25 percent of the total costs of the demonstration program authorized in subsection (a), as estimated by the Secretary. All remaining costs of such program shall be paid by the utilities involved or shall be provided by the Secretary from the Interim Storage Fund established in section 136.

(e) RELATION TO SPENT NUCLEAR FUEL STORAGE PROGRAM.—The spent nuclear fuel storage program authorized in section 135 shall not be construed to authorize the use of research development or demonstration facilities owned by the Department unless—

(1) a period of 30 calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than 3 calendar days to a day certain) has passed after the Secretary has transmitted to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a written report containing a full and complete statement concerning (A) the facility involved; (B) any necessary modifications; (C) the cost thereof; and (D) the impact on the authorized research and development program; or

(2) each such committee, before the expiration of such period, has transmitted to the Secretary a written notice to the effect that such committee has no objection to the proposed use of such facility.

PAYMENTS TO STATES AND INDIAN TRIBES

SEC. 219. (a) PAYMENTS.—Subject to subsection (b), the Secretary shall make payments to each State or affected Indian tribe that has entered into an agreement pursuant to section 215. The Secretary shall pay an amount equal to 100 percent of the expenses incurred by such State or Indian tribe in engaging in any monitoring, testing, evaluation, or other consultation and cooperation activity under section 215 with re-

spect to any site. The amount paid by the Secretary under this paragraph shall not exceed $3,000,000 per year from the date on which the site involved was identified to the date on which the decontamination and decommission of the facility is complete pursuant to section 217(h). Any such payment may only be made to a State in which a potential site for a test and evaluation facility has been identified under section 213, or to an affected Indian tribe where the potential site has been identified under such section.

(b) LIMITATION.—The Secretary shall make any payment to a State under subsection (a) only if such State agrees to provide, to each unit of general local government within the jurisdictional boundaries of which the potential site or effectively selected site involved is located, at least one-tenth of the payments made by the Secretary to such State under such subsection. A State or affected Indian tribe receiving any payment under subsection (a) shall otherwise have discretion to use such payment for whatever purpose it deems necessary, including the State or tribal activities pursuant to agreements entered into in accordance with section 215. Annual payments shall be prorated on a 365-day basis to the specified dates.

STUDY OF RESEARCH AND DEVELOPMENT NEEDS FOR MONITORED RETRIEVABLE STORAGE PROPOSAL

SEC. 220. Not later than 6 months after the date of the enactment of this Act, the Secretary shall submit to the Congress a report describing the research and development activities the Secretary considers necessary to develop the proposal required in section 141(b) with respect to a monitored retrievable storage facility.

JUDICIAL REVIEW

SEC. 221. Judicial review of research and development activities under this title shall be in accordance with the provisions of section 119.

SEC. 222. RESEARCH ON ALTERNATIVES FOR THE PERMANENT DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE.—The Secretary shall continue and accelerate a program of research, development, and investigation of alternative means and technologies for the permanent disposal of high-level radioactive waste from civilian nuclear activities and Federal research and development activities except that funding shall be made from amounts appropriated to the Secretary for purposes of carrying out this section. Such program shall include examination of various waste disposal options.

TITLE III—OTHER PROVISIONS RELATING TO RADIOACTIVE WASTE

MISSION PLAN

SEC. 301. (a) CONTENTS OF MISSION PLAN.—The Secretary shall prepare a comprehensive report, to be known as the mission plan, which shall provide an informational basis sufficient to permit informed decisions to be made in carrying out the repository program and the research, development, and demonstration programs required under this Act. The mission plan shall include—

(1) an identification of the primary scientific, engineering, and technical information, including any necessary demonstration of engineering or systems integration, with respect to the siting and construction of a test and evaluation facility and repositories;

(2) an identification of any information described in paragraph (1) that is not available because of any unresolved scientific, engineering, or technical questions, or undemonstrated engineering or systems integration, a schedule including specific major milestones for the research, development, and technology demonstration program required under this Act and any additional activities to be undertaken to provide such information, a schedule for the activities necessary to achieve important programmatic milestones, and an estimate of the costs required to carry out such research, development, and demonstration programs;

(3) an evaluation of financial, political, legal, or institutional problems that may impede the implementation of this Act, the plans of the Secretary to resolve such problems, and recommendations for any necessary legislation to resolve such problems;

(4) any comments of the Secretary with respect to the purpose and program of the test and evaluation facility;

(5) a discussion of the significant results of research and development programs conducted and the implications for each of the different geologic media under consideration for the siting of repositories, and, on the basis of such information, a comparison of the advantages and disadvantages associated with the use of such media for repository sites;

(6) the guidelines issued under section 112(a);

(7) a description of known sites at which site characterization activities should be undertaken, a description of such siting characterization activities, including the extent of planned excavations, plans for onsite testing with radioactive or nonradioactive material, plans for any investigations activities which may affect the capability of any such site to isolate high-level radioactive waste or spent nuclear fuel, plans to control any adverse, safety-related impacts from such site characterization activities, and plans for the decontamination and decommissioning of such site if it is determined unsuitable for licensing as a repository;

(8) an identification of the process for solidifying high-level radioactive waste or packaging spent nuclear fuel, including a summary and analysis of the data to support the selection of the solidification process and packaging techniques, an analysis of the requirements for the number of solidification packaging facilities needed, a description of the state of the art for the materials proposed to be used in packaging such waste or spent fuel and the availability of such materials including impacts on strategic supplies and any requirements for new or reactivated facilities to produce any such materials needed, and a description of a plan, and the schedule for implementing such plan, for an aggressive research and development program to provide when needed a high-integrity disposal package at a reasonable price;

(9) an estimate of (A) the total repository capacity required to safely accommodate the disposal of all high-level radioactive waste and spent nuclear fuel expected to be generated through December 31, 2020, in the event that no commercial reprocessing of spent nuclear fuel occurs, as well as the repository capacity that will be required if such reprocessing does occur; (B) the number and type of repositories required to be constructed to provide such disposal capacity; (C) a schedule for the construction of such repositories; and (D) an estimate of the period during which each repository listed in such schedule will be accepting high-level radioactive waste or spent nuclear fuel for disposal;

(10) an estimate, on an annual basis, of the costs required (A) to construct and operate the repositories anticipated to be needed under paragraph (9) based on each of the assumptions referred to in such paragraph; (B) to construct and operate a test and evaluation facility, or any other facilities, other than repositories described in subparagraph (A), determined to be necessary; and (C) to carry out any other activities under this Act; and

(11) an identification of the possible adverse economic and other impacts to the State or Indian tribe involved that may arise from the development of a test and evaluation facility or repository at a site.

(b) SUBMISSION OF MISSION PLAN.—(1) Not later than 15 months after the date of the enactment of this Act, the Secretary shall submit a draft mission plan to the States, the affected Indian tribes, the Commission, and other Government agencies as the Secretary deems appropriate for their comments.

(2) In preparing any comments on the mission plan, such agencies shall specify with precision any objections that they may have. Upon submission of the mission plan to such agencies, the Secretary shall publish a notice in the Federal Register of the submission of the mission plan and of its availability for public inspection, and, upon receipt of any comments of such agencies respecting the mission plan, the Secretary shall publish a notice in the Federal Register of the receipt of comments and of the availability of the comments for public inspection. If the Secretary does not revise the mission plan to meet objections specified in such comments, the Secretary shall publish in the Federal Register a detailed statement for not so revising the mission plan.

(3) The Secretary, after reviewing any other comments made by such agencies and revising the mission plan to the extent that the Secretary may consider to be appropriate, shall submit the mission plan to the appropriate committees of the Congress not later than 17 months after the date of the enactment of this Act. The mission plan shall be used by the Secretary at the end of the first period of 30 calendar days (not including any day on which either House of Congress is not in session because of adjournment of more than 3 calendar days to a day certain) following receipt of the mission plan by the Congress.

NUCLEAR WASTE FUND

SEC. 302. (a) CONTRACTS.—(1) In the performance of his functions under this Act, the Secretary is authorized to enter into contracts with any person who generates or holds title to high-level radioactive waste, or spent nuclear fuel, of domestic origin for the acceptance of title, subsequent transportation, and disposal of such waste or spent fuel. Such contracts shall provide for payment to the Secretary of fees pursuant to paragraphs (2) and (3) sufficient to offset expenditures described in subsection (d).

(2) For electricity generated by a civilian nuclear power reactor and sold on or after the date 90 days after the date of enactment of this Act, the fee under paragraph (1) shall be equal to 1.0 mil per kilowatt hour.

(3) For spent nuclear fuel, or solidified high-level radioactive waste derived from spent nuclear fuel, which fuel was used to generate electricity in a civilian nuclear power reactor prior to the application of the fee under paragraph (2) to such reactor, the Secretary shall, not later than 90 days after the date of enactment of this Act, establish a 1 time fee per kilogram of heavy metal in

spent nuclear fuel, or in solidified high-level radioactive waste. Such fee shall be in an amount equivalent to an average charge of 1.0 mil per kilowatt-hour for electricity generated by such spent nuclear fuel, or such solidified high-level waste derived there from, to be collected from any person delivering such spent nuclear fuel or high-level waste, pursuant to section 123, to the Federal Government. Such fee shall be paid to the Treasury of the United States and shall be deposited in the seperate fund established by subsection (c) 126(b). In paying such a fee, the person delivering spent fuel, or solidified high-level radioactive wastes derived therefrom, to the Federal Government shall have no further financial obligation to the Federal Government for the long-term storage and permanent disposal of such spent fuel, or the solidified high-level radioactive waste derived therefrom.

(4) Not later than 180 days after the date of enactment of this Act, the Secretary shall establish procedures for the collection and payment of the fees established by subsection (a) and subsection (c). The Secretary shall annually review the amount of the fees established by subsections (a) and (c) above to evaluate whether collection of the fee will provide sufficient revenues to offset the costs as defined in subsection (a) herein. In the event the Secretary determines that either insufficient or excess revenues are being collected, in order to recover the costs incurred by the Federal Government that are specified in section 601(a), the Secretary shall propose an adjustment to the fee to insure full cost recovery. The Secretary shall immediately transmit this proposal for such an adjustment to Congress. The adjusted fee proposed by the Secretary shall be effective after a period of 90 days of continuous session have elapsed following the receipt of such transmittal unless during such 90-day period either House of Congress adopts a resolution disapproving the Secretary's proposed adjustment in accordance with the procedures set forth for congressional review of an energy action under section 551 of the Energy Policy and Conservation Act.

(5) The contracts entered into under this section shall provide that in return for the payment of the fees established by paragraphs (2) and (3), the Federal Government will reasonably undertake to perform the duties required of it under this Act and shall no later than December 31, 1996—

(A) take title to the spent nuclear fuel and high-level radioactive waste owned or generated by such person, and

(B) store or dispose of the spent nuclear fuel or high-level radioactive waste in a federally owned and operated repository or monitored, retrievable storage facility.

(6) The Secretary shall establish in writing criteria setting forth the terms and conditions under which such disposal services shall be made available.

(b) ADVANCE CONTRACTING REQUIREMENT.—(1)(A) The Commission shall not issue or renew a license to any person to use a utilization or production facility under the authority of section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134) unless—

(i) such person has entered into a contract with the Secretary under this section; or

(ii) the Secretary affirms in writing that such person is actively and in good faith negotiating with the Secretary for a contract under this section.

(B) The Commission, as it deems necessary or appropriate, may require as a precondition to the issuance or renewal of a license under section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134) that the applicant for such license shall have entered into an agreement with the Secretary for the disposal of high-level radioactive waste and spent nuclear fuel that may result from the use of such license.

(2) Except as provided in paragraph (1), no spent nuclear fuel or high-level radioactive waste generated or owned by any person (other than a department of the United States referred to in section 101 or 102 of title 5, United States Code) may be disposed of by the Secretary in any repository constructed under this Act unless the generator or owner of such spent fuel or waste has entered into a contract with the Secretary under this section by not later than—

(A) June 30, 1983; or

(B) the date on which such generator or owner commences generation of, or takes title to, such spent fuel or waste;

whichever occurs later.

(3) The rights and duties of a party to a contract entered into under this section may be assignable with transfer of title to the spent nuclear fuel or high-level radioactive waste involved.

(4) No high-level radioactive waste or spent nuclear fuel generated or owned by any department of the United States referred to in section 101 or 102 of title 5, United States Code, may be disposed of by the Secretary in any repository constructed under this Act unless such department transfers to the Secretary, for deposit in the Nuclear Waste Fund, amounts equivalent to the fees that would be paid to the Secretary under the contracts referred to in this section if such waste or spent fuel were generated by any other person.

(c) ESTABLISHMENT OF NUCLEAR WASTE FUND.—There hereby is established in the Treasury of the United States a separate fund, to be known as the Nuclear Waste Fund. The Waste Fund shall consist of—

(1) all receipts, proceeds, and recoveries realized by the Secretary under subsections (a), (b), and (e), which shall be deposited in the Waste Fund immediately upon their realization;

(2) any appropriations made by the Congress to the Waste Fund; and

(3) any unexpended balances available on the date of the enactment of this Act for functions or activities necessary or incident to the disposal of civilian high-level radioactive waste or civilian spent nuclear fuel, which shall automatically be transferred to the Waste Fund on such date.

(d) USE OF WASTE FUND.—The Secretary may make expenditures from the Waste Fund, subject to subsection (e), only for purposes of radioactive waste disposal activities under titles I and II, including—

(1) the identification, development, licensing, construction, operation, decommissioning, and post-decommissioning maintenance and monitoring of any repository, monitored, retrievable storage facility or test and evaluation facility constructed under this Act;

(2) the conducting of nongeneric research, development, and demonstration activities under this Act;

(3) the administrative cost of the radioactive waste disposal program;

(4) any costs that may be incurred by the Secretary in connection with the transportation, treating, or packaging of spent nuclear fuel or high-level radioactive waste to be disposed of in a repository, to be stored in a monitored, retrievable storage site or to be used in a test and evaluation facility;

(5) the costs associated with acquisition, design, modification, replacement, operation, and construction of facilities at a repository site, a monitored, retrievable storage site or a test and evaluation facility site and necessary or incident to such repository, monitored, retrievable storage facility or test and evaluation facility; and

(6) the provision of assistance to States, units of general local government, and Indian tribes under sections 116, 118, and 219.

No amount may be expended by the Secretary under this subtitle for the construction or expansion of any facility unless such construction or expansion is expressly authorized by this or subsequent legislation. The Secretary hereby is authorized to construct one repository and one test and evaluation facility.

(e) ADMINISTRATION OF WASTE FUND.—(1) The Secretary of the Treasury shall hold the Waste Fund and, after consultation with the Secretary, annually report to the Congress on the financial condition and operations of the Waste Fund during the preceding fiscal year.

(2) The Secretary shall submit the budget of the Waste Fund to the Office of Management and Budget triennially along with the budget of the Department of Energy submitted at such time in accordance with chapter 11 of title 31, United States Code. The budget of the Waste Fund shall consist of the estimates made by the Secretary of expenditures from the Waste Fund and other relevant financial matters for the succeeding 3 fiscal years, and shall be included in the Budget of the United States Government. The Secretary may make expenditures from the Waste Fund, subject to appropriations which shall remain available until expended. Appropriations shall be subject to triennial authorization.

(3) If the Secretary determines that the Waste Fund contains at any time amounts in excess of current needs, the Secretary may request the Secretary of the Treasury to invest such amounts, or any portion of such amounts as the Secretary determines to be appropriate, in obligations of the United States—

(A) having maturities determined by the Secretary of the Treasury to be appropriate to the needs of the Waste Fund; and

(B) bearing interest at rates determined to be appropriate by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturities of such investments, except that the interest rate on such investments shall not exceed the average interest rate applicable to existing borrowings.

(4) Receipts, proceeds, and recoveries realized by the Secretary under this section, and expenditures of amounts from the Waste Fund, shall be exempt from annual apportionment under the provisions of subchapter II of chapter 15 of title 31, United States Code.

(5) If at any time the moneys available in the Waste Fund are insufficient to enable the Secretary to discharge his responsibilities under this subtitle, the Secretary shall issue to the Secretary of the Treasury obligations in such forms and denominations, bearing such maturities, and subject to such terms and conditions as may be agreed to by the Secretary and the Secretary of the

Treasury. The total of such obligations shall not exceed amounts provided in appropriation Acts. Redemption of such obligations shall be made by the Secretary from moneys available in the Waste Fund. Such obligations shall bear interest at a rate determined by the Secretary of the Treasury, which shall be not less than a rate determined by taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the obligations under this paragraph. The Secretary of the Treasury shall purchase any issued obligations, and for such purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under chapter 31 of title 31, United States Code, and the purposes for which securities may be issued under such Act are extended to include any purchase of such obligations. The Secretary of the Treasury may at any time sell any of the obligations acquired by him under this paragraph. All redemptions, purchases, and sales by the Secretary of the Treasury of obligations under this paragraph shall be treated as public debt transactions of the United States.

(6) Any appropriations made available to the Waste Fund for any purpose described in subsection (d) shall be repaid into the general fund of the Treasury, together with interest from the date of availability of the appropriations until the date of repayment. Such interest shall be paid on the cumulative amount of appropriations available to the Waste Fund, less the average undisbursed cash balance in the Waste Fund account during the fiscal year involved. The rate of such interest shall be determined by the Secretary of the Treasury taking into consideration the average market yield during the month preceding each fiscal year on outstanding marketable obligations of the United States of comparable maturity. Interest payments may be deferred with the approval of the Secretary of the Treasury, but any interest payments so deferred shall themselves bear interest.

ALTERNATIVE MEANS OF FINANCING

SEC. 303. The Secretary shall undertake a study with respect to alternative approaches to managing the construction and operation of all civilian radioactive waste management facilities, including the feasibility of establishing a private corporation for such purposes. In conducting such study, the Secretary shall consult with the Director of the Office of Management and Budget, the Chairman of the Commission, and such other Federal agency representatives as may be appropriate. Such study shall be completed, and a report containing the results of such study shall be submitted to the Congress, within 1 year after the date of the enactment of this Act.

OFFICE OF CIVILIAN RADIOACTIVE WASTE MANAGEMENT

SEC. 304. (a) ESTABLISHMENT.—There hereby is established within the Department of Energy an Office of Civilian Radioactive Waste Management. The Office shall be headed by a Director, who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall be compensated at the rate payable for level IV of the Executive Schedule under section 5315 of title 5, United States Code.

(b) FUNCTIONS OF DIRECTOR.—The Director of the Office shall be responsible for carrying out the functions of the Secretary under this Act, subject to the general supervision of the Secretary. The Director of the Office shall be directly responsible to the Secretary.

(c) ANNUAL REPORT TO CONGRESS.—The Director of the Office shall annually prepare and submit to the Congress a comprehensive report on the activities and expenditures of the Office.

(d) ANNUAL AUDIT BY COMPTROLLER GENERAL.—The Comptroller General of the United States shall annually make an audit of the Office, in accordance with such regulations as the Comptroller General may prescribe. The Comptroller General shall have access to such books, records, accounts, and other materials of the Office as the Comptroller General determines to be necessary for the preparation of such audit. The Comptroller General shall submit to the Congress a report on the results of each audit conducted under this section.

LOCATION OF TEST AND EVALUATION FACILITY

SEC. 305. (a) REPORT TO CONGRESS.—Not later than 1 year after the date of the enactment of this Act, the Secretary shall transmit to the Congress a report setting forth whether the Secretary plans to locate the test and evaluation facility at the site of a repository.

(b) PROCEDURES.—(1) If the test and evaluation facility is to be located at any candidate site or repository site (A) site selection and development of such facility shall be conducted in accordance with the procedures and requirements established in title I with respect to the site selection and development of repositories; and (B) the Secretary may not commence construction of any surface facility for such test and evaluation facility prior to issuance by the Commission of a construction authorization for a repository at the site involved.

(2) No test and evaluation facility may be converted into a repository unless site selection and development of such facility was conducted in accordance with the procedures and requirements established in title I with respect to the site selection and development of respositories.

(3) The Secretary may not commence construction of a test and evaluation facility at a candidate site or site recommended as the location for a repository prior to the date on which the designation of such site is effective under section 115.

UP AMENDMENT NO. 1574

Mr. McCLURE. Mr. President, I now send a group of printed amendments to the desk and ask for their immediate consideration en bloc and ask unanimous consent that when considered en bloc and adopted en bloc that they be then treated as original text for the purpose of further amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment en bloc numbered 1574.

Mr. McCLURE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To make clear that if the Federal Government seeks to utilize repositories developed under this bill, the Federal Government must pay its pro rata share of development, construction and operating costs of such repositories)

On page 12, line 11, strike all beginning with the word "Such", through the word "302." in line 18, and insert in lieu thereof the following: "Such arrangements shall include the allocation of costs of developing, constructing, and operating this repository or repositories. The costs resulting from permanent disposal of high-level radioactive waste from atomic energy defense activites shall be paid by the Federal Government, into the special account established under section 302.".

(Purpose: To make it clear that with respect to transportation, nothing in the Act is intended to affect existing Federal, State, or local laws)

On page 13, following section 8, insert a new section 9 as follows:

"APPLICABILITY

"SEC. 9. TRANSPORTATION.—Nothing in this Act shall be construed to affect Federal, State, or local laws pertaining to the transportation of spent nuclear fuel or high-level radioactive waste.".

(Purpose: To amend the process by which potential sites for repositories are selected)

On page 18, line 18, strike subsection (b) of section 112 and insert in lieu thereof the following new subsection:

"(b) RECOMMENDATION BY SECRETARY TO THE PRESIDENT.—(1)(A) Following the issuance of guidelines under subsection (a) and consultation with the Governors of affected States, the Secretary shall nominate at least 5 sites that he determines suitable for site characterization for selection of the first repository site.

"(B) Subsequent to such nomination, the Secretary shall recommend to the President three of the nominated sites not later than January 1, 1985 for characterization as candidate sites.

"(C) Not later than July 1, 1989, the Secretary shall nominate five sites, which shall include at least three additional sites not nominated under subparagraph (A), and recommend by such date to the President from such five nominated sites three candidate sites the Secretary determines suitable for site characterization for selection of the second repository. The Secretary may not nominate any site previously nominated under subparagraph (A), that was not recommended as a candidate site under subparagraph (B).

"(D) Such recommendations under subparagraphs (B) and (C) shall be consistent with the provisions of section 305.

"(E) Each nomination of a site under this subsection shall be accompanied by an environmental assessment, which shall include a detailed statement of the basis for such recommendation and of the probable impacts of the site characterization activities planned for such site, and a discussion of alternative activities relating to site characterization that may be undertaken to avoid such impacts. Such environmental assessment shall include—

"(i) an evaluation by the Secretary as to whether such site is suitable for site characterization under the guidelines established under subsection (a);

"(ii) an evaluation by the Secretary as to whether such site is suitable for development as a repository under each such guide-

line that does not require site characterization as a prerequisite for application of such guideline;

"(iii) an evaluation by the Secretary of the effects of the site characterization activities at such site on the public health and safety and the environment;

"(iv) a reasonable comparative evaluation by the Secretary of such site with other sites and locations that have been considered;

"(v) a description of the decision process by which such site was recommended; and

"(vi) an assessment of the regional and local impacts of locating the proposed repository at such site.

"(F)(i) The issuance of any environmental assessment under this paragraph shall be considered to be a final agency action subject to judicial review in accordance with the provisions of chapter 7 of title 5, United States Code, and section 119. Such judicial review shall be limited to the sufficiency of such environmental assessment with respect to the items described in clauses (i) through (vi) of subparagraph (E).

"(G) Each environmental assessment prepared under this paragraph shall be made available to the public.

"(H) Before nominating a site, the Secretary shall notify the Governor and legislature of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, as the case may be, of such nomination and the basis for such nomination.

"(2) Before nominating any site the Secretary shall hold public hearings in the vicinity of such site to inform the residents of the area in which such site is located of the proposed nomination of such site and to receive their comments. At such hearings, the Secretary shall also solicit and receive any recommendations of such residents with respect to issues that should be addressed in the environmental assessment described in paragraph (1) and the site characterization plan described in section 113(b)(1).

"(3) In evaluating the sites nominated under this section prior to any decision to recommend a site as a candidate site, the Secretary shall use available geophysical, geologic, geochemical and hydrologic, and other information and shall not conduct any preliminary borings or excavations at a site unless (i) such preliminary boring or excavation activities were in progress upon the date of enactment of this Act or (ii) the Secretary certifies that such available information from other sources, in the absence of preliminary borings or excavations, will not be adequate to satisfy applicable requirements of this Act or any other law: *Provided,* That preliminary borings or excavations under this section shall not exceed a diameter of six inches.".

(Purpose: To reflect the change made from an environmental impact statement back to an environmental assessment for sites recommended to the President)

On page 22, line 7, strike all of subsection (f) and insert in lieu thereof the following:

"(f) TIMELY SITE CHARACTERIZATION.—Nothing in this section may be construed as prohibiting the Secretary from continuing ongoing or presently planned site characterization at any site on Department of Energy land for which the location of the principal borehole has been approved by the Secretary by August 1, 1982, except that (1) the environmental assessment described in subsection (b)(1) shall be prepared and made available to the public before proceeding to sink shafts at any such site; and (2) the Secretary shall not continue site characterization at any such site unless such site is among the candidate sites recommended by the Secretary under the first sentence of subsection (b) for site characterization and approved by the President under subsection (c); and (3) the Secretary shall conduct public hearings under 113(b)(2) and comply with requirements under section 117 of this Act within one year of the date of enactment.".

(Purpose: To strike subsection 112(g) of the substitute amendment)

On page 23, strike lines 3 through 18.

(Purpose: To provide that no repository shall be built in the surface facility of any proposed repository would be located adjacent to a one square mile area with more than 1000 individuals)

On page 18, line 4 strike the words "in a highly populated area.", and insert in lieu thereof the following:

"(1) in a highly populated area; or (2) adjacent to an area 1 mile by 1 mile having a population of not less than 1,000 individuals.".

(Purpose: To provide the President discretion to recommend additional sites for the construction of subsequent repositories)

On page 32, line 2, add the following new sentence following the words "under paragraph (1)": "After submission of the second such recommendation, the President may submit to the Congress recommendations for other sites, in accordance with the provisions of this subtitle.".

(Purpose: To clarify the Secretary's preliminary determination that sites are suitable for development as repositories is to be made consistent with the Secretary's guidelines promulgated under section 112(a))

On page 37, line 4, strike the sentence beginning with "For purposes of", and insert in lieu thereof the following: "For purposes of complying with the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and this section, the Secretary shall consider as alternate sites for the first repository to be developed under this subtitle 3 candidate sites with respect to which (1) site characterization has been completed under section 113; and (2) the Secretary has made a preliminary determination that such sites are suitable for development as repositories consistent with the guidelines promulgated under section 112(a)."

(Purpose: To clarify the Secretary's preliminary determination that sites are suitable for development as repositories is to be made consistent with the Secretary's guidelines promulgated under section 112(a))

On page 37, line 16, strike the sentence beginning with "The Secretary shall", and insert in lieu thereof the following:

"The Secretary shall consider as alternative sites for subsequent repositories at least three of the remaining sites recommended by the Secretary by January 1, 1985 and by July 1, 1989, pursuant to section 112(b) and approved by the President for site characterization pursuant to section 112(c) for which (1) site characterization has been completed under section 13; and (2) the Secretary has made a preliminary determination that such sites are suitable for development as repositories consistent with the guidelines promulgated under section 112(a).".

(Purpose: To provide for judicial review of environmental assessments prepared under 112(b)(1))

On page 63, line 14, after the word "section", insert the following: "112(b)(1) or".

On page 92, line 14, strike Subtitle C and insert in lieu thereof the following:

SUBTITLE C—MONITORED RETRIEVABLE STORAGE

MONITORED RETRIEVABLE STORAGE

SEC. 141. (a) FINDINGS.—The Congress finds that—

(1) long-term storage of high-level radioactive waste or spent nucler fuel in monitored retrievable storage facilities is an option for providing safe and reliable management of such waste or spent fuel;

(2) the executive branch and the Congress should proceed as expeditiously as possible to consider fully a proposal for construction of one or more monitored retrievable storage facilities to provide such long-term storage;

(3) the Federal Government has the responsibility to ensure that site specific designs for such facilities are available as provided in this section;

(4) the generators and owners of the high-level radioactive waste and spent nuclear fuel to be stored in such facilities have the responsibility to pay the costs of the long-term storage of such waste and spent fuel; and

(5) disposal of high-level radioactive waste and spent nuclear fuel in a respository developed under this Act should proceed regardless of any construction of a monitored retrievable storage facility pursuant to this section.

(b) SUBMISSION OF PROPOSAL BY SECRETARY.—(1) On or before June 1, 1985, the Secretary shall complete a detailed study of the need for and feasibility of, and shall submit to the Congress a proposal for, the construction of one or more monitored retrievable storage facilities for high-level radioactive waste and spent nuclear fuel, each such facility shall be designed—

(A) to accommodate spent nuclear fuel and high-level radioactive waste resulting from civilian nuclear activities;

(B) to permit continuous monitoring, management, and maintenance of such spent fuel and waste for the foreseeable future;

(C) to provide for the ready retrieval of such spent fuel and waste for further processing or disposal; and

(D) to safely store such spent fuel and waste as long as may be necessary by maintaining such facility through appropriate means, including any required replacement of such facility.

(2) Such proposal shall include—

(A) the establishment of a Federal program for the siting, development construction, and operation of facilities capable of safely storing high-level radioactive waste and spent nuclear fuel, which facilities are to be licensed by the Commission;

(B) a plan for the funding of the construction and operation of such facilities, which plan shall provide that the costs of such activities shall be borne by the generators and owners of the high-level radioactive waste and spent nuclear fuel to be stored in such facilities;

(C) site-specific designs, specifications, and cost estimates sufficient to (i) solicit bids for the construction of the first such facility; (ii) support congressional authorization of the construction of such facility; and (iii) enable completion and operation of

such facility as soon as practicable following congressional authorization of such facility; and

(D) a plan for integrating facilities constructed pursuant to this section with other storage and disposal facilities authorized in this Act.

(3) In formulating such proposal, the Secretary shall consult with the Commission and the Administrator, and shall submit their comments on such proposal to the Congress at the time such proposal is submitted.

(4) The proposal shall include, for the first such facility, at least three alternative sites and at least five alternative combinations of such proposed sites and facility designs consistent with the criteria of paragraph (b)(1). The Secretary shall recommend the combination among the alternatives that the Secretary deems preferable. The environmental assessment under subsection (c) shall include a full analysis of the relative advantages and disadvantages of all five such alternative combinations of proposed sites and proposed facility designs.

(c) ENVIRONMENTAL IMPACT STATEMENTS.—(1) Preparation and submission to the Congress of the proposal required in this section shall not require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)). The Secretary shall prepare, in accordance with regulations issued by the Secretary implementing such Act, an environmental assessment with respect to such proposal. Such environmental assessment shall be based upon available information regarding alternative technologies for the storage of spent nuclear fuel and high-level radioactive waste. The Secretary shall submit such environmental assessment to the Congress at the time such proposal is submitted.

(2) If the Congress by law, after review of the proposal submitted by the Secretary under subsection (b), specifically authorizes construction of a monitored retrievable storage facility, the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) shall apply with respect to construction of such facility, except that any environmental impact statement prepared with respect to such facility shall not be required to consider the need for such facility or any alternative to the design criteria for such facility set forth in subsection (b)(1).

(d) LICENSING.—Any facility authorized pursuant to this section shall be subject to licensing under section 202(3) of the Energy Reorganization Act of 1974 (42 U.S.C. 5842(3)). In reviewing the application filed by the Secretary for licensing of the first such facility, the Commission may not consider the need for such facility or any alternative to the design criteria for such facility set forth in subsection (b)(1).

(e) CLARIFICATION.—Nothing in this section limits the consideration of alternative facility designs consistent with the criteria of paragraph (b)(1) in any environmental impact statement, or in any licensing procedure of the Commission, with respect to any monitored, retrievable facility authorized pursuant to this section.

(f) IMPACT ASSISTANCE.—(1) Upon receipt by the Secretary of congressional authorization to construct a facility described in subsection (b), the Secretary shall commence making annual impact aid payments to appropriate units of general local government in order to mitigate any social or economic impacts resulting from the construction and subsequent operation of any such facility within the jurisdictional boundaries of any such unit.

(2) Payments made available to units of general local government under this subsection shall be—

(A) allocated in a fair and equitable manner, with priority given to units of general local government determined by the Secretary to be most severely affected; and

(B) utilized by units of general local government only for planning, construction, maintenance, and provision of public services related to the siting of such facility.

(3) Such payments shall be subject to such terms and conditions as the Secretary determines are necessary to ensure achievment of the purposes of this subsection. The Secretary shall issue such regulations as may be necessary to carry out the provisions of this subsection.

(4) Such payments shall be made available entirely from funds held in the Nuclear Waste Fund established in section 302(c) and shall be available only to the extent provided in advance in appropriation Act.

(5) The Secretary may consult with appropriate units of general local government in advance of commencement of construction of any such facility in an effort to determine the level of payments each such unit is eligible to receive under this subsection.

(g) LIMITATION.—No monitored retrievable storage facility developed pursuant to this section may be constructed in any State in which there is located any site approved for site characterization under section 112.

(h) PARTICIPATION OF STATES AND INDIAN TRIBES.—Any facility authorized pursuant to this section shall be subject to the provisions of section 115, 116(b), 116(d), 117 and 118. For purposes of carrying out the provisions of this subsection, any reference in sections 115 through 118 to a repository shall be considered to refer to a monitored retrievable storage facility.

(Purpose: To provide that the Secretary of Energy take title to high-level waste or spent fuel as expeditiously as practicable upon the request of the generator of such waste)

On page 133, strike lines 1 through 12 and insert in lieu thereof the following:

"(5) Contracts entered into under this section shall provide that—

(A) following commencement of operation of a repository, the Secretary shall take title to the high-level radioactive waste or spent nuclear fuel involved as expeditiously as practicable upon the request of the generator or owner of such waste or spent fuel; and

(B) in return for the payment of fees established by this section, the Secretary, beginning not later than January 31, 1998, will dispose of the high-level radioactive waste or spent nuclear fuel involved as provided in this subtitle.".

(Purpose: To clarify that interim storage may only be placed at Federal sites owned by the Government on the date of enactment of this act)

On page 75, line 24, strike "federal site", and insert in lieu thereof the following: "site owned by the federal government on the date of enactment of this Act;".

(Purpose: To conform the language of the substitute amendment to conform to the terminology employed throughout the House bill)

On page 70, line 19, strike the word "powerplant", and insert in lieu thereof the following: "reactor".

(Purpose: To correct cross-references contained in section 302(a)(4) of the bill)

On page 132, strike lines 5 through 25 and insert in lieu thereof the following:

"(4) Not later than one hundred and eighty days after the date of enactment of this Act, the Secretary shall establish procedures for the collection and payment of the fees established by paragraph (2) and paragraph (3). The Secretary shall annually review the amount of the fees established by paragraphs (2) and (3) above to evaluate whether collection of the fee will provide sufficient revenues to offset the costs as defined in subsection (d) herein. In the event the Secretary determines that either insufficient or excess revenues are being collected, in order to recover the costs incurred by the Federal Government that are specified in subsection (d), the Secretary shall propose an adjustment to the fee to insure full cost recovery. The Secretary shall immediately transmit this proposal for such an adjustment to Congress. The adjusted fee proposed by the Secretary shall be effective after a period of ninety days of continuous session have elapsed following the receipt of such transmittal unless during such ninety-day period either House of Congress adopts a resolution disapproving the Secretary's proposed adjustment in accordance with the procedures set forth for congressional review of an energy action under section 551 of the Energy Policy and Conservation Act.".

Mr. McCLURE. Mr. President, this amendment is intended to make it clear that if the Federal Government seeks to utilize repositories developed under this bill for disposal of high-level radioactive waste resulting from atomic energy defense activities, the Federal Government must pick up its pro rata share of the costs of developing, constructing, and operating such a repository. This provision, in addition, directs those funds to be placed into the waste fund account established under section 302 for this purpose.

The intent of this amendment is simple and straightforward: We are proposing to add a new section to this bill to make it clear that, with respect to transportation of spent nuclear fuel or high-level radioactive waste, nothing in this act is intended to affect existing Federal, State, or local laws. Thus, this bill is intended to have no affect with respect to the validity of those individual laws, by either affirming or negating such validity, nor is it intended to alter the legal relationship between Federal, State, or local laws regarding transportation of spent nuclear fuel or high-level radioactive waste, as determined under existing law or judicial precedent.

REPOSITORY SITE SELECTION

Mr. President, this amendment represents a compromise as to the nature of the selection of sites for a potential repository. The Senate bill provided that that Secretary of Energy recommend to the President for his approval, at least 3 sites for characterization by January 1, 1984. One of those would then be selected for recommendation as a repository. The Secretary

would then select at least three additional sites to recommend for site characterization for a second repository in January of 1987. One additional site would then be chosen for a second potential repository.

The House approach to this same process was to have the Secretary of Energy recommend to the President for his approval, at least five sites by July 1, 1984 and one additional site by February 1, 1985 for site characterization. From these six sites at least three would be characterized and from those three, one would be recommended as a potential repository.

In the Senate approach an environmental assessment was required before sinking shafts for site characterization. In the House version the environmental assessement was to accompany the recommendations to the President for site characterization.

The compromise approach embodied in this amendment is as follows. First, five sites would be nominated by the Secretary as sites to be considered for recommendation to the President for site characterization. Of those sites, three would actually be recommended by January 1, 1985, to the President for his approval for characterization. Off these sites characterized the Secretary would recommend one for the selection of the first repository. The Secretary would nominate at least three additional sites by July 1, 1989, leading to the recommendation of three candidate sites that the Secretary determines suitable for site characterization for selection of the second repository.

Under the compromise no drilling of preliminary boreholes would be permitted at a site before that site was selected by the Secretary for site characterization unless drilling was already underway on the date of enactment of this act. The drilling or preliminary boreholes could take place if the Secretary were to find that existing geologic information was not sufficient.

The compromise would also provide that an environmental assessment be done on each site at the time the Secretary nominated the site. The environmental assessment provided under the compromise is identical to that in the House passed bill. Among other things the assessment would provide that a reasonable comparative evaluation be made by the Secretary of the site which is subject of the assessment and other sites which have been nominated.

Mr. President, I believe this compromise represents a very workable and fair process for the evaluation of sites and I urge the adoption of the amendment.

Mr. President, this is simply a conforming change, to reflect the change we have made from an environmental impact statement back to an environmental assessment for sites recommended to the President. In section 112(f), the Secretary, in the substitute amendment, was directed to prepare an environmental impact statement for all sites for which a borehole had been approved by DOE by August 1, 1982. It is my understanding that the only site involved in this subsection is the Hanford site in Washington. Consistent with our earlier change back to environmental assessments for these sites, we have restored the language requiring an environmental assessment under this subsection, as well.

Mr. President, this amendment is a technical change resulting from an earlier amendment already offered. As you recall, the substitute amendment included a provision requiring the preparation of an environmental impact statement on each site recommended to the President by the Department of Energy for site characterization. We have restored the requirement adopted by both the House and the Senate that the Secretary only prepare an environmental assessment, rather than impact statement. This amendment is a conforming amendment, striking subsection 112(g) of the substitute amendment, wherein we had defined what must be included in such an impact statement.

Mr. President, this amendment provides that the Secretary, in promulgating guidelines for recommendation of sites for repositories, shall specify that no repository shall be built if the surface facility of any proposed repository would be located adjacent to a 1 square mile area with more than 1,000 individuals.

Mr. President, this amendment to section 114(a)(2)(A) is a technical amendment to restore a provision contained in the House bill, as originally passed, to the Senate substitute amendment. This provision, which was inadvertently deleted when the substitute amendment was submitted for printing, simply says that after the President, after recommending two sites for the construction of the first and second repositories, may at his discretion recommend additional sites for the construction of subsequent repositories. We have included this provision to make it clear that, although the President is not required to recommend any more than two sites for the construction of repositories, if the need arises, the President may recommend additional sites.

Mr. President, these two amendments are of a clarifying nature, to make it clear that the Secretary's preliminary determination that sites are suitable for development as repositories is to be made consistent with the Secretary's guidelines promulgated under section 112(a). Without the reference to the 112(a) guidelines, it was not clear what criteria the Secretary was to use in making this preliminary determination, and this amendment is intended to clarify that oversight.

Mr. President, this is yet another technical change required as a result of the earlier amendment requiring environmental assessments, rather than environmental impact statements, on sites recommended to the President for characterization. Now that we have made that change, it was necessary to include in the judicial review section, under the provision authorizing judicial review of environmental assessments, a reference to those prepared under 112(b)(1).

Mr. President, this amendment substitutes with only a few changes the version of the monitored retrievable storage provisions of the House reported bill. Monitored retrievable storage of spent fuel and high-level radioactive waste means the long-term isolation of fuel and waste in facilities that permit continuous monitoring, ready retrieval and periodic maintenance, as necessary, of the canisters containing the fuel or waste. Basically, MRS facilities would be used to isolate the fuel and waste without losing control of it.

Both the House and Senate nuclear waste policy bills contained provisions calling on the President to submit to Congress a proposal including designs and other site-specific information about a proposed MRS facility.

The compromise substitute described here was developed by the principal sponsors of the House and Senate bills.

This compromise substitute provides for a MRS proposal to Congress in June of 1985—2½ years after enactment of this act. The Senate would recede from its original position of a 1-year deadline, and the House would recede from its 5-year deadline.

The proposal to Congress must contain at least five alternative combinations of site and design and at least three alternative sites. Thus if one site is identified that accommodates two different MRS designs—for example, either the dry-well or tunnel-rack approaches already analyzed by DOE—then the requirements of the substitute would be satisfied if three other sites, each with its own preferred design, were also included in the proposal. Under this scenario, Congress would have four sites to review. Alternatively, DOE could comply with the requirements of the substitute by submitting five separate sites, each with its own site-specific design.

MRS facilities would be licensed by the Nuclear Regulatory Commission, and, under the compromise substitute, the licensing process would involve consideration of alternative sites, even though the Congress itself had selected a specific site. The substitute explicitly provides that alternative de-

signs for an MRS may always be considered.

Full State participation is provided for the MRS program in exactly the same way as it is provided in the case of repository sites.

Congress must act before any construction application could proceed. Congress would be free to reject, by failing to act, any of the recommendations DOE makes under the provisions of the substitute. Even if Congress does act, the Nuclear Regulatory Commission could decline to issue a license for the facility chosen pursuant to congressional action.

Mr. President, this amendment amends section 302(a)(5) of the substitute amendment to provide that the Secretary of Energy take title to high-level waste or spent nuclear fuel as expeditiously as practicable upon the request of the generator of such waste. In addition, this amendment directs the Secretary to begin, not later than January 31, 1998, to begin to dispose of the high-level radioactive waste or spent nuclear fuel from those generating such waste. Under the substitute amendment, there was some concern that, in directing the Secretary to take title to and dispose of such wastes no later than December 31, 1996, we might not be giving the Secretary enough flexibility to tailor his schedule for accepting such wastes to the availability of a repository. This amendment simply directs the Secretary to take title to such wastes as expeditiously as practicable, upon the request of the generator of those wastes, after commencement of repository operation.

Mr. President, this amendment restores language inadvertently deleted from the House-passed bill in section 135(a)(B), the subtitle dealing with interim storage. In preparing our substitute amendment, it was not our intent to delete this language, and this amendment would serve to restore the language deleted.

Mr. President, this is another technical change to conform the language of the substitute amendment to the terminology employed throughout the House bill. In section 132(5), where we had included the word "powerplant," we have replaced that reference with the appropriate terminology, "reactor."

Mr. President, this is another technical amendment correcting cross-references contained in section 302(a)(4) of the bill. Specifically, where that section referred to subsections (a) and (c), those references have been changed to the appropriate references, "paragraphs (2) and (3), respectively. For ease of reference, Mr. President, we have simply repeated the entire paragraph.

Mr. President, have the amendments en bloc been adopted?

The PRESIDING OFFICER. The question is on agreeing to the amendments en bloc of the Senator from Idaho.

The amendment (UP No. 1574) en bloc was agreed to.

Mr. McCLURE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. McCLURE. We now have pending the substitute which has been amended by the amendments en bloc and they will be treated as original text for the purpose of further amendment; is that correct?

The PRESIDING OFFICER. The Senator is correct.

UP AMENDMENT NO. 1575

Mr. McCLURE. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration on behalf of Senator WEICKER.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), for Senator WEICKER proposes an unprinted amendment numbered 1575.

Mr. McCLURE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 143, line 13, add a new section as follows:

"SEC. 306. NUCLEAR REGULATORY COMMISSION TRAINING AUTHORIZATION.—The Nuclear Regulatory Commission is authorized and directed to promulgate regulations, or other appropriate Commission regulatory guidance, for the training and qualifications of civilian nuclear powerplant operators, supervisors, technicians and other appropriate operating personnel. Such regulations or guidance shall establish simulator training requirements for applicants for civilian nuclear powerplant operation licenses and for operator requalification programs; requirements governing NRC administration of requalification examinations; requirements for operating tests at civilian nuclear powerplant simulators, and instructional requirements for civilian nuclear powerplant licensee personnel training programs. Such regulations or other regulatory guidance shall be promulgated by the Commission within the 12-month period following enactment of this Act, and the Commission within the 12-month period following enactment of this Act shall submit a report to Congress setting forth the actions the Commission has taken with respect to fulfilling its obligations under this Section."

In Section 1 amend the table of contents accordingly.

Mr. METZENBAUM. Mr. President, will the Senator from Idaho be good enough to explain what the amendment does?

Mr. McCLURE. The amendment provides that the Commission license provide for the operator training.

Mr. METZENBAUM. The operator training. Nothing further?

Mr. McCLURE. Nothing further.

Mr. WEICKER. Mr. President, I rise today to offer an amendment which speaks directly to one of the public's great concerns regarding our use of nuclear power. The simple fact is, Mr. President, that of our nuclear power and the ability of the nuclear industry to insure the safe operation of our nuclear powerplants.

To many people, nuclear power is a mysterious and threatening institution. Understandably, the accidental failure of Three Mile Island galvanized much of this concern. My amendment addresses these concerns by establishing authority in the Federal Government to insure that nuclear powerplants are operated safely and with reliability, or not operated at all.

My colleagues will recall, that, following the failure at Three Mile Island, the Kemeny Commission, as well as numerous other studies, observed that the lack of adequate nuclear powerplant operator training had played a very significant role in the inability to control that accident.

Mr. President, my amendment specifically responds to that deficiency. It does so by requiring that the Nuclear Regulatory Commission—within the next 12 months—proceed to develop firm regulations for the proper training and requalification of nuclear powerplant operators, supervisors, technicians, and other appropriate plant personnel. In addition, Mr. President, my amendment requires that the NRC begin an orderly program of training drills for nuclear powerplant personnel so that such personnel will be skilled in dealing with emergency situations.

Now, Mr. President, these are simple, but very necessary steps. My amendment merely instructs the NRC to get on with the job it set for itself following the incident at TMI: To provide more adequate safeguards for the operation of our nuclear powerplants.

I believe it is fair to say that the nuclear industry, through the Institute of Nuclear Power Operations (INPO) has done a conscientious job of attempting to come to grips with the need for greater operator training. But, as INPO itself observed in a summary of a recent nuclear industry survey, some 50 percent of the respondents plan substantial modification of their operator training programs. I believe, Mr. President, that finding argues very forcefully for the need to have the NRC immediately undertake the effort to establish firm regulations and guidelines for such training programs.

Moreover, Mr. President, the fact is that over the next 10 years the nuclear power industry will need to add or replace some 41,300 managers and technical and professional personnel; 29,900 or some 72 percent of these positions are technical positions and will

require high levels of training. I believe that it would be folly to enter this period of intensive recruitment without strict guidelines and regulations outlining how these personnel are to be trained.

Lastly, Mr. President, let me quote from a December 18, 1981, letter from J. Carson Mark—Mr. Mark is chairman of NRC's advisory committee on nuclear safeguards. In this letter to the Department of Energy, Mr. Mark specifically notes the shortcomings of relying only upon INPO or other existing institutions:

The current draft of the report states that the "Nation's academic and nonacademic institutions, outside the nuclear industry, have a large and expandable capability in place to provide training in nuclear fundamentals and to augment specific training by utilities." While this may be true, we believe that it is important to recognize that this capability, particularly in terms of graduate education in nuclear engineering and radiation protection, has been declining in recent years. There is no assurance that the necessary resources and students will be available to enable the existing training capability to be fully utilized. Similarly, we believe it is overly optimistic to state that the "Institute of Nuclear Power Operations (INPO) has outlined an overall plan for an industry-wide program to provide adequately trained personnel to perform operational and supervisory functions." While commendable, the INPO plan, unless modified, appears to us to be capable of providing only a portion of the total number of people that will be required. We believe the report should acknowledge these deficiencies as well as the need to correct them.

In summary, Mr. President, my amendment simply seeks to provide that the personnel running our nuclear powerplants receive adequate training. However, elegant or sophisticated our technologies, we are, in the end, a society of humans who must operate and control that technology. My amendment recognizes that reality. By itself, this amendment will not restore our nuclear power industry to any measure of public confidence in that industry. Until we address this issue, the issue of industry's health is and will remain moot.

Mr. President, I understand both sides have agreed to accept the amendment.

I simply wish to outline its intent for the benefit of other Members.

The amendment requires that the Nuclear Regulatory Commission in 12 months, following passage of the bill, proceed to establish clear regulations and guidelines for training of nuclear powerplant operators and other technical personnel.

Mr. McCLURE. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho.

The amendment (UP No. 1575) was agreed to.

UP AMENDMENT NO. 1576

Mr. McCLURE. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration on behalf of Senator MITCHELL.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) for Senator MITCHELL proposes unprinted amendment numbered 1576.

Mr. McCLURE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of section 134(b) of the bill add the following new paragraph:

(4) The provisions of this section shall not apply to the first application for a license or license amendment received by the Commission to expand on-site spent fuel storage capacity by the use of a new technology not previously approved for use at any nuclear powerplant by the Commission.

Mr. METZENBAUM. Mr. President, will the Senator tell us what this amendment does?

Mr. McCLURE. Mr. President, the amendment in effect says that new technologies cannot be the subject of hybrid hearings. They must have separate hearings based upon the new technology, full-blown hearings in NRC.

Mr. METZENBAUM. I have no objection.

Mr. MITCHELL. Mr. President, my amendment would prohibit the use of an abbreviated hearing in the case of an application to the Nuclear Regulatory Commission which proposes the use of a new technology to increase onsite storage capacity.

Section 134 of the McClure substitute amendment to H.R. 3809 provides for an abbreviated, legislative-type hearing to precede the normal full adjudicatory hearing. The purpose of the abbreviated hearing is to speed up the licensing of onsite storage expansion. A full hearing would only be necessary if it were determined that a "genuine and substantial dispute of fact" exists; that such a dispute could be resolved in a full adjudicatory hearing; and that the decision of the Commission is likely to depend in whole or in part on the resolution of the dispute. These criteria by which the Commission may decide that a full adjudicatory hearing is necessary are extremely narrow.

As a member of the Senate Nuclear Regulation Subcommittee, I have opposed efforts by the Reagan administration and the nuclear industry to accelerate the licensing process at the expense of safety regulations and public involvement in the licensing process.

The abbreviated hearing procedure represents another attempt to speed up licensing at the expense of the full NRC public hearing process. For that reason I am opposed to the abbreviated hearing procedure in general. In its attempt to hasten final NRC action, the abbreviated hearing may only result in great harm to the integrity of the licensing process and in a serious restriction on the rights of ordinary citizens to participate in that process.

In response to questions on this subject put to him by the Environment Committee in November 1981, then NRC Commissioner Peter Bradford stated:

I do not favor modified hearing procedures. . . . Adjudicatory hearings, which the NRC currently uses for all contested power plant licensing issues, are a better way to get an accurate assessment of complex factual issues. If they are run effectively, they will not take significantly longer than informal hearings, but they will be a much more reliable decisionmaking tool. They are more reliable because they permit direct confrontation between the views of different parties under circumstances that allow each party a maximum of opportunity to probe the assumptions and the weaknesses of the other's position. Informal hearings, by contrast, allow the parties to make statements that contain untested allegations and assumptions and that need not face cross-examination. Within limits, this favors the witnesses who are most careless with the truth. In any clash of statements the chances of the fallacious ones prevailing, especially if they are sufficiently financed to be repeated by several witnesses, improve in direct proportion to the informality of the proceeding. As one of the officials who must pass judgment based on the records that will be built at these hearings, I ask you in the strongest terms not to change the current adjudicatory format.

Given my serious reservations with the abbreviated hearing concept, I am particularly concerned that this process not occur when an application before the NRC proposes the use of a new technology.

The abbreviated hearing is, after all, a totally new procedure to be incorporated into the NRC licensing process. As Commissioner Gilinsky has warned, "The Commission has not had any experience in conducting hearings pursuant to this procedure."

The purpose of my amendment is to prevent the use of a new and untested hearing procedure in the case of an application which proposes the use of a new and untested technology. We should not allow two virtual experiments to occur simultaneously when both directly relate to critical issues involving nuclear safety and public participation.

Let me say in closing that the objectives of the NRC licensing process must place safety and citizen involvement before development or hurried onsite storage expansion, not the other way around. Safety and the public's right to know about nuclear power must take precedence.

It is my view that public participation in nuclear safety issues enhances

the NRC licensing process. In the State of Maine, both the State and Sensible Maine Power have been permitted to intervene in Maine Yankee's petition for a license to use a new technology for expanded onsite storage capacity. The technology proposed for use at Maine Yankee is pin compaction, a technology never before approved for use in any nuclear powerplant in the country.

Public scrutiny will help make certain that this new technology is measured against the imperative health and safety concerns that all citizens legitimately have about the operation of nuclear powerplants.

My amendment goes a significant step in this direction. The amendment will insure that, at the critical juncture an application to use a new technology for onsite storage expansion is before the NRC, the most reliable and comprehensive hearing procedure will be used.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho.

The amendment (UP No. 1576) was agreed to.

UP AMENDMENT NO. 1577

(Purpose: To improve the process for State participation in decisions relating to interim storage facilities)

Mr. McCLURE. Mr. President, I send to the desk four amendments on behalf of Senator THURMOND and ask that they be considered en bloc.

The PRESIDING OFFICER. The amendments will be stated.

The Legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), proposes an unprinted amendment on behalf of Mr. THURMOND'S unprinted amendment numbered 1577.

Mr. McCLURE. Mr. President, I ask unanimous consent that reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

Strike section 135(d) and insert in lieu thereof the following:

(d) REVIEW OF SITES AND STATE PARTICIPATION.—(1) In carrying out the provisions of this subtitle with regard to any interim storage of spent fuel from civilian nuclear power reactors which the Secretary is authorized by section 135 to provide, the Secretary shall, as soon as practicable, notify, in writing, the Governor and the State legislature of any State and the Tribal Council of any affected Indian tribe in such State in which is located a potentially acceptable site or facility for such interim storage of spent fuel of his intention to investigate that site or facility.

(2) During the course of investigation of such site or facility, the Secretary shall keep the Governor, State legislature, and affected Tribal Council currently informed of the progress of the work, and results of the investigation. At the time of selection by the Secretary of any site or existing facility, but prior to undertaking any site-specific work or alterations, the Secretary shall promptly notify the Governor, the legislature, and any affected Tribal Council in writing of such selection, and subject to the provisions of paragraph (6) of this subsection, shall promptly enter into negotiations with such State and affected Tribal Council to establish a cooperative agreement under which such State and Council shall have the right to participate in a process of consultation and cooperation, based on public health and safety and environmental concerns, in all stages of the planning, development, modification, expansion, operation, and closure of storage capacity at a site or facility within such State for the interim storage of spent fuel from civilian nuclear power reactors. Public participation in the negotiation of such an agreement shall be provided for and encouraged by the Secretary, the State, and the affected Tribal Council. The Secretary, in cooperation with the States and Indian tribes, shall develop and publish minimum guidelines for public participation in such negotiations, but the adequacy of such guidelines or any failure to comply with such guidelines shall not be a basis for judicial review.

(3) The cooperative agreement shall include, but need not be limited to, the sharing in accordance with applicable law of all technical and licensing information, the utilization of available expertise, the facilitating of permitting procedures, joint project review, and the formulation of joint surveillance and monitoring arrangements to carry out applicable Federal and State laws. The cooperative agreement also shall include a detailed plan or schedule of milestones, decision points and opportunities for State or eligible Tribal Council review and objection. Such cooperative agreement shall provide procedures for negotiating and resolving objections of the State and affected Tribal Council in any stage of planning, development, modification, expansion, operation, or closure of storage capacity at a site or facility within such State. The terms of any cooperative agreement shall not affect the authority of the Nuclear Regulatory Commission under existing law.

(4) For the purpose of this subsection, "process of consultation and cooperation" means a methodology by which the Secretary (A) keeps the State and eligible Tribal Council fully and currently informed about the aspects of the project related to any potential impact on the public health and safety and environment; (B) solicits, receives, and evaluates concerns and objections of such State and Council with regard to such aspects of the project on an ongoing basis; and (C) works diligently and cooperatively to resolve, through arbitration or other appropriate mechanisms, such concerns and objections. The process of consultation and cooperation shall not include the grant of a right to any State or Tribal Council to exercise an absolute veto of any aspect of the planning, development, modification, expansion, or operation of the project.

(5) The Secretary and the State and affected Tribal Council shall seek to conclude the agreement required by paragraph (2) as soon as practicable, but not later than one hundred and eighty days following the date of notification of the selection under paragraph (2). The Secretary shall periodically report to the Congress thereafter on the status of the agreements approved under paragraph (3). Any report to the Congress on the status of negotiations of such agreement by the Secretary shall be accompanied by comments solicited by the Secretary from the State and eligible Tribal Council.

(6)(A) Upon deciding to provide an aggregate of 300 or more metric tons of storage capacity under subsection (a)(1) at any one site, the Secretary shall notify the Governor and legislature of the State where such site is located, or the governing body of the Indian tribe in whose reservation such site is located, as the case may be, of such decision. During the 60-day period following receipt of notification by the Secretary of his decision to provide an aggregate of 300 or more metric tons of storage capacity at any one site, the Governor or legislature of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, as the case may be, may disapprove the provision of 300 or more metric tons of storage capacity at the site involved and submit to the Congress a notice of such disapproval. A notice of disapproval shall be considered to be submitted to the Congress on the date of the transmittal of such notice of disapproval to the Speaker of the House and the President pro tempore of the Senate. Such notice of disapproval shall be accompanied by a statement of reasons explaining why the provision of such storage capacity at such site was disapproved by such Governor or legislature or the governing body of such Indian tribe.

(B) Unless otherwise provided by State law, the Governor or legislature of each State shall have authority to submit a notice of disapproval to the Congress under subparagraph (A). In any case in which State law provides for submission of any such notice of disapproval by any other person or entity, any reference in this subtitle to the Governor or legislature of such State shall be considered to refer instead to such other person or entity.

(C) The authority of the Governor and legislature of each State under this paragraph shall not be applicable with respect to any site located on a reservation.

(D) If any notice of disapproval is submitted to the Congress under subparagraph (A), the proposed provision of 300 or more metric tons of storage capacity at the site involved shall be disapproved unless, during the first period of 90 calendar days of continuous session of the Congress following the date of the receipt by the Congress of such notice of disapproval, the Congress passes a resolution approving such proposed provision of storage capacity in accordance with the procedures established in this paragraph and subsections (d) through (f) of section 115 and such resolution thereafter becomes law. For purposes of this paragraph, the term "resolution" means a joint resolution of either House of the Congress, the matter after the resolving clause of which is as follows: "That there hereby is approved the provision of 300 or more metric tons of spent nuclear fuel storage capacity at the site located at , with respect to which a notice of disapproval was submitted by on .". The first blank space in such resolution shall be filled with the geographic location of the site involved; the second blank space in such resolution shall be filled with the designation of the State Governor and legislature or affected Indian tribe governing body submitting the notice of disapproval involved; and the last blank space in such resolution shall be filled with the date of submission of such notice of disapproval.

(E) For purposes of the consideration of any resolution described in subparagraph (D), each reference in subsections (d) and (e) of section 115 to a resolution of repository siting approval shall be considered to refer to the resolution described in such subparagraph.

(7) As used in this section, the term "affected Tribal Council" means the governing body of any Indian tribe within whose reservation boundaries there is located a potentially acceptable site for interim storage capacity of spent nuclear fuel from civilian nuclear power reactors, or within whose boundaries a site for such capacity is selected by the Secretary, or whose federally defined possessory or usage rights to other lands outside of the reservation's boundaries arising out of congressionally ratified treaties, as determined by the Secretary of the Interior pursuant to a petition filed with him by the appropriate governmental officials of such tribe, may be substantially and adversely affected by the establishment of any such storage capacity.

In subsection 136(d), sentence 16, strike the word "and". In subsection 136(d), after the line following sentence 16, strike the period and insert in lieu thereof a semicolon and the word "and".

In subsection 136(d), after the line following sentence 16, insert the following new material:

(5) impact assistance as described in subsection (e).

(e) IMPACT ASSISTANCE.—(1) Beginning the first fiscal year which commences after the date of the enactment of this Act, the Secretary shall make annual impact assistance payments to a State or appropriate unit of local government, or both, in order to mitigate social or economic impacts occasioned by the establishment and subsequent operation of any interim storage capacity within the jurisdictional boundaries of such government or governments and authorized under this subtitle: *Provided, however,* That such impact assistance payments shall not exceed (A) ten per centum of the costs incurred in paragraphs (1) and (2), or (B) $15 per kilogram of spent fuel, whichever is less;

(2) Payments made available to States and units of local government pursuant to this section shall be—

(A) allocated in a fair and equitable manner with a priority to those States or units of local government suffering the most severe impacts; and

(B) utilized by States or units of local governments only for (i) planning, (ii) construction and maintenance of public services, (iii) provision of public services related to the providing of such interim storage authorized under this title, and (iv) compensation for loss of taxable property equivalent to that if the storage had been provided under private ownership.

(3) Such payments shall be subject to such terms and conditions as the Secretary determines necessary to ensure that the purposes of this subsection shall be achieved. The Secretary shall issue such regulations as may be necessary to carry out the provisions of this subsection.

(4) Payments under this subsection shall be made available solely from the fees determined under subsection (a).

(5) The Secretary is authorized to consult with States and appropriate units of local government in advance of commencement of establishment of storage capacity authorized under this subtitle in an effort to determine the level of the payment such government would be eligible to receive pursuant to this subsection.

(6) As used in this subsection, the term "unit of local government" means a county, parish, township, municipality, and shall include a borough existing in the State of Alaska on the date of the enactment of this subsection, and any other unit of government below the State level which is a unit of general government as determined by the Secretary.

On page 81, line 3, strike all after the word "practicable" through the end of the page, and insert in lieu thereof the following: , but in any event not later than three years following the date on which a repository or monitored retrievable storage facility developed under this Act is available for disposal of such spent suclear fuel.

In section 135(a)(2), insert at the end thereof the following: "The restriction in the preceding sentence shall only apply until such time as the Secretary decides that such candidate site is no longer a candidate site under consideration for development as a repository."

Mr. McCLURE. Mr. President, the Thurmond amendments regard State participation.

The second of the four amendments involves impact assistance. The third refers to the time limit on AFR storage. And the fourth refers to the availability of storage site for AFR storage.

All four of these amendments en bloc have been distributed to most of the principals who are involved. If any Member wants further explanation I will be glad to make further explanation of them.

Mr. METZENBAUM. What does it do with impact assistance?

Mr. McCLURE. It provides for payments to State and local governments to mitigate any adverse social or economic impact of hosting interim storage.

Mr. METZENBAUM. What was the second one?

Mr. McCLURE. That was the second one of the four

Mr. METZENBAUM. The first one was what?

Mr. McCLURE. The first is State participation and adds language to the House provisions, providing for cooperative agreement between Federal Government and potential host State, and outlining the State participation and decisionmaking on the AFR storage. It applies even if the State loses on the two House override, and it applies to any amount of fuel even less than 300 metric tons and expands the guarantees for State participation in the process.

Mr. METZENBAUM. Will the Senator indicate whether any of the amendments have been considered by the committee? Are these or any other amendments that are up for consideration at the moment?

Mr. McCLURE. I think it would be fair to say that the issues have been discussed in the committee, in the committee hearings, and the issues have been discussed at varying times with members of the other people who are involved in this discussion.

Mr. METZENBAUM. All right.

STATE PARTICIPATION AMENDMENT TO H.R. 3809, THE NATIONAL NUCLEAR WASTE POLICY ACT

Mr. THURMOND. Mr. President, this amendment will provide governing officials and tribal entities of those States which may be considered as host States for temporary, away-from-reactor (AFR) storage facilities with a more effective role in the decisionmaking process regarding such facilities.

The amendment essentially combines the State participation provisions of the Senate bill, which I inserted by floor amendment to S. 1662 during Senate debate on that bill, with the State veto and two-House override provisions in the House bill. The latter procedures apply to any decision to locate 300 or more tons of spent nuclear fuel at a Federal away-from-reactor site.

Under my proposal, a decision by the Secretary of Energy to provide any amount of interim spent fuel storage will trigger the State participation provisions, under which the Secretary is to negotiate a formal cooperative agreement with the State(s)—or eligible Indian tribe—in which an AFR is to be located. The agreement must include a detailed plan of decision points and opportunities for State review and objection, as well as procedures for negotiating and resolving State objections at any stage in the process.

Similar to the House bill, however, only if the Secretary of Energy decides to provide capacity for 300 or more tons of fuel storage will there be opportunity for an absolute State veto of the Federal AFR siting decision. In the event of such a siting decision and subsequent State veto, the objections of the State would stand unless both Houses of Congress pass a resolution overriding the veto. It is the intent of the author of this amendment that the process of close consultation with State officials under a formal cooperative agreement would continue to apply subsequent to any congressional override of a State veto.

Mr. President, this amendment has been discussed with the managers of the bill, and I understand they are willing to accept it.

IMPACT ASSISTANCE TO AREAS WHERE AN AFR MAY BE SITED

Mr. President, the Senate committee substitute to the House nuclear waste bill provides for impact assistance to States and localities in which monitored retrievable storage facilities and geologic repositories are located. However, the legislation does not provide such assistance to States and localities in which interim, away-from-reactor storage facilities may be located. This is a serious omission, one that should be corrected before any legislation, such as that presently before us, is passed. It simply makes sense that, if such impact assistance is necessary for the longer termed storage facilities and repositories, it also may be necessary to assist States and localities with costs incurred because of the operation of AFR facilities.

This amendment corrects this omission and provides that impact assistance be made available to States and localities which host an AFR facility. Under this amendment, the cost of such impact assistance is to be borne by the utility company users, is to be included in the determination of the interim storage fee, and is to be paid out of the interim storage fund. This is consistent with the other provisions in the bill governing payment of costs by commercial users of the various types of spent fuel storage facilities.

Mr. President, I hope the managers of the bill will accept this amendment, which is similar to the amendment offered and accepted when the Senate passed its version of the nuclear waste bill earlier this year.

REQUIRING THAT ALL SPENT FUEL BE REMOVED FROM AN INTERIM STORAGE FACILITY WITHIN 3 YEARS AFTER THE AVAILABILITY OF A REPOSITORY OR MONITORED RETRIEVABLE STORAGE FACILITY

Mr. President, this amendment simply requires that all spent nuclear fuel be removed from an interim storage facility within 3 years following the date on which a longer term monitored retrievable storage facility or a permanent repository is available.

I believe this definite time limitation further tightens the language in the House bill and the Senate committee substitute. It gives additional assurance that any Federal interim storage program will be temporary in nature and that any spent fuel stored in such a facility will be expeditiously removed once a longer term storage facility is in place.

During Senate consideration of S. 1662, the bill managers accepted an amendment I authored to put a 12-year time limit on the duration of any interim storage facility. I continue to believe that a specific, tight time limit is appropriate and consistent with the objectives in this legislation of providing a limited, last resort, interim spent fuel storage program. However, I understand the concerns voiced since acceptance of my original amendment that the time frame imposed by it might be impractical and could conceivably leave the Federal Government without any authority or means of storing spent fuel which it might have acquired, in the event an MRS or permanent repository is not available. Accordingly, I have modified my proposal to tie removal of spent nuclear fuel from an interim storage facility to the availability of a longer term storage facility or permanent repository.

My distinguished colleague from South Carolina, Senator HOLLINGS, joins me in offering this amendment, which I believe is acceptable to the managers of the bill.

LOCATING AN INTERIM STORAGE FACILITY AT A PERMANENT REPOSITORY SITE

Mr. President, this amendment simply clarifies the language in the committee substitute to the House nuclear waste bill which would eliminate from consideration as an interim, away-from-reactor waste storage site any site which is a candidate for a permanent repository.

The apparent intent of this provision is to assure the citizens in an area surrounding a potential waste repository that they need not be concerned about the additional possibility of an interim, AFR facility on that site. In other words, one type of nuclear waste facility will be considered to preclude the other.

Although there is considerable logic, from an engineering and economic standpoint, to the idea of locating an AFR at the site of a final repository, I can understand the concerns of those in potential repository sites who feel it is an unfair burden to ask them to shoulder both an interim and a permanent waste facility. I do feel, however, that once a potential repository site has been ruled out of consideration for a repository, it should thereafter no longer be automatically excluded from consideration as an AFR, if indeed there is a need for a Federal interim storage facility at that time. This amendment will accomplish that purpose.

Mr. HOLLINGS. Mr. President, I rise in support of the amendment of the senior Senator from South Carolina and am pleased to indicate that I am a cosponsor of this amendment.

Mr. President, if the need for an away-from-reactor storage facility is ever required, I would hope that every effort would be made to insure the participation of the concerned State both before and after the site selection has been made, and both before and after the State has used its veto prerogative concerning the siting of the facility. To that end, this amendment would broaden the State cooperation and consultation requirements of the bill and insure that at no point in the process would State participation be diluted.

Mr. President, the senior Senator from South Carolina and I have long been sensitive to the issue of States rights. One might argue that this is the result of our Southern heritage. However, it also might be because we have long recognized the need for Federal-State cooperation if issues of national importance are ever to be resolved. I prefer to think the latter is the reason and that the amendment being offered on behalf of the senior Senator from South Carolina and myself helps to make this a better bill.

Mr. President, I would hope that the managers of the bill would be willing to accept this amendment and to insure the participation of State government in this issue of importance to the entire Nation.

INTERIM STORAGE AT A REPOSITORY SITE NUCLEAR WASTE BILL

Basically, this amendment intends to reaffirm a basic contention of this bill, that all States should be considered equally as candidates for the siting of any of the facilities authorized in this bill.

With this principle in mind, I would argue that when a site being considered as a possible repository site is eliminated from that status, it be eligible as an away-from-reactor site.

I would also like to reiterate, I still assume that the need for an AFR is hightly improbable as a result of the needs test established in the bill. Yet, I feel that this provisions should be included to maintain the necessary equity established in this legislation.

In addition, I think it only appropriate that any repository site be considered as a possible site for storage of less than 300 metric tons of spent nuclear fuel. I would argue that such sites would be most appropriate for the storage of spent fuel in dry casks if the need ever should surface. However, as noted above, I still feel that an AFR is a last resort and a very unlikely occurrence.

LOCAL IMPACT ASSISTANCE NUCLEAR WASTE BILL

Mr. President, if the need for an away-for-reactor facility should ever be required, it is important that the involved State and local units of governments be assisted in planning for such a facility. To that end, I am supportive of this amendment and feel that its inclusion in H.R. 3809 will strengthen the away-from-reactor storage provisions of this bill.

Mr. President, a similar provision was included in the original Senate-version of the Nuclear Waste Management bill and I ask that you support the inclusion of this language in the version now being considered since it represents an important procedural safeguard for any community that could be selected as an away-from-reactor site.

DEFINITE TIME LIMITATIONS ON AN AFR NUCLEAR WASTE BILL

Mr. President, as my colleague indicated, the original Senate-passed nuclear waste bill, S. 1662, included a provision that limited utilization of an AFR for a minimum of 8 years and a maximum of 12 years. The purpose of that language, simply put, was to insure the construction of a permanent repository.

Mr. President, I need not repeat my story about the Savannah River facility and the fact that what was temporary has slowly become a fixture to the South Carolina landscape. Yet, I think it is important that a safeguard be included in this legislation that will insure the construction of a permanent repository and not let history repeat the Savannah River experience.

To that end, I support inclusion of this amendment in the bill that would limit the use of the AFR facility once a permanent respository or monitored retrievable storage facility has been constructed. Based on the information that I received, a 3-year grace period after either facility is operational should be more than enough to phase out any existing AFR and to provide for the safe and secure transport of spent fuel from the AFR site to either an MRS or permanent repository.

Mr. President, I hope that the managers of the bill would be willing to support this amendment that I feel will improve the bill and insure the construction of a permanent repository within a reasonable time frame.

Mr. McCLURE. Madam President, I move adoption of the amendments en bloc.

The PRESIDING OFFICER (Mrs. KASSEBAUM). The question is on agreeing to the amendments en bloc.

The amendment (UP No. 1577) en bloc was agreed to.

UP AMENDMENT NO. 1578

(Purpose: To provide technical assistance to non-nuclear weapon states in the field of spent fuel storage and disposal)

Mr. McCLURE. Madam President, I send to the desk an unprinted amendment on behalf of Senator GLENN and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), for Senator GLENN proposes an unprinted amendment numbered 1578.

Mr. McCLURE. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 125, following section 222, add a new section 223 as follows:

TECHNICAL ASSISTANCE TO NON-NUCLEAR WEAPON STATES IN THE FIELD OF SPENT FULE STORAGE AND DISPOSAL

SEC. 223. (a) It shall be the policy of the United States to cooperate with and provide technical assistance to non-nuclear weapon states in the field of spent fuel storage and disposal.

(b)(1) Within ninety days of enactment of this Act, the Secretary and the Commission shall publish a joint notice in the Federal Register stating that the United States is prepared to cooperate with and provide technical assistance to non-nuclear weapon states in the fields of at-reactor spent fuel storage; away-from-reactor spent fuel storage; monitored, retrievable spent fuel storage; geologic disposal of spend fuel; and the health, safety, and environmental regulation of such activities. The notice shall summarize the resources that can be made available for international cooperation and assistance in these fields through existing programs of the Department and the Commission, including the availability of: (i) data from past or on-going research and development projects; (ii) consultations with expert Department or Commission personnel or contractors; and (iii) liaison with private business entities and organizations working in these fields.

(2) The joint notice described in the preceding subparagraph shall be updated and reissued annually for five succeeding years.

(c) Following publication of the annual joint notice referred to in paragraph (2), the Secretary of State shall inform the governments of non-nuclear weapon states and, as feasible, the organizations operating nuclear powerplants in such states, that the United States is prepared to cooperate with and provide technical assistance to non-nuclear weapon states in the fields of spent fuel storage and disposal, as set forth in the joint notice. The Secretary of State shall also solicit expressions of interest from non-nuclear weapon state governments and non-nuclear weapon state nuclear power reactor operators concerning their participation in expanded United States cooperation and technical assistance programs in these fields. The Secretary of State shall transmit any such expressions of interest to the Department and the Commission.

(d) With his budget presentation materials for the Department and the Commission for fiscal years 1984 through 1989, the President shall include funding requests for an expanded program of cooperation and technical assistance with non-nuclear weapon states in the fields of spent fuel storage and disposal as appropriate in light of expressions of interest in such cooperation and assistance on the part of non-nuclear weapon state governments and non-nuclear weapon state nuclear power reactor operators.

(e) For the purposes of this subsection, the term "non-nuclear weapon state" shall have the same meaning as that set forth in article IX of the Treaty on the Non-Proliferation of Nuclear Weapons (21 U.S.C. 438).

(f) Nothing in this subsection shall authorize the Department or the Commission to take any action not authorized under existing law.

Mr. McCLURE. Madam President, this amendment merges into this bill an amendment provision previously adopted by the Senate with respect to U.S. assistance to foreign governments to study the problem of storage.

Mr. GLENN. Madam President, I am reintroducing today an amendment to the Nuclear Waste Policy Act, H.R. 3809 that was originally included in the Senate version of the bill, S. 1662. The amendment provides for increased U.S. cooperation with and technical assistance for nonnuclear weapon states in the field of spent nuclear fuel storage and disposal. I believe such cooperation and assistance can substantially enhance our efforts to curb the spread of nuclear weapons by offering alternatives to reprocessing the chemical process by which nuclear weapons-usable plutonium is separated from spent fuel. The United States, in the Nuclear Non-Proliferation Act and in numerous related initiatives, has long recognized the dangerous potential for increased proliferation inherent in the separation and stockpiling of plutonium. Even where this material is subject to international inspections, it would be possible for a government during a national crisis to seize this material and manufacture nuclear weapons in a matter of weeks, if not days, if the nonnuclear components for these weapons had been fabricated in advance. Moreover, the international inspection regime—known as safeguards—has, itself, been recognized as woefully inadequate by the Nuclear Regulatory Commission and others when applied to reprocessing plants and plutonium fabricating facilities, leaving open the serious possibility that a nation with such plants might surreptitiously divert plutonium from peaceful purposes to weapons, without the need for overt seizure of the material.

For many years it was assumed that spent fuel from nuclear power reactors would be reprocessed and the resulting plutonium reused as reactor fuel, either in the current generation of reactors, or in future breeder reactors. As the proliferation risks inherent in this course of action became more apparent, however, the United States under Presidents Ford and Carter, along with many other nations, began to reexamine the need for reprocessing and to consider the alternative of longer term storage of spent fuel. Reduced projections for nuclear power growth worldwide and sharply increased estimates of uranium availability have also called into doubt the need for early use of plutonium fuels on economic grounds. As a result of these factors, the question of the need for and timing of reprocessing of power reactor fuel remains unresolved in the vast majority of nuclear-power-using nations, including our own.

The Nuclear Waste Policy Act does not directly address this matter, but provides for a long-range nuclear waste disposal program that will accommodate both spent fuel and the wastes from reprocessing, should this option be selected in this Nation. In the meantime, the bill calls for spent fuel to be retained and managed in a variety of settings: At reactor sites, at interim away-from-reactor storage facilities, and, possibly at longer term "monitored retrievable storage" facilities. Technology for permanent disposal of spent fuel in geologic repositories will also be developed under the bill (in parallel with technology for disposal of high level waste) some in the relatively near term in conjunction with the mandated "test and evaluation facility." Plainly, the United States will soon become the world leader in spent fuel management technology at a time when increasing numbers of other nuclear-power-using nations will be confronting the choice of whether their spent fuel should be reprocessed. Given our own national security stake in curbing the spread of the nuclear weapons potential inherent in reprocessing and the accumulation of separated plutonium, the desirability of sharing our spent fuel management

technology with nonnuclear weapon states is obvious.

My amendment provides that as part of our broader nonproliferation program the policy of the United States will be to offer cooperation and technical assistance to nonnuclear weapon states in this broad field. No new funding would be required; rather cooperation and assistance would be provided through the resources already in place under existing Department of Energy and Nuclear Regulatory Commission programs. For example, data from past and ongoing research and development projects could be shared; DOE and NRC personnel working in this area could be made available for consultations and briefings; and joint demonstration projects could be set up with the costs shared with participating nonnuclear weapon state partners.

The availability of these resources would then be publicized in the Federal Register and by the Department of State in communications with potentially interested foreign governments and nuclear utilities. In future years, the program of cooperation and assistance could be expanded in response to expressions of interest from these foreign entities in accordance with Presidential budget submissions and subject to the normal authorization and appropriations processes. Existing DOE and NRC regulations would protect the confidentiality of all proprietary data, while officials of these agencies could provide informal liaison between interested foreign entities and private U.S. firms offering spent fuel management services or hardware.

While I consider my amendment to be a potentially important addition to our nonproliferation efforts, it is but a first step toward a far more significant initiative that I have long believed could serve as the focal point of our nonproliferation program, the International Nuclear Fuel Authority (INFA). The basic concept behind INFA was that nuclear importer member nations would receive guaranteed supplies of fresh uranium fuel—which cannot be used for nuclear weapons—and in return would turn their spent fuel, containing weapons usable plutonium, back to the Authority, where it would be stored under international auspices and inspections with further disposition made in accordance with agreements between INFA and supplier and recipient nations. Under this arrangement, the spent fuel could be removed from national control, providing significant protection against future misuse of the material. Although the outlines of INFA were included in the Nuclear Non-Proliferation Act with the requirement that the President promptly enter into discussion with other nations concerning establishment of the Authority, neither the Carter nor Reagan administrations have pursued this arrangement with the vigor it deserves. I remain committed to this alternative as a particularly promising nonproliferation tool.

With respect to my amendment, finally, let me make absolutely clear that all participation by foreign governments and nuclear utilities with the United States in the field of nuclear spent fuel storage and disposal would be entirely voluntary. Second, the assistance we would be providing would be for spent fuel storage or disposal in the country generating the fuel; the amendment is not an attempt to address the more controversial question of storing foreign spent fuel in the United States. Finally, my amendment does not impose any preconditions or export restrictions of any kind; any deferral of reprocessing activity which might result from U.S. cooperation and assistance would simply be the natural outgrowth of nonnuclear weapon states' voluntary decisions to place increased reliance on extended storage of spent fuel. In effect, my amendment is a declaration that it is in our national interest to assist other nations in managing their spent nuclear fuel and that, to the extent resources will permit, we stand ready to provide such assistance.

Mr. McCLURE. Madam President, if there be no further question, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho.

The amendment (UP No. 1578) was agreed to.

Mr. JOHNSTON. Madam President, I thank the distinguished Senator from Idaho for a marvelous job along with the other parties to this matter, Senator SIMPSON from Wyoming, Senator HART, and all the rest, Senator DOMENICI, Senator GORTON, Senator JACKSON, Senator STAFFORD, and all the others who worked so hard to finally put together a bill.

UP AMENDMENT NO. 1579

Mr. PROXMIRE. Madam President, I have an amendment I am sending to the desk on behalf of myself, Mr. GARN, Mr. KASTEN, Mr. BOSCHWITZ, Mr. LEVIN, Mr. COCHRAN, Mr. STENNIS, Mr. LEAHY, Mr. BUMPERS, Mr. RIEGLE, Mr. GLENN, Mr. JOHNSTON, and Mr. MITCHELL, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE), for himself and Mr. GARN, Mr. KASTEN, Mr. BOSCHWITZ, Mr. LEVIN, Mr. COCHRAN, Mr. STENNIS, Mr. LEAHY, Mr. BUMPERS, Mr. RIEGLE, Mr. GLENN, Mr. JOHNSTON, and Mr. MITCHELL proposes an unprinted amendment numbered 1579.

Mr. PROXMIRE. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike section 115, and insert in lieu thereof:

REVIEW OF REPOSITORY SITE SELECTION

SEC. 115. (a) DEFINITION.—For purposes of this section, the term "resolution of repository siting approval" means a joint resolution of the Congress, the matter after the resolving clause of which is as follows: "That there hereby is approved the site at ——— for a repository, with respect to which a notice of disapproval was submitted by ——— on ———.". The first blank space in such resolution shall be filled with the name of the geographic location of the proposed site of the repository to which such resolution pertains; the second blank space in such resolution shall be filled with the designation of the State Governor and legislature or Indian tribe governing body submitting the notice of disapproval to which such resolution pertains; and the last blank space in such resolution shall be filled with the date of such submission.

(b) STATE OR INDIAN TRIBE PETITIONS.—The designation of a site as suitable for application for a construction authorization for a repository shall be effective at the end of the 60-day period beginning on the date that the President recommends such site to the Congress under section 114, unless the Governor and legislature of the State in which such site is located, or the governing body of an Indian tribe on whose reservation such site is located, as the case may be, has submitted to the Congress a notice of disapproval under section 116 or 118. If any such notice of disapproval has been submitted, the designation of such site shall not be effective except as provided under subsection (c).

(c) CONGRESSIONAL REVIEW OF PETITIONS.—If any notice of disapproval of a repository site designation has been submitted to the Congress under section 116 or 118 after a recommendation for approval of such site has been made by the President under section 114, such site shall be disapproved unless, during the first period of 90 calendar days of continuous session of the Congress after the date of the receipt by the Congress of such notice of disapproval, the Congress passes a resolution of repository siting approval in according with this subsection approving such site, and such resolution thereafter becomes law.

(d) PROCEDURES APPLICABLE TO THE SENATE.—(1) The provisions of this subsection are enacted by the Congress—

(A) as an exercise of the rulemaking power of the Senate, and as such they are deemed a part of the rules of the Senate, but applicable only with respect to the procedure to be followed in the Senate in the case of resolutions of repository siting approval, and such provisions supersede other rules of the Senate only to the extent that they are inconsistent with such other rules; and

(B) with full recognition of the constitutional right of the Senate to change the rules (so far as relating to the procedure of the Senate) at any time, in the same manner and to the same extent as in the case of any other rule of the Senate.

(2)(A) Not later than the first day of session following the day on which any notice of disapproval of a repository site selection is submitted to the Congress under section 116 or 118, a resolution of repository siting

approval shall be introduced (by request) in the Senate by the chairman of the committee to which such notice of disapproval is referred, or by a Member or Members of the Senate designated by such chairman.

(B) Upon introduction, a resolution of repository siting approval shall be referred to the appropriate committee or committees of the Senate by the President of the Senate, and all such resolutions with respect to the same repository site shall be referred to the same committee or committees. Upon the expiration of 60 calendar days of continuous session after the introduction of the first resolution of repository siting approval with respect to any site, each committee to which such resolution was referred shall make its recommendations to the Senate.

(3) If any committee to which is referred a resolution of siting approval introduced under paragraph (2)(A), or, in the absence of such a resolution, any other resolution of siting approval introduced with respect to the site involved, has not reported such resolution at the end of 60 days of continuous session of Congress after introduction of such resolution, such committee shall be deemed to be discharged from further consideration of such resolution, and such resolution shall be placed on the appropriate calendar of the Senate.

(4)(A) When each committee to which a resolution of siting approval has been referred has reported, or has been deemed to be discharged from futher consideration of, a resolution described in paragraph (3), it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) for any Member of the Senate to move to proceed to the consideration of such resolution. Such motion shall be highly privileged and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which such motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of such resolution is agreed to, such resolution shall remain the unfinished business of the Senate until disposed of.

(B) Debate on a resolution of siting approval, and on all debatable motions and appeals in connection with such resolution, shall be limited to not more than 10 hours, which shall be divided equally between Members favoring and Members opposing such resolution. A motion further to limit debate shall be in order and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business, and a motion to recommit such resolution shall not be in order. A motion to reconsider the vote by which such resolution is agreed to or disagreed to shall not be in order.

(C) Immediately following the conclusion of the debate on a resolution of siting approval, and a single quorum call at the conclusion of such debate if requested in accordance with the rules of the Senate, the vote on final approval of such resolution shall occur.

(D) Appeals from the decisions of the Chair relating to the application of the rules of the Senate to the procedure relating to a resolution of siting approval shall be decided without debate.

(5) If the Senate receives from the House a resolution of repository siting approval with respect to any site, then the following procedure shall apply:

(A) The resolution of the House with respect to such site shall not be referred to a committee.

(B) With respect to the resolution of the Senate with respect to such site—

(i) the procedure with respect to that or other resolutions of the Senate with respect to such site shall be the same as if no resolution from the House with respect to such site had been received; but

(ii) on any vote on final passage of a resolution of the Senate with respect to such site, a resolution from the House with respect to such site where the text is identical shall be automatically substituted for the resolution of the Senate.

(e) PROCEDURES APPLICABLE TO THE HOUSE OF REPRESENTATIVES.—(1) The provisions of this section are enacted by the Congress—

(A) as an exercise of the rulemaking power of the House of Representatives, and as such they are deemed a part of the rules of the House, but applicable only with respect to the procedure to be followed in the House in the case of resolutions of repository siting approval, and such provisions supersede other rules of the House only to the extent that they are inconsistent with such other rules; and

(B) with full recognition of the constitutional right of the House to change the rules (so far as relating to the procedure of the House) at any time, in the same manner and to the same extent as in the case of any other rule of the House.

(2) Resolutions of repository siting approval shall, upon introduction, be immediately referred by the Speaker of the House to the appropriate committee or committees of the House. Any such resolution received from the Senate shall be held at the Speaker's table.

(3) Upon the expiration of 60 days of continuous session after the introduction of the first resolution of repository siting approval with respect to any site, each committee to which such resolution was referred shall be discharged from further consideration of such resolution, and such resolution shall be referred to the appropriate calendar, unless such resolution or an identical resolution was previously reported by each committee to which it was referred.

(4) It shall be in order for the Speaker to recognize a Member favoring a resolution to call up a resolution of repository siting approval after it has been on the appropriate calendar for 5 legislative days. When any such resolution is called up, the House shall proceed to its immediate consideration and the Speaker shall recognize the Member calling up such resolution and a Member opposed to such resolution for 2 hours of debate in the House, to be equally divided and controlled by such Members. When such time has expired, the previous question shall be considered as ordered on the resolution to adoption without intervening motion. No amendment to any such resolution shall be in order, nor shall it be in order to move to reconsider the vote by which such resolution is agreed to or disagreed to.

(5) If the House receives from the Senate a resolution of repository siting approval with respect to any site, then the following procedure shall apply:

(A) The resolution of the Senate with respect to such site shall not be referred to a committee.

(B) With respect to the resolution of the House with respect to such site—

(i) the procedure with respect to that or other resolutions of the House with respect to such site shall be the same as if no resolution from the Senate with respect to such site had been received; but

(ii) on any vote on final passage of a resolution of the House with respect to such site, a resolution from the Senate with respect to such site where the text is identical shall be automatically substituted for the resolution of the House.

(f) COMPUTATION OF DAYS.—For purposes of this section—

(1) continuity of session of Congress is broken only by an adjournment sine die; and

(2) the days on which either House is not in session because of an adjourment of more than 3 days to a day certain are excluded in the computation of the 90-day period referred to in subsection (c) and the 60-day period referred to in subsections (d) and (e).

(g) INFORMATION PROVIDED TO CONGRESS.—In considering any notice of disapproval submitted to the Congress under section 116 or 118, the Congress may obtain any comments of the Commission with respect to such notice of disapproval. The provision of such comments by the Commission shall not be construed as binding the Commission with respect to any licensing or authorization action concerning the repository involved.

Mr. PROXMIRE. Mr. President, my amendment would give States a greater role in decisions affecting siting of nuclear repositories. It would offer these States the same rights now provided to States which will be the sites of temporary away-from-reactor storage.

The States most likely to be potential respository hosts are united in their support for a strong State siting role.

I have received the following telegram from the Governor of New Mexico.

[Mailgram, Apr. 16, 1982]

Hon. WILLIAM PROXMIRE,
Senator Office Building,
Washington, D.C.

DEAR SENATOR THE HONORABLE WILLIAM PROXMIRE: As you are aware, our States are certainly under consideration for the siting of a high level nuclear waste repository. While we have a number of additional, individual concerns, we feel the following amendments will provide assurance that the site selection process will be undertaken in full cooperation with potentially impact States and with full consideration of appropriate siting criteria.

First, similar language incorporated in the companion legislation of the House of Representatives Interior and Insular Affairs Committee allowing a State to disapprove of a site with a requirement of a two-House override is essential. Under S. 1662, State disapproval has no effect unless one House of Congress passes a resolution disapproving the site. Under such a provision the decision to override State objection may be made by the executive branch and sustained through the inaction of Congress. We believe it is extremely important that the Nuclear Waste Policy Act require action on both Houses to override State disapproval. The burden of proof should rest with the U.S. Department of Energy to sustain such an override. Requiring Western States with numerically small delegations to provide the burden of proof is an overwhelming and unfair task.

Second, we urge your support for an amendment which should leave intact the existing process for environmental review under the National Environmental Policy Act (NEPA). The creation of special exemptions will do little to expedite the construction of a repository which cannot in any case be in operation much before the turn of the century. Exemption from the review requirements feeds the suspicion that the project cannot bear upon examination.

We believe that the inclusion of this provision in S. 1662 will result in a nuclear waste repository siting policy and frame work which will meet the needs of both the Nation and potentially impact States.

BRUCE KING,
Governor of New Mexico.
ROBERT LIST,
Governor of Nevada.
SCOTT M. MATHESON,
Governor of Utah.
JOHN SPELLMAN,
Governor of Washington.

Neither the Senate- nor the House-passed bills addresses this concern.

Madam President, my view of the proper role for States in siting decision is not far-fetched. In fact, it is the view of the Reagan administration. Here is what Dr. Shelby Brewer of DOE had to say about the need for the two-House, joint resolution process when he testified before the Senate Energy and Environment Committees 1 year ago.

Mr. MEYERS. Yes. We think the procedures outlined in the bill would help accelerate the licensing of new storage capacity or expansion.

Senator SIMPSON. Let me ask one more question so we may take a recess and return at 1:30 p.m. I certainly apologize for my tardiness this morning dealing with other matters in the committee.

Your testimony states the Department believes the passage of a joint resolution by the Congress should be required to sustain the objections of an affected State or Indian tribe to a proposed facility.

Why do you believe the passage of a joint resolution is a more appropriate procedure or requirement than what is set out in S. 1662 which is basically the same procedure passed by the House and Senate last year? That procedure provided that the State or Indian tribe objections would stand if supported by the passage by either House of a resolution supporting the State or tribe.

Dr. BREWER. Your bill, S. 1662, allows either House to sustain an objection. We basically feel it would be more democratic to have both Houses act on the matter.

Senator SIMPSON. The joint resolution also gives the President the opportunity to veto. What about that?

Dr. BREWER. Senator, I will have to answer for the record. I am sorry. I was not aware a joint resolution can be vetoed by the Executive.

Senator SIMPSON. That is all right. I am not interested in sharpshooting you. I am just interested in your comments. I would appreciate it if you would furnish that for the record.

Dr. BREWER. Yes sir.

[Subsequent to the hearings Dr. Brewer supplied the following:]

Title VII of S. 1662 addresses congressional review of State objections to the Secretary's decision to submit an application to construct a repository or retrievable monitored storage facility. As we understand section 701(f)(3), it provides for a one-house veto of the Secretary's decision. The Administration of every President since 1932 has expressed opposition on constitutional grounds to one-house veto provisions, finding that these provisions represent legislative action in a manner inconsistent with the legislative procedures prescribed by the Constitution and also that they constitute an unconstitutional encroachment on the President's power and duty to execute the law. In the event Congress desires to overturn Executive Branch actions taken under authority vested by law in the Executive, the remedy lies in new legislation which, under the Constitution, must be presented to the President before it may become effective. A joint resolution, which would be presented to the President for signature or veto, is a proper mechanism for Congress to use to revoke authority or alter Executive decisions—such as the site selection involved here—otherwise provided by law to the Executive Branch of government.

If the Administration thinks 2 House action is required that is good enough for me.

But they aren't the only ones to share this view. This position is shared by the National Governors Association, National Conference of State Legislators, and by the State Planning Council set up by President Carter to advise him on nuclear waste matters.

The position is also supported by the League of Women Voters, Sierra Club, Union of Concerned Scientists, Environmental Policy Center, Congresswatch and Friends of the Earth, as well as close to a majority of both the House and Senate.

Here is what one group, the National Governors Association had to say on the matter of two House override:

STATE PARTICIPATION

The National Governors' Association has long maintained that the states must play a primary role in decisions affecting nuclear waste facilities. We have used the terms "consultation and concurrence" and "cooperative federalism" to describe how that should happen. Our position is based on the principle that while no state may reasonably impede the national interest, federalism makes the states equal partners in pursuing that interest.

The NGA's original policy statement on waste management, adopted in 1977, insisted that states be given the absolute power to veto a project. Subsequently, the states have dropped that provision and in its place endorsed as process of extensive participation in siting and construction and a Congressional review if a state objects to DOE plans. The formula contained in the present version of S. 1662 approximates the policy recommended by the National Governors' Association. There is, however, one point of disagreement. The governors and the State Planning Council have recommended a procedure where both houses of Congress are required to support the Department of Energy's plan rather than one house voting with the state, as S. 1662 provides. The states feel that the burden of securing support in Congress should be on DOE rather than on the state and that if the Department has designed and implemented its program correctly, Congressional assent in both houses is not an unreasonable requirement. We are convinced that early and substantial involvement of state and local officials and the public will strengthen and accelerate the waste managment program by building public confidence and diminishing opportunities for obstructionism and litigation.

Why is two-House override necessary? The answer is simple—it is needed for insurance.

The Broyhill amendment, adopted by the House, as well as the Senate-passed provision, does not offer enough protection. Under their amendments, once the President chooses a site and the State objects. the objection means nothing unless one House of Congress votes to uphold a State's objection. This provision would pit one State against the 49 others, against DOE and against the President. Since a State would have to live with a repository forever it is outrageous that State objections are not given more weight.

Even worse, the Broyhill language, which is now a part of the House bill, may well be ruled unconstitutional in a case currently before the Supreme Court. In fact, as I am sure most Members know, one-House vetos have been ruled unconstitutional by Federal courts.

If we enact a nuclear waste bill with the langauge now contained in the House and Senate bill and one-House vetos are ruled unconstitutional, we would be left with an act with, no, that is right, no State role. Would you want your State to be stuck with dangerous, nuclear waste which remains radioactive for thousands of years and have nothing to say about it?

On January 29, 1982, the U.S. Court of Appeals for the District of Columbia Circuit in the case of Consumer Energy Council of America against Federal Energy Regulatory Commission unanimously held unconstitutional the one-House congressional veto. The court said that the one-House veto abridges the constitutional process for lawmaking contained in article I, section 7 and the doctrine of separation of powers. Under this case, even two-House may be unconstitutional unless it is drafted in the form of a joint resolution, the form of my amendment.

How would it work in the Senate? The State would send its notice of disapproval of a site to Congress. The first day of session following the day of receipt of the notice a resolution is introduced on the subject and referred to the proper committee. After 60 days of continuous session after the introduction of the resolution the committee or committees to which it is referred makes its recommendation to the Senate or is discharged. At that time it is in order for any Member of the Senate to move to proceed to the consideration of the resolution. The motion is highly privileged and not debatable. Debate on the resolution is limited to 10 hours equally divided between Members favoring and Members opposing. Procedural motions are se-

verely limited. The House has similar procedures for resolutions which originate there and there are further procedures for the House which receives the resolution. Once it has already been approved by the other body.

This is a straightforward procedure which adds insurance to the bill. It is moderate, widely supported and a necessary addition to any nuclear waste legislation.

Madam President, what this amendment does is after the President of the United States picked a disposal site within the State the State would send its notice of disapproval, if it does disapprove it, if it wants to stop it, sends a notice of disapproval to Congress the first day of session the receipt of it and it is referred to the appropriate committee. After 60 days of continuous session after introduction of the resolution the committees or committee to which it is referred makes the recommendation to the Senate or for its discharge.

(The following proceedings occurred later:)

Mr. STENNIS. Madam President, the remarks I make are made on the amendment offered by the Senator from Wisconsin. That is what I want to address, as I understand, the Senator from Idaho has offered for the RECORD, and it has been accepted, a statement of approval of the amendment.

Mr. McCLURE. Madam President, the Senator is correct. I have approved this amendment. As we know, the Senator has urged the adoption of this amendment earlier. It was not adopted earlier, but at this time I am happy to endorse it. I think we can make it work, and I think, as a matter of fact, it is greater protection for the States. I thank the Senator from Mississippi for his very, very great help in forging some of the compromises that were involved here. I know of his reservations with respect to the legislation, inspite of those promises, but he has been a very constructive participant in the discussion.

Mr. STENNIS. I thank the Senator for his remarks.

I want to especially thank him for his statecraft and real statesmanship which he has shown not only as chairman but that shown by the others, members of the committee and others still, who carry responsibility in this field.

Madam President, I want to take just a little time of the Senate, some time at least of the Senate, at this point, not having a long or elaborate speech. But the contents of this amendment, Madam President, making it necessary before final selection of one of the sites—we have to have sites of some kind for this storage—but nevertheless, the matter has to be in effect submitted back to Congress and has to be approved, in effect, by both Houses, the House of Representatives and the U.S. Senate before it can become final.

Ordinarily, I do not favor giving any one House a veto or legislation before or after the fact. But this is a matter of such far-reaching consequence, so highly important to every State and to our energy field of the future, that certainly it is a small concession for us to agree here that as in any other far-reaching policy or bill it ought to be expressly approved by both Houses. So this is not an act of favoritism that is being shown wherever this site may go but it is just an act of essential justice and right and a part of the American system.

Now, the Senator from Nevada (Mr. CANNON) offered an amendment along this line within less than a year ago, and it had a tremendous appeal then when this legislation had not moved as far forward as it has now. But the Cannon amendment got 40 votes.

The Senator from Mississippi (Mr. COCHRAN) and I strongly supported that position and worked on it and at that time contacted many of the membership. Now this shows the process again and the leadership and the committees decided to approve this proposal, and now I judge it will get an overwhelming vote. So I want to thank each Member who has worked on it and considered it, and think it is a great step forward.

Now, Madam President, I know time is short here and other matters have got to come up. I really, in spite of these matters in the measure that I do approve, I cannot give all-out support or give a vote for this bill now. But, as I have just said, I heartily favor these amendments, and I know some legislation in this field is going to be necessary, and I hope things can settle down now and we can move along here according to the policies set forth in the act.

Reserving the right, Madam President—others here want to speak—I do want to take some more time of the Senate before we finally dispose of this measure. I yield the floor.

I believe that the leaders will agree that this policy which will establish a program for managing, storing, and disposing of radioactive material for tens of thousands of years is cause for great concern. I know from personal experience that the people of Mississippi are greatly concerned that this policy might cause the development of one of the first nuclear waste repositories in a geological formation of salt which serves as the bedrock for the town of Richton, in Perry County, Miss. For this reason, I have urged that we adopt a policy which would demonstrate that we can safely dispose of this waste before placing radioactive material near populated permanent towns. I feel very strongly that the public level of fear will only be heightened by this program which this bill will establish.

It greatly concerns me because I believe our past approach to locating a site for a nuclear waste repository has seriously undermined public confidence, making the disposition of nuclear waste much more difficult, and Richton, Miss., is a good example. The Department of Energy went down there in 1976 and started punching holes in the ground right near the town, and running tests which excited a great deal of public interest. And then as things progressed, some officials of the Department of Energy were quoted in a popular magazine, and in many of the newspapers that the Richton salt dome was "number one." Now that is when the sparks started flying. I was visited by concerned officials of the county and the State and I went down there myself to look into the Department of Energy program. My investigation led me to question the Department of Energy's rationale for going into an established community like Richton, Miss., and tell the people that there was nothing to be afraid of, there was nothing to fear, that this was only a test, and if the Department of Energy were allowed to continue the work, everybody in the town would get rich. Or, as some said, "It would be equivalent to the second coming."

I consulted with the Secretary of Energy, and wrote the Chairman of the Nuclear Regulatory Commission, and urged them to pursue this nuclear waste program in areas that were uninhabited, or in technical communities where the inhabitants are accustomed to working with nuclear material, so that our scientists and technicians could demonstrate in a step-by-step manner that they indeed had the technology to safely handle and dipose of nuclear waste. It made sense to me that we could only develop public confidence with a carefully thought out, carefully executed, step-by-step approach to the development of a nuclear waste repository.

In this regard, I am pleased, Mr. President, that the committees of jurisdiction have agreed with my personal conclusion in their finding that public confidence must be substantially increased. I am pleased that the committees have recognized the flaws in past efforts which have destroyed public confidence. Therefore, I must call into question those portions of the substitute amendment which appear to detract from the important purpose of developing public confidence.

Mr. President, it seems incredible to me that the work in Mississippi has progressed to the point it has. With the number of possibilities that exist in barren, uninhabited areas and with the number of possibilities in areas which have long been established as

communities of nuclear workers, scientists, and technicians, that we would create by legislating a program which would allow the further exploration of large, populated areas before we have adequately demonstrated that we indeed have the know-how to safely dispose of this waste. As the chairman knows, I have urged that if we must permanently dispose of true nuclear waste and so-called spent nuclear fuel, which, parenthetically, it too valuable to permanently dispose, that it would be wiser in the long run to demonstrate that we can develop one repository before characterizing other sites. I know that there are some who say that we must have at least three big shafts in various areas of the country to achieve equity and satisfy the National Environmental Policy Act. Well, what we need to do is to proceed on passage of a law which makes sense. It makes no sense to drill deep, wide shafts and storage rooms all at once. I think we should proceed to drill one and finish that before we go to a second shaft.

We need to demonstrate, and build confidence. Therefore, I cannot accept the policy established by this bill. There is no evidence to support that this plan will allay the fears of the public and develop confidence.

Mr. President, I also think we need to discuss the need for the variety of facilities called for in this policy. As the chairman knows, this bill calls for a geologic permanent repository, a so-called "away from reactor interim storage facility," so-called "monitorable and retrievable" storage facility, and a test and evaluation facility. I trust the committee has thought this through carefully, but I believe the public is entitled to an explanation of the need for these facilities which now appear to be redundant. I believe it is important to futher explain where these faciltites will be located, or if this is not known, what the procedure will be for siting these facilities.

Mr. MITCHELL. Mr. President, I rise to support the amendment to increase the rights of States in the siting process for the geological repository.

Both the Senate bill and the House bill as amended provide that a State's objections to a proposed final repository will stand only if a single House of Congress votes to sustain those objections.

During Senate consideration of S. 1662, the Senate waste bill, I voted against an amendment that would have provided States with an absolute veto of a proposed repository site. Clearly, such a provision would guarantee 50 State vetos, while the dilemma of permanent waste storage would remain unresolved.

States rights in the siting of the repository is a difficult issue on which to gain a fair and workable solution. The ultimate solution should meet two objectives. First, the States much have a just say in the siting process and have available to them a just mechanism to object to the final siting decision. Second, the bill itself should not burden the process with dilatory or obstructionist provisions.

In my judgment, the Senate and House bills do not provide a fair solution for the States. The amendment, however, strikes what I believe is a reasonable and viable balance.

The amendment, which is similar to the original House language, would require that a State's objection would stand unless both Houses of Congress vote to override the objection.

The difference between the two provisions is, on the surface, a slim one. But the crucial difference centers on where the burden of proof lies once the State registers an objection. The Senate and House bills place the burden of proof on the State. The State would effectively be forced to convince one House to sustain its objections.

The amendment, on the other hand, would place the burden of proof where it belongs—with the Department of Energy. If DOE decides on a specific site on the basis of a number of considerations, it is only right that the Federal agency should bear the responsibility to convince both Houses of the Congress of the virtues of its decision.

As both bills are presently written, the Department of Energy could decide on specific site, but be in no way compelled to argue for that site before the Congress.

Mr. President, there is no issue of greater importance in this legislation than the rights of States and ordinary citizens to participate in the evaluation, siting, and licensing processes. At the heart of this public participation discussion is the ability of States to object to the proposed siting of a repository and to be insured of a fair process after such an objection is made. This amendment would guarantee that a State's objections is dealt with in a fair and comprehensive manner.

Mr. PROXMIRE. Madam President, I ask unanimous consent that Senator HATCH be added as a cosponsor.

The PRESIDING OFFICER. Without objections, it is so ordered.

The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment (UP No. 1579) was agreed to.

UP AMENDMENT NO. 1580

Mr. LEVIN. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Michigan (Mr. LEVIN) proposes an unprinted amendment numbered 1580: Amend subsection (g) of section 141, by deleting the last sentence thereof, and inserting in lieu thereof the following:

"The restriction in the preceding sentence shall only apply until such time as the Secretary decides that such candidate site is no longer a candidate site under consideration for development as a repository. Such restriction shall continue to apply to any site selected for construction as a repository.".

Mr. LEVIN. Madam President, this amendment amends the committee amendment No. 3 by striking the second sentence so that it will be possible for a State that has a monitored retrievable storage facility to be considered, nonetheless, for a permanent site. It also clarifies the intention of the first sentence of that subsection to indicate that a State will be ineligible for consideration as a site for a monitored retrievable storage facility only so long as that State is under consideration for a permanent site or has been selected for the construction of such a repository.

Mr. McCLURE. Madam President, will the Senator yield?

Mr. LEVIN. I would be happy to yield.

Mr. McCLURE. I would be happy to accept the amendment.

Mr. JOHNSTON. It is acceptable to the minority.

Mr. LEVIN. I thank my friends.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Michigan.

The amendment (UP No. 1580) was agreed to.

UP AMENDMENT NO. 1581

Mr. LEVIN. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Michigan (Mr. LEVIN) proposes an unprinted amendment numbered 1581: On page 38, line 13, following the words "2011 et seq.).", insert the following new sentence:

"Nothing in this Act shall be construed to amend or otherwise detract from the licensing requirements of the Nuclear Regulatory Commission as established in title II of the Energy Reorganization Act of 1974 (Public Law 93-438).".

Mr. LEVIN. Madam President, I want to discuss this amendment with my colleagues. It is my understanding that there is nothing in this act that is intended to restrict, or amend, or modify in any way the licensing requirements for the permanent repositories, including, but not limited to, findings of need.

Mr. McCLURE. Madam President, the Senator is correct. That is my understanding also.

Mr. GORTON. I understand that by adopting this amendment we are not in any way changing the requirements of the statute that the maximum capacity for one facility will be 70,000 metric tons and that the reasonable

prospect of reaching that capacity within approximately 12 years constitutes the need for a second facility.

Mr. McCLURE. The Senator is correct.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Michigan.

The amendment (UP No. 1581) was agreed to.

Mr. LEVIN. I thank Senator McCLURE and Senator JOHNSTON and numerous other Senators for their support of these amendments.

They are intended to assure that States must end up as disposal sites by elimination of other States that have more appropriate disposal sites.

I particularly thank Carla Kish of my staff for her excellent work on this bill and on these amendments.

Mr. DOMENICI. Madam President, I would like to thank the members of the Energy Committee and the Committee on Environment and Public Works for their work on this legislation for us. We have before us a compromise bill reached between Members of the House and Members of the Senate who have been working on this legislation for some time. As I have said in the past, I believe that one of the most difficult issues to come to grips with in putting together a program for the disposal of nuclear waste is an institutional issue, not a technical one. It is the issue of how States and affected Indian tribes would participate in this process. I am happy to see that the bill sent to us by the House contained many of the same principles in this regard as did the Senate bill.

The bill before us now contains some modifications of the House approach, modifications which I believe only make for better Federal, State, and tribal relationship. Let me explain briefly the program for State participation contained in this bill and its application to affected Indian tribes, as well. The bill provides for an early notification of those States or tribes which may have a potentially acceptable site for a repository. Once that notification has been made or at least when the Secretary makes a recommendation to the President for site characterization of a site, the State would be provided the opportunity to enter into a written agreement which would set the bounds for the future working relationship between the State or affected Indian tribe and the Federal Government. That agreement really sets the framework for a process, a process which is a continuous one and provides for a give and take with the Federal Government. The agreement will set out in writing just how the Federal Government will provide information to the State or affected Indian tribe and address issues relating to the public health and safety as well as social and economic impacts of any repository or monitored retrievable storage facility. The agreement would also provide an opportunity for the parties to resolve objections that a State or affected Indian tribe might have. It provides that this could be done through a process of negotiation or arbitration or any other appropriate mechanism.

Madam President, throughout this bill, in fact throughout the process of State or affected Indian tribe participation with the Federal Government, there are numerous opportunities for public comment and public hearings. It is my hope through this very open and comprehensive process that we will avoid arbitrary decisions by either party.

The bill before us also provides a provision for that eventuality where a State or affected Indian tribe would have outstanding objections that could only be resolved by the Congress. In that event, those objections and the comments of the Secretary of Energy would come before the Congress where the Congress could review those objections and determine whether or not the repository should be built. More specifically, if one House of the Congress were to concur with a State or affected tribe that a repository should not be built, then that repository would not be built. There has been considerable discussion as to whether this congressional mechansim is properly balanced. When the Senate considered S. 1662 the Senators here determined that it was the proper balance, the middle ground between an absolute veto and a two-House vote to override a State's objection. I believe that is truly the case. The mechanism in this bill provides that both the Federal Government and the States will behave in a responsible fashion. Neither will put forward arbitrary objections to the other's point of view.

On closing Madam President, I believe we have fashioned a good procedure here, a procedure which will provide for active State or affected Indian tribe participation, compensation for the full costs of the impacts of the construction of a repository both during site characterization and possible construction and operation, and ultimately for the opportunity of congressional review.

Mr. COCHRAN. Madam President, I want to commend the Senator from Idaho for the diligent work he has done in getting this bill to the floor and in the way he has managed it, although I still have very serious concern about the content of the reservation.

Can I ask the Senator from Idaho is there anything in this legislation that specifically limits any one State from selection as a repository site?

Mr. McCLURE. I would say there is nothing in this bill that would prohibit that. There is a restriction that is embodied in the language of the Senator from Mississippi—that both Senators from Mississippi had requested earlier—and that parallels the House action with respect to population density.

Mr. COCHRAN. Despite the excellent work of the distinguished Senator from Idaho, Mr. McCLURE, in obtaining concessions from the House to improve this bill, I continue to have serious reservations about the legislation.

I am worried that we will still have problems with this program as long as there is not in place an independent commission to administer the site selection and repository program. When the bill was before the Senate in April of this year, I urged the adoption of an amendment that would have created an institutional mechanism for managing the waste program. It was not approved, although agreement was reached on the need for a study of the idea.

The Office of Technology Assessment strongly advocates such a change in the administrative structure, and I am convinced we will need it. The Department of Energy and the Atomic Energy Commission have not provided American citizens with a sense of confidence in their ability to manage high-level radioactive waste safely or efficiently. To the contrary, people in my State have been alarmed and confused with piecemeal information and contradictions concerning timetables and Government intentions about geological investigations, eminent domain proceedings and siting decisions.

It is also a disappointment to me that no requirement is contained in the bill for a national site survey prior to the characterization of sites that have been identified during preliminary review of some locations.

Because of these and other deficiencies in the legislation, I cannot vote for it. Nonetheless, I have to say it is a much better bill than the one passed by the House.

Mr. McCLURE. Madam President, it is a great privilege and with a special pride that I join my colleagues on the Energy and Natural Resources Committee, the Environment and Public Works Committee, and the Armed Services Committee in bringing to the Senate H.R. 3809, the National Nuclear Waste Policy Act of 1981.

Shortly, the Senate will consider printed amendment No. 4983 in the nature of a substitute reflecting consultations with members of the Senate and Representatives of the House committees. I am most privileged to have proposed this amendment for myself and others.

I am pleased to say that the substitute we are presenting today represents the collective judgment of all the cosponsors representing themselves

and their respective committees on this side of the aisle and both sides of the Hill with regards to the appropriate and necessary nuclear waste policy for the United States. I believe that this action deserves special note in that these three committees have been working for the past three Congresses to fashion just such a consensus piece of legislation. Such legislation must deal with this most critical and serious national issue in the areas of both national energy policy and national environmental policy to assure the predictable and long-term viability of the nuclear power option for this Nation, and indeed for the free world.

I commend each of my colleagues with whom I have worked and all of those who have assisted and contributed to the efforts in reaching this action. Hopefully, the spirit of good faith, accommodation, and conciliation required to achieve the common goal represented by the totality of this substitute will engender a special spirit in the Senate, in the House, and in the administration to expedite and facilitate enactment finally of a comprehensive nuclear waste policy and program for America.

I would like to take this opportunity to review the provisions of the compromise text. I ask unanimous consent that there be printed in the RECORD at this point in my remarks a sumary of the major changes in the House passed bill that are being proposed in printed amendment No. 4983.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY

The following summary sets forth those major changes in the House-passed bill that are being proposed in printed amendment No. 4983. Technical and confirming changes are not discussed in this summary, but appear in the text of the attached draft. Except where noted in the text of the attached draft and the following summary, the language of the House-passed bill would be retained. The following changes are presented in the order that they appear in H.R. 3809.

I. HIGH-LEVEL RADIOACTIVE WASTE FROM ATOMIC ENERGY DEFENSE ACTIVITIES

If defense wastes are to be disposed of in a civilian repository, the federal government shall pay a pro rata share of the costs of developing, constructing, and operating this repository (no such provision in H.R. 3809).

II. SUBTITLE A—REPOSITORIES FOR DISPOSAL OF HIGH-LEVEL WASTE

DOE, in issuing its guidelines for the recommendation of sites for repositories, must first obtain the concurrence of the NRC (H.R. 3809 only requires consultation.

DOE guidelines must include provisions for disqualifying potential repository sites if they are located in highly populated areas. Specific reference in H.R. 3809 to 1000 individuals in a 1 square mile area adjacent to the surface facility of the repository has been deleted.

DOE and the President, in developing and selecting repository sites, are directed to consider the cost and impact of transportation of high-level waste and the advantages of regional distribution in the siting of repositories. (No similar provision in H.R. 3809.)

DOE is directed to recommend 3 candidate repository sites to the President by July 1, 1984, and 3 additional candidate repository sites by July 1, 1987 that he determines are suitable for site characterization. Specific references to the number of media that must be represented are deleted. (H.R. 3809 requires 5 sites in at least 2 geologic media by July 1, 1984, and 1 additional site in a medium not included in the first round, by February 1, 1985.)

DOE is prohibited from recommending any candidate repository site that would permit the physical integration of the test and evaluation facility and the repository. (H.R. 3809 includes certain restrictions if test and evaluation facility is to be located at repository site.)

DOE must submit an environmental impact statement on each candidate site recommended. This statement must include an analysis of each of the candidate sites considered and an explanation of the reasons for eliminating any sites not recommended to the President. The EIS need not consider the need for a repository, the time of the initial availability of a repository, nor alternatives to disposal in a repository (H.R. 3809 required an environmental assessment to be submitted with each candidate site recommended.)

Capacity of the initial repository (or the combined capacity of the first repository and the monitored retrievable storage facility, if the latter is located within 50 miles of the repository) is limited to 70,000 metric tons, until such time as the second repository is in operation. (No similar provision in H.R. 3809.)

In examining alternative repository sites, DOE must consider 3 candidate sites for the initial repository or all sites recommended for a subsequent repository for which (i) site characterization has been completed, and (ii) DOE has made a preliminary determination of the suitability of each site for development as a repository.

Rights conferred upon an Indian tribe to participate in the development of a repository, enter into a written agreement, transmit objections to Congress, and receive financial assistance, are extended to "affected Indian tribes." The term "affected Indian tribe" includes those tribes which, although the proposed repository is not located on the reservation, would suffer substantial and adverse effects to possessory or usage rights to lands outside of the reservation. (H.R. 3809 limits tribal participation to those situations where the repository is located on the Indian reservation.)

NRC criteria for issuance of a construction authorization for a repository must provide for a system of multiple barriers in the design of the repository. (No similar provision in H.R. 3809.)

DOE is authorized to take to high-level waste when it is delivered to DOE for disposal in a repository (H.R. 3809 prohibited title from passing until the high-level waste was delivered to DOE at the repository.)

DOE is authorized to provide for the transportation of such high-level waste, subject to the condition that the costs of transportation are to be paid by the generator of such waste. (Under H.R. 3809, transportation would be the responsibility of the generator.)

III. SUBTITLE B—INTERIM STORAGE PROGRAM

AFR storage capacity provided by DOE may not be located at any federal or nonfederal site within which there is a candidate site for a repository. (H.R. 3809 allows the use of such sites.)

The NRC, in determining whether particular utilities require AFR capacity, is directed to ensure maintenance of a full core reserve capability at the site of the powerplant, unless the NRC determines that maintenance of such capability is not necessary for the continued orderly operation of the powerplant.

No authority is provided DOE under this bill to accept any foreign spent nuclear fuel. (H.R. 3809 authorized DOE to accept up to 100 metric tons.)

Rights conferred upon an Indian tribe to participate in the development of an AFR and to transmit objections to Congress under H.R. 3809 are extended to any "affected Indian tribe". (See discussion under Subtitle A for definition.)

Opportunity for State or "affected Indian tribe" to transmit objections to the Congress, and requirement that such objections be overriden by two houses of Congress before DOE may proceed, are extended to the provision of any AFR storage capacity over 300 metric tons.

DOE is directed to take title to and transport spent nuclear fuel for which utilities have entered into contracts for storage, subject to the condition that the costs of transportation are to be paid by the generator of such waste. Transportation of such fuel is subject to licensing and regulation, as provided under existing law. (Under H.R. 3809, DOE is prohibited from taking title and transportation would be the responsibility of the generator of such waste.)

MONITORED RETRIEVABLE STORAGE

DOE is directed to submit a report to Congress on the need for and feasibility of one or more MRS facilities by June 1, 1985 (H.R. 3809 calls for report within 5 years of the date of enactment.)

The DOE report is to include at least 5 alternate combinations of proposed sites and designs, with a discussion of the advantages and disadvantages of each combination. DOE is to recommend the preferable alternative. (H.R. 3809 prohibits DOE from selecting a specific site for the MRS facility.)

If Congress authorizes a MRS facility, NEPA shall apply to the construction of the facility, except that any EIS need not consider the need for the facility, nor any alternative to the design criteria. In addition, if Congress authorizes construction at a specific site, any EIS need not consider alternatives to that site. Similar restrictions apply to the NPC licensing of such a facility. (H.R. 3809 states that NEPA shall apply to any proposal to construct a facility, and that such facility shall be licensed by the NRC, with no reference to any restrictions.)

Any impact assistance for a MRS would come from the repository fund (H.R. 3809 provides for such assistance from the Interim Storage Fund).

V. NUCLEAR WASTE FUND

Adopted Senate one mil per kilowatt hour fee, but retained the basic structure of H.R. 3809 for the establishment and operation of the fund (H.R. 3809 directed DOE to submit to Congress within 180 days a report establishing payment charges per unit of spent fuel.)

Mr. President, due to the short time available at the end of this Congress,

we urge your support for the compromise text and for the prompt consideration by the Senate of this important legislation.

Mr. President, this bill is a truly comprehensive approach to the ultimate solution to disposition of the large and varied quantities of nuclear waste existing today in the United States and nuclear wastes which will be created in the years and decades ahead. The bill includes aggressive and predictable action in several major programmatic areas.

An interim spent-fuels storage program, which would maximize the existing at-reactor storage capacity, while at the same time providing all of the necessary elements for alternative storage for spent fuel, including away-from-reactor storage facilities, would be immediately implemented under the bill.

Recognizing that changes in Federal policy over the past decade have led to the disruption of utility planning for the storage of spent nuclear fuel prior to its disposal, the compromise text provides a firm national policy for spent-fuel storage, with clear guidelines for future utility planning. Utilities would bear the primary responsibility for providing interim storage of spent fuel and would be obligated to maximize the use of storage at existing reactor sites using a variety of means specified in the bill. Provisions of the compromise text would help expedite regulatory procedures which might otherwise delay expansion of at-reactor storage. However, the compromise text also provides for those limited circumstances where a utility that cannot reasonably provide adequate spent-fuel storage capacity faces disruptions in the orderly operation of its nuclear powerplant. In that circumstance the Secretary of Energy could provide storage at a federally operated away-from-reactor facility. The costs of spent-fuel transportation, operation, maintenance, and decommissioning of the facility would be borne by the utilities using it. The total capacity of such a Federal facility would be strictly limited to 1,900 metric tons of spent fuel—about 10 percent of the total projected need in the year 2000—and only those utilities that face disruption in the operation of their nuclear plants would be allowed to use the Federal facility. This "last resort" Federal option, totally paid for by its users, is not opposed by the administration. The comparable provision in the Senate-passed S. 2189 had authorized a Federal AFR storage program also, but without any specific limit on AFR or burden of responsibility on the utilities.

The interim spent-fuel provisions would include a streamlined regulatory process in the Nuclear Regulatory Commission to support both increased at reactor storage and necessary away-from-reactor facility availability on a timely basis. The combination of these several initiatives and the interim spent-fuel program would insure predictable and timely measures necessary to keep America's nuclear powerplants in full operation without any threat of reduced operations or shutdown because of a failure by the Federal Government to provide for interim spent fuel management.

In a similarly aggressive manner, the bill includes a much accelerated program for the ultimate disposal of commercial high-level waste and spent-fuel elements in mined geologic repositories. The objective of this much accelerated geologic disposal program would be to begin in the 1989 timeframe this Nation's first commercial geologic repository for high-level waste.

The compromise text provides a schedule for the establishment of repositories for the permanent disposal of nuclear waste, together with a realistic and workable schedule for their siting and construction. The deadlines set out in S. 1662 as originally introduced have been extended in the compromise text to take into account testimony received on the schedule. The compromise text also requires the Secretary of Energy to establish criteria for siting repositories which must include, among others, factors pertaining to geologic criteria, the location of valuable natural resources, and proximity to population. The Secretary would be required to apply those criteria to any site being considered for a repository.

The specific provisions within this part of the bill provide for the necessary actions for all Federal agencies to support the 1989 objective. Additionally, this part of the bill would establish a program for having at least one test and evaluation facility in full operation prior to 1988 to provide all necessary information to support the geologic repository program. Also, for the first time, the bill would create a mandatory national site survey program to identify acceptable sites to provide for additional geologic repositories which might be sited on various regions of the United States.

While the combination of the interim spent-fuel storage program and the geologic disposal program should conceptually provide two direct steps, one following the other, to a final disposition of high-level waste and spent fuel, the bill incorporates the Senate-passed proposal for a third, potentially necessary, program to be sequenced between interim spent-fuel storage on the one hand, and ultimate geologic disposal, on the other hand in the form of a retrievable monitored storage facility program.

This program would require the initial efforts necessary to prepare for congressional consideration in the next Congress of a retrievable-monitored storage facility proposal as an intermediate step or phase in the event that there are any unforeseen time delays because of institutional or technical difficulties in the geologic disposal program.

The compromise text requires the Secretary to provide the Congress with a proposal for one or more facilities which could provide for long-term storage of spent fuel or high-level waste in a way which permits continuous monitoring and maintenance and ready retrieval of the waste. The proposal would include a plan for integrating the operation of such monitored, retrievable storage (MRS) facilities into that of the repository and interim spent fuel storage facilities authorized in the bill. The compromise consists of provisions very similar to the MRS provisions passed by the Senate in S. 2139 and S. 1662. Before any MRS facilities could be built, subsequent congressional action would be required.

The retrievable monitored storage program would be the extra insurance under this bill to give complete confidence to the American pecple that nuclear wastes will be properly managed in the event of any foreseeable circumstances in the future. That approach of total confidence underlies the entire bill and is intended to insure that there can no longer be any valid question raised with regard to that complete confidence.

The bill includes several new or modified concepts from the bill passed by the Senate in the last Congress. One of the most noteworthy of those is the proposal for an assured full-cost recovery by the Federal Government from nuclear power-supplied ratepayers for the nuclear waste programs included in the bill. By establishing a 1 mill-per-kilowatt-hour users fee on nuclear generated electricity, this bill for the first time would provide a direct financial linkage between the beneficiaries of nuclear power and the cost for interim management and ultimate disposal for nuclear wastes.

The bill provides for a contractual fee, initially set a 1 mill per kilowatt-hour, which would be charged on the production of electricity from nuclear powerplants. Receipts from this fee would be placed in a separate account in the Treasury established solely for this purpose and would then be appropriated for the waste program on an annual basis. According to the Congressional Budget Office this fee is adequate to cover the costs of this legislation well into the 1990's. However, the bill requires that the adequacy of the fee be reviewed on an annual basis, and the fee could be modified in the future if receipts fell below costs of the program.

This funding mechanism would provide an assured source of funds to carry out the programs and would eliminate not only annual budgetary perturbations in an evermore constrained Federal budget, but the too often repeated shifts of policy direction under succeeding administrations. The nuclear waste policy, programs, and required financing would be statutorily fixed and quite predictable under this approach.

One of the more challenging issues which the Congress has confronted in attempting to develop such comprehensive legislative proposals for nuclear waste has been and continues to be the question of State participation in the siting, development, construction, and operation of interim storage facilities and geologic repositiories for nuclear waste. This bill incorporates a modification of the formulation passed by the Senate in the last Congress, which was the subject of intense negotiation with various parties over the past year.

The bill incorporates a combination of the so-called consultation and concurrence methodology developed and enacted, and now in practice for the waste isolation pilot project in New Mexico pursuant to statutory provisions, on the one hand, and the State-congressional approach adopted in the Senate-passed bill of last Congress and negotiated at length with our colleagues in the House and other interested parties. The formulation in this bill should insure, we sincerely hope, the best of the available methods reflecting our national experience in this area in the past several years.

The compromise text provides for the participation of States and Indian tribes in the development of a repository or a monitored-retrievable storage facility. The affected parties would enter into a written agreement with the Secretary under which their rights of "consultation and concurrence" would be exercised. Differences over health and safety issues between the State or Indian tribe and the Federal Government would be open to negotiation and arbitration. Funding for independent technical analysis and compensation for the effects of the facility would also be provided under this cooperative agreement. At the time that the Secretary was prepared to request a construction authorization from the Nuclear Regulatory Commission (NRC), the affected State or Indian tribe would be given the right to have any outstanding objections over the proposed facility be considered by the Congress. If either House were to agree that the State or tribe's objections had not been properly addressed, the Secretary could not submit his request to the NRC, thereby stopping further development of the facility. Those rights for State participation would be extended to both civilian facilities and licensed defense facilities. The comparable provision passed by the Senate in S. 1662 and S. 2189 had the same opportunity for congressional review of State or tribal objections with civilian facilities, but provided a more restricted opportunity for congressional review of objections to defense facilities.

I believe that these elements of the compromise text are essential to a balanced and adequate nuclear waste policy. The overriding Federal responsibility for the disposal of nuclear waste is clear. In the absence of this legislation, a Federal program for nuclear waste disposal would proceed, but it would do so without clear guidelines for utility planning; without a requirement for detailed controls on the selection and development of sites for geologic repositories; without a mechanism for user financing and a procedure for substantive State participation. For this reason we urge your support for the compromise text, and for prompt Senate action on this important legislation.

Mr. President, let me take a minute to comment as a representative of the people of my home State of Idaho on this bill. The good people of Idaho have been waiting for many, many long years for a predictable, near term conclusion to the nuclear waste issue and the management of nuclear wastes which have accumulated over the past three decades in our State.

Our people have waited through those many long years with great patience, while meanwhile continuing to support enthusiastically efforts in Idaho in the nuclear weapons program, the naval nuclear power program, and the civilian nuclear power research and development program.

Candidly, our people in Idaho have been promised more than once by various Federal officials a near-term solution to our waste management concerns. While the patience of our people may have been tested over time, and sorely tested in the last administration, the aggressive programs already proposed by this administration and the provisions of this bill should give the people of Idaho great comfort and great confidence at long last that the nuclear waste issue will be addressed constructively, positively, and successfully.

At long last, action by a seriously committed and concerned Congress will forge exactly the kind of partnership between the executive and legislative branches of the Federal Government needed to insure swift and responsible action on the nuclear waste issue. I am compelled to commend the people of my State for their continued efforts to deal with this issue. I sincerely hope that this Congress will mark a successful and more than acceptable conclusion to their long wait for promised Federal action.

Mr. President, in conclusion, again, I thank and commend my colleagues who are cosponsors. I believe it is fair to say that the cosponsors of this legislation believe that these provisions carefully balance the constitutional, equitable, legal, and practical interests of the several parties at the Federal, State, and local levels with legitimate interests in these facility matters. I would hope that these provisions will receive the most serious and thoughtful consideration by our colleagues in the Senate and also in the House, in the administration, the several States, and in the various elements of the nuclear industry.

We believe we have successfully fashioned a consensus approach to this most essential and important aspect of nuclear waste management in this country.

Mr. President, I ask unanimous consent that there appear in the RECORD at this point in my remarks a summary of the proposed amendments to printed amendment No. 4983. These amendments reflect discussions with Members of Congress which are intended to be proposed to the printed amendment.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF AMENDMENTS TO H.R. 3809, CALENDAR NO. 968

1. This amendment is intended to make it clear that if the Federal government seeks to utilize repositories developed under this bill for disposal of high-level radioactive waste resulting from atomic energy defense activities, the Federal government must pick up its pro rata share of the costs of developing, constructing, and operating such a repository. This provision, in addition, directs those funds to be placed into the waste fund account established under section 302 for this purpose.

2. The intent of this amendment is simple and straightforward: A new section has been added to this bill to make it clear that, with respect to transportation of spent nuclear fuel or high-level radioactive waste, nothing in the Act is intended to affect existing federal, state, or local laws. Thus, this bill is intended to have no affect with respect to the validity of those individual laws, by either affirming or negating such validity, nor is it intended to alter the legal relationship between federal, state, or local laws regarding transportation of spent nuclear fuel or high-level radioactive waste, as determined under existing law or judicial precedent.

3. This amendment represents a compromise as to the nature of the selection of sites for a potential repository. The compromise approach embodied in this amendment is as follows: First, five sites would be nominated by the Secretary as sites to be considered for recommendation to the President for site characterization. Of those sites, three would actually be recommended by January 1, 1985 to the President for his approval for characterization. Of those sites characterized the Secretary would recommend one for the selection of the first repository. The Secretary would nominate at

least five additional sites by July 1, 1989, leading to the recommendation of 3 candidate sites that the Secretary determines suitable for site characterization for selection of the second repository.

Under the compromise no drilling of preliminary bore holes would be permitted at a site before that site was selected by the Secretary for site characterization unless drilling was already underway on the date of enactment of this Act. The drilling of preliminary bore holes could take place if the Secretary were to find that existing geologic information was not sufficient.

The compromise would also provide that an environmental assessment be done on each site at the time the Secretary nominated the site. The environmental assessment provided under the compromise is identical to that in the House passed bill. Among other things the assessment would provide that a reasonable comparative evaluation be made by the Secretary of the site which is subject of the assessment and other sites which have been nominated.

4. This is simply a conforming change, to reflect the change made from an environmental impact statement back to an environmental assessment for sites recommended to the President. In section 112(f), the Secretary, in the substitute amendment, was directed to prepare an environmental impact statement for all sites for which a borehole had been approved by DOE by August 1, 1982. The understanding is that the only site involved in this subsection is the Hanford site in Washington. Consistent with the earlier change back to environmental assessments for these sites, language requiring an environmental assessment under this subsection has been restored as well.

5. This amendment is a technical change resulting from an earlier amendment already offered. The substitute amendment included a provision requiring the preparation of an environmental impact statement of each site recommended to the President by the Department of Energy for site characterization. The requirement adopted by by both the House and the Senate that the Secretary only prepare an environmental assessment, rather the impact statement has been restored. This amendment is a conforming amendment, striking subsection 112(g) of the substitute amendment, wherein it defined what must be included in such an impact statement.

6. This amendment provides that the Secretary, in promulgating guidelines for recommendation of sites for repositories, shall specify that no repository shall be built in the surface facility of any proposed repository would be located adjacent to a one square mile area with more than 1000 individuals.

7. This amendment provides clarification as to when the fee for waste disposal is to be paid for disposal of spent fuel generated prior to the date of enactment of this Act. It states that the fee be paid when delivery is made to the Federal Government.

8. This amendment to section 114(a)(2)(A) is a technical amendment to restore a provision contained in the House bill, as originally passed, to the Senate substitute amendment. This provision, which was inadvertently deleted when the substitute amendment was submitted for printing, simply says that after the President, after recommending two sites for the construction of the first and second repositories, may at his discretion recommend additional sites for the construction of subsequent repositories. This provision has been included to make it clear that, although the President is not required to recommend any more than 2 sites for the construction of repositories, if the need arises, the President may recommend additional sites.

9 & 10. These two amendments are of a clarifying nature, to make it clear that the Secretary's preliminary determination that sites are suitable for development as repositories is to be made consistent with the Secretary's guidelines promulgated under section 112(a). Without the reference to the 112(a) guidelines, it was not clear what criteria the Secretary was to use in making this preliminary determination, and this amendment is intended to clarify that oversight.

11. This is yet another technical change required as a result of the earlier amendment requiring environmental assessments, rather than environmental impact statements, on sites recommended to the President for characterization. Now that this change has been made it was necessary to include in the judicial review section, under the provision authorizing judicial review of environmental assessments, a reference to those prepared under 112(b)(1).

12. This amendment provides that the prohibiting against the location of any away-from-reactor storage capacity at a candidate site shall apply only so long as the candidate site is under consideration for development as a repository.

13. Monitored retrievable storage of spent fuel and high-level radioactive waste means the long-term isolation of fuel and waste in facilities that permit continuous monitoring, ready retrieval and periodic maintenance, as necessary, of the canisters containing the fuel or waste. Basically, MRS facilities would be used to isolate the fuel and waste without losing control of it.

Both the House and Senate nuclear waste policy bills contained provisions calling on the President to submit to Congress a proposal including designs and other site-specific information about a proposed MRS facility.

The compromise substitute described here was developed by the principal sponsors of the House and Senate bills.

This compromise substitute provides for a MRS proposal to Congress in June of 1985—2½ years after enactment of this Act. The Senate would recede from its original position of a 1-year deadline, and the House would recede from its 5-year deadline.

The proposal to Congress must contain at least five alternative combinations of site and design at at least three alternative sites. Thus if one site is identified that accommodates two different MRS designs—for example, either the dry-well or tunnel-rack approaches already analyzed by DOE—then the requirements of the substitute would be satisfied if three other sites, each with its own preferred design, were also included in the proposal. Under this scenario, Congress would have four sites to review. Alternatively, DOE could comply with the requirements of the substitute by submitting five separate sites, each with its own site-specific design.

MRS facilities would be licensed by the Nuclear Regulatory Commission, and, under the compromise substitute, the licensing process would involve consideration of alternative sites, even though the Congress itself had selected a specific site. The substitute explicitly provides that alternative designs for an MRS may always be considered.

Full State participation is provided for the MRS program in exactly the same way as it is provided in the case of repository sites.

Congress must act before any construction application could proceed. Congress would be free to reject, by failing to act, any of the recommendations DOE makes under the provisions of the substitute. Even if Congress does act, the Nuclear Regulatory Commission could decline to issue a license for the facility chosen pursuant to Congressional action.

14. This amendment amends section 302(a)(5) of the substitute amendment to provide that the Secretary of Energy take title to high-level waste or spent nuclear fuel as expeditiously as practicable upon the request of the generator of such waste. In addition, this amendment directs the Secretary to begin, not later than January 31, 1998, to begin to dispose of the high-level radioactive waste or spent nuclear fuel from those generating such waste. Under the substitute amendment, there was some concern that, in directing the Secretary to take title to and dispose of such wastes no later than December 31, 1996, the Secretary might not be given enough flexibility to tailor his schedule for accepting such wastes to availability of a repository. This amendment simply directs the Secretary to take title to such wastes as expeditiously as practicable, upon the request of the generator of those wastes, after commencement of repository operation.

15. This amendment restores language inadvertently deleted from the House-passed bill in section 135(a)(1)(B), the subtitle dealing with interim storage. In preparing the substitute amendment, the intent was not to delete this language, and this amendment would serve to restore the language deleted.

16. This is another technical change to conform the language of the substitute amendment to the terminology employed throughout the House bill. In section 132(5), where the word "powerplant" is included, that reference was replaced with the appropriate terminology, "reactor".

(There is no Amendment No. 17)

18. This is another technical amendment correcting cross-references contained in section 302(a)(4) of the bill, specifically, where that section referred to subsections (a) and (c), those references have been changed to the appropriate references, "paragraphs (2) and (3), respectively. For ease of reference, the entire paragraph has been repeated.

Mr. McCLURE. Madam President, I ask unanimous consent that Senator WARNER be added as a cosponsor of the substitute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I ask the Senator from Idaho to add my name as a cosponsor.

Mr. McCLURE. Madam President, I ask unanimous consent that Senator THURMOND be added as a cosponsor to the substitute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Will the Senator yield?

Mr. McCLURE. Yes.

Mr. THURMOND. Madam President, I am pleased that the Senate sponsors have chosen to basically adopt the House provisions regarding interim storage for commercial spent fuel. The House provisions come much closer, in my view, to establishing a

truly limited, "last resort" Federal storage program, and are, therefore, preferable to those found in the Senate bill. There is one major change from the House bill. In response to the concerns of potential repository States that they not be considered as a host State for both a new AFR facility and a final repository, the House option of constructing new AFR capacity at a repository site has been deleted. Language has also been added to the Senate substitute which would bar any use of potential repository sites for providing interim storage.

The more careful and limited nature of the House approach is reflected in a number of provisions. Primarily, the manner in which the Secretary of Energy may provide such storage is more carefully circumscribed. The Secretary may not, as he was authorized to do in the Senate bill, "construct, acquire, or lease" one or more new facilities to provide such storage. Instead, the Secretary is limited to three options, now that the option of construction at a repository site has been deleted. These options may be used in combination for meeting Federal storage commitments. The Secretary may, for example, utilize available capacity at one or more Federal facilities owned by the Federal Government on the date of enactment of this legislation. A second option is to provide modular or mobile spent nuclear fuel storage equipment to the utilities for use either at the reactor sites or at any Federal sites. The Secretary's third and final option is to construct storage capacity at any reactor site.

With regard to the use of a Federal facility, the House bill and the Senate substitute establish a two-tier environmental review process. If the Secretary decides to store 300 or more metric tons at any one Federal facility, that decision will require preparation of an environmental impact statement. A decision to store less than 300 tons at a given Federal facility, if such decision requires modification or expansion of the facility, necessitates the preparation of an assessment of probable environmental impacts.

The specific factors to be considered in such an assessment are delineated in the bill. In providing storage capacity through any other option, the Secretary must comply with applicable requirements for licensing or authorization of such method. It is my understanding that the provisions of the National Environmental Policy Act will apply, as they ordinarily would, for the other listed options.

The 300-ton figure also triggers the State participation provisions of the bill. If the Secretary decides to store 300 or more tons at one site, he must notify the Governor and legislature of the affected State. They in turn have 60 days in which to disapprove that decision and submit to Congress a notice of such disapproval. The Secretary's proposed action stands disapproved unless, within 90 days of continuous session, Congress passes a joint resolution approving the storage of 300 or more metric tons of fuel at the Federal site within the objecting State.

I believe, and I hope, that this 300-metric ton trigger for both preparation of an environmental impact statement and for the State participation provisions will encourage the Secretary to place smaller amounts of fuel at several sites, rather than requiring one State to bear the burden of storing all spent fuel which utilities cannot store onsite.

Another provision of the Senate substitute which has been improved is that relating to full core reserve (FCR). The original Senate bill mandated that full core reserve be maintained, while the House bill took the more flexible and reasonable approach of allowing the Commission to decide whether maintenance of FCR capability at a particular reactor is necessary for the continued orderly operation of that reactor. While NRC has always encouraged utilities to maintain FCR as a good management practice, the Commission has not required it as a safety matter. Obviously, if FCR capacity is mandated, less storage capacity is available at the reactor site and Federal storage would be needed at an earlier date. The Senate substitute now provides that NRC shall insure full core reserve, unless it determines that FCR is not necessary for the continued orderly operation of the reactor.

It remains my position that a Federal interim storage program is unnecessary and that the utilities should themselves provide such temporary storage capacity. Thus, I believe it is unfortunate that neither the House bill nor the Senate substitute totally insulates the State of South Carolina from providing any interim storage. While the applicability language of the House bill and Senate substitute precludes use of a facility already being utilized for atomic energy defense activity, the site at the Savannah River plant in my State might be used to provide some amount of interim spent fuel storage. Such a decision would, however, be subject to full environmental review, any applicable licensing requirements, and the State review process if over 300 tons of fuel is involved. Use of the Barnwell facility in South Carolina is not a possibility under the Senate substitute.

As I am sure our colleagues will recall, I and several other Senators interested in this issue offered an amendment regarding the AFR storage when the Senate considered S. 1662 this summer. That amendment, which completely struck the AFR title of the bill except for its licensing provisions, failed by only three votes. We argued at that time that utilities could provide such storage and that it should remain their responsibility to do so. We also expressed the concern that the establishment of a Senate-style AFR program might hinder efforts to find a permanent solution to the nuclear waste problem. I believe the closeness of that three-vote margin indicated that a number of Senators shared our concerns regarding the absence of need for an AFR program of the magnitude established by S. 1662.

Mr. President, I am pleased that the Senate sponsors of this substitute have responded to that concern. Limited, "last resort" Federal storage either at existing Federal facilities or sites, or at the reactor site, is a far more preferable approach. While I personally remain opposed to any interim storage program and would prefer that the bill not contain such provisions, I recognize that the majority of both Houses appear to be of the view that some limited amount of Federal storage should be provided for those utilities who are unable to reasonably provide for their own storage needs. In a spirit of reasonable compromise, we have decided not to pursue our earlier approach to the AFR issue. Instead, we are willing to accept the more reasonable provisions of the House bill.

Another major reason why I have agreed to go along with the House provisions is the need to enact a nuclear waste bill this Congress. It is essential that we begin to move forward with a policy and program for the permanent disposal of high-level nuclear waste and spent fuel. The Nuclear Waste Policy Act of 1982 is in the best interest of our Nation and of the utility industry as well. A permanent repository program would also serve the best interests of the State of South Carolina by increasing the likelihood of removing the 28 million gallons of high-level waste now stored at the Savannah River plant to a final repository.

Finally, Mr. President, I have decided to support the Senate substitute because of some of the improvements which it makes in the House bill. First and foremost, the total amount of authorized storage capacity is limited to 1,900 metric tons rather the 2,000-ton figure in the House bill. The difference of 100 tons results from the deletion of section 135(c) of the House bill authorizing the Secretary of Energy to provide storage capacity for up to 100 metric tons of foreign spent fuel. Second, the State participation provisions are extended to cover all options for providing interim storage, not just the first two listed options as under the House bill. It is essential, in my view, for an affected State to have every opportunity to participate in the

decisionmaking process for any method of providing interim storage.

Madam President, I just want to take this opportunity to commend all these people who worked so long and hard on this bill. This is one of the most important pieces of legislation facing this Nation.

I especially wish to commend the able Senator from Idaho (Mr. McCLURE) for the leadership he has shown in this matter and for the initiative he has shown in getting this bill before the Senate in this short, post-election session. It is very important. It should be acted upon and we are proud that has been done.

I wish to also commend Senator SIMPSON, Senator JOHNSTON, Senator DOMENICI, Senator STAFFORD, Senator GORTON, Senator JACKSON, and Senator HART for cooperating in this.

There are many staff members who have played an important part in this and they are to be commended also. Chuck Trabandt, Senator McCLURE's staff director on the Energy Committee; Jim Curtiss with Senator SIMPSON, Ben Cooper with Senator JOHNSTON, Paul Gilman with Senator DOMENICI, Keith Glaser with Senator HART, Will Smith with Senator JACKSON, Jim Davenport with Senator GORTON, and others have all worked diligently on this legislation for months and have been very helpful to me and my staff.

Madam President, I especially wish to commend Miss Sally Rogers of my staff who is an expert on nuclear energy issues and who so ably assisted me with respect to this landmark legislation.

AWAY FROM REACTOR FACILITIES NATIONAL NUCLEAR WASTE POLICY ACT OF 1982

Mr. PERCY. Mr. President, I would like to commend the floor managers of this bill for working out this compromise, especially given the time constraints they have had to contend with. When this bill was first considered by the Senate, I had considerable problems with it. Although the bill is by no means perfect, I believe it has been significantly improved and will provide a beginning for a program for the final disposal of nuclear waste.

One of my primary concerns with the original Senate bill was the section calling for Federal operation of away-from-reactor (AFR) spent fuel storage facilities. I introduced, along with many of my colleagues, an amendment which would have eliminated provisions for Federal operation of AFR's in entirety. I continue to believe firmly that the interim storage of spent fuel should remain a private sector responsibility while the Federal Government gets on with the business of finding a more permanent solution to our nuclear waste disposal problem.

If this Congress feels compelled to provide some provisions for AFR's, it is critical that this language be as limited as possible, and not provide a disincentive for utilities to responsibly handle the temporary storage of nuclear waste. I am pleased that over the past week, after lengthy negotiations, the Senate committees have moved toward a compromise which I believe significantly limits the future use of federally operated away-from-reactor facilities. The committee-drafted amendments would only allow the use of a Federal AFR after a determination by the Nuclear Regulatory Commission that the utility has no alternative means to temporarily store its spent fuel.

The amount of spent fuel storage which could be provided by the Federal Government will be limited to 1,900 metric tons. The Federal Government could only use an existing Federal facility or use the site of a nuclear reactor plant to provide this new spent fuel storage. The bill would not authorize the construction of a new AFR facility. In addition, Federal provision of large amounts of nuclear waste storage at non-Federal facilities will require a full NEPA environmental review.

Furthermore, if the Governor or legislature in the State object to the Federal Government placing a large AFR in the State, the State veto holds unless two Houses of Congress override the State objections. These various restrictions assure that Federal AFR's will only be used as a last resort.

I am also pleased that the compromise bill prohibits the Federal Government from taking over the interim spent fuel storage facility in Morris, Ill. The Morris facility was not built with the expectation that it would become a federally operated facility for storage of spent fuel from across the entire Nation. The people of Morris have been understandably concerned about the possibility of a Federal takeover, while many others throughout the State have been concerned about increasing shipments of nuclear waste en route to Morris. I have received many, many letters from citizens expressing these concerns and have met with a distinguished group of leaders from the community who have organized citizens against the Federal takeover (CAFT) of the Morris facility. I am sure that people in the Morris community will be relieved to know that they will no longer face the possibility of a Federal takeover of the nuclear waste storage facility in Morris.

Mr. President, I would like to ask the chairman one question on behalf of myself and my colleague, Senator DIXON, to reassure these people that their community will not be subjected to a federally operated nuclear waste storage facility.

AFR SITE RESTRICTIONS

Is it the intent of the managers of this legislation under section 135 to prohibit the Secretary from providing capacity for the storage of spent nuclear fuel from civilian nuclear power reactors at the following facilities:

First. The interim spent fuel storage facility owned and operated by General Electric in Morris, Ill.;

Second. The former nuclear fuel reprocessing center in West Valley, N.Y.; and

Third. The Allied General Nuclear Services facility near Barnwell, S.C.?

Mr. SIMPSON. Yes, that is the intent of the managers of this legislation.

Mr. PERCY. Thank you again, Mr. Chairman, for working so diligently to pull together this final compromise bill.

Mr. DIXON. Mr. President, I rise in total support of the comments made by the senior Senator from Illinois. I joined with him in an earlier amendment to delete the authorization far away-from-reactor storage in entirety. I am pleased that we have been able to work out language that both prohibits the Federal Government from taking over the spent fuel storage facility in Morris, Ill., and provides significant limitations on the future use of federall operated AFR's in this final compromise bill.

Mr. LEVIN. Although the full EIS will not be prepared until the Secretary recommends one of the characterized sites for construction of a repository, I assume that the environmental assessment on the five sites the Secretary nominates under section 112(b) for characterization would include as much detailed information as is reasonable on those five sites. Such information could then be included in the EIS that follows site characterization. Is my understanding correct?

Mr. McCLURE. Yes; that is correct.

Mr. SIMPSON. Mr. President, we are on the verge today of establishing the framework for this Nation's first comprehensive nuclear waste management and disposal program—a significant achievement for the Congress and the country. We now have before us the work of seven committees of the House of Representatives and three committees of the Senate, combined with the efforts of numerous individual Members on both sides of the aisle, all of whom have played formative roles in shaping this legislation.

The tough, hard work and dedication of everyone involved in the nuclear waste disposal issue, and the compromise that we have been able to fashion in this substitute amendment, is testimony to the overwhelming consensus in support of a solution to this difficult issue. And dealing with a very diverse cast of characters, Senators McCLURE, JOHNSTON, JACKSON, and DOMENICI, and Represenatatives DINGELL, OTTINGER, BROYHILL, and UDALL all labored diligently.

We all recall too readily the unfortunate failure of the Congress to reach agreement on a comprehensive nuclear waste disposal policy in the closing days of the 96th Congress. For my part, Mr. President, I am committed, as are many of our colleagues, to insuring that this important piece of legislation not suffer the same fate.

I strongly urge my colleagues to support the legislation we have before us, the product of so much time and effort by so many—principals and staff. In particular, I would like to commend my distingished colleague, Senator McCLURE, chairman of the Energy and Natural Resources Committee, for his hard work, leadership, and real statesmanship, together with the efforts of Bennett Johnston and many other colleagues, most notably my own distinguished chairman, Senator STAFFORD, ranking member JENNINGS RANDOLPH, and Senators HART, DOMENICI, JACKSON, and TOWER. So many more.

Suffice it to say, here it is, something we seem to always talk about but never seem to resolve. We never quite grapple the monster to the ground. Here is our chance.

Mr. THURMOND. I have a question regarding section 135(c) of the substitute, establishing the two-tier environmental review process for storage at any existing Federal facility. Since that process only applies to the existing Federal facilities option, does that mean that the other two storage options are subject to review under NEPA, as it would ordinarily apply, without regard to the amount being considered for storage?

Mr. McCLURE. Yes; that is correct.

Mr. JACKSON. I would like to ask the senior Senator from Idaho whether it is his understanding of the provision in paragraph 2 of subsection 135(a) that the DOE Hanford Reservation, which is a candidate site, would be precluded from use for away-from-reactor storage of spent nuclear fuel for so long as it remains under consideration as a potential site for a geologic repository.

Mr. McCLURE. My understanding of the effect of the provision is as the Senator has stated it regarding the Hanford Reservation. However, of the current places under consideration as possible candidate sites, I know of no other Federal site that would be precluded for AFR storage because of this provision.

Mr. JOHNSTON. I would like to ask the distinguished Senator from Idaho, Senator McCLURE, with respect to the words "to be collected from any person delivering spent fuel" to the Federal Government, which appear in section 302(a)(3), is it correct that the intent of this language is to specify not only who will pay the fee, but also when that fee is to be paid?

Mr. McCLURE. The Senator is correct. The language specifies both the person who will pay and the time the payment is made.

Mr. JOHNSTON. Is it also correct that the time that the payment is to be made is when the fuel is actually delivered by the payor to the Federal Government?

Mr. McCLURE. The Senator is again correct. The payment is to be made at the time of delivery to the Federal Government.

MRS DESIGN CRITERIA

Mr. McCLURE. I think we should clarify our intent with regard to the language of the MRS section of the bill where, in paragraph 141(c)(2) and in subsection 141(d), we refer to the design criteria set forth in subsection 141(b)(1). Are the design criteria of subsection 141(b)(1) the only design criteria applicable to MRS facilities under law?

Mr. JOHNSTON. No; the design criteria of subsection 141(b)(1) merely define a monitored retrievable storage facility for purposes of section 141. Other design criteria specific to MRS facilities, such as safety criteria, reliability criteria, public health criteria, environmental criteria, and so forth may be imposed on any MRS facility under law.

STATE PARTICIPATION

Mr. SIMPSON. Mr. President, I would like to ask my distinguished colleague from New Mexico to clarify a modification to the provisions of this legislation that I believe were in large part his doing. I would call the Senator's attention to that part of section 117 that deals with the written agreement between the Federal Government and States or affected Indian tribes. This provision establishes the framework for the process of consultation and cooperation. The Senate substitute expressly states that in resolving State or affected Indian tribe objections, the Secretary shall specify procedures for arbitration, negotiation, or other appropriate mechanisms. I wonder if the Senator from New Mexico could clarify the intent of the word "arbitration."

Mr. DOMENICI. I thank the Senator from Wyoming for drawing our attention to this matter. I believe it is a very significant one. The process we have in mind there certainly must be flexible enough to meet the ends of any particular objection which needs resolution, but we would expect that something like a technical review board, with an equal number of Members chosen by both sides, perhaps with an additional number chosen by both sides, would hear the technical arguments on both sides of an issue. This review board could then make a judgment as to the most appropriate resolution of the objection. Both parties would be expected to abide by the decision of that board. I hope that clarifies the use of that term for my friend from Wyoming. It certainly is an important one in that it is a key element in having States or affected tribes resolve their concerns within the process of consultation and cooperation rather than before Congress.

Mr. SIMPSON. I thank the Senator and would only ask him one further question at this time. Do the funds provided to potential repository States or affected Indian tribes under this legislation cover the costs of entering into this written agreement under section 117.

Mr. DOMENICI. They do.

Mr. SIMPSON. I thank the Senator for his responses.

CONCEPTUAL REPOSITORY DESIGN

Mr. DOMENICI. I wonder if I might inquire of the distinguished floor managers of this bill about precisely what is intended in section 113(b). The particular issue has to do with the requirement that DOE submit to the States a general plan for site characterization activities, a description of the possible packaging for the high level waste, and a conceptual respository design that takes into account likely site-specific requirements. Since this information must be submitted prior to sinking shafts at any candidate site, am I correct in assuming that the discussion of site-specific requirements associated with the conceptual repository design required by this subsection should be commensurate with the limited amount of work done at the candidate site, and that this discussion will, in all likelihood, entail an analysis of the overall conceptual repository design, rather than a detailed site specific design that must incorporate information not yet available at this stage of examination?

Mr. SIMPSON. The gentleman's understanding is absolutely correct. It would be our hope that DOE make available to the State a conceptual repository design that, to the extent practicable, includes information related to the particular site involved. We fully recognize, however, that since we are directing DOE to submit the design to the States prior to the sinking of any shaft, the amount of detailed, site-specific information that will be available at this stage will necessarily be limited. It is not our intent to require DOE to delay its program while it proceeds to acquire such additional information, since this would necessarily entail the sinking of a shaft at the site. Instead, we felt it important for the State to have, at this very early stage, a general discussion of the conceptual repository design being proposed by DOE for that site.

Mr. DOMENICI. I thank the gentleman for his clarification.

SITE NOMINATION

Mr. SIMPSON. I have some questions I would like to have answered by

the Senator from Louisiana. As the Senator knows, I favor a program which provides for as many alternative sites for the selection of a repository as are reasonable. This principle should apply to each of the two repositories required under this bill.

Under the provisions of subsection 112(b) it appears that the pool of alternatives from which a repository will ultimately be selected will include at least 5 nominated sites in each round. That is, a pool of at least five nominated sites will be available prior to selection of the first repository, and a pool of at least five nominated sites will be available for the selection of the second repository. Is that correct?

Mr. JOHNSTON. The Senator correctly describes the situation.

Mr. SIMPSON. I would like to clarify the intent of subparagraph 112(b)(1)(c) with regard to just how it provides for a pool of at least five nominated sites for the selection of the second repository.

As I read subsection 112(b), it would work like this. Of the five sites nominated in the first round, three will be recommended for characterization, and one of these three will be selected as the first repository.

For the second round, not later than July 1, 1989, the Secretary shall again nominate five sites. The two sites from the first round that were not selected for site characterization could not be among these five nominated sites for the second round. However, the other two sites that were nominated in the first round and did undergo site characterization could be included among the five nominated sites for the second repository.

The Secretary would be required in any event to insure that at least five sites are nominated for the second round by including in the nomination at least three new sites not nominated in the first round. If the Secretary nominated the two characterized sites from the first round, he would only be required to nominate three new sites in the second round. If the Secretary decided not to nominate for the second round one of the two sites characterized in the first round, he would be required to nominate at least four new sites for the second round. Is this an accurate description of the intent of the provision?

Mr. JOHNSTON. The Senator is correct.

POPULATION DENSITY

Mr. McCLURE. Mr. President, I would like to ask my colleague from Wyoming a question regarding the guidelines for the recommendation of sites for repositories. As the Senator knows, one of the factors that must be considered in these guidelines is the proximity to populations that a site would have. It is my understanding that this consideration is intended to pertain to the proximity of populations at the time the repository is being constructed and initially operated. It was not our intent that the Secretary try to see far off into the future as to population centers and their proximity to the site. Is that the Senator from Wyoming's understanding?

Mr. SIMPSON. Indeed it is.

Mr. McCLURE. I thank the Senator.

Mr. WARNER. Mr. President, I rise in strong support of the McClure substitute in H.R. 3809, the National Nuclear Waste Policy Act. This legislation is a product of many long years of negotiation and will be remembered as one of the most important legislative achievements of the 97th Congress. The Senator from Idaho and other Senators who have worked so tirelessly on this bill are to be highly commended for their efforts.

As a cosponsor of the legislation which originally passed the Senate, I wrote to and talked with Majority Leader HOWARD BAKER to urge him to bring this House-passed bill to the Senate floor.

The legislation is a blueprint for the safe disposal of high level radioactive waste. It will be especially important to States, such as Virginia, which have nuclear generating facilities that may reach their spent fuel storage capacities as early as 1985.

I urge the adoption of the legislation.

Mr. MOYNIHAN. Mr. President, I rise today in support of the Nuclear Waste Policy Act of 1982, H.R. 3809, as amended. The passage of comprehensive Federal nuclear waste management legislation is long overdue. Many have worked diligently and thoroughly on the legislation before us today and it would be unfortunate indeed if another Congress adjourned without enacting a much needed system to deal with the long-term storage and permanent disposal of the high-level nuclear wastes being generated by this Nation's commercial nuclear power plants.

The first commercial nuclear reactor in this country began operating in 1957. Over the last 25 years some 9,000 metric tons of spent nuclear fuel have accumulated. But we have no permanent repository for these wastes, wastes that will be dangerously radioactive for tens of thousands of years.

As Carroll L. Wilson, professor emeritus at the Massachusetts Institute of Technology and first general manager of the Atomic Energy Commission, observed in 1979, we have devoted much attention to the front end of these machines—nuclear reactors—but not enough to the problem of disposing of the radioactive waste they produce. By the year 2000 there will be some 89,000 metric tons of accumulated spent nuclear fuel, nearly 10 times the current quantity. We must be steadfast, therefore, in our efforts to develop and execute a Federal policy for the permanent disposal of these high-level nuclear wastes. We can no longer put off this undertaking.

My own experience with this perplexing problem is, I feel, quite telling. Upon coming to the Senate in 1977 I was faced most directly with the consequences of the Federal Government's inability to bring into being comprehensive nuclear waste management legislation. There existed a defunct nuclear fuel reprocessing facility, known as the Western New York Nuclear Service Center, in West Valley, N.Y. This small hamlet, some 30 miles from Buffalo, was home for the only commercial nuclear fuel reprocessing plant ever to have operated in the United States.

Between 1966 and 1972 about 640 metric tons of spent fuel were reprocessed at the West Valley facility. In 1972 the center shut down. It was thought that the plant needed to be larger in order to be cost efficient. As plans to enlarge the facility were being considered, the regulatory climate changed. Standards for such reprocessing operations became stricter, safeguards more extensive. By 1976 it became clear that reopening the West Valley Center was not practical and so the plant's operator, Nuclear Fuel Service, Inc., announced it was giving up its reprocessing plans and leaving the site. What was left behind was some 600,000 gallons of highly radioactive liquid wastes, a by-product of the reprocessing that had taken place at the plant.

A serious question arose as to what was to become of these wastes. They were being stored in tanks with useful lives of some 50 years. Simply replacing the tanks every 50 years was not the answer. Realizing we needed a permanent solution, Congressman LUNDINE, Senator JAVITS, and I set about to have the Federal Government conduct a nuclear waste solidification project at the West Valley Center.

Eventually we were successful in securing the passage of the West Valley Demonstration Project Act, Public Law 96-368, which became law on October 1, 1980. What we brought into being was the first commercial nuclear waste management legislation ever to become Federal law. On February 25, 1982, the U.S. Department of Energy took possession of the West Valley site to begin the waste solidification project, the only commercial nuclear waste management project currently being conducted by the Federal Government.

We must move on. May I say that the Western Europeans and Swedes are facing up to the nuclear waste management issue with far more discipline. I commend to my colleagues an article entitled "Nuclear Waste Disposal: Bold Innovations Abroad Instructive for U.S." by Walter Sullivan

that appeared in the New York Times on August 31, 1982. Mr. Sullivan points out that there are 73 operating commercial nuclear powerplants in the United States, more than in any other country. Yet we have no comprehensive nuclear waste management program in place to deal with the tremendous volume of waste that will be generated by these plants. Our lack of a nuclear waste policy stands in sharp contrast to the steps being taken by other countries. We should not allow this situation to continue.

What we have before us today is a bill that will finally put us on the path to comprehensive nuclear waste management. It is a bill that represents consensus on certain issues and compromise on others. After the intensive debate that has marked this issue during the current and the last Congress, it is time to come to a final agreement.

I wish to make particular reference to the provisions for the interim storage of spent fuel contained in title III of the bill. When the Senate first considered and passed this legislation, S. 1662, on April 29, 1982, the bill contained broad provisions for a federally owned and operated system for the interim storage of up to 2,800 metric tons of spent fuel at one or more away-from-reactor (AFR) storage facilities. I joined with Senators HOLLINGS, THURMOND, PERCY, DIXON, and D'AMATO in offering an amendment to S. 1662 to strike all provisions for AFR storage. We fell but three votes short of prevailing on the amendment.

I did not support the original Senate AFR storage provisions because I believed them to be unnecessary. Utilities, under the watchful eye of the Nuclear Regulatory Commission, have been taking care of the interim storage of their own spent fuel in good faith for some time. I am of the opinion that interim storage should continue to be the responsibility of those owning and operating civilian nuclear power plants. The utilities have on-site storage options, including the expansion of existing storage pools, reracking or consolidation of spent fuel rods into tighter assemblies, and the use of new technologies such as dry storage. I feel strongly that these options can and should be exercised.

When the House considered the nuclear waste management legislation, it adopted a narrow set of provisions for a Federal AFR storage program. The House-passed bill, H.R. 3809, is carefully crafted to insure that a Federal AFR storage program would only be used as an option of last resort. The substitute to H.R. 3809 that is now before the Senate includes AFR provisions that are almost identical to the House approved language. What we are considering, therefore, is a compromise, one I believe that includes a significant number of safeguards. While not ideal, the Senate language on AFR storage is acceptable.

In sum, I feel it is time to pass this much needed legislation. We have argued and debated, with the result being a consensus bill that I feel deserves support. The ultimate goal here is to establish a program for the permanent disposal of our Nation's nuclear wastes. We must not lose sight of this objective, we must move ahead with all due diligence.

Mr. President, I ask unanimous consent that Mr. Walter Sullivan's article, "Nuclear Waste Disposal: Bold Innovations Abroad Instructive for U.S.," be printed in full in the RECORD.

There being no objection, the article was/were ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 31, 1982]

NUCLEAR WASTE DISPOSAL: BOLD INNOVATIONS ABROAD INSTRUCTIVE FOR U.S.

(By Walter Sullivan)

Sweden is planning to dismantle, piece by piece, all 12 of its nuclear power plants by 2010 and is taking steps to bury the radioactive waste from them deep in granite at sea.

France, on the other hand, expects to have 55 nuclear power plants generating 55 percent of its electricity within three years. It too has enormous waste disposal problems and is looking into the possibility of storing the radioactive waste under the Alps.

These two approaches are among a wide range of West European strategies for dealing with the radioactive waste produced in generating nuclear power, strategies that must take into account the possibility that dangerous conditions could develop at waste-disposal sites thousands or millions of years hence.

The future of nuclear power depends on safe disposal at a reasonable cost. Thus the West European experience—diverse, innovative and laden with political, physical and practical problems—will be instructive to other nations.

The United States, for example, has 73 operating nuclear power plants generating 13 percent of its energy, but the Energy Department and Congress have been unable to agree on a plan for developing long-range storage sites. Some reactors may have to be shut down as soon as 1986, and a full-scale storage crisis is expected by 1990 unless proper disposal sites are created by then. Thus far, key Congressmen have been unwilling to vote for long-term disposal sites in their own districts.

Of principal interest among the European operations, as revealed in a series of recent interviews and visits to key disposal sites in Britain and on the continent, is an international project in Sweden. Techniques are being tested there for encasing high-level wastes in the granite walls of an abandoned mine more than 1,000 feet underground, at a site 100 miles west of Stockholm.

Sweden is keenly interested in having the mine shaft experiment succeed. Now the third most electrified country in the world, it will soon depend on nuclear plants for half its power.

But the Swedish people, concerned about the dangers of radiation and difficulties of waste disposal, voted in a referendum in 1980 to close down all the country's nuclear reactors within 30 years and to consider a whole range of alternative sources of power. The Government's overall program, therefore, is designed to dispose of all wastes produced up to then, including radioactive structural material from the plants themselves.

As in other countries, the waste is assigned to one of three radioactive categories: low, medium or high level. In the first category are slightly contaminated materials, such as empty containers, gloves and shoes discarded after exposure. Medium-level wastes consist of material radioactive enough to require special handling but not sufficient to generate high temperatures.

High-level wastes continue to be so radioactive that they generate too much heat for early burial. They have to be artificially cooled, by air circulation or other means, possibly for decades, before they can be permanently stored.

Reactor rods, removed after their fuel has been depleted, are treated as medium-level waste unless their more radioactive constituents are extracted and concentrated by a reprocessing plant. To handle the thousands of tons of spent fuel being generated in Sweden, an elaborate center is being built alongside the Oskarshamn nuclear power station on the Baltic coast. In a cavern carved out of bedrock underneath it, four large "swimming pools" are being constructed to hold the spent rods.

STORAGE TO START IN 1985

According to Erik Svenke, president of the Swedish Nuclear Fuel Supply Company, which handles disposal as well as production of fuel, the center should begin operation early in 1985 as an interim storage center. It is designed ultimately to hold 9,000 tons of spent fuel and reactor components.

For final storage of medium-level waste, Sweden plans a site excavated out of granite or similar rock under the Gulf of Bothnia. The site, a mile off shore, will be linked by tunnel to the nearby Forsmark nuclear power station. Above it will be a 165-foot layer of rock topped by 20 feet of water. When asked about the obvious construction difficulties, Mr. Svenke said with a grin, "Swedes are good at blasting."

Since the Swedish plants and medium-level disposal sites are all at four coastal sites, a contract was signed last year with a French shipyard to build a special ship to transport the waste.

High-level waste, according to the plan, will be disposed of in granite or comparably homogeneous rock at one or more sites to be chosen by 2000. Four test holes are being drilled into such formations, and at least 10 are planned. Each deposit will be tested for such factors as water permeability, corrosive chemistry and geologic stability. Archeological samples of copper are being studied to determine how that metal responds to prolonged exposure.

Sweden has contracted with British Nuclear Fuels Ltd. and France's state-owned COGEMA company to reprocess 956 tons of its spent fuel. The plan, as in most European programs, is to fuse the high-level waste in glassy material that resists heat and action by water or chemicals. The Swedish disposal program is financed by a fund to which the utilities make periodic contributions.

STUDIES OF GRANITE UNDERTAKEN

The problems of disposal in granite are being studied by an international project at the Stripa mine in Sweden, where mining began in 1485 and ended in 1976. Participants are Finland, Japan, Sweden, Switzer-

land and the United States, with Canada and France as associates.

Some of the questions they need to answer are: What are the effects of heat generated by high-level waste? Does water percolate through the rock? Does it pick up substances that, under such conditions, will corrode the canisters and dissolve the glassy, waste-laden material inside?

Electric heaters are testing such effects as well as heat conductivity of the rock, which facilitates dispersal of heat from the canisters of waste.

The tests at Stripa are also exploring ways to enclose the deposited canisters so that no material can enter or escape. A favored substance is bentonite, a clay of volcanic origin that, would provide a tight seal because it swells considerably when mixed with water.

By using remote means, such as seismic tests, it is also important to identify rock fractures in the disposal area through which water might flow.

In Britain, tests are being conducted in a number of bore holes in granite. Exploratory drilling has been conducted in northern Scotland; the heat response of Cornish granite 165 feet underground has been subjected to tests for more than three years. Britain operates a major reprocessing center at Windscale.

France has developed a vitrification process, in which high-level wastes are incorporated into borosilicate glass at Marcoule. Despite its present success, it is still not clear where France will be able to dispose of the wastes permanently.

WASTES ARE TURNED TO GLASS

In 1978, after five years of pilot plant operation, France's large AVM (Atelier de Vitrification Marcoule) plant started up, and by last year it had turned 13,400 cubic feet of concentrated high-level wastes into solid glass.

Roughly 40 gallons of a molten glass and waste mixture are poured into a three-foot stainless steel canister. The canisters are stored temporarily in wells, ventilated for cooling, beneath the Marcoule plant. Each of the 220 wells has a capacity of 10 canisters, to provide storage for a decade's output of 10 nuclear plants, each generating 1,000 megawatts, according to Jean-Marie Lavie, director of the French disposal program. Several decades of storage will be needed before the canisters are cool enough for burial.

In search of a permanent disposal site, holes have already been bored, one of them more than 3,000 feet deep, into granite of the Massif Central at Auriat.

Both at Marcoule and at La Hague on the Cherbourg Peninsula, France is reprocessessing spent reactor fuel not only from its own reactors and weapons program, but also from six European countries and Japan. This process extracts uranium and plutonium that can be used again, leaving a small residue of high-level waste.

Low-level waste is stored at the 30-acre La Manche site near La Hague. Drums filled with waste are either stored in the open or buried in shallow holes. Under an international arrangement, much of Europe's low-level waste is dumped at a site far out in the Atlantic Ocean.

Expansion of the French fuel-reprocessing plants, including construction of a plant that would double La Hague's capacity to 1,600 tons a year, was suspended when protesters blocked a train shipment of spent fuel from West Germany, but it was later resumed.

It is expected that La Hague will be filled to capacity for temporary high-level disposal by 1986. The Government has proposed using an abandoned uranium mine, which is already radioactive, at St. Priest de la Prugne in central France, but this has evoked opposition because it is in the mineral-water country.

GERMANS FACED POLITICAL CHOICES

West Germany's original intent was to establish a single center for processing spend fuel and disposing of nuclear waste. Attention focused on salt domes in northern Germany and, in 1977, on Gorleben, close to the East German border. Local authorities requested a review of the project by international specialists, who in 1979 found that while it appeared safe, the political feasibility of a large reprocessing plant was doubtful.

The Germans have since decided to make Gorleben their disposal site, but for fuel reprocessing, smaller plants are envisioned at other locations. At Gorleben drilling of shafts for the disposal mine began in February. At last report one shaft, 3,250 feet deep, had been completed, and drilling of the second was about to begin.

Nevertheless, various concerns have been expressed about the Gorleben deposit. Like other salt domes, it is a body of salt that has risen from a deeper deposit because of its buoyancy relative to other rock. Current boring may indicate whether or not it is still rising and eventually might bring a deep deposit to the surface.

The salt has apparently been free from water action for millions of years, but some fear that the Elbe River might change its course and penetrate the area. The advatages of salt, however, are that it is self-sealing and, unlike rock, will not open permanent cracks under the stress of an earthquake or other geologic change.

The Netherlands is also interested in salt deposition, primarily in offshore salt domes, far from communities that might protest.

Probably the most innovative approach is that of Belgium, which has no suitable salt or granite deposits. It is seeking to carve a repository out of the extremely homogeneous and impermeable clay deposited on what was a sea floor 35 million years ago.

About 525 feet under the Belgian nuclear research center at Mol, this clay forms a layer 360 feet thick. Disposal directly below the center would be ideal. A shaft has been sunk 720 feet, penetrating this layer, and a horizontal tunnel is being exavated for tests of the clay's suitability for storing medium- and low-level waste.

A slow descent down this shaft in a chin-high iron barrel is like Alice in Wonderland's trip down the rabbit hole. One must wear polar clothing in midsummer, because pipes have been inserted into the surrounding clay to carry refrigerants that freeze it solid. The shaft has been walled with concrete, to preserve it after thawing of the clay, and the tunnel will be lined with metal.

PROBLEMS WITH CLAY DEPOSITS

The chief drawback of such a clay deposit, however, may prove to be its low level of heat conductivity. Conceivably, heat would build up to unacceptable levels unless the high-level waste was stored above ground until relatively cool. Granite is a far better heat conductor.

Another drawback to clay deposition is the difficulty of building in a deep, high-pressure clay deposit that continually seeks to close any cavity.

Italy also has extensive clay deposits. It is able to study the long-term effects of heat on such material because some deposits, such as those near Pisa, were penetrated by volcanic material as much as 41 million years ago.

Some West European countries, such as Austria and Norway, have no operating nuclear plants, but they still must dispose of radioactive residues from industrial, medical and research applications.

While there appears to be general agreement among Europeans that low- and medium-level wastes will have to be disposed of on their own territories, some specialists are still concerned about public acceptance of high-level wastes, even in the deepest deposit of granite, salt, volcanic rock or clay. They would be happier if it was carried far away—to a midocean island or a sea-bed depository.

NUCLEAR WASTES: INNOVATIONS ABROAD: HOW RADIOACTIVE WASTES ARE RANKED FOR DISPOSAL

For long-term disposal, radioactive wastes are classified by Jean-Marie Lavie, director of the French disposal program, in three categories.

Category A consists of radioactive elements whose lifetimes do not exceed 30 years, plus trace amounts of long-lived forms that occur in all natural materials. Such wastes, of both low and medium radioactivity, are produced by nuclear power plants, fuel processing plants and industrial, medical and research centers using radioactive material. By volume, 99 percent of the wastes are in this category, but they contain less than 1 percent of the radiation.

Category B consists of wastes with lives longer than 30 years. Most of them emit alpha particles, similar to helium nuclei. These wastes are chiefly produced by plants preparing or recycling nuclear fuel.

Category C comprises all high-level, long-lived wastes. These come chiefly from plants that reprocess nuclear fuel to recover the residual uranium and plutonium. High-level wastes are so hot, from intensive radioactive decay, that most specialists believe they cannot be disposed of until the radiation has subsided after 20 to 50 years.

Such wastes consist largely of fission products, fragments produced by the splitting of uranium or plutonium atoms in a reactor. They also include superheavy elements created by neutron bombardment of the nuclear fuel and structural material made radioactive by such bombardment.

In depleted fuel rods the fission products may constitute less than 4 percent of the contents. Plutonium generataed in the reactor by exposure of uranium 238 to radiation may provide another 1 percent. In such a case more than 95 percent of the residue is uranium, most of it uranium 239, which cannot be used directly as fuel, plus a residue of fissionable uranium 235.

Mr. JOHNSTON. Mr. President, the Nuclear Waste Policy Act is one of the most important bills to come before the Senate this Congress. This bill establishes several very important programs to permit the Federal Government to assume its proper responsibilities with regard to the management of spent nuclear fuel and high-level radioactive waste. The responsibilities are not being fulfilled now, because the necessary congressional guidance has not been provided and, in certain important respects, the necessary legislative authority is not available.

The bill we have before us is far from perfect. Most of it is identical to the bill the House was finally able to pass in December. Under Senator McCLURE's determined leadership, we have attempted to modify that bill in only those ways that are absolutely necessary to make the policy work, so we can get Senate approval.

As my colleagues know, this is the second Congress in a row in which we find ourselves confronted with a difficult and complex House bill passed only at the very end of the second session. The Senate bills in each of these last two Congresses were passed early, providing plenty of time for the process to be completed. In the 96th Congress, time ran out on the proposed nuclear waste policy legislation. We are perilously close to the same fate this time around.

It would be a tragedy if we lose the legislation this time too. We can, of course, try again next year. But should we fail again this Congress, the message we will be sending to the public, to the embattled nuclear industry and to the Nation's electric utilities is not a good one. It suggests that the Federal Government simply does not intend to take up those reponsibilities that only the Federal Government can assume.

There are a number of important provisions in this bill. I do not intend to discuss all of them. I would like to talk about monitored retrievable storage (MRS).

MRS

Monitored retrievable storage of spent fuel and high-level radioactive waste means the long-term isolation of fuel and waste in facilities that permit continuous monitoring, ready retrieval and periodic maintenance, as necessary, of the canisters containing the fuel or waste. Basically, MRS facilities would be used to isolate the spent nuclear fuel and high-level radioactive waste without losing control of it.

In March 1979, I, along with Senators JACKSON and CHURCH, introduced to first comprehensive nuclear waste policy legislation to the seriously considered in any recent Congress. As we all know, in 1980, the Senate passed a bill that embodied the approach taken in that bill. In the 96th Congress MRS was the principal policy approved by the Senate for the long-term isolation of nuclear waste. Irreversible geologic disposal was the backup technology, which under the bill at that time was to be studied for later congressional evaluation before a specific site could be approved.

In this Congress, in the interest of gaining broad support for a comprehensive nuclear waste bill, we compromised with those who want to go in other directions than MRS with regard to nuclear waste. We have attempted to create "parallel" programs for MRS and for geologic disposal.

Under the present bill, facilities for the irreversible geological disposal of nuclear waste are authorized, while for MRS the bill provides for a proposal to Congress, subject to further congressional action, before any facility would be built.

If MRS is to become an alternative to the main program of irreversible geologic disposal of nuclear waste, we would at least like to know that the MRS approach will be "on the table" at approximately the same time that the Nation is seriously considering specific geological disposal sites. This timing could become especially important if, for some unforeseen reason, the repository program runs into any snag. In this eventuality, we would want the option to be available to move to MRS; if only on an interim basis.

To accomplish this it was essential that the House bill be amended. That bill provided that Congress would not even see the MRS proposal until 5 years after the enactment of the act—presumably in 1988. But this is well past the time when, under the provisions of the House bill, the commitment to a specific geological site would already be made.

The substitute that Senator McCLURE placed in the RECORD last Monday (amendment No. 4983) as modified by the McClure amendments to be offered today gets the timing right. Under the modified substitute, the first three geologic sites are chosen for characterization on January 1, 1985 and the final selection is made in March of 1987. In order to have timely availability of an MRS proposal, let alone any kind of fair comparison of the geologic and MRS approaches, the MRS proposal has to be available to Congress during this time period.

The MRS provision contained in the package of McClure amendments was negotiated with the principal sponsors of the House bill. The change proposed in the compromise substitute would bring the MRS proposal to Congress in June of 1985—2½ years after enactment of this act—after the selection of the first three candidate geologic sites, but with sufficient time for Congress to review its options and legislate before any final commitment to a specific geologic project is necessary. We would recede from original position in the Senate bill, S. 1662, of a 1-year deadline, and the House would recede from its 5-year deadline. A 2½-year deadline just about splits the difference.

Adoption of the timing proposed by the House for submission of the MRS proposal would reverse the position adopted by the Senate by overwhelming vote in two Congresses, including the present one, and render the option offered by the MRS technology unavailable for future implementation as an achievable, licensable and entirely adequate interim solution to the problem of long-term isolation of nuclear waste.

So the issue of timing is critical to the future availability of the MRS option. Whatever we decide about the process for considering MRS, it is essential that Congress have access to a detailed, site-specific evaluation of this option before an irreversible commitment to an irreversible geologic technology is made. If the assumptions implicit in both the House and Senate bill are correct about the time when some facility for long-term isolation of nuclear waste will be needed, it only makes sense to have the MRS option available, if only as a backup to the geologic option. In this regard, timing set forth in the negotiated compromise substitute is critical.

ALTERNATIVE SITES/DESIGNS

The compromise substitute explicitly provides for congressional access to information about alternatives with respect to MRS design and siting. The substitute requires that the MRS proposal to Congress include at least five alternative combinations of site and MRS design. Thus if one site is identified that accommodates two different MRS designs—for example, either the dry-well or tunnel-rack approaches already analyzed by DOE—then the requirements of the substitute would be satisfied if three other sites, each with its own preferred design, were also included in the proposal. Under this scenario, Congress would have four sites to review. Alternatively, DOE could comply with the requirements of the substitute by submitting five separate sites, each with its own site-specific conceptual design.

ONE SET OF DETAILED PLANS

It is our intent that the proposal offer alternatives with respect to sites and designs. However, the point of the proposal is to provide Congress with at least one set of site-specific plans, cost estimates and specifications. A complete set of detailed plans will be expensive. It is not our intent that the Secretary have a complete set of plans for each site/design combination he includes in the proposal. The purposes of Congress will be served if the proposal includes a complete set of plans for only one of these combinations, for example, the combination the Secretary thinks is preferable. For the other combinations, the proposal must only include a thorough conceptual design so that it is easy to see how the detailed site-specific plans might be drawn. However, we will not need to look at five detailed sets of plans to accomplish this.

Congress must act before any construction application could proceed. Congress would be free to reject, by failing to act, any of the recommendations DOE makes under the provisions

of the substitute. Even if Congress does act, the Nuclear Regulatory Commission could decline to issue a license for the facility chosen pursuant to congressional action.

NRC LICENSING

The licensing authority of the Commission with respect to a congressionally approved MRS facility is limited under the compromise substitute, as it was in the Senate bill. Equivalent and parallel limitations apply to the irreversible geological alternatives in the House bill.

If the Congress by law approves an MRS facility, that action is presumed, as it should be, to establish the need for the facility. A parallel provision also governs Commission licensing authority with respect to the first irreversible geologic disposal site.

Under the proposed substitute, there would be no limitation on NRC consideration of alternative sites, even though Congress, after reviewing the MRS proposal, authorizes a facility at a specific site. In making this change from the Senate bill, it is our intent to encourage the NRC and the drafters of any environmental impact statement for the Commission to consider a reasonable number of alternative sites for comparative purposes. It is not our intent to delay the program by endless analysis of alternative sites.

Any alternative design for an MRS facility may always be considered. This flexibility, implicit in the Senate-passed nuclear waste bill, is explicit in the negotiated compromise substitute.

The only aim of the MRS provision in the negotiated compromise substitute is to offer Congress the necessary detailed information to make, in a timely fashion, an intelligent choice between a site-specific irreversible geologic facility and a series of site-specific MRS facilities under which control of long-lived radioactive wastes is retained.

MRS IN EUROPE

Retention of control over these wastes is the key characteristic of the nuclear waste management strategies of the overwhelming majority of European countries that plan to rely on nuclear energy, in most cases, to a greater extent than the United States. The United Kingdom, France, and Sweden all have made a clear choice to store their nuclear wastes retrievably pending the availability of a more certain disposal option.

There are compelling technical reasons for this choice. Long-term storage of radioactive wastes permits use of passive thermal convection to cool the wastes before they are consigned to natural containment. The uncertainties of reliable, safe geologic isolation of wastes are dramatically reduced as the wastes cool.

More importantly, given the inevitable uncertainties of consigning hot wastes to isolation by nature alone, maintaining a monitoring capability and retrievability—that is, control—only makes good sense. As long as we control the waste, we control the tolerances of safety. Once we lose control of these wastes, as we must with the irreversible approach of geologic disposal, we are helpless to combat the uncertainties of geologic prediction. Based on what we know now, and on what we are likely to know in the foreseeable future, these uncertainties are simply too great.

The negotiated compromise substitute does not commit the United States to the MRS approach. It merely keeps this approach alive and available, should Congress, through normal legislative procedure, decide that it wants or needs to consider this option. The negotiated compromise substitute preserves all our options, and, if only for this reason, should be adopted.

Mr. HOLLINGS. Mr. President, it appears likely that the Senate will resolve an issue today that has been around for too long—sound legislation for the disposal of nuclear waste.

Mr. President, to be honest, there was a point last week when I thought the likelihood of a bill passing was minute, if not totally improbable. However, much to the credit of the managers of the bill, negotiations were kept open between the committee's staff and the respective offices that were directly concerned until an acceptable compromise was reached. The bill that stands before us today has gone a long way in addressing the concerns of many States by including important substantive and procedural safeguards. As a result of the modifications that have been made to the draft bill that was floated last week, I feel an acceptable compromise has been reached.

Mr. President, the bill that stands before us today clearly states four important principles.

First, utilities are primarily responsible for the interim storage of spent fuel and the Federal Government is responsible for permanent storage.

Second, an AFR is truly a last resort and before any facility is established a needs test must be met.

Third, a new AFR should not be constructed, and fourth, if such a facility ever is required, all States should be considered equally as candidates.

Mr. President, I have long been an opponent of a Federal AFR. On more than one occasion, I have stood on the floor of the Senate and argued that the interim storage of spent fuel is primarily the responsibility of the utilities and that temporary storage only delayed action on the construction of a much-needed permanent respository. Needless to say, I think all the Members of the Senate know that storage at Savannah River in South Carolina was perceived to be a temporary facility—such as we often describe any potential AFR—and that it has been there for over 30 years. One need not ask, therefore, why I have serious reservations about an AFR program. However, the bill before us today seems to say for once and for all that an AFR is truly a last resort and the Federal Government's responsibility is to establish a permanent, not a temporary, repository. Although it has taken 4 years of debate, we have finally come to clarify the lines of responsibility between the utilities and the Federal Government.

Mr. President, since 1977, time and time again proponents of an AFR have argued that the nuclear industry would come to a standstill if AFR's were not constructed. The truth of the matter is that the Department of Energy estimates of the need for AFR storage consistently have been revised downward. In the most recent estimate which I would like to include for the Record, that DOE shows that the earliest date when utilities will need additional storage capacity is in 1986 when they estimate there will be a shortfall of 8 metric tons.

I ask unanimous consent to have this estimate printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

However, even this estimate fails to take into account the potential contribution that new technologies can make to resolving this modest shortfall. To quote from a recent memorandum from the Office of Technology Assessment:

DOE's most recent analysis of spent fuel storage needs indicates that the amount of emergency storage capacity needed could be quite small, provided that it is indeed limited to cases in which utilities are experiencing unavoidable delays in their good-faith efforts to provide their own storage, and does not serve as relatively low cost, more convenient substitute for such storage. Specifically, DOE estimates that if applications for reracking of existing basins, and for transshipments to reactors that have additional storage capacity, are approved by the NRC in a timely manner, 400 metric tons of storage in new facilities would be needed through 1990 to ensure that every reactor maintains full core reserve. If this amount of storage in new facilities were made available, the 23 reactors expected to exhaust the maximum capacity of their existing basins by the end of 1990 would have time to construct and license a new water basin, a storage technology for which licensing should be quite easy. If the more flexible and less expensive dry storage technologies could be implemented sooner, which appears likely (particularly if DOE takes an active role in promoting their commercialization, as contemplated in these bills), this would further reduce—perhaps greatly—the need for any emergency backup storage capacity.

Mr. President, based on the OTA assessment, the DOE estimates, and the

needs test established in this bill, I remain confident that an AFR will never be required and that utilities will be able to take care of the need for interim storage of spent fuel on-site.

Mr. President, I ask unanimous consent that a telegram from Hon. Richard W. Riley, Governor of South Carolina, concerning an AFR be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

EXHIBIT 2

[Telegram]

Hon. ERNEST F. HOLLINGS,
U.S. Senate,
Washington, D.C. 20510

DEAR FRITZ: I am informed that, as a result of action by the U.S. House of Representatives, consideration of the National Nuclear Waste Policy Act will be before the U.S. Senate soon. I urge you to seriously consider the House version of this important legislation rather than that which was passed by the Senate.

I continue to strongly disagree with the provision for a program of Federal away-from-reactor spent fuel storage and a program for storage of commercial spent fuel from other countries. Both such programs are unwise and unnecessary. The legislation passed by the House at least has restrictions on such programs that require substantiation of need and requirements to involve State governments. Such restrictions are necessary and consideration should be given to possibly strengthening them.

A National Nuclear Waste Policy Act that will cause this country to move more expeditiously toward the goal of providing safe permanent disposal of spent fuel and other high-level nuclear waste is desperately needed. I encourage you to continue working toward this goal. If such a law is enacted, however, that contains authorization for new Federal programs for temporary storage, the State of South Carolina will resist those programs being implemented here.

If I can be of any assistance to you and your office in this matter, you know I stand ready to help.

Sincerely,

RICHARD W. RILEY,
Governor of South Carolina.

Mr. HOLLINGS. Mr. President, in conclusion, let me say that this bill closely resembles the House-passed bill and represents a sound compromise that protects the best interest of all States. While I still have some minor concerns, I feel that this bill represents the best possible nuclear waste management bill attainable and I intend to support this legislation.

Mr. JACKSON. Mr. President, for the last several years the Congress has been considering legislation aimed at establishing for the first time a comprehensive nuclear waste policy for the Federal Government. If the Senate and, subsequently, the House adopts the text of this substitute amendment to the House bill, we will finally have achieved this important legislative objective.

One of the major concerns that the American public has about the use of nuclear energy is what we will do with the nuclear wastes that inevitably result from its use. The American people have a right to expect the Federal Government to deal with this important issue in a definitive way. Only if we are able to convince them that their health and safety will be protected from nuclear waste will nuclear power have a future.

The biggest shortcoming of the Federal Government's efforts to date to dispose of nuclear waste has been an impression that shortcuts would be taken and that information about what was being done would not be available to those who want to follow closely the course of events. This legislation will address those concerns by establishing a set of clear and predictable procedures for the Department of Energy to follow.

The major political stumbling block for the Department of Energy in proceeding with a program to achieve the ultimate disposal of high-level waste or spent nuclear fuel is that States and Indian tribes currently have no legal right to participate in the process leading to the development of a repository. This bill provides the statutory authority for the Governor and the leadership of Indian tribes to participate fully in the entire process of repository development. The State and any affected Indian tribe will have full access to information, will have an opportunity to comment on all aspects of a repository development, and will in the end have an opportunity to stop the project if their objections have not been resolved until the Congress reviews their objections. The project will be terminated if one House of the Congress decides that the objections of the Governor have merit.

There are several aspects of this bill that I wish to comment on to explain the intent of the Congress. One important constraint on the away-from-reactor storage program is set forth in paragraph 2 of section 135(a), This provision is intended to preclude the use of a Federal site such as the DOE Hanford Reservation from being used for storing spent nuclear fuel for as long as the Hanford Reservation is a candidate site for a repository. Since the definition of candidate site includes the entire geologic formation of basalt underlying the Hanford Reservation, the words "within which there is a candidate site" are intended to totally preclude the Hanford Reservation. Since there are no known other candidate sites which fall within a Federal site, this provision only precludes the Hanford Reservation at the present time.

Logic of this action is quite simple. The Hanford Reservation already has more than 60 percent of the high-level wastes from the DOE military programs. Much of this waste is in a semi-liquid form in single-walled steel tanks which are increasingly worrisome as the years go by. The Hanford Reservation is one of the prime—if not the prime—sites for the first repository which I hope will be used to dispose of much of the high-level waste already stored there.

We already have a test and evaluation facility at the Hanford site which is a very publicly visible effort. To compound the public's concern by also using the Hanford Reservation for away-from-reactor storage is only likely to complicate the process for constructing a geologic repository there. We believe that this statutory prohibition is a part of the philosophy of this bill to insure that no one area of the country is required to share an inordinate portion of the Nation's nuclear waste problem. I would urge my colleagues to maintain this provision in the substitute text being proposed today.

Another feature of the House-passed bill which created a problem in the Senate was the requirement that the Secretary of Energy must build a test and evaluation facility under the provisions of title II. The case for building a new test and evaluation facility has simply not been made in testimony to the Congress. There are already two facilities at the Climax site on the Nevada test site and at Gable Mountain at the Hanford Reservation which should prove adequate for the facility to meet any programmatic needs.

The construction of another test and evaluation facility should not be undertaken unless it is clear ahead of time that it will render information that is crucial to the development of a

repository. The cost in dollars and potential public objection to one more set of activities at a repository site can only be justified if information for licensing the repository cannot otherwise be obtained. Thus, the House language has been modified to make the test and evaluation facility envisioned in title II a discretionary action of the Secretary rather than a mandated action.

Another feature of the House bill which I think is important to discuss is section 112(f) which was included through the efforts of Congressman MORRISON. This section allows activities currently underway at the Hanford Reservation on evaluating the basaltic formations there as a potential repository site. I decided not to oppose the continuation of this work because the efforts in other States will also be going forward under this bill, and no singling out of Hanford as "the repository site" will occur. Three sites must be characterized prior to a decision on one of the three to be recommended as the site for the first repository. However, I did insist that we insure that the Secretary bring his actions there into conformity with the other requirements of this act pertaining to public hearings and a cooperative agreement with the Governor within 1 year of the date of enactment of this act. We must not engage in activities where the public perception is that the State of Washington is being shortchanged vis-a-vis other States in overseeing the work at the Hanford Reservation.

I am also pleased to say that the provisions of the Senate bill requiring that a second repository on a specified time schedule following the first repository has been retained in the amendment. The 70,000 metric ton limit on disposal in the first repository will insure that a second repository is forthcoming. We must not make any one State feel that it is going to be the recipient of all of the Nation's nuclear waste. In fact, I believe that we will need more than two repositories and that they will be located on a regional basis as they are developed.

During the Senate's consideration of the nuclear waste legislation in 1981, I set forth, in an opening statement at a hearing, several civilian nuclear waste disposal issues which legislation would necessarily have to address. They were as follows:

We must resolve the problem of spent fuel storage by deciding when and if the Secretary of Energy can relieve a utility of spent fuel which is accumulating at operating nuclear powerplants.

We must address the question of whether spent fuel will be stored until a reprocessing capability is established in this country, or whether some spent fuel will be disposed of.

We must decide on how to achieve the proper balance in a schedule for disposal of high-level wastes between the competing objectives of protecting public health and safety and demonstrating that disposal of nuclear waste is possible.

We must structure the legislation in a way to insure that no individual State believes that they have been unfairly singled out as a site for a nuclear waste disposal facility.

We must provide an opportunity for interaction with the Secretary of Energy to insure that the concerns of the people of the affected State are properly addressed so as to maintain public acceptance of a disposal facility in that State.

We must also provide a funding mechanism for these activities where the full cost of the disposal of civilian nuclear waste is borne by those who derive the benefits from nuclear power, as opposed to taxing the general population.

I believe that the legislation in its present form adequately addresses each of these points. I urge my colleagues to support adoption of the amendment in its present form.

Mr. GORTON. Mr. President, the problem of high level nuclear waste disposal has been growing upon us since the beginnings of the nuclear age. First the defense nuclear programs and then the civilian nuclear power production created benefits for the American people. But they also created a byproduct, nuclear waste, which we have not known what to do with. Particularly with respect to the development of civilian nuclear power production, the waste problem has become a greater and greater impediment to the establishment of public acceptance and investor confidence in nuclear power as part of the necessary energy mix which is so important to this country's economic well-being.

The Congress has endeavored in several past Congresses to draft legislation which would orient and direct the Nation's civilian nuclear power industry in the solution to the nuclear waste problem. Last Congress, though the high level nuclear waste legislation under consideration did not pass, low level nuclear waste legislation did. It is time, in my opinion, that legislation establishing a national program, with Federal Government involvement, for the management and disposal of high level nuclear waste be enacted.

That legislation is before us today. It is the result of much debate and much compromise. Three Senate committees and seven committees of the House of Representatives have considered this legislation. Each has made its contribution.

The Senate counterpart to the bill now under consideration is S. 1662, passed by the Senate on April 29, 1982. That bill included several provisions which I advocated following a hearing on the bill held at Richmond, Wash., on October 31, 1981. Generally, those provisions required the planning and development of more than one high level radioactive waste repository located so as to serve various regions of the country, required the Secretary of the Department of the Energy to perform full environmental analysis of the siting of any repository, and required the Federal Government to compensate the State or local governments for the expenses of determining the appropriateness of sites for repositories as well as for the economic impact of a repository's construction and operation.

H.R. 7187, the bill now before us, contains much of the language of S. 1662. But there are some ways in which H.R. 7187 fails to accomplish the objectives which the Senate provisions I earlier advocated were designed to accomplish. In particular, and most significantly, H.R. 7187 fails to establish a firm plan and schedule for the siting of more than one repository. That deficiency is, however, as I understand it, cured by amendments offered in the Senate today and currently under consideration.

Throughout the discussion on high level nuclear waste legislation during this Congress, there has been a common misconception. That misconception is that the people of the State of Washington "want a repository located in Washington State." To be fair, this is not the case.

The State of Washington is a State of great diversity; geographically, climatologically, politically. The Cascade Mountain Range, bisecting the State into eastern and western regions, separates the densely populated Puget Sound region from the more sparsely populated agricultural and arid lands of eastern Washington. Were the disposal of nuclear waste in the State of Washington put to the people of the State of Washington as a general proposition, the overwhelming majority would answer no. Indeed, a State initiative, Initiative 383, which would have totally banned the disposal of nuclear waste generated outside of the State of Washington passed the electorate several years ago by a majority of 73 percent of the voters.

Notwithstanding this, the people living in and around Richland, Wash., in southeast central Washington, are receptive to the disposal of nuclear waste at the Hanford Nuclear Reservation near there. This is so, I believe, because of the many years of participation which those persons have had in the development of the nuclear industry in America and because of their economic dependence on the industry. A majority of these individuals did not

support the initiative mentioned earlier.

I have repeatedly taken the position that the nuclear waste disposal problem is detrimental to the energy independence of this Nation. Resolution of the problem is, therefore, a national responsibility from which no State should be allowed to remove itself unilaterally. I do not believe, however, that any State should be called upon to resolve this problem on its own. No one State should be called upon to bear the environmental, economic, and other impacts of nuclear waste disposal while other States bear none. In the case of the State of Washington, it is my opinion, that it should be asked to do no more than provide nuclear disposal capacity adequate to dispose of those wastes which are generated within a range of distance in which the transportation risks can be minimized. Other States in other regions of the country should be responsible to provide disposal capacity for nuclear waste generated within similar ranges of those disposal facilities. We should not be planning to move high level nuclear waste across the continent if we can avoid it. We should not be looking to a State on one side of the continent to provide disposal capacity for waste generated on the other.

I believe that the provisions of the Senate bill which are added by amendment to the bill now before us operate to accomplish the policy which I have above set forth, and I consequently support them.

There is one point of clarification which I would like to make regarding the application of the National Environmental Policy Act to the siting of high level nuclear waste repositories. Both the Senate and House bills contain provisions which limit the application of NEPA. I believe that this is appropriate because of the significant amount of congressional direction in the nature and timing of the facilities which would be developed under these bills, and because of the requirement that any facility to be developed be in conformance with guidelines which must respect environmental values. More specifically, section 112(e) and section 113(d) of H.R. 7187 provide that all of the President's or Secretary's actions taken pursuant to section 112 and section 113, respectively, are "preliminary decisionmaking activities," and that such actions do not require the preparation of an environmental impact statement pursuant to section 102(2)(C) of the National Environmental Policy Act.

Because section 112(e) and section 113(d) were altered somewhat through the amendment process, there is concern that the words "preliminary decisionmaking activity" have been left dangling, and could therefore be construed to apply in some non-NEPA context, for example the Administrative Procedures Act. It is my opinion that the words "preliminary decisionmaking activity" are NEPA words, having been utilized so greatly in judicial opinions construing that law. Those do not, in my opinion, bear on the determination whether an action is "final" under the Administrative Procedures Act. Neither do those words limit any other judicial remedies outside of NEPA.

I commend the sponsors of this legislation for bringing this complex issue to a well-thought legislative conclusion. I encourage the House of Representatives to consider the Senate's amendments favorably and to send H.R. 7187 to the President for signature at the earliest possible convenience of the House of Representatives.

I encourage all Members of the Senate to support the amendments offered.

Mr. GLENN. Mr. President, in a few moments we will be taking final action on long pending, and much needed legislation to establish a Federal program for the permanent disposal of the wastes from our nuclear powerplants and nuclear defense activities.

One of the central features of this bill is its attempt to harmonize the strong reservations of potential nuclear waste repository States with the interests of the Federal Government, which must deal with the national problem of finding a final resting place for the products of U.S. nuclear activities despite the fact that few States, if any, would welcome the establishment of a nuclear waste repository within their borders. The approach taken by H.R. 3809, as a result of amendment introduced by Senator FOXMIRE, is to provide a statutory opportunity for a host State to object to a proposed repository. This objection would bar construction of the facility unless overridden by both Houses of Congress. I believe this is an effective and evenhanded approach for fairly balancing the interests of all parties. It will give the States—whose rights to participate in the nuclear waste repository process have generally lacked statutory footing—new bargaining power vis-a-vis the Federal Government during the period when the particular technical, environmental, and health and safety features of the facility are being developed; at the same time it will provide a mechanism for the Federal Government to vindicate the overall national interest in building a repository if an impasse is reached in these negotiations.

I am particularly pleased to see this mechanism embodied in law since it was first introduced by Senator PERCY and myself in the 96th Congress as part of the Nuclear Waste Management Reorganization Act of 1979, legislation that we subsequently reintroduced as S. 95 in the 97th Congress. I believe it is fair to say that our active early support for this evenhanded concept for resolving State-Federal disputes began the public dialog on this approach and assisted substantially in gaining for it the widespread support it now enjoys in the Congress and among State and local organizations.

I would also like to highlight another valuable element in this bill, the "monitored, retrievable storage" concept. It has been my view for several years that serious uncertainties remain as to our ability to dispose of nuclear waste in permanently mined repositories in a completely failsafe way, and I think it is widely accepted that more research will still be needed in this sphere. Quite possibly, our level of confidence will be greatly enhanced by the time we are ready to emplace nuclear materials in such a facility. On the other hand, a long-term monitored facility would have many advantages as a parallel approach: Additional time would be available for resolving all outstanding technical issues surrounding the permanent geologic repository option; wastes could be cooled in an "MRS" for several decades prior to permanent burial, reducing heat/radiation stresses in any mined facility; a decision on whether to extract plutonium from spent nuclear fuel for further use could be deferred until clearly justified on economic grounds and until adequate methods for safeguarding this material were in hand; and finally, should any leaks or other loss of integrity occur at an MRS, it could be readily fixed—or the wastes removed to another site—actions that would be far more difficult, if not impossible, once a permanent repository were sealed. The bill, by requiring a study of the MRS concept keeps this option alive and available for future congressional consideration, while at the same time maintains necessary momentum toward solving the disposal problem on a permanent basis via the mined repository route.

Mr. KASTEN. Mr. President, I support the right of States to have a veto over the Department of Energy's nuclear waste siting decisions. The Senate-passed version of this would only allow a State's objection to a repository siting decision to stand if either the House or the Senate passes a resolution upholding that objection. Such a process is inadequate. Nuclear waste disposal decisions are far too important to allow an override of State and local concerns by congressional inaction.

The State of Wisconsin may be a potential future home for a permanent nuclear waste repository. The stable granite bedrock beneath scenic northern Wisconsin has been targeted by the Department of Energy for further study as a burial site, and the citizens of Wisconsin have a right to be con-

cerned over the role the State of Wisconsin will be given in the final decision.

Justified or not, there is a perception by States that the Federal Government cannot be counted on to keep its word on radioactive waste management programs. One only has to look at the problems the State of New Mexico has had with the waste isolation pilot project to realize a similar situation could occur anywhere. In fact, in the State of Wisconsin, the Governor's office has been having a great deal of trouble with the Department of Energy over receiving information as to what the Department is doing in northern Wisconsin. The Department of Energy cannot be allowed to build a disposal facility without giving the States a meaningful role in the siting and construction decisions.

A long-range nuclear waste disposal program is critical to our Nation's energy future, and the proper role to our Nation's energy future, and the proper role of States in the siting of disposal facilities is critical to the success of this program. The only successful nuclear waste disposal program will be one which matches national policy needs with local citizen concerns. I am proud to join today with Senator PROXMIRE in cosponsoring new language to this legislation which gives States a strong role in nuclear waste siting decisions.

Mr. STAFFORD. I wonder if I might inquire of the distinguished Senator from Wyoming about a particular issue. As the Senator recalls, the bill passed by the Senate, S. 1662, included a provision stating that nothing in that act precluded any recognized right of any State or Indian tribe under existing law with respect to such a repository or monitored, retrievable storage facility. That provison, as I understand it, was intended to simply reiterate what would have otherwise been true under existing law. That provision was not included in the substitute amendment offered here today. Am I to understand that to mean that the failure to include that provision suggests that this act would preclude recognized rights of States or Indian tribes under existing law with respect to either a monitored retrievable storage facility or a geologic repository.

Mr. SIMPSON. The failure to include this provision of the original Senate bill should not be so interpreted. It was our view that existing law makes it very clear that recognized rights of States or Indian tribes to participate in either an MRS facility or a geologic repository would not be affected by this bill. Stated differently, the substitute amendment should not be interpreted to preclude the right of a State or Indian tribe to excercise any right recognized under existing law with respect to a MRS facility or a geologic repository.

Mr. STAFFORD. I thank the Senator for his assurances.

Mr. SIMPSON. Mr. President, I would like to make one additional comment about the population criterion contained in this bill. We have provided in this bill that, in deciding where to locate a geologic repository, one of the factors that should be considered in making that determination is population. The specific language in this bill states that the Secretary shall not locate the surface facility of a repository in a highly populated area or adjacent to an area 1 mile by 1 mile having a population of not less than 1,000 individuals.

I want to emphasize that, in addition to this population criterion, there are a number of other criteria set forth in this bill that the Secretary would examine in deciding where to locate a repository, including such things as geologic media, location of valuable natural resources, hydrology, geophysics, seismic activity, atomic energy defense activities, proximity to water supplies, the effect upon the rights of users of water, proximity to sites where radioactive waste is generated, transportation, and others. All of these criteria would be examined by the Secretary under this bill, and the population criterion is simply one of the many criteria that must be factored into the Secretary's decision.

Mr. SCHMITT. Mr. President, I rise in support of the nuclear waste bill. Its enactment in effect will resolve the question of safe disposal of nuclear waste by clearing the path for implementation of appropriate waste disposal technology.

Mr. President, the experts assure us that nuclear waste can be safely disposed. As an additional assurance, the legislation before us provides for EPA standards and NRC technical requirements and criteria relating to that disposal. As provided under the Atomic Energy Act, these standards, requirements, and criteria must protect the public health and safety.

This is not to say, however, that EPA and NRC are authorized to impose any standard or requirement, no matter how burdensome or arbitrary. Obviously EPA and NRC actions must be reasonable and well supported. It would be a waste of society's resources, and an unwarranted imposition on taxpayers and private industry, if the agencies were to impose costly requirements designed to address de minimis hazards. Similarly, it makes no sense to impose requirements whose burdens exceed their projected benefits.

There are certain methodologies which must be employed if NRC and EPA are to discharge their duty to develop reasonable, nonarbitrary requirements. One of the most important of these methodologies is comparative risk analysis. It is well established that, to be meaningful, an assessment of the risks from exposure to radiation must be performed in the context of other known risks. If a projected risk is insignificant in comparison to other known risks which we commonly incur, it makes no sense to regulate it. Similarly, if a projected risk from exposures associated with an Atomic Energy Act activity is only a relatively small increment of background exposures, then imposition of additional requirements seems unwarranted.

Mr. President, I am unaware of any valid argument against use of comparative risk analysis. Given the fact that society's resources are limited, the only rational objective for regulatory agencies is to minimize overall societal risks given the resources available. This can only be done by devoting our risk reduction efforts to those activities where the efforts have the most impact. Identification of those activities obviously requires risk comparisons.

Furthermore, consideration of comparative risks is essential to avoid increasing overall societal risks. If unusually high demands are placed on particular activities, such as atomic energy activities, society will be predisposed against that activity and in favor of more risky alternatives. We will be worse off. A vignette related by Prof. David Okrent is particularly instructive here:

> In 1957 I designed my own passive solar home in northern Illinois. It was very well insulated and had the tightest storm windows available. Not till 20 years later did I become aware that I had thereby been exposing my family to increased indoor air pollution. I have learned to be skeptical about risk. I am particularly skeptical of those who advocate a particular technology as benign, or attack a technology as too risky without presenting a detailed, quantitative risk evaluation, without making a choice among feasible alternatives, and without placing the risks in some broader societal perspective." [1]

Another essential tool in formulating standards is balancing. No one seriously disputes that regulations should not be imposed if they will impose burdens which bear no reasonable relationship to their costs. It makes little sense to spend a billion dollars to avert some relatively remote and largely hypothetical hazard. Balancing of costs and benefits has long been practices under the Atomic Energy Act, and this practice obviously should continue.

Mr. President, I would add one final consideration. The regulatory agencies should base their requirements and standards on the best available scientific information and analysis. In areas of uncertainty, they should be sensi-

[1] Comment on Societal Risk, Science 208:372, 375 n.2 (1980).

tive to the warning of the National Council on Radiation Protection, in its Report No. 43, that undue concern or over conservatism with regard to radiation is as problematic as lack of adequate concern or precautions.[2] In all cases, regulations should be directed to a balanced minimization of actual hazards, and not to a counterproductive crusade against imagined, remote, or unsupported risks and fears.

Mr. MITCHELL. Mr. President, the Congress is once again on the brink of acting on legislation to establish a plan for the disposal of nuclear wastes.

During the 2d session of the 97th Congress, both the Senate and House have passed nuclear waste bills. On April 29, 1982, the Senate passed S. 1662, which was a result of efforts by three committees—the Senate Environment Committee, of which I am a member, and the Senate Energy and Armed Services Committees. The House on December 2 passed H.R. 3809, the result of seven committees' work. Instead of going to a House-Senate conference, and in the hope of expediting possible joint action, the Senate Energy Committee has introduced a substitute amendment to H.R. 3809.

The drive behind the efforts to bring up and pass nuclear waste legislation is based on one steadfast concern: that for too long, Congress has failed to act on a final, comprehensive solution to the problem of nuclear waste. Our total inability to act serves no one: The increasing mass of radioactive wastes continues to imperil our environment, and to fundamentally question the continued operation of all nuclear powerplants.

The saga of this Nation's inaction is almost unbelievable. Our current delemma reflects the illogical approach with which this Nation commenced with nuclear power development four decades ago.

Since 1942, when the first experimental weapons were produced, the byproducts of the nuclear age have been piling up in our Nation. With the startup of the first commercial nuclear plant in 1957, both the quantity of waste and the speed with which it accumulated accelerated rapidly.

For four decades, our energy policy and our military strategy have helped produce nuclear wastes as a byproduct of the generation of electricity and the maintenance of a defense capability. But neither our energy policy nor our military strategy have taken account of the disposition of these wastes. Both Federal policies virtually ignored their inevitable adverse results.

The ramifications of our neglect are manifold. Over 8,000 tons of spent fuel have already piled up at nuclear powerplants across the country. And, as a New York Times article of May 2, 1982, reported, the problem will only get worse:

> A recent survey by Science News estimates that by the year 2000, waste from commercial nuclear power plants will have increased from its current level of 104,000 cubic feet to more than nine times that amount. From weapons production, the nation has already amassed about 77 million gallons of high-level liquid waste created when spent fuel is reprocessed to remove uranium and plutonium. Wastes such as plutonium, neptunium and americium—produced in the reprocessing of nuclear fuel and the production of nuclear bombs—account for another 2 million cubic feet.

The four-decade-old pile of nuclear wastes, which will increase due to the continued operation of civilian and military reactors, is forceful proof of both our inaction and of the need to act immediately.

Given the serious need for congressional action, it is imperative that we forge a national nuclear waste policy that will meet certain basic objectives. Any solution to the nuclear waste dilemma should: One, provide full participation by States and ordinary citizens; two, preserve the integrity and full scope of the NRC licensing review and environmental analysis under the National Environmental Policy Act; three, focus on the long-term solution of permanent geological waste disposal, and utilize temporary methods of storage only when such steps are strictly necessary; and four, require a consistent and long-term commitment by the Federal Government to the resolution of the nuclear waste problem.

The legislation before the Senate is testimony to extensive efforts to solve the nuclear waste problem in the most reasonable manner available. But the legislation is also testimony to the politics of nuclear waste: Each of the possible four methods of storage will be available for purusit by DOE, and there are a number of clauses and provisions which attempt to prohibit the siting of certain methods in certain regions of the country. Not surprisingly, the legislation lacks a clear and singular direction.

I have reservations about a number of provisions in particular.

First, away-from-reactor (AFR) provision. The substitute amendment before the Senate severely restricts the use of the AFR. I would strongly prefer a prohibition against the construction of a federally mandated and owned AFR. I believe that an AFR is the clear responsibility of the private sector; that a Federal AFR would reduce the incentive to find a permanent solution; and that any AFR would dramatically increase the near-term transportation and handling risks.

Second, the title to waste substitute amendment allows DOE to take title to the waste at the plant gate, and provides that DOE will be responsible for the transportation of these wastes from the plant to the AFR. I disagree with these provisions, and believe that it is the responsibility of the utilities and not the Federal Government to transfer these wastes.

Third, monitored retrievable storage (MRS) of nuclear waste. The substitute amendment required that a DOE proposal for an MRS be submitted in 2½ years, and also calls for the exemptions in the environmental impact statement and NRC licensing review of the MRS proposal. The MRS concept represents a seriously diversionary mode of storage, the need for which has yet to be determined. Proponents of the MRS want it on equal footing with the geological repository. I believe just the opposite approach is necessary. Both DOE and Congress need more time to study the MRS concept, and it is critical that any MRS proposal not be allowed to compete head to head with the more important and urgent task of permanent waste disposal. I also oppose exemptions in the EIS analysis and NRC licensing review of the MRS.

Fourth, the test and evaluation (T&E) facility. The substitute amendment authorizes a T&E facility. I favor the original Senate language, which required DOE to study the need for a T&E facility before congressional authorization. DOE should study the need for such an additional temporary, diversionary program, the cost of which exceed $250 million, before and not after congressional authorization.

Fifth, the environmental impact statement. Under the substitute amendment, only an environmental assessment need be submitted with each of the three proposed repository sites recommended by the Department of Energy. In a decision of this magnitude—the disposal of wastes for 10,000 years to provide the required degree of waste isolation under EPA criteria—a full EIS should be completed for each candidate site. Only a full EIS will provide the fundamental and essential information DOE, and in turn the Congress and the American public, need to evaluate each candidate site.

Those concerns represent my major reservations with the substitute amendment. There are, however, a number of issues which provide important balance to the bill as a whole and deal directly with issues involving citizen and State participation. Two of these issues stand out as areas where significant improvements were made in the course of Senate consideration.

One. Hybrid hearing procedure. The substitute amendment provides for a hybrid hearing, essentially an abbreviated, legislative-type hearing, to precede the normal adjudicatory hearing, as a way of speeding up the licensing of onsite storage expansion. I oppose shortcuts in the full NRC licensing

[2] Review of the Current State of Radiation Protection Philosophy (NCRP Report No. 43) 4 (1975).

process by the use of this new, modified hearing procedure. I offered an amendment which was adopted that will prohibit the use of the abbreviated hearing procedure when an application to the NRC proposes the use of a new technology not previously approved for use at any nuclear powerplant by the Commission. Two virtual experiments should not be allowed to occur simultaneously. My amendment will guarantee greater public participation and scrutiny in the NRC hearing process.

Two. States rights. The substitute amendment provides that a State's objection to a proposed final repository site will stand only if a single House of Congress votes to sustain the objection.

During Senate consideration of S. 1662, I voted against an amendment that would have provided States with an absolute veto of a proposed repository site. Clearly such a provision would guarantee 50 State vetos, while the dilemma of permanent waste storage would remain unresolved.

I cosponsored an amendment, which was adopted, which requires that a State's objection would stand unless both Houses of Congress vote to override the objection.

The difference between the two provisions is, on the surface, a slim one. But there is a crucial difference, and it centers on where the burden of proof lies once a State registers an objection. The Energy Committee substitute amendment places the burden of proof on the State. The amendment, on the other hand, places the burden of proof where it belongs—with the Department of Energy. The amendment will insure that a State's objection is dealt with fairly.

Although far from perfect, the bill represents a critical first step toward addressing the problem of nuclear waste. I will support the bill, with serious reservations, because nuclear wastes are a problem which it is our positive obligation to resolve. We cannot allow it to be ignored, postponed, or put off until our children are faced with it. We are the generation which has developed nuclear power. We are the generation whose responsibility it is to cope with the byproducts of that power.

A New Yorker article of October 19, 1981, described our nuclear waste dilemma as "a national legacy of more than 3 billion cubic feet of radwaste." We have looked into the face of that legacy, hesitated, and stepped back too many times. It is time we address the legacy in the most reasonable and sound approach available to us.

The PRESIDING OFFICER. The bill is open to further amendment. If there is no further amendment to be offered, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 3809) was read the third time, and passed.

Mr. McCLURE. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SURFACE TRANSPORTATION ACT OF 1982

Mr. BAKER. Madam President, what is the pending question?

The PRESIDING OFFICER. The pending question is the substitute amendment to H.R. 6211.

Mr. BAKER. Madam President, may we have order?

The PRESIDING OFFICER. There should be order in the Chamber so we can hear what the pending business is before the Senate.

Mr. BAKER. Madam President, I yield the floor.

Mr. BRADLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

OPERATING SUBSIDIES

Mr. BRADLEY. Madam President, I would like to engage in a colloquy with the distinguished Senator from Utah concerning the issues of operating subsidies in this bill before the Senate at this time. The issue of operating subsidies is an important one for many sections of the country and many types of mass transit.

In the present bill, these subsidies are reduced 20 percent. The original proposal was to reduce the subsidies also 20 percent, followed by reductions of 10 percent and another 10 percent. In addition, this bill provides for an exchange of a 3-to-2 ratio of capital assistance for operating assistance.

I had an amendment that would have made that exchange on a 1-to-1 basis. The Senator from Utah had an amendment which would have increased the cuts in operating assistance by 10 percent in each of the next 2 years, total of 20 percent further reduction.

What I would like to ask the Senators is, If I withdraw my amendment would the Senator withdraw his amendment?

Mr. GARN. I would be happy to respond to the distinguished Senator from New Jersey. But before I do let me give the Senate a little background on this mass transit legislation, which in this part of the bill is under the jurisdiction of the Banking Committee.

Unfortunately, we have not had an authorizing bill for 2 years because of a lot of disagreements. And so I am very pleased that we were finally able to get to a point where, with Senator D'Amato and Senator Lugar and others, we could come to a very carefully constructed bill, like walking on thin ice or on eggs, to get to the point where we could have an agreement that would allow the passage of a bill. And that was the result of 2 years of effort, as I have stated.

Now my own personal opinion, as a former mayor, and the administration's position was that operating subsidies were getting out of hand and they should be cut. As the Senator mentioned there was a 20-percent cut in the bill. I desired, along with the administration, to have a progression of those cuts to the second and third years of the bill that would have taken an additional 20 percent for a total of 40 percent, and I have an amendment that had been entered more than a week ago to do that.

But, having given that background, I think at this point in time, this late in the lameduck session, it is far more important that we have a mass transit bill than to lose it at this point. So I would be willing, on the assurance that the Senator from New Jersey would withdraw his amendment and not offer it, I would not offer the amendment for the additional cuts in mass transit. we do have to go to conference with the House. This would give us some flexibility in how we deal with the House. Obviously the bills are not exactly the same.

But I did want to assure the Senator that my opinion is still the same. We differ on the nature of the operating subsidies. I have not changed my mind. But, being pragmatic and practical at this stage in the legislative session, it is much, much better that we have a bill. So I would withdraw my amendment if the Senator withdrew his.

Mr. BRADLEY. Let me ask the Senator one further question. As I understand it, the bill provides a sort of a block grant for mass transit, is that true?

Mr. GARN. That is correct.

Mr. BRADLEY. Is it not consistent with the administration's general philosophy to return the basic decisions of how to spend moneys within a block grant to the local or State authority?

Mr. GARN. That is correct.

Mr. BRADLEY. I would then hope that the Senator, consistent with this philosophy, would look at the conference with the idea of implementing that philosophy, which is—in States such as New Jersey where, over the years, we have expended sizable dollars for capital investment in our mass

transit system—that the Governor might not desire more money for capital investment but that he indeed needs to have sufficient operating assistance so as to keep the system functioning and to keep the fares low enough so that working people actually have an option of using mass transit. It is kind of paradoxical that on the one hand we are spending money in this bill for highways and on the other hand we are in effect reducing operating subsidies which will put greater burdens on those highays as they push more and more people off the mass transit system.

So I would hope that the conference would give some consideration to the need for this flexibility, and indeed my amendment provided for that, in allowing States and municipalities to exchange a dollar of capital assistance for a dollar of operating assistance instead of what the present bill is $3 of capital assistance for $2 of operating assistance. I would hope that there might be in the conference a possible positive compromise.

Would the Senator have a comment about that?

Mr. GARN. I would just make the comment to the Senator from New Jersey that I am not in a position to give any guarantees or any promises. I am only one member of that conference and cannot do so. I have expressed my own personal philosophy, but I do not think I can go any further than to say there is some flexibility and there will have to be some give and take in the conference to achieve a bill that can be passed and sent to the President.

I cannot give any specific guarantees other than to look at those trade offs as we go into conference.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Madam President, I have listened with interest to the colloquy between my distinguished colleague from New Jersey and my distinguished friend from Utah. There is no question about mass transit. Bringing back to mind how this whole program started, that money would be paid by the Federal Government only for capital expenditures. We have moved to the point of saying to the local communities, "You can get more and more of the Federal dollars for operating expenses."

Well, there may be a good case made for that. I am not one who feels so strongly that that is right or wrong. But I know there is one subject about which I feel very strongly, and that is the fact that throughout this Nation the administrators of the transit authorities—I do not care whether it is in San Francisco, Chicago, Washington, or wherever—are becoming the highest paid public executives in the Nation. They are getting more money than the mayors of their communities. They are getting more money than the Governors of their States. They are taking trips all over the Nation into the most luxurious areas, because they know that the Federal Government is picking up a very substantial portion of that tab.

I think it is high time that the Congress provide some limits that officials working for regional transit authorities, mass transit authorities, not be permitted to receive a salary in excess of the highest paid official in the community in which they are operating.

I think maybe we ought to send the message as well that it is time for them to cut back on their fancy vacations to all the luxurious areas of this Nation.

I know it is happening in my own State, and I am quite certain, from what I have heard, that it is happening in other States as well.

What happens is that there is an independent board created. They treat themselves well and their executives well.

We here in Washington are always criticized for being big spenders, but I hope we will send word back to those who operate the mass transit systems of the country that they, too, should not be big spenders, and that they ought to be concerned about those dollars. They are public dollars whether they are Federal or local in nature.

Mr. GARN. I agree with much of what the Senator from Ohio has said. But I think he is also well aware that this subject is outside the area that the Senator from New Jersey and I are talking about. I do agree, and it is one of my reasons that I have had concerns about operating subsidies, with much of what the Senator has said. Operating subsidies are not nearly as controlled as the capital subsidies.

Mr. METZENBAUM. I am not certain that it is beyond the purview of that colloquy. At this point, I would certainly guess that an amendment would be in order that none of the funds could be expended in connection with a mass transit system whose officials receive a salary higher than any public official in the area in which that transit association operates.

I believe that is a subject, frankly, to which the committee should give its attention. I believe it more appropriately comes as considered action on the part of a committee after making due deliberations.

Absent that, I want to say now that the next time this subject comes to the floor, I will have an amendment drafted to that effect. I would much prefer that the committee charged with the responsibility would come forth with its own effort to deal with this problem rather than to handle it by a floor amendment.

Mr. GARN. I do not want to prolong this, but I would suggest that the Senator from Ohio in drafting his amendment be very careful how it is worded. I remember as a mayor serving in the National League of Cities where the mayor of Phoenix, Ariz., made $6,000 a year. You have to be very concerned about this, so you are not limiting it to the highest ranking official in some cities because some of them are very poorly paid. I mean that suggestion very seriously.

Mr. METZENBAUM. Any language I would have would provide for the highest paid public official, whether the mayor or anyone else. Certainly, somebody in Phoenix, Ariz., gets paid more than $6,000 a year. I think we can draft that language.

That is one of the reasons that I am not prepared at this point to offer an amendment to this bill, but I would hope that the Senator from Utah would keep it uppermost in his mind and come forth with some sort of an amendment. It would be helpful to have consultations, of course, with all those involved in this industry.

Mr. GARN. I thank the Senator.

Mr. SYMMS. If the Senator will yield, I want to say to my colleague that some of us in the West have usually opposed operating subsidies based on philosophical reasons. The fact is that what the Senator has mentioned has happened under the present system. It is not just places like New Jersey or in New York City. In many small rural communities all across America cities have already purchased new equipment for their transit systems.

I would say to the chairman there has to be some flexibility, and no one knows better than him as a former mayor. We end up where you have small communities wanting to buy new buses every year because that is the only place they can get the Federal money for their transit system. In many cases, all they need do is repair the equipment they have to operate their system.

There is a place, I think, for some flexibility in this but I would hope we would not get carried away too far so that we lose the demand for efficiency.

Mr. GARN. I will say to the Senator from Idaho that last week in the consideration of this bill there was an amendment by the Senator from New Hampshire (Mr. HUMPHREY) that gave more flexibility in shifting funds from operating to capital to help the smaller cities that do not have the problems that some of the bigger States have. That amendment was agreed to. There is more flexibility in this bill than there was prior.

Mr. SYMMS. I thank the Senator.

Mr. BRADLEY. Let me say to the Senator from Idaho that there are

many cities, such as Phoenix, Fort Lauderdale, and so on, that have as much as 30 percent of their transit budgets taken up with operating assistance. In my State of New Jersey it is 13 percent. This is clearly an effort that will be made. I will make it on the floor of the Senate and I am sure the Banking Committee over the next year or so will follow it, attempting to bring this issue before the Senate as a whole, and to show, as the Senator from Idaho has clearly stated, that this is an issue that affects small communities and medium-size communities in the Southeast, Southwest, and the Northwest, as well as the more mature mass transit systems in the Northeast and upper Midwest.

I thank the Senator for his comments.

If the Senator from Utah is prepared, I am prepared to withhold my amendment and will do so.

Mr. GARN. I withhold my amendment.

Mr. BRADLEY. I withhold my amendment.

AMENDMENT NO. 5043

(Purpose: To allow certain vehicles using the Interstate System reasonable access to certain locations in proximity to such system)

Mr. BUMPERS. Madam President, I call up amendment No. 5043.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS) proposes amendment No. 5043.

At the appropriate place in the Baker amendment (printed No. 4998) insert the following new section:

REASONABLE ACCESS

SEC. . No funds authorized to be appropriated for any fiscal year under section 108(b) of the Federal-Aid Highway Act of 1956 shall be apportioned to any State which enacts or enforces any law denying reasonable access for commercial motor vehicles using, pursuant to title 23, United States Code, the Interstate System, national defense highways, and any other qualifying Federal-aid highways designated by the Secretary of Transportation, to the Federal-aid primary system and locations for loading and unloading, including terminals and facilities for fuel, food, repairs, and rest.

Mr. BUMPERS. Madam President, I have talked to the floor managers on both sides about this amendment. The amendment is designed to do one simple thing. That is, it makes certain that people in my State, the manufacturers and producers, are not deprived of the use of the interstate. It is not at all certain under the bill right now, though there is a provision under title 4 which says that reasonable access to the interstate shall not be denied. But that is under the safety provision. It does not cover the whole bill.

I am not very happy about this bill overriding our law which limits trucks to 73,000 pounds. We have had the 80,000-pound truck weight fight in our State for a millennium. I do not think it is very becoming of the Federal Government to override our law on that, but they are doing it. If they are going to do it, under the existing law, a shipper in California can ship to North Carolina and come all the way across 350 miles of Arkansas I-40, but people in my State who live within a mile of our side of the interstate might not be allowed to get to the interstate, because this does not provide that they can get there over the primary and secondary road system. I know the authors of the bill never intended such an untoward effect. My amendment will redress that.

Mr. STAFFORD. Madam President, I say first to my good friend, the most able Senator from Arkansas, that the condition in which he finds himself in respect to the 73,000 pounds is not something that the Senator from Vermont personally would have had happen. It is something that the Committee on Environment and Public Works collectively voted to do.

The distinguished Senator mentioned reasonable access, which has prevailed in the State of Vermont. I assume the Senator's amendment would codify "reasonable access" to the Interstate System. Am I correct in that?

Mr. BUMPERS. The Senator is correct. It simply says no funds may be appropriated. It does not say to deny access.

Mr. STAFFORD. We have reviewed the amendment, and I am prepared to accept it for the majority.

Mr. ROBERT C. BYRD. Madam President, I am advised that the distinguished senior Senator from West Virginia (Mr. RANDOLPH), who is the ranking member, has no problem with the arrangement here. I shall not pose any objection.

Mr. STAFFORD. In that event, Madam President, we are prepared to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 5043) was agreed to.

Mr. STAFFORD. I move to reconsider the vote by which the amendment was agreed to.

Mr. BUMPERS. I move to lay that amendment on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 5190

(Purpose: To further restrict the Secretary's authority to make mass transit grants under this Act)

Mr. BUMPERS. Madam President, I call up my amendment No. 5190 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS) proposes an amendment numbered 5190.

Mr. BUMPERS. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in title III of the Baker substitute (printed amendment No. 4998), add the following new section:

SEC. . None of the authority granted by this Act to the Secretary to make grants for transit capital infrastructure projects under section 314 of Title III of this Act shall be exercised unless the Secretary exercises such authority under the following additional restrictions on his authority to make such grants: He shall assure that each state receives not less than 85 per centum of the amount of estimated tax payment attributable to highway users in that state paid into the Mass Transit Account of the Highway Trust Fund in the latest fiscal year for which data are available, and he shall assume that such funds are available for operating expenses.

Mr. BUMPERS. Madam President, this amendment is not so easy. This applies to what I regard as a fatally flawed bill as it applies to my State and I think a number of other States. This bill has a provision in here that essentially provides 1 cent for mass transit. That would be about—I am not sure. I think in this year, it would amount to about $530 million the first year. The problem I have with that is that my State is not one of the States that fares well under the formula. We have a very complicated formula here as to how the mass transit money is going to be returned to the States. It deals with vehicle miles, it deals with density of population and a host of other things on which my State does not fare well.

What my amendment does is apply the same rule to that penny that applies to the other 48; namely, those States will get less than 85 percent of it.

This amendment simply provides that not less than 85 percent of the penny for mass transit shall be returned to the State. It also allows the State, in its own judgment, to use it for operating expenses if it chooses. It is just that simple.

Madam President, I am prepared to move the adoption of the amendment.

Mr. STAFFORD. Madam President, the Senator from Vermont, whose Committee on Environment and Public Works has title II of the bill, was unaware of this second amendment by the Senator from Arkansas. It applies against title III, which is not one of the titles of the bill for which I am responsible.

Mr. GARN. Will the Senator yield?

Mr. STAFFORD. Yes.

Mr. GARN. Madam President, this does appear to be under a section that comes under the Banking Committee. I simply have to say I have had no conversations about it, I was not aware the amendment was coming up. I have

not even had a chance to read it, I have just picked up a copy from the desk. I am not prepared at this point to go ahead and debate it.

I wish the Senator from Arkansas had discussed it. We have discussed whether many amendments were acceptable or not. At this point, I have to get some advice and then take a look at it, because it has taken me entirely by surprise.

Mr. D'AMATO. Madam President.

The PRESIDING OFFICER. Does the Senator from Vermont yield?

Mr. STAFFORD. I yield to the Senator from Utah.

Mr. GARN. The Senator from Arkansas is undoubtedly right, as I look at it. My response was before his motion for passage and I had not even had an opportunity to look at it. I am a little disappointed that the Senator was not willing to at least let us look at it and be prepared to debate it. At this time, I yield the floor while I take a further look at it.

Mr. BUMPERS. Madam President, that is the reason we offer amendments on the floor, to debate them. The situation here is about as simple as any I have ever seen.

First, my amendment has been at the desk since well before the first cloture vote. I did not file it for dilatory reasons, I filed it because I was deadly serious about what I think is a gross inequity in the bill. We have one urban mass transit system. We have six nonurban mass transit systems, and I daresay there are at least 25 to 30 States represented in this body which are similarly situated.

This bill says:

To the extent practicable, the Secretary shall assure a fair and equitable distribution of grants to all States so that each receives no less than one-half of 1 percent of the funds available under this section.

Bear in mind, Madam President, he is not obligated to see that any State does not get less than half. I shall go ahead, so that other States can relate to what I am saying.

My State will pay $12.5 million to $13 million for each penny tax of this bill. That means we are going to be paying $12.5 million to $13 million for mass transit and get back in our State, if the Secretary happens to wake up felling good, one-half of that amount. When you consider the fact that we are a poor State—I have said that on this floor a thousand times. I am not proud of it, but in the interest of candor and realism, we are a poor State. We are the second poorest State in the Nation. We use more gasoline than in any State in the Nation. When you consider those factors, plus the fact that we have just sustained a $350 million damage loss from tornadoes and floods, we are in a poor position to say we love this 5-cent gas tax.

We are certainly not in a position to say we love subsidizing the subway systems of New York, Washington, Atlanta, Chicago, and San Francisco. When you consider our poverty, we are ill-equipped and we are not so charitable as to want to send one-half of 1 cent plus the other $^{15}/_{100}$ of 1 percent of the other 4 cents to the U.S. Government so they can send it to somebody else.

We have more unpaved roads in my State per capita, I would venture to say, than almost any State in the Nation. So all I am trying to do is to say to the people of my State, you are at least going to get back 85 percent of what you send in. I can tell you they are not going to be terribly joyous this Christmas season at the prospect of spending about——

Mr. D'AMATO. Will the Senator from Arkansas yield for a question?

Mr. BUMPERS. I yield for a question.

Mr. D'AMATO. Is not the purpose of this bill to deal with the infrastructure needs as they now exist? Would the Senator agree to that?

Mr. BUMPERS. Absolutely.

Mr. D'AMATO. What do we do then? Do we say that where there is no need for mass transit we are going to give you 85 percent of those moneys which are contributed as the Senator's amendment calls for?

Mr. BUMPERS. What I am saying is that I understand New York's needs. They are very peculiar to New York. And I am not parochial about this. I voted to bail New York City out. That was not the most popular vote I ever cast in my State.

Mr. D'AMATO. It has noting to do with New York. The fact of the matter is that we have created a bill that takes into account the number of riders, passenger miles, route miles. The formula block grant section of the mass transit title does take into account the needs of nonurban as well as urban areas.

Under the Baker substitute, a portion of the receipts from the gas tax will be placed in a Secretary's discretionary fund. The Secretary will then determine the areas of need and distribute those funds accordingly.

Moreover, I might add that New York and other States are drastically short changed in other areas. For example New York is only reinsured at a rate of 50 percent of its medicaid costs. Other States receive much more I am only trying to insure, here, that there is equity and States receive those funds on the basis of need. I suggest that this amendment does violence to the whole concept of funding mass transit needs.

Mr. BUMPERS. To respond to the Senator from New York, why is the number of unpaved roads in the State not a part of the formula?

Mr. D'AMATO. We should address that. However, both Environment and Public Works Committee and the Banking Committee, after extensive hearings, developed formulas for the distribution of funds. The Baker substitute should be adopted.

Mr. BUMPERS. Will the Senator also be willing to add an element in this formula to consider per capita income?

Mr. D'AMATO. I think that we could consider that, but let me suggest that for 2 years nobody has come forth to the Banking Committee to suggest that. We attempted to craft a bill that deals with the needs of rural areas. If you begin to demonstrate the need, the Secretary will have money under this system to meet those needs. But to provide a State with moneys where there is not need, that would be unconscionable.

Mr. BUMPERS. Does the Senator understand that this bill reauthorizes the basic reauthorization which has always been in effect? Operating revenues are not going to be cut one dime from what they are right now. What we are talking about is the new formula of what we are going to do with the additional $1.2 billion that is being produced by one of the pennies of the five that goes for mass transit. In my State we have capital equipment; they just finished buying new buses, but we need help on operating.

Mr. D'AMATO. The Senator should understand that in the formula block grant section of title III of this bill, we try to insure that your transit properties will continue to receive the operating assistance which is so crucial to the maintenance of capital equipment.

You will recall part the administration's initial proposal would have completely phased out operating assistance. This bill, while making some reduction in operating assistance so that we may get a bill signed into law, retains operating assistance.

What we have done is made a cut, a modest cut of 20 percent over a 3-year period of time. We have also provided a provision for trade-in, $3 for $2, for those areas that wish to trade capital assistance in for operating. I think it is a vast improvement. I know it is a vast improvement over what the administration's initial proposal was. I admire the representation that the Senator from Arkansas gives to his constituents, but I think this goes beyond just a mere constituency issue. The fact is we are fighting to set up a formula block grant system that does not remove from localities, the opportunity to use Federal funds for operating expenses.

I ask the Senator to think very carefully before we go forward with this bill because he could cause great violence, I believe, to the entire concept of providing block grant systems and allowing a certain amount of flexibility that did not exist under the other program.

Mr. BUMPERS. Let me make a couple of observations so that we are not just like ships passing in the night and not really communicating.

I want to first say that the Senator is dead right; the basic authorization for mass transit in this bill does not change operating revenues. The city of New York is going to continue to get the same operating amount that it has been getting in the past, because we are reauthorizing the first 4 cents of the gas tax just as we always have.

Mr. D'AMATO. If I might just indicate, that is not entirely accurate. We will be taking a 20-percent cut in operating assistance, as will all of those areas that operate transit systems throughout the country in excess of a million people. Thereafter, in order to recognize the special needs of the smaller transit properties, that cut has been reduced to 10 percent, since operating assistance for the smaller properties is much more critical than it is for the larger properties.

So that for cities under a million, cuts for transit authorities will only be 10 percent. For the smaller communities of under 200,000, their cut in operating assistance will only be 5 percent. This has been a very delicately crafted bill that has the support of the American Public Transit Association, the National League of Cities, the National Association of Counties, National Association of Regional Counties and many other groups.

Mr. BUMPERS. I should like for Senators from North Dakota, South Dakota, Wyoming, Montana, and Idaho, just to name a few, and Oklahoma—I see the Senator from Oklahoma over here, the Senator from South Dakota back here—to come to the floor and tell this body and their constituents back home how much money they anticipate getting out of the mass transit provision of this extra 5 cents based on this language which says that the mass transit account is to be used to fund:

Transit capital infrastructure development projects involving the acquisition, rehabilitation and replacement of rolling stock;

The construction, rehabilitation, and modernization of commuter rail and fixed guideway systems;

The construction, rehabilitation, modernization, and replacement of bus facilities and related equipment;

The renovation and improvement of historic transportation facilities with related private investment, and intermodal terminals.

I can tell the Senator what that means for my State—zero.

I just made a quick calculation here. First of all, my State is one that because the House put the 85-percent provision in—that is of 4 of the 5 cents—no State shall receive less than 85 percent of that money back. If it were not for the House having put that language in, my State would have only received 40 to 50 percent back of the 4 cents we paid in.

When you take that combined with less than one-half of 1 percent that we will get back, and certainly that is about what we will get back, you are asking the people of Arkansas to levy a 1-cent tax on themselves to send to Washington and never see a dime of it. We are just not disposed to do that. That is what the net effect of it is and I would be very hard pressed to go home and say to my people "Yes, we levied a 5-cent tax but unhappily we are only going to get 4 back. We are a poor State, with lots of unpaved roads. We have the same deteriorating highways everyone else has but we are going to give a penny to the Secretary of Transportation, who, to the extent practicable, will send us one-half of 1 cent back if he is so disposed."

Mr. President, I ask unanimous consent that we both yield for a moment to receive a message from the House of Representatives.

The PRESIDING OFFICER. Is there objection?

(Mr. COHEN assumed the chair.)

Mr. BAKER. Mr. President, I wish to be recognized so I can yield for the message to be received. Am I recognized?

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I yield now so the message from the House may be received.

The PRESIDING OFFICER. The Senate will receive a message from the House of Representatives.

MESSAGES FROM THE HOUSE

At 2:02 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 631) making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 436. Concurrent resolution relating to the enrollment of H.J. Res. 631.

Mr. BAKER. Mr. President, this is the conference report on the continuing resolution. Under the authority granted to me after first consulting with the minority leader, the pending message may be laid aside notwithstanding the provisions for rule XXII, in order to take it up, I have consulted with the minority leader and I believe he will confirm that we agree that this should be done as soon as possible.

Mr. President, I am perfectly prepared to finish this particular amendment before going to the conference report, or to do it at this moment. But if the Senator from Arkansas has concluded, I recommend that we yield so that the distinguished Senator from Utah may be recognized. I understand he wishes to make a tabling motion, get that vote and then go to the conference report.

Mr. ROBERT C. BYRD. Will the majority leader yield?

Mr. BAKER. I hope we would proceed to the continuing resolution. The amendment by Mr. BUMPERS then would be the pending matter when we get back. It makes no difference to me if the Senator from Utah is agreeable to that.

Mr. BUMPERS. To the minority leader I say I am finished. There are a couple other Senators who wish to speak.

Mr. BAKER. I have no desire to cut anyone off. I will withhold that suggestion and we will take the message from the House.

Mr. President, I now ask pursuant to the authority granted to me under the unanimous-consent agreement of yesterday that the Chair lay before the Senate the conference report on the continuing resolution.

FURTHER CONTINUING APPROPRIATIONS, 1983—CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on House Joint Resolution 631 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 631) making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 20, 1982.)

The PRESIDING OFFICER. Who yields time?

Mr. HATFIELD. Mr. President, I yield myself whatever time is necessary.

Mr. ROBERT C. BYRD. Will the distinguished Senator yield for a question?

Mr. HATFIELD. I am happy to yield.

Mr. ROBERT C. BYRD. Would the distinguished Senator allow the Chair, or the majority leader, or someone, or me to state what the time control agreement is on this measure so that all Senators would know?

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. HATFIELD. I will yield to the Senator from Tennessee.

Mr. BAKER. Mr. President, I thank the minority leader. It is a good suggestion and one that I should have thought of.

Will the Chair please state for the Senate the terms of debate on this measure as embodied in the unanimous-consent agreement of yesterday?

The PRESIDING OFFICER. The time on this conference report is 4 hours, the time to be equally divided between the majority and minority leaders or their designees.

Mr. BAKER. Mr. President, I believe the 4 hours for debate is all-inclusive of debate on the conference report and any amendments in disagreement, is that correct?

The PRESIDING OFFICER. The leader is correct.

Mr. BAKER. Are there amendments in disagreement?

The PRESIDING OFFICER. There are no amendments in disagreement.

Mr. BAKER. Very well. So the entire 4 hours will be for debate on the conference report.

The PRESIDING OFFICER. The leader is correct.

Mr. BAKER. Mr. President, I designate the distinguished chairman of the Appropriations Committee, the Senator from Oregon, to manage the time on this side of the aisle.

The PRESIDING OFFICER. Does the Democratic leader designate anyone?

Mr. ROBERT C. BYRD. I designate the distinguished Senator from Wisconsin (Mr. PROXMIRE) on this side of the aisle.

Mr. HATFIELD. I thank the leadership for putting this in motion.

Mr. President, we now have before us at long last a conference report on House Joint Resolution 631, the last continuing resolution for fiscal year 1983.

Mr. President, it has been a very long week for all of us. I do not intend to stand here very long and belabor the Senate with a detailed description of the items contained in the conference report. We are making every effort to get the report duplicated and placed on every Senator's desk. And I might say that the Senate and the House met in conference yesterday from 10 a.m. to 10 p.m and the staff finished the report about 6 o'clock this morning, having worked all night as they have done on two of the last four nights.

And the service department has been working on this report since 7:30 a.m.

It is a very sizable report, and I understand Members will understand the amount of time necessary to reproduce it.

I will briefly summarize the basic terms of the resolution and leave it up to the subcommittee chairman to explain the detail of the individual bills covered by the resolution. I expect, for example, the Senators will have questions for Mr. STEVENS relative to defense, as an example.

Mr. President, this resolution covers eight regular appropriations bills, Commerce, Defense; Energy, Water; Foreign Operations; Interior, Labor, HHS, Education; Treasury, and the District of Columbia.

Since the Senate acted on this measure, the Transportation and Agriculture bills have been signed by the President. So they are no longer covered under the terms of the resolution. We expect the signature of Interior and D.C., if that has not occurred already. So that they, too, will fall out from under the terms of the CR.

The resolution is effective for the full year up to September 30, 1983.

A legislative provision allows for a pay raise for House Members, top-level executive branch employees, the Judiciary, House and Senate staff, but not, I underscore, underline, put in quotations and parentheses and every other kind of grammatical symbolism that I can, it does not include a pay raise for the Senate.

I imagine I will have that very question asked me sometime during this period of discussion on the floor. Maybe more than once. But I want to start out by saying as clearly as I can in the Queen's English that it does not include a pay raise for the Senators. As my colleagues have no doubt read in the paper, the conferees deleted title II, which is the jobs package. Your Senate conferees yielded to this House suggestion, at least as far as the chairman is concerned, with great regret. I will not speak for all the members of the committee because I sincerely hoped that some productive job package could be adopted by Congress and signed by the President.

It was not to be, however. Even the relatively small jobs stimulus package proposed by the committee was opposed by my leadership here in the Senate and the President made it quite clear over several occasions that he would veto any legislation that contained a job stimulus package.

The conferees decided, therefore, that the better course of valor was to recognize the practicality of the situation and delete title II rather than risk a Government-wide shutdown, a veto overriding struggle with the President, and the possibility of drafting yet another continuing resolution after this protracted debate.

I can assure my colleagues, however, that the issue by no means is at rest. I intend to do everything I can to persuade the President to incorporate these items or items similar in a jobs package in his fiscal year 1984 budget, and if the President does not see fit to do that, I want to indicate that I will certainly do everything that I can possibly do to provide our congressional budget and subsequent appropriations with such a proposal. We badly need a national program to improve the capital assets of our country, to restore and repair our infrastructure and, at the same time, we desperately need to do something to reverse this unemployment trend that is reaching close to 11 percent.

We do not need more soup kitchens, more handouts, more extensions of unemployment benefits. We need to put people to work, not just help them when they are out of work. Now is apparently not the time when we will accomplish that, so the conference dropped title II.

I am sure Senators will have specific questions which I will try to answer as they arise.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield?

Mr. HATFIELD. I will be happy to yield to the Senator from Virginia.

Mr. HARRY F. BYRD, JR. I assume the Senator from Oregon at the appropriate time wil ask for the yeas and nays?

Mr. HATFIELD. I will be very happy to ask for the yeas and nays at this time.

The PRESIDING OFFICER (Mr. COHEN). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HATFIELD. Mr. President, one other item I would like to alert the Senator, that procedurally we have normally had amendments in disagreement with the House that have been acted on separately, of course, and individually. In this particular case there are no amendments in disagreement so the one vote up or down will in all probability determine the outcome of this product.

So the conference report, I believe, under the unanimous-consent agreement, was unamendable but we are ready for questions concerning the report.

Mr. President, if there are no questions, I would ask for the adoption of the conference report.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, the conference report on the continuing resolution as it sits on each Senate desk today is probably the most voluminous and complex conference report ever filed by an appropriations conference in the long history of the Congress. It represents a huge series of compromises with the House on subjects as diverse as a funding for abortions, a Federal pay raise, and an MX missile basing plan.

As we all know the conference had to deal with at least a dozen highly controversial issues. Many of them never should have arisen in connection with a continuing resolution, which was originally devised as a means of extending the operations of the Government for a relatively short period of time while we dealt with the regular appropriations bills. However, these issues have been forced upon us by our refusal as a body to abstain from adding everything but the kitchen sink to this sort of appropriations measure.

I am sure that several Members feel that we conferees should have done much better. I wish they could have been with us in the conference so that they could have experienced the pressures and difficulties created by the fact that the Government closed down at midnight on Friday and that to avoid a disastrous interruption in Federal operations we had to come forth with a conference report in less than 24 hours.

Mr. President, I take no pride in this product. But given the legislative mess we had to deal with in conference and the short time period in which we had to act, I think it is about the best compromise we could come up with, especially if we were to avoid a veto that would delay Federal agency operations even further.

Mr. President, I would like to pay tribute to my distinguished colleague, the chairman of the Appropriations Committee, Senator HATFIELD, who did a really marvelous job in chairing the conference.

As we all know, he handled this enormously complicated legislation with great mastery and he has won the admiration of, I think, all Members of the Senate who have followed this bill.

Mr. President, I yield the floor.

Mr. HATFIELD. Mr. President, I would like to take a moment to thank again the Senator from Wisconsin for his leadership in this matter. It has certainly been a joint effort. I thank the Senator from Wisconsin for his leadership in this matter. It has certainly been a joint effort. I think the Senator from Wisconsin would agree with me that we had an extraordinary demonstration of devotion and diligence of the subcommittee chairman and ranking minority members. We have 13—I think Senator realizes—we have 13 chairman and ranking minority members, and when you consider the complexity of the issues with which each one of those committees was dealing, it is really a phenomenal effort that has been demonstrated here to bring us to a final decision.

In addition, I want to pay respect to the staff. I mentioned earlier, before the arrival of the Senator from Wisconsin, that the staff has remained on a 24-hour shift 2 out of the last 4 nights in order to do the support work and to bring us into a conference conclusion, and that is indeed a great example of quality of staff we have here on this committee and, I think, is typical of all of our Senate staff.

These are the unsung heroes of these long marathons. Our pictures are in the paper, but it is really the people at the staff level who are doing all of that basic support work that makes it possible for us to bring these matters to a conclusion. They seldom get the focus or the attention they certainly deserve. I have often said I think that Senators are only as good as their staffs because unless you have that kind of backup and auxilliary support no one person can really perform his tasks and responsibilities in any quality form at all.

So I wish to thank the staff again for their outstanding work on this project.

Mr. President, we are open for questions. I hope that Senators who have an interest in this subject will come to the floor because, after a reasonable period of time, the managers of the bill would like to complete this. We have no interest in self-flagellation. We have been through enough I think of the torture chamber of procedures and marathons that we are anxious to complete it.

So I am very hopeful that Senators who have a concern or interest or question will arrive on the floor in the next little while.

Mr. DOMENICI. Will the chairman yield?

Mr. HATFIELD. I yield to the distinguished chairman of the Budget Committee and the newest and most junior member of the Appropriations Committee, and my good friend.

Mr. DOMENICI. I thank the Senator so much.

I do not have any substantive questions on numbers at this point, but I wanted to ask one question that I know the answer to but I think the Senator ought to answer because I think it is such a momentous part of this bill. This bill now extends all of the subject matters within it through the entire fiscal year; namely, to October 1, of next year. Is that correct?

Mr. HATFIELD. I am most pleased to be happy to respond in the affirmative on that question.

Mr. DOMENICI. I say to the Senator, I am not sure that everyone appreciates as you do and as I do the significance of that. That means if this body and the other body are disposed to actually produce appropriation bills instead of continuing resolutions, that we start the new year without the need for another continuing resolution unless we are unable, come fiscal year October 1, to have produced appropriation bills. Is the Senator from New Mexico correct?

Mr. HATFIELD. The Senator from New Mexico is, indeed, correct.

Mr. DOMENICI. I say to the Senator, I do not think we have been in this posture at the end of a session, whether it be lameduck or whether we closed at an earlier time, I do not think we have been in this position for many years where we do not need a single continuing resolution in terms of keeping the ordinary operation of the Government, aside from supplements and add-ons that we are unaware of, as we are now.

Does the Senator remember how many years it has been since that event as I have described it?

Mr. HATFIELD. Not in the memory of humankind.

Mr. DOMENICI. I thank the Senator. And I am most complimentary of the committee with reference to this issue. I now know that it was very important that we prevail on amendments offered on the floor to fund Government, be it to March or April or May or June.

Frankly, as the Budget Committee chairman, as I said the other day and I say to my good friend from Oregon, I really do not believe we would have accomplished one single cent or dollar savings by cutting this bill to some shorter period of time. I think if you need supplementary appropriations they will be forthcoming.

But I agree with the Senator, had we not gone for the year, we would have been once again up against a deadline, not against a deadline of fiscal years but a deadline of we are going to close the Government again or we are going to close a piece of it.

I think the Senator agrees with me that that probably is the worst way to run Government and the worst way to appropriate. I just wanted to say, before anyone asks detailed questions, that that is an historic event. I commend him and the House Members for it and the House for passing it and certainly in advance of the Senate passing it, because they are going to pass it this afternoon.

I hope the President will sign the bill. That issue alone is worth the President giving on a number of issues in my opinion. For the first time he then starts, after 2 full years in office, with kind of a clean slate in terms of the appropriations process; am I not correct?

Mr. HATFIELD. The Senator is correct. It not only provides an opportunity for the appropriation process to move on track, on schedule, and in concert with the Budget Committee, but it does, as the Senator has indicated, provide the President and all the executive agencies with greater opportunity to plan for the rest of the year.

When we had these dates that went only for a portion of that fiscal year, agencies of Government could not plan for the full fiscal year. They did not know what levels would be reduced or added to in the expiration of a June continuing resolution or May or April or March, whatever it might be.

So I think we are going to really, in the long term on this fiscal year, we are going to save money. I cannot help but think it costs more money when we have these partial fiscal year CR's that really do not provide any long-term plan.

Mr. DOMENICI. I thank the Senator.

Mr. HATFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I yield to the Senator from Arkansas, for the purpose of questions, whatever time he requires.

Mr. PRYOR. I deeply appreciate the distinguished Senator from Oregon, the chairman of the Appropriations Committee, yielding to me.

I would like to ask this following question: Was there any item in the continuing resolution that was approved by the House of Representatives and subsequently approved by the Senate by rollcall vote that was then knocked out by the conference committee?

Mr. HATFIELD. Yes; there were a number of such instances.

Let me give you an example of one. Both Houses had divided the continuing resolution into two titles. Title I was the title dealing with all of the normal appropriation bills that were not yet signed—and there were only three that had been signed—and title II that was initiated on the House side had to do with a special jobs program. The Senate also had a title II having to do with a jobs program.

The House package was $5.4 billion; the Senate proposed committee bill was $1.2 billion. In both of those, there was a $50 million appropriation that was made under FEMA, which would have meant that $50 million would have been distributed through United Fund groups in order to provide for immediate relief of needy people.

In the conference, the House conferees indicated that they felt that it was very important to get a Presidential signature on whatever final product we came up with. And the President indicated publicly on a number of occasions that he would probably veto a jobs program at this time. The chairman of the House Appropriations Committee, Mr. WHITTEN, at one point in these negotiations made reference to that point and indicated it might be best for the House to recede from the jobs bill title I and that the Senate recede from its title II, the lesser package of the jobs program.

The House made a rescission to that position, followed by the Senate making a similar rescission, so that that program of $50 million which was included in both of the title II's dropped. That dropped the program itself that had been included in both title II's.

Mr. PRYOR. Would the distinguished chairman please advise this Senator as to how the $50 million appropriation for FEMA, after passing the Senate by a vote of 52 to 43, got to be an item that the conference committee could handle in the manner it did?

Mr. HATFIELD. It was not a conference item as such. FEMA itself was not a conferenceable item. Title II was because under the unanimous-consent agreement of the Senate, title II became a single standing issue that could be handled as a unit, and out of the dropping of title II, FEMA dropped as part of title II because as part of title II it was indivisible from title II.

Mr. PRYOR. It seems to me rather strange, maybe even without precedent, that once the House adopts a proposal and the Senate adopts a proposal, we suddenly find that it is not part of the conference report.

Mr. HATFIELD. I agree it is unusual but not without precedent. There is ample precedent where an issue is dropped from a conference in which both Houses have acted upon it by what is called mutual recession from that issue, or receding from that particular question.

Mr. PRYOR. If the distinguished chairman would answer this question, did the conference committee have an up-or-down vote on the issue of the $50 million appropriation to FEMA?

Mr. HATFIELD. No. It was one of many items within title II. The issue was on the question of retaining title II in the continuing resolution. When the issue of title II was decided, everything within title II on both sides fell with the title.

Mr. PRYOR. The reason I feel so concerned about this is because this money was going basically to FEMA acting as a conduit to the United Way of America and then going to recipients chosen by a board consisting of the Salvation Army, the Council of Jewish Federations, Inc., the Council of Churches, the National Conference of Catholic Charities, and others. These funds were to help the poor, to help the needy, to help those who are homeless, without food, to help those who are absolutely destitute. It was also going to help some 158,000 citizens of our land who have lost all disability payment benefits, as well as their medicare benefits.

I feel the conference has made a terrible mistake. And I also feel perhaps the conference was not aware that by dropping the entirety of title II, it was also dropping this small appropriation for such a worthy cause.

Mr. HATFIELD. Let me say to the Senator I think the conference was fully aware of what it was doing and I think the conference was wrong in doing it. I felt very strongly that we had put together on the Senate side a very responsible jobs program of a very modest size, $1.2 billion. If the Senator will recall, we had a vote on that on the floor of the Senate after it had been adopted by the Appropriations Committee. It was a proposal I offered to the Appropriations Committee to consider.

You can multiply the impact on the needy of this country that many other parts of that title had, not just the $50 million which is important. There were literally many other items in that title II that could have gone for immediate job development for people who are running out of their unemployment compensation or who have already run out.

It was not going to cure the natioanl unemployment problem, let me tell the Senator very candidly. I did not believe that this one package was going to, in itself, correct our unemployment problem today. But it would have the Government in a very positive leadership role, which I think could become a triggering mechanism for much of our private sector to step forth and to renew its confidence in the future, renew its confidence in the economic system, do some expansion, do some operation and maintenance, do some rebuilding. It could have triggered many jobs beyond those that would have been immediately created by that package.

As I say, the Senator is talking to the author of the bill, who has not a pride of authorship but just a deep commitment and deep concern on this issue. It was not an easy matter to do. I can say to the Senator that when the House of origin of this whole package began to signal that they were ready to toss in the question or recede to the question, it did not leave us in much of a position to deal from.

I looked down and the ground was gone.

Mr. PRYOR. I know the distinguished Senator from Oregon, and I know his compassion for his fellow humans. I also know his dedication and hard work during the last several weeks, especially the last 5 or 6 days. It has been intense. The chairman has done a miraculous job just standing and holding together. I compliment the Senator for the job he has been doing.

I would like to register my objection to the idea of taking away $50 million from the homeless and the poor, who are in such need at this time. I am particularly concerned Mr. President, because the amendment would have provided that the funds not be caught up in the bureaucracy but distributed within 45 days.

I think that is my deepest concern.

In addition to this, I am concerned that this conference report, as I understand it, has in the neighborhood of $11.5 billion for foreign aid which is an increase over earlier years. We are appropriating about $0.5 billion for refugees. We are giving a salary increase to the Members of the House of Representatives. But somehow we are not really answering the needs, especially in this Christmas period, of those who do not have a home and those who literally have nothing to eat. I think we will be judged very harshly for our action, and I think that judgment will be justified.

Mr. HATFIELD. I thank the Senator from Arkansas. I would only add one little further detail to his thesis that he has eloquently presented. That is that in that foreign aid bill we have $1.6 billion more this year for arms than last year, and some of those arms are going into countries that do not have a subsistence agriculture, that cannot feed their own people.

I received a letter from a constituent this morning. There was a very interesting comment made. I suppose it is a little macabre, but I would like to share it.

The person said, "I saw where you answered a certain question put to you by the press relating to shipping arms to Third World countries."

I had been critical of doing this type of thing in my response to that question.

This person said, "A better answer, a more appropriate answer than you gave, would have been to give an answer of, 'Send them a gun so they can go out and shoot their enemy and starve to death in peace.' "

Think about it. It has, as I say, a rather macabre tone or ring to it. But if you think about it, there is a very profound thought in that statement I received.

Mr. PRYOR. It is profound indeed. I share the Senator's feelings about arms sales.

Mr. President, I have expressed some of the reasons why I will continue to vote in opposition to this particular continuing resolution.

Mr. PROXMIRE. Will the Senator yield?

Mr. PRYOR. I will be glad to yield.

Mr. PROXMIRE. I commend the Senator from Arkansas because twice now he has made very serious and important criticisms of the continuing resolution. Yesterday I think he made the most important of all. That is, that we should not have a continuing resolution at all. It is a mark of failure on our part. We have to acknowledge that.

We have to acknowledge that.

This continuing resolution, as the Senator points out, goes for the whole year. It means there will be no careful, deliberate consideraton by all Senators of the biggest domestic bill we have, Health and Human Services, no careful, deliberate—we should have several days, maybe 3 or 4 days' consideration on the military aspect. We will not have that at all. It means we put it all together; then in a nightmare session of 36 hours or so, try to do the whole thing at once, covering all the appropriations. They cover relatively small matters, but take up a great deal of time. The Senator made that point very well. It should not be lost on us. I think he deserves great credit for having done that.

He makes the great point of knocking out the aid for the needy in the FEMA amendment. Again, that is in infuriating kind of situation. In principle, it should not be done. a few of us gathered together in conference have no right to overturn what a majority of the Congress have agreed to do.

I thought that was the whole principle of conference, that you are only allowed to compromise within the limits set by the two bodies. I think the Senator from Arkansas has made that point very well. We did not do that. There were technical reasons why we were able to get away with it.

There is another fundamental reason we did it—that is because we faced the veto, that great, big monster of a veto. I think all of us realized as a matter of realism that if we supported the jobs bill, which so many in this body supported and so many in the other body, the whole thing would have gone down. It went down last year. That would have meant we would have the Government out of operation for another 2 or 3 days. It was really a matter of adjusting to grim reality, why we did that.

I want to add a technical point on foreign aid. We are $500 million below last year, at the level President Reagan requested. So it is not as big in this respect as people might suspect.

I agree with the Senator. He has made two excellent points as far as principle is concerned. He is 100 percent correct. I am glad he called that to our attention.

I think he has to recognize that we had to keep with reality. We were really under the gun. Today, as we discuss this here, the Government technically should be out of operation. We do not have any continuing appropriation. So we had to act rapidly, recognizing that a veto was forthcoming. It was all we could do.

Mr. PRYOR. I thank the Senator for his comments. If I may offer one final commentary, then I shall sit down. I think if one inscription or one thought remains after this session finally concludes, if it ever does, it will be that of the great philosopher, Pogo, who said, "I have just met the enemy, and they is us."

We are our own worst enemy. Frankly, I think if the Government continued to run, that might be worthwhile. But I am beginning to wonder whether the Senate ought to continue to run. I think that is how frustrated a lot of us are.

It is not frustration with the people, it is frustration with the system. It is the system we have to change.

The problem is, we get to this point, we see all the problems in the system, we worked all night long, all week long, our families forget we even exist. The whole thing breaks down. Then we come back in January and forget how terrible it was. We forget the pressure.

The time to correct the system, I think, is eventually going to be in one of those long, all-night sessions when the pressure is on. That is probably how we are going to have to change the rules of this body so we can carry out the business of the country and so our procedures can be conformative with our century.

Mr. RIEGLE. Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. PROXMIRE. I yield time to the distinguished Senator.

Mr. RIEGLE. I thank the Senator for yielding and I wanted to follow along with the comments of the Senator from Arkansas.

I have a question for the Senator from Wisconsin. I have heard it said that the reason the jobs part of the package was dumped over the side is that there was a clear signal that the White House would veto that bill and there was a feeling on the part of House Members that they dare not take a new bill back to the House because if they did, it would require another vote on the pay raise, which would not be able to survive; therefore, the jobs portion of the bill was just dumped over the side because of the chain of events that would follow. Therefore, in order to protect the pay raise,the jobs program had to be surrendered.

Is it the Senator's sense that that is what was at play here? Is that the bottom line?

Mr. PROXMIRE. I would not say that, Mr. President. I just do not know. I would hate, and I think the Senator from Michigan feels the same way, to attribute motives to people. I think they did realize the grim reality of the veto and acted accordingly. I might stress the fact that the House initiated that action.

Mr. RIEGLE. Which action?

Mr. PROXMIRE. The action that the distinguished chairman of the Appropriations Committee just told us he agreed to, that we would drop the jobs program from both bills. They may have also had in mind the fact that whatever we are able to get through would be far less than what we are going to be able to get in the next session. The next session will have a different lineup. There will be 26 new Democrats in the House of Representatives, maybe a new attitude in this body, too. I think they may have felt the problem would be better served not trying to get the relatively little amount we would get with the compromise after a veto and get set trying for the next year.

Mr. RIEGLE. If that were the reason, why would they not shorten the date on the continuing resolution to insure that early in January or February, all of these issues would have to come back to us so we would have the chance to do the jobs portion then? It seems to me that we surrender the leverage here of the continuing resolution date that otherwise would have given us a chance to force this jobs issue now, at a time when we have a jobs emergency in the country.

Mr. PROXMIRE. As I understand it, there is no reason why we cannot come back in January and February and pass a supplemental appropriations bill. We do not need a request. We can do it.

Certainly, if the economic situation worsens, as it may well do, and more and more States have the kind of situation Michigan has suffered from for so long and Wisconsin now suffers from, we might very well get legislation enacted that will be effective in the coming year. We would not have to wait until September 30, 1983.

Mr. RIEGLE. The problem is, it seems to me, the White House mentality still is to the effect that there is no jobs problem in the country. The President still makes reference to the want ad sections in the weekend and daily papers as listing plenty of jobs.

It seems to me one of the key items of leverage is to force this administration to address the real issues in this country.

Mr. PROXMIRE. The real leverage they have is that the Government is out of money and that we have to act on some kind of appropriation bill now. It seems to me that we have as much leverage next year as we would this for passing a supplemental appropriations bill. That leverage has always worked somehow because the master of communication, the President of the United States, has somehow worked against the Congress, we have been the fall guy. We would continue to be.

Mr. RIEGLE. It seems to me if we get trapped here with closing down a session, as well as the Christmas holidays, this is a particular kind of time period where everything gets jammed together. It seems to me if we had changed the date on a continuing resolution to some date at the end of January or the end of February, we would have brought all these issues back, it would have compelled them to come back.

It would have meant the President of the United States, no matter how detached he want to remain from the jobs crisis in this country, would not be able to because the certain need of financing the operation of the Government would bring us all back together so we can fight out these issue.

I think it is a tragedy that the jobs part of this bill was tossed over the side. The fact that a pay raise survives and the jobs program does not is something that cannot be defended. I do not think it can be defended in the country or to anybody who understands the severity of the problems that exist in this country. If we were going to come back here in a special session, the thing we should have accomplished was something that would have put people back to work.

I do not mean the so-called road/jobs bill which may pass later on, which has a minusclue job effect, a very minor one.

I think if we shut down here today, tomorrow, or the next day without having some component in the continuing resolution that is active and real in terms of creating jobs in this country, we all will have failed. I think that will be a mark of failure for the House and Senate together. What we will have, I think, will be an additional level of frustration and outrage in the people across the country, we will miss the boat on the jobs bill, but we will manage to provide additional help for the Members of Congress, whether in the form of a pay raise on the one side or the lifting of a cap on honoraria on the other side.

I do not think there is any justification for that.

Mr. PROXMIRE. It is my understanding that the chairman of the Appropriations Committee in the House indicated that he would do all he could—and he can do quite a bit—to push a jobs bill just as early as he can in the next session of the Congress, and that seemed under the circumstances to be the best way to proceed. I do not see that we gain anything by saying that the House sold out for a $9,000 pay increase. Whether the people think that is right or wrong, frankly, I do not think it would have made any difference. People may think that is naive. I do not think so. If there had been no pay increase in this bill, I think we would have come to the same conclusion.

Mr. RIEGLE. I guess my own feelings are different and that may arise from the fact that in my State the unemployment rate is 17.2 percent.

I do not make this as a point now directly to the Senator from Wisconsin, because I know of his concern for these jobs, but I am speaking now in terms of the sense of urgency that the Congress is showing, or failing to show, as well as the sense of urgency that the administration is failing to show.

We have been in session all these hours and all these days. There is an unemployment emergency in the country. We have 12 million people unemployed. If you add the underemployed and even those who dropped out looking for work, we have 20 million people out of work in this country and we are so inept as a Congress that we are unable to come back here, after all these days and all these hours, to pass any kind of a significant jobs initiative.

Yet, at the same time, we have managed to take care of ourselves. That is the bottom line, and that is the way it is going to look to the country, because that is exactly what the facts are. I think it is pathetic that that is the outcome. I do not think we have any justification—I do not care how hard Ronald Reagan's head is on the issue of unemployment in this country. We ought not to leave here until we have done something about the jobs crisis, whether we stay in on Christmas, on New Years, go right up to January 3, bring the new Congress in, come in early in January and stay here, then cancel out the recess in February, and do something about this jobs crisis.

I do not think the people of this country are going to be able to have any faith in what we do here after the message they sent on November 2 about the jobs crisis. The damage, the suffering, and the hardship is everywhere you look, in all 50 States, and here we are meeting and the one thing we need to do we have failed to do. We come back in here with a bill that does not have a jobs component. No matter who the responsible party is, whether the leadership in the House or the Senate on one side or the other that caved in to the pressure from the White House, in the end it is a failure of our duty to meet our obligations and our responsibilties. I do not know how anybody can leave here, when we

adjourn and go home for the holidays, knowing what this season is going to be like for so many other millions of people across this country in desperate circumstances and knowing that the only thing that we really managed to do was to take care of the pay issue and a few other miscellaneous issues. We have an enormous continuing resolution. We have not dealt with all the appropriation bills. We are tied in knots here, as others have said, in terms of the process with the filibuster and the fact that the rules are designed for obstruction more than they are for progress and for throughput in terms of dealing with problems. But the country is not going to understand this because what we have done has fallen short of what we needed to do. I think it is a shame on the entire institution that this is the situation we find ourselves in.

I express my disappointment. I disassociate myself with it. I am going to vote against this bill. I would like to see it go down. I would like to see us go right back in. Let us have more conversations. The White House, the people in the administration, Stockman and this whole crowd, they are all going to get paid through the holidays, we are going to get paid through the holidays. Maybe we ought to work through the holidays and see if we can come up with something that is significant. But to go into a conference and cave in and throw the jobs bill over the side because of this pressure or that pressure or this threat or the threat of a veto I just think sells us all short. And in the end it sells the country short. The country has been shorted. It is being shorted by this continuing resolution. It is being shorted by our failure to face up to the critical economic problems facing this country. There is no excuse for it, absolutely no excuse for it.

Mr. PRYOR. Will the Senator yield 1 minute?

Mr. RIEGLE. Yes. I do not have the floor but——

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. HATFIELD. I yield myself 2 minutes.

Mr. President, I would like to correct the record. I am sure the Senator really did not mean to express himself quite in the state of error that he did about what the appropriations process has accomplished or not accomplished. I only remind the Senator from Michigan, the Senate Appropriations Committee reported all 13 bills. Seven of them have had conference reports. The President has signed five of them and is expected to sign the other two. So I want to make the record clear. The Senate Appropriations Committee has completed its work, under very adverse circumstances. If the Senator would go back and reread his history, he would realize that we were a month late on the budget report for this fiscal year which held up the appropriations process. Then the Appropriations Committee had to take up the urgent supplemental. Then we had to do a second urgent supplemental. Then we had to do a tax bill before we could act. Then we had to do a supplemental. Then we had to take action to override the President's veto on the supplemental, and then we had to start a continuing resolution because we were at September before the appropriations process on the Senate side or the whole Congress could really get on track.

So I just want to make the record clear that the Senator's remarks about the appropriations process are not accurate.

Mr. RIEGLE. If the Senator will yield, I want it understood that I have enormous regard for the Senator from Oregon. I think he has given as much leadership to this process as anybody I have seen. I appreciate the hours and the effort, and I do not want to be misunderstood on that point. But let me just ask this question: How many appropriations bills have not cleared and are contained in the continuing resolution here and what percent of the Federal budget does that represent as a total of all the appropriation bills?

Mr. HATFIELD. There would be six bills that will probably ultimately remain, because there are two conference reports waiting for signature at the White House which we anticipate either have been signed——

The PRESIDING OFFICER. The time the Senator yielded to himself has expired.

Mr. HATFIELD. I yield myself 5 minutes—or will be signed momentarily. So out of the 13 total, that means that we will have 6 remaining under this continuing resolution.

Mr. SCHMITT. Will the Senator yield on that point?

Mr. HATFIELD. I will say that that includes two of our largest, the Defense bill and the Labor-HHS bill, which will be incorporated in this continuing resolution.

Mr. RIEGLE. So in percentage terms might that be as much or more than half of the Federal budget?

Mr. HATFIELD. I might also say that in this continuing resolution report that we bring the Senate today, the Defense bill is incorporated in this. We handled it in conference as if it were a Defense Committee conference. So consequently that is the whole issue that you see here, or a major part of it is the actual Defense bill that we would have had this bill actually gone through to a completed legislative part of the process. So when the President signs this, he will in effect be signing the Defense bill as well.

Mr. SCHMITT. Will the Senator yield?

Mr. HATFIELD. And the Labor-HHS, I might say. Those two will be tantamount to a bill being signed.

Mr. SCHMITT. I just wanted to make that point and support the chairman in what he has said. This is the first time since 1979 that the regular bill has been signed into law. Why? Because the House receded to a Senate amendment that was the Labor-HHS bill. And I believe the same action was taken essentially on the Defense bill. So those bills have worked their way through both Houses of Congress. They particularly had the opportunity under adverse circumstances but still the opportunity for full consideration here on the floor of the U.S. Senate, and although it is not absolutely identical to a regular bill having been passed, it is so close to it that I think this Senate and the Appropriations Committee particularly, under the leadership of Chairman HATFIELD, has done an outstanding job.

Let me remind the Senator from Michigan that we did not receive the bill from the House of Representatives in time to work a normal process.

We barely received them at all. The Labor-HHS bill was not received until the first of December when it has not been many years, certainly too long before the Senator and I arrived in this body, when the House completed its work on the appropriations bills by July 4.

The first year I was on the Appropriations Committee we were dealing with the fiscal 1979 bill, the last regular bill to ever pass this body, as I recall, and we received it before the end of July, somewhere around August 1.

But this year, and in the preceding 2 years, we just have not been getting the bills from the House of Representatives.

So if the Senator wants to direct his criticism on how this process is working, a great deal of that criticism must be toward the House of Repesentatives, the other body, and not toward the chairman of the Appropriations Committee or the Appropriations Committee itself.

Mr. RIEGLE. If I may just respond, I do not direct my criticism to the chairman of the committee, and I do not want there to be any misunderstanding to suggest I am doing so. I think he has performed a Herculean duty here under the circumstances, and I am a genuine admirer of the work he has done.

I am talking about a collective failure. I am talking about the fact we are nevertheless left with a final product that is so deficient that I think it reflects poorly on all of us. We have an unemployment emergency in this

country and this bill does next to nothing to deal with it, and I think that is inexcusable.

Mr. SCHMITT. If the Senator will yield, Mr. President, yield me just a couple more minutes, again I think the Senator from Michigan, although it might not be an ideal bill that he personally would want and others might want, also nevertheless again, under the encouragement and guidance of the Senator from Oregon, there is a great deal that deals with unemployment in this bill. In the Labor-HHS bill, for which I have some responsibility, we have as a result of Senate action, either in committee or on the floor, the initiation of the dislocated workers program; we have significant new money for older workers, for the employment services, vocational education, title XX, WIN, all of these programs having been augmented under the leadership of the Appropriations Committee.

So I think the Senator may want to qualify his remarks a little bit in that we have tried to the best of our ability under the constraints that were placed on us by actions and suggested actions of the administration, as well as the late hour with respect to the 97th Congress, to do something about the jobs situation—not enough, and I do not think anybody in this body could say we got enough—but at least we have gotten started, and I certainly hope Congress continues to work in this problem field.

Mr. RIEGLE, Mr. President, will the Senator respond to this point: We had $50 million in this bill providing for funding for soup kitchens and emergency feeding programs to try to help deal with all of the millions of dispossessed people in this country going hungry at the present time. We voted on that here in the Senate. We took that to conference.

Is that $50 million in this bill? Did that come back from conference?

Mr. HATFIELD. I would like to respond. I wish the Senator had been on the floor earlier. We went through this with the Senator from Arkansas, but I would be very happy to repeat it.

The $50 million, which was added by the Senate to the jobs section, which was title II of the bill, and the House had a similar kind of program under FEMA to be distributed under the United Fund groups or United Way or whatever it was called, that was part of a number of items in title II.

When the House moved to recede from title II it fell, along with all other items in the title, when the title was deleted. So then the Senate receded because, as I said a while ago when I described this situation, all of a sudden when you look down and the ground is gone you realize you are no longer standing on anything, so when the House made that move we had no course but to follow that move because ours is $1.2 billion, theirs was $5.4 billion.

To get to the very specific program, the FEMA program, $50 million, fell with the title. The Senator is correct.

I would like to say I do not disagree with the Senator's assessment of the need and the immediacy of this. I again said that earlier on the floor today. It was a distressing experience to see this thing disappear after one had worked up even a very modest program.

But I also think it is wrong to communicate to the public that somehow even a $5.4 billion jobs program would have had a major impact on this country of 12 million unemployed today. The House program would have created about 325,000 jobs. I am willing to settle for anything that will create 100 new jobs.

However, all I am saying is that a jobs program in any congressional bill is not the answer to the basic problem. I said a while ago that I felt Government had a responsibility to play as a role setter, and even if it had been only 325,000 or only 100,000, it would show the Federal Government was giving leadership, and that is what I want to see the Federal Government doing, and that could trigger a lot of the private sector to at least move in and do 50 jobs here, 100 jobs there, and someplace else 1,000 jobs that they might otherwise be reluctant to take that step now.

So I feel the Government's role was not really solving the unemployment problem as much as it was setting into action a sequence of little actions that could together help turn this country around.

But I would not want to in any way convey to the American public that somehow this jobs bill, whether it was the Senate or the House or a combination thereof, in and of itself was going to correct the real basic problem of 12 million unemployed.

Mr. RIEGLE. Mr. President, if the Senator will yield.

The PRESIDING OFFICER (Mr. CHAFEE). The Senator from Michigan.

Mr. RIEGLE. I think we all know that. But it was a start, and whether the figure was 300,000 jobs, that would have been 300,000 more jobs than we will otherwise have, and it was important.

The chairman says he supported it, and I certainly supported it.

One final question: If we were to vote down this continuing resolution, if we were to vote it down, I assume then the conferees would have to go back into conference, would they not, and put this package back together again? Would that not be the next step if the Senate decided not to accept this?

Mr. HATFIELD. The conference has been dissolved and would have to go through the process of starting all over again, and I would say to the Senator that I appreciate his concern and I think he has every right to be upset by this type of thing we are talking about.

But I think we have to look clearly and soberly at our options at this particular point in time, and I would say to the Senator that I see no options that we really have until January when the new Congress convenes, and I want to say to the Senator that I am not spending my Christmas vacation or my holiday doing nothing. In fact, we have already gone to work putting together another jobs bill that I would like to feel that maybe the President could incorporate and, hopefully, by that time to persuade the President to incorporate, in his state of the Union message, and his first budget proposal to the Congress. So I am not throwing in the towel on this. I am not sitting back and saying, "Well, we failed in this particular effort and, therefore, there is nothing else to do."

We have got to move this thing, whether it is now or whether it is January, and that is the option realistically, I would say with all due respect to my good friend from Michigan. Voting down this conference report today does not put us in any better position to get a jobs bill than when we passed this conference report. I have to put it just as bluntly as I can.

The jobs proposal for this "lameduck" session is dead, d-e-a-d, and there is no way to resurrect it.

So I think it is only putting a further burden upon the Republic to keep this "lameduck" session in session longer.

I think the sooner we adjourn and go home the better off the Republic will be and, therefore, vote "aye" on this conference report and do not torture us any longer as a committee or the Senate or the Republic.

Mr. RIEGLE. If the Senator will just yield for a final comment, Mr. President, it seems to me that if we were to defeat the conference report, if that were to happen, and with the operation of the Government now in the process of shutting down, we have already gone past the deadline, there would be an enormous sense of urgency on all parties to come up with an alternative package, literally within hours, because none of us can walk away from this problem, certainly the chairman would not nor would the rest of us, nor would the President of the United States.

So it would seem to me if there is an urgent requirement within the country to respond to the unemployment problem which we thus far have failed to do, that to take another 24 hours to do that may well be the most responsible thing we can do.

I mean, why should not the President of the United States be more di-

rectly involved in this process? And also I think those around him, as well as the House and Senate, so we have something here that we can really offer the country?

Mr. HATFIELD. I would say to the Senator, in response to his question, first of all, you are not going to craft anything in an hour that is going to be of any defensible character. I mean, that is the problem we find ourselves in too frequently that we are putting the Band-Aids on something because we really have not given careful thought to it and programed it and planned it and anticipated it, to begin with. So I would reject the idea we are going to come up with something better to be crafted within an hour.

Second, I would say realistically I am not at all in any way arguing the Senator's thesis that this Congress failed to act where it should have acted, but I am saying the alternative to what the Senator is suggesting here or what the Senator is suggesting of voting this down, a vote against this conference report is a vote to create unemployment. That is what it is, pure and simple.

Now, some of my friends on certain parts of the political spectrum would welcome seeing the Government shut down. What I am saying is the Government will literally shut down, there will literally be that many more people unemployed when those offices are closed, whether it is for 1 day, 1 week, or 1 hour, whatever we are going to increase the unemployment percentage in this country by a "no" vote or defeating this conference report.

I would urge the Senator from Michigan to vote his conscience and to, perhaps, withhold his vote until he sees the way this is going, and then I would urge him for the sake of the Republic again if it is necessary for his vote to vote for it in order to get this session ended and not to create more unemployment.

Mr. RIEGLE. I would just say to the Senator I think that within 2 days' time we could have another continuing resolution completed that was better, that would address the problem. We have to hold the feet of those of the administration to the fire, as well as those of the House and Senate who might otherwise be inclined to sidestep these problems until some time next year. I think that could be done. I think that would be a better course of action, and I think we ought to be prepared to stay here.

Mr. HATFIELD. Mr. President, I certainly grant the Senator his right to make an observation and make this the biggest part of his observation.

But there is absolutely no foundation to make an assessment to say we are going to get something better.

Let me tell the Senator as chairman of the committee who has been through the torturous process, through many days, weeks, and months, I can tell him my perspective as the one given the leadership to do this that it is not possible. To even convey that idea to the Members of the Senate is a false, false, false idea, and it is not true. I can assure him that.

We will not get something better in a few days or a few hours. We will have the continuing resolution right back that we have now.

I just tell the Senator that from the inside, from someone who struggled with this continuing resolution and dealing with the House of Representatives, dealing with my colleagues on the committee, dealing with this Senate, that that will not be, and I certainly reject that proposition that he proposes here that somehow we are going to get a better one back if we kill this and go back to the conference for another 2 or 3 days right up to Christmas Eve. They would not even get a quorum in that conference.

Therefore, what I am saying is if the Senator really wants to bring Government to a halt, and there are some in this body who may wish to do that—I do not think the Senator from Michigan is one of them, and I am not one of them—I do not see our Government as our enemy, but there are some who do—if the Senator from Michigan wants to really add to the unemployment figures and really wants to bring Government to a halt, then he will vote no.

Mr. SCHMITT and Mr. RIEGLE addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. HATFIELD. I yield 5 minutes to the Senator from New Mexico.

Mr. SCHMITT. Mr. President, what Chairman HATFIELD said is precisely correct. It would be extraordinarily difficult and I believe also that it would be impossible in the time remaining and under the circumstances remaining and as a consequence of what the Senator from Michigan obviously understands with his comments. I would say he broke the cord on one of the pressures at least that was operating in this conference. The interrelationship of the pay raise with other actions was very important in the considerations of the conference.

But, Mr. President, those who would vote against this conference report I hope will pause in the short time remaining and read and look and ask us what is in there with respect to the bills that are covered by this continuing resolution. What are the bills that have been passed now into law for the full fiscal year as a consequence of this continuing resolution because there is a great deal in these bills that under other circumstances almost certainly would not have been there? There is a remarkable increase in health funding, a remarkable increase in basic research in health and related matters, a remarkable increase in funding for vocational education, including the Job Corps. All of these do create significant new job opportunities. There are community health centers, the Job Corps, as I said. Head Start creates job opportunities. All of these things are going to contribute greatly to what the Senator from Michigan and others are concerned about.

Thank you, Mr. President.

Mr. PROXMIRE. Mr. President, will the Senator from New Mexico yield 1 minute?

Mr. SCHMITT. I yield.

Mr. PROXMIRE. I apologize to my good friend from Oregon.

I think we should point out that, although there are many disappointments in this continuing resolution, we are $18 billion under the President on defense, and we are $30 billion over the President, if we leave defense aside, $12 billion of which is in Health and Human Services.

So this is not exactly a stingy budget. The fact is we have gone much higher than the President in these areas of domestic spending and, as a matter of fact, we are still way above last year on defense because the President, of course, asked for a very large increase.

Mr. HATFIELD. Mr. President, I yield to the Senator from Pennsylvania 3 minutes.

Mr. SPECTER. Mr. President, I am very disappointed that the conference report has excluded the jobs program in a manner which I frankly find inexplicable and just totally not understandable on the grounds of public policy.

When the House of Representatives passed the continuing resolution with a jobs program in excess of $5 billion and the Senate responded with a jobs program for $2.1 billion, it seemed conclusive that there would be a jobs program submitted to the President in the continuing resolution. Considering the fact that unemployment is at an alltime high of some 10.8 percent, even higher in a State like the Commonwealth of Pennsylvania at 12.1 percent, and with the major problem in this country being jobs, Congress in this special session should be addressing this issue at least in some manner.

It may well be that there is not an opportunity in the 3 weeks or in the 4th week we are now in for a comprehensive program, but in my judgment it is just indispensable as a matter of good faith and good conscience that Congress should address the jobs issue.

The $1.2 billion program which was carefully crafted by the chairman of the Appropriations Committee and supported by the Appropriations Committee and supported by the Senate

after extensive debate in a relatively close vote is a minimal figure to come forward with to show the American people that Congress cares about unemployment and that Congress cares about a jobs program. For the House of Representatives and the Senate to be in a conference and not to accept even the lesser figure in my judgment simply cannot be explained and is unconscionable and inappropriate.

For those reasons I intend to vote against the conference report and against the continuing resolution.

It may well be that the President when confronted with the continuing resolution as a whole would have accepted the $1.2 billion jobs program.

I noted the President's statement that he would veto the continuing resolution with the jobs program, and I also noted another statement that he would study——

The PRESIDING OFFICER. The time yielded to the Senator has expired.

Mr. SPECTER. Mr. President, I ask for an additional minute.

Mr. HATFIELD. Mr. President, I yield the Senator an additional 1 minute.

Mr. SPECTER. I noted the two statements from the President, one that he would veto the continuing resolution with a jobs program and the second that he would study closely the continuing resolution with a jobs program.

It is my view that it is up to Congress to submit to the President what it is we think he should sign and then it is his responsibility to make the decision to approve it or to veto it.

But I do not think that we should abrogate our responsibility out of fear that he would veto the continuing resolution. It is our job to say what we think should be done and the $1.2 billion jobs program was minimal.

There are a great many factors in the continuing resolution and it may well have been that the President would have signed it with the $1.2 billion program, and I think it is unconscionable for us to leave this special session without that provision in it.

I thank the Chair and I thank the chairman of the Appropriations Committee and the ranking minority member for providing this time for my comments.

Mr. HATFIELD. Mr. President, I would only respond to the Senator from Pennsylvania by saying that I appreciate his concern. I would only remind him that we are in a timeframe in which such long involved discussions with the President on what he would sign was not possible.

I would also indicate the Senator from Pennsylvania signed the conference report, as I signed the conference report.

Mr. President, I know of no other Senator from the minority side or the majority side who have indicated to us their desire to speak. Therefore, I urge the Senate to adopt the conference report.

Mr. SPECTER. will the chairman of the Appropriations Committee yield me an additional minute?

Mr. HATFIELD. Mr. President, I withhold my motion. I would also say that we are not going to sit around here in continuing quorums for another hour waiting for Senators to wander onto the floor. If they have any remarks to make, I want them here now, because we have put too long a time on this thing to dilly-dally around here on this day getting the conference report adopted.

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. PROXMIRE. Mr. President, if the chairman would yield 1 minute to me on my time, I agree with him wholeheartedly. As far as I know, there are no Democrats who now wish to speak. We are ready to vote.

Mr. SPECTER. Will the Senator yield?

Mr. HATFIELD. I yield to the Senator from Pennsylvania.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, with respect to the chairman's comments that there is insufficient time, it is my suggestion that we have sufficient time to have a discussion with the President as to what he is going to sign or to make a submission of the continuing resolution to the President and to await his veto. We have time until January 3, when a new Congress will be convened, for the business of the country and the unemployed of the country.

Mr. HATFIELD. Mr. President, may I ask the Senator what he would propose would happen to the Government between now and January 3 that he plans to shut down while we talk to the President? Who is going to pay these people?

Mr. SPECTER. I would suggest that could be forthcoming much sooner than January 2.

Mr. HATFIELD. When does the Senator suggest that?

Mr. SPECTER. I suggest that we submit the continuing resolution to the President. It is as much his responsibility as our responsibility to have the Government to continue to run.

Each time there is a confrontation between the executive and legislative branch, I hear the comments that we are going to take a chance on a Presidential veto and have the Government shut down. Let the President face that alternative. It is equally his responsibility and we should not shirk from what we think ought to be submitted to him because of the consequence that a veto will shut down the Government. There are millions of people who are "shut down"—on unemployment—and their concerns ought to addressed.

The PRESIDING OFFICER. The time of the Senator from Pennsylvania has expired.

Mr. HATFIELD. I thank the Senator from Pennsylvania.

Does the Senator from Alabama wish to ask a question?

Mr. DENTON. Yes. How many pages are in the conference report?

Mr. HATFIELD. I think the Senator has a copy of it on his desk. We were not able to number the pages.

Mr. DENTON. Several hundred would be a pretty good estimate.

Mr. HATFIELD. I would think that is probably true.

Mr. DENTON. I do not think it should be surprising to anyone that those Senators who have problems or potential problems with this have not yet come up with their prepared statements. I think, in all fairness, I should say, on behalf of some of them, that they are indeed going to make emphatic statements on the floor and are not just delaying for the purposes of being annoying. They are trying to understand the fine print. They are trying to understand the report language, as opposed to the language in the bill itself.

Mr. HATFIELD. Let me say to the Senator that this is not a strange document. The Senate has worked its will through the appropriations process and the bills and reports on this floor. There have been changes made in the conference report, but not, I would say, of that magnitude. So we have been through this. This is not a first-time deal that we are looking at. This is a first-time conference report that was completed last night at 11 o'clock.

Now, I must say to the Senator, in my view, the continuing resolution is not the best way to do business. But that is not my choice to make at this time. I have to deal with what options I have.

Mr. DENTON. I am referring to the changes that were made, not to the familiar language.

I think one of those things is about to be addressed by the Senator who just came in behind you, so I yield the floor.

Mr. HATFIELD. Mr. President, does the Senator have any specific questions he would like us to answer at this time?

Mr. DENTON. I do, but there are Senators senior to me who have more authority to address them and I only intend to help them in addressing them.

The PRESIDING OFFICER. Who yields time?

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum on my time.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Schmitt). Without objection, it is so ordered.

Mr. HATFIELD. I yield 5 minutes to the Senator from Rhode Island.

Mr. CHAFEE. I thank the distinguished chairman of the Appropriations Committee for yielding me that time.

Mr. President, I share the regret that has been expressed on this floor that a jobs bill did not emerge with the continuing resolution conference report. I think that the jobs bill that we passed here in the Senate, chiefly authored by the chairman of the Appropriations Committee, was a good one. I supported that. I believe it would be beneficial to our Nation. The amount involved was modest when one reviews the total budget. To me it seems regrettable that it was not included in the final conference report.

Mr. President, I also would like to comment briefly on the pay situation.

Mr. President, it has been the decision of the majority of Senators that this year there shall be a pay raise for Members of the House of Representatives, and that the cap on salaries paid to top civil servants and congressional staff members be raised.

At the same time, it has been decided that there shall be no raise for Members of the Senate, although the need for such an increase is acknowledged by many Senators. Instead, that need for Senators is now expected to be fulfilled through honoraria from speaking engagements.

This is bad policy. Clearly, it would be futile to attempt to derail the step we have taken, for the votes do not exist to change the outcome. Yet, I cannot cast my vote for the pending conference report on the continuing resolution without registering a protest.

I have consistently supported the right of Members of Congress—both Representatives and Senators—to earn honoraria, provided there remains a limit on the amount one can receive for each speech, currently $2,000, and provided that there be full disclosure of the amount and source of the honoraria. If Members abuse the practice of giving speeches by ignoring Senate duties—and few do—then they face retribution on election day.

It has always seemed to me that either to deny Members the right to earn honoraria, or to cap the amount that may be earned from speeches, creates a double standard. Those who have no outside source of income other than from honoraria would be limited, but those who enjoy revenue from investmants—in some cases, very substantial revenue—would not be affected in the slightest. Such a policy rewards those Senators who are wealthy and penalizes those who lack resources beyond their Senate salaries.

There is an additional reason for permitting Members—of which I am one—to earn money by giving speeches. It is not only a source of supplementary income; it also serves as a means of drawing Members to different sections of the country to meet diverse groups. The resultant exchange of information and ideas is frequently beneficial to both sides.

But there is all the difference in the world between a policy which treats honoraria as an income supplement, and a policy which is tantamount to requiring such speaking engagements if Senators hope to earn what has been determined to be a proper salary.

By approving the increase for Representatives, we are affirming that the new salary is the proper amount Members of Congress should be paid. By denying such a salary for ourselves, we are stating that giving our services as lecturers is a requirement if we expect to even attempt to keep our income at levels consistent with inflation.

Once again, we are creating double standards, both in setting different salary levels for Representatives and Senators, and among Senators themselves. There are those among us, I believe, who refuse honoraria, or who donate all such income to charities. In essence, this new policy further penalizes these Senators. This is not right.

The great error we have made in connection with our salary is the failure to take the same percentage increases which we annually grant to other Federal employees. By rejecting such modest percentage increases on a yearly basis—and I have participated in these rejections—we have once again found ourselves in a situation where an enormous increase would be required to bring our compensation to the same level as our predecessors, taking inflation into account.

Since 1969, congressional salaries have risen from $42,500 a year to $60,662—or slightly more than $18,000. Yet, the $42,500 of 1969 is equivalent to $114,000 in today's inflated dollars! Clearly that would be excessive but modest steps upward would have avoided the situation that now exists.

I recognize that the die has been cast—the House will be paid more than the Senate. Even so, I think Senators should at least be aware of the ramifications, one of which is that if the imbalance continues, pensions received by retiring Representatives will be higher than the pensions paid to Senators. I suppose that we will soon be asked to restrict the salaries of our staff to keep them below our own, while those who serve the House will be allowed to keep step with inflation.

I had hoped that we could use this occasion to start afresh by awarding ourselves the same 4-percent pay increase we approved for other Federal employees. Such a modest increase is both responsible and reasonable. I do not believe it would be begrudged us by the American people.

Sadly, that is not to be. I think we are making a mistake, and I believe we will come to regret it.

I thank the chairman and the ranking Member for giving me this time.

Mr. HATFIELD. I am happy to have yielded time to the Senator from Rhode Island.

I suggest the absence of a quorum. Mr. President, I ask that that time be charged against my time.

The PRESIDING OFFICER. The Chair advises the Senator that that is automatic.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I understand the minority leader has a few remarks he would like to make. I yield whatever time he may wish.

Mr. ROBERT C. BYRD. Mr. President, In the face of the deepest and severest recession since the days of the Great Depression, this Congress is about to adjourn without having enacted any jobs program into law. Because of the President's unyielding opposition, the conferees have been forced to drop any jobs program from the continuing resolution conference report, even though more than 12 million Americans are jobless—the largest number since 1933.

Senate Democrats worked hard to develop a jobs program which could earn bipartisan support.

We worked hard to craft a jobs program that targets help where it is needed most, that takes careful note of the lessons we have learned from past job creation efforts, that is fiscally responsible, and that distributes the burden of paying for this additional spending in the fairest way. We do not claim that our program is a panacea; on the contrary, it is only a first step in the effort to turn this economy around and put America's jobless citizens back to work. I regret very much that it is a step which the President is evidently not prepared to take.

What is the President's alternative? What is it that he believes we should do to offer America's jobless hope for the future? We do not pretend to have a corner on wisdom, we know that ours is not the only answer. We are ready to listen to other approaches, to meet the President halfway. But we have heard no suggestions from the Presi-

dent or his advisers, no alternate approach to adding the 12 million Americans who find themselves without jobs in this Christmas season.

We understand that the provisions that were in this bill, in and of themselves, were not going to resolve the unemployment problems, but it was certainly a step, a major step, in the right direction. It was a step that would give hope. It was a step that indicated that Congress recognizes the problem, and that Congress is willing to do something about the problem. But with the President's threats to veto a continuing resolution containing the jobs program, I think such a threat was a sledgehammer held over the heads of the conferees and in order to keep this Government from coming to a halt—a screeching halt, very soon—they had to do the best they could do under the circumstances. So, they dropped the provision, under that pressure.

The simple fact is that we cannot afford any longer to "stay the course". We must get America's economy off its back and moving again. Perhaps the most important provision of the continuing resolution is the one which expresses the sense of the Congress that monetary policy should continue to concentrate on achieving a level of interest rates that will help us climb out of this recordsetting recession.

Mr. President, this economy is not going to straighten itself out unless interest rates come down and the investors of this country, and the business community of this country have some confidence that real, positive interest rates are going to come down and are going to stay down, within a reasonable range of inflation.

There may be no more crucial part of this legislation than this sense of the Congress, for it tells the Federal Reserve Board that Congress wants interest rates at affordable levels.

Since the President's veto threat forced the Senate-House Conference Committee to drop the modest job packages approved by each body, the resolution of Congress in favor of reasonable interest rates and responsible monetary policy offers the only hope for the unemployed in this bleak Christmas season.

I am sure that the Federal Reserve Board will pay careful attention to this resolution when setting its monetary policy targets for the coming year, and I hope our colleagues on the Banking Committees will use the monetary policy oversight hearings next February to assure compliance with this resolution.

Mr. President, I compliment Mr. HATFIELD, the chairman of the Senate conferees, and I want to compliment and do compliment Mr. PROXMIRE, the ranking member, for the work that he did in chairing the Senate conferees. I think the conferees worked long and they worked hard. I am very disappointed in the dropping of the jobs provision and I think that that can only be laid at the door of the White House.

At the White House, according to news reports I read, the President was intent on vetoing any continuing resolution that carried a jobs provision. I may be misstating the news reports, but that is the impression I had and now have. Certainly, that Damocles sword was hanging over the heads of the conferees, and the conferees were forced to act responsibly. Certainly, the Senate conferees, for the most part, wanted to retain the jobs provision and I assume that many House conferees wanted to do the same. But they were also faced with the freight train that was coming down the track, the fact that the Government was coming to a halt and checks were not going to go out, that social security recipients, veterans, military personell, and others, would not get their checks and so on, et cetera, et cetera, and many Government agencies would grind to a halt.

The conferees were faced with that situation.

Mr. President, I am sorry that the President insisted on a date in the continuing resolution that expired last Friday at midnight. This whole thing could have been avoided, this whole postelection lameduck session could have been avoided if there had been an expiration date of, say, next March 1. Congress would have been out of session and could have come back in January and we could have dealt with this continuing resolution in a situation that was not a pressurized and emotional situation such as the one in which we find ourselves now, with time already having run out and with the Government being put in the position of having to be brought to a halt.

Mr. HART. Mr. President, I wonder if the minority leader will yield for a question?

Mr. ROBERT C. BYRD. Yes, I yield.

Mr. HART. I was struck by the comparison the minority leader used in his opening remarks about the situation the country found itself in in 1933. I wonder if the minority leader will agree that perhaps the first and foremost, most important thing that Franklin Roosevelt did for this country under those circumstances was to give the American people hope? Would he agree with that proposition?

Mr. ROBERT C. BYRD. Yes. Yes, I do agree. I was in high school. I was in the 11th grade in 1933, and so I very well remember that 4,000 banks closed their doors in 1 year. I very well remember that there were 12 or 13 million people walking the streets and the country roads of this country looking for work. They could not find work.

During earlier years I sold the Cincinnati Post, saved up $7, put the $7 in a bank at Matoaka, W. Va. The bank went under, and I have not seen my $7 since.

So I very well remember a good bit of what happened during the great stock market crash, and predepression days and the Great Depression days when businessmen, bankers, and other people, those who had shares of stocks, were jumping out of windows, or some of the few people in this country who had automobiles in those days who were pulling them into garages and closing the doors and turning on the motors and taking their lives, or pressing cocked pistols to their temples and snuffing out their lives because their whole financial world had come crashing down around them, and their life's savings had been snuffed out overnight.

I can remember the first thing Mr. Roosevelt did. He declared a banking holiday, and in those first 100 days, numerous laws were passed, one of which was that the miners and other working people who had no right to bargain collectively were given a right to bargain collectively regarding their working hours and wages. During that administration came the social security program, and unemployment compensation, many other laws, and a law which provided for insurance on bank deposits so that never again would a little boy sell the Cincinnati Post and see his $7 go down the drain.

But the President and a Democratic Congress took action to put people back to work and to give this country hope. I can remember as a young lad, 15 or 16 years of age in the 11th grade, the hope that surged across this land like a tornado when Roosevelt was elected. It was a feeling of hope that, at last, here was a President and a Congress that were going to act to put people back to work and take people out of the soup kitchens, the veterans selling apples off the street corners, and make it possible to get jobs.

Mr. HART. If the minority leader will yield further, did not President Roosevelt, the President that this President continues to quote all the time, do that by uniting the country, by pulling it together rather than dividing it and using confrontation and setting class against class?

Mr. ROBERT C. BYRD. Absolutely, he did. I have never seen a time when there was a President who had more unification on the part of the American people. They were on the verge of revolution, but when Roosevelt was elected there was hope and they came together. The fact that the President was able to accomplish so much in the first 100 days of that Congress—and we have heard time and time again my senior colleague (Mr. RANDOLPH) speak of programs enacted in those 100 days—was because that President had a mandate from the people. I think it

was one of the moments in the history of this country which cannot be equaled. There was born a new feeling of hope, rather than despair. Order was to take the place of chaos. Faith replaced desperation.

Mr. HART. Is it not also the case that the leadership of the Congress was fairly united; that we really did not want to have a so-called lameduck session because we did not think that it was necessary but that the President of the United States insisted on it; when it was insisted upon, it was undertaken by leadership on this side of the aisle and in the House to try to take a step in the direction of solving this country's most urgent problem, and that is unemployment; when the Congress, both Houses had tried to do that, it was in fact the President of the United States who, having called the lameduck session back, now sends it a message that he does not want even a single vital step taken on the road to providing hope again and bringing the country back together again? Is that not pretty much the case of what happened here?

Mr. ROBERT C. BYRD. The distinguished Senator preeminently reflects my feeling in the matter better than I could speak it myself.

Mr. HART. Does that not leave us then at this hour with perhaps the worst of all worlds, having displayed a rather lengthy struggle in the Halls of Congress and the Senate and beyond to try to solve some of these problems even in an inadequate way and we are now sent a message from the House and the President of the United States that he will not accept this continuing resolution if it has any provision in it that is going to provide jobs for even a handful of people?

Mr. ROBERT C. BYRD. That is the message that I have heard. That is what I got from my understanding of the media reports.

Mr. HART. And it does not do us good really as a Congress to kick ourselves around for failure because it really is not our failure; it is the failure of the leadership of the White House and his rejection of the actions which the Congress has tried to take?

Mr. ROBERT C. BYRD. And the stubbornness, if I may say so, on the part of the White House. We went through all this last year. We passed a continuing resolution which, as I recall, the President promised the majority leader of this body (Mr. BAKER) would be accepted.

So we passed that continuing resolution. What happened? A veto occurred, and that veto caused some agencies to shut down. It cost taxpayers money. But the President had to show his macho.

So here we are again. We did not want to come back for a lameduck session. All we needed was to pass a continuing resolution that would have expired on March 1 or March 30 or April 1, or whatever, and we would have avoided this session, but the President wanted the Congress to come back and pass the remaining appropriation bills. I think we have passed four since we have been back. And do not forget that we spent 5 weeks this summer debating a debt limit extension in order that certain Senators could offer amendments prior to the election, amendments which did not deal with jobs necessarily but which dealt with various emotional social issues—which could be used as campaign ammunition against incumbent candidates.

Now here we are, at the last moment, with the threat of a Presidential veto if a jobs provision is in the legislation. I think the conferees did the best they could do. I certainly want to commend them. We are now at a point where we can only vote this conference support up or down. It cannot be amended, and there are no amendments in disagreement.

Mr. HART. But the leadership is going to be as frustrated as the Senator from Colorado if the interpretation of what has happened here is that this Congress failed to pass the jobs bill. That is not the story.

Mr. ROBERT C. BYRD. That is emphatically not the case.

Mr. HART. The story is that the President of the United States threatened to veto the jobs bill. That is the story.

Mr. ROBERT C. BYRD. That is correct. That is the story the American people ought to hear, and ought to know. Congress passed a jobs provision. It was in the continuing resolution. It passed both Houses. And there then came this threat of a veto by the President.

What were the conferees to do? They have done their best. I cannot criticize the conferees. I can only say that the leadership which existed in 1933 at the White House does not exist now.

Apparently there is not that same understanding of the plight of the unemployed in this country and the need for giving the unemployed people hope.

Mr. HART. And instead of Government by unification we have Government by confrontation.

Mr. ROBERT C. BYRD. Yes. And Government by confrontation is not good for the Nation.

Now. the President may have won a victory on this, but it is not a victory for the unemployed.

Mr. HART. The American people are tired of those kind of victories.

Mr. ROBERT C. BYRD. The American people are tired of confrontation, tired of that kind of victory. I must say that in my judgment the minority in this Senate has worked in a very cooperative fashion with the majority. We have offered our alternatives when we disagreed with the majority. We offered our alternatives last year on the Kemp-Roth tax bill. We offered our alternatives on the budget cut packages last year. We offered our alternatives on the gas tax package on which there will be a vote today, on the Baker amendment, and then there will be a cloture vote on the bill itself today. We have cooperated in every way possible even though some of us will not vote for the gas tax bill. Yet, we have not sought to obstruct or delay. We have not followed a policy of obstruction and confrontation. We have done everything to cooperate and expedite passage of appropriations bills and the continuing resolution so that Government agencies could continue to function and checks might not be delayed for those entitled to receive them. We have performed the part of a responsible minority.

We in the minority have followed a policy of responsibility. We have tried to do our duty and where we could not agree, we offered our alternatives. We were voted down.

So I think it has to be said that this has been a minority that has acted reasonably and that many times could have obstructed. We did not have to give cloture on the gas tax bill and the majority could not have gotten cloture without the help of the minority here because it takes 60 votes, but we gave cloture on the Baker amendment, and as far as I am concerned, I am willing to give cloture on the gas tax bill itself this evening, and I think that there are a good many Democrats who are willing to do that. We in the minority are also willing to allow passage of the bill tonight. What happens beyond that point is something else.

We may then have to reevaluate our position, but we have cooperated in every way.

All we see from the White House is a politics of confrontation. The President vetoed a supplemental appropriation bill this year. He called it a budget buster. Yet, it was $1.9 billion under what the President requested. And that raised the hackles of a lot of our friends from the other side of the aisle who had worked hard on behalf of that supplemental appropriations bill.

The chairman of the Appropriations Committee, Mr. HATFIELD, and the chairman of the Budget Committee, Mr. DOMENICI, did not like it because that bill was called a budget buster. It was $1.9 billion under what the President had requested. And we saw then a bipartisan grouping together to override that President's veto and we overrode it by 60 to 30 votes which was a two-thirds vote here in the Senate.

Again, let me say that the President, if my memory is correct, not once, not twice, but at least twice, maybe three times before a joint session of the two

bodies early this year stated there would be no increase in taxes this year. What did he do? He reversed himself and supported an $89 billion tax increase, and again now he is supporting the proposed tax increase on gasoline.

I do not quarrel with Senators who wish to support that tax. That is their business. And I find no fault with any Senator who disagrees with me on that, but I say we have cooperated and this side has not filibustered. There has been a little minority on the other side that has filibustered. But we have tried to be constructive, we have tried to come up with a jobs provision that has had the support of at least some Members of the majority party, and yet the President has held out the threat of vetoing that continuing resolution.

I do not doubt his willingness to veto it because he has held out these threats before and he has followed through on them.

Mr. HART. Mr. President, the majority leader mentioned a minute ago the fact that the President can now claim a victory. I think that is exactly what is wrong with our Government today. Outside the beltway of this city people do not care about that kind of stuff. That is big news here in Washington. The President won a victory. It is like a political scorecard. The President wins one, Congress loses one; the Democrats win one, the Republicans lose one, and vice versa.

That does not mean anything to the American people. They do not see their Government that way. They do not see it like a baseball scorecard. They, for that matter, do not care who wins or loses so long as this country is doing well.

What I am suggesting, and I think the minority leader agrees, is that kind of confrontation, that kind of Government by scorecard, Government as a sport, who wins more often than the other side, is what has gotten this country into trouble.

And the minority leader is absolutely right about bipartisan cooperation. That is not the issue. The issue is there is no cooperation between the White House and Congress.

Mr. ROBERT C. BYRD. That is exactly right. That is precisely correct.

The Democrats in this body are an "invisible" force as far as the White House is concerned. They are not considered at all except when the administration wants something.

As far as I know, the minority in the other body, which is the Republicans, may not be considered—I do not know—I cannot speak for them at all.

But there is going to come a time when this Senate minority is no longer going to be an invisible force because the people out there beyond the beltway, as the Senator referred to them, may be interested in the scorecard as far as the Redskins are concerned, as far as the West Virginia University football against Penn State or Pitt, or West Virginia at the Gator Bowl—but they are not interested in the scorecard on who wins and who loses here in these confrontations, many of which do not have to happen. There does not have to be confrontations. They seem to be set up by the White House in order that they can have a confrontation and declare a victory from time to time.

The people outside the beltway and some of them within the beltway are not interested in that kind of scorecard and they are not interested in confrontation. That is not doing the country any good.

Mr. HART. I just hope tomorrow when they pick up the newspaper they do not read that Congress failed to pass the jobs bill. That was not what happened here.

Mr. ROBERT C. BYRD. That is exactly what has not happened.

Mr. HART. The President threatened to veto the jobs bill and it was dropped. That is the story.

Mr. ROBERT C. BYRD. I have one important paragraph which I shall read and then I will yield.

Mr. President, the conferees have been forced by the specter of a veto to jettison any effort to include a jobs program, however modest, in this continuing resolution. But unemployment will not go away with the adjournment of this Congress. On the contrary, it will be the first and most pressing issue before the new Congress when it convenes in January. It is a challenge which Senate Democrats stand ready to meet.

Again, I compliment the conferees. I intend to vote for the conference report. We can either vote it up or vote it down. I see no point in voting it down because why go through this again and come in with a slimmed down version. The House of Representatives has already dispensed with their conferees, so we cannot sent it back to conference. There is no conference which to sent it. The House of Representatives adopted the conference report and they have discharged their conferees. Even if it were possible for us to vote this down and if it were possible to get the votes by some parliamentary procedure to start it all over again, and I have no doubt that that could be done, we would get a slimmed down continuing resolution that still would not contain the jobs provision in it and the President would have won on the scorecard again and the people again would have lost.

I say instead of running that risk and instead of running the risk of bringing the Government to a halt and at a cost of millions of dollars to the American people, again we are put in the position of having to vote for a conference report, having to vote it up—at least I feel that way—that does not contain the provisions which Congress wanted and in this instance provisions which would have helped the unemployed, which would have given the unemployed hope and which would have given the employed who are wondering when they are going to get their little pink slips also some hope.

I for one will vote reluctantly for the conference report.

Mr. SARBANES. Mr. President, will the minority leader yield?

Mr. ROBERT C. BYRD. I yield the floor.

Mr. PROXMIRE. Mr. President, how much time does the Senator require?

Mr. SARBANES. Three minutes.

Mr. PROXMIRE. Mr. President, I yield 3 minutes to the Senator from Maryland.

The PRESIDING OFFICER. The Senator from Maryland is recognized.

Mr. SARBANES. Mr. President, are the managers of the bill familiar—if I could have the attention of the floor manager—with the report on the wire, and I quote:

> GOP aides hinted that Reagan may not make a decision for a day or two on signing the bill making reference to the continuing resolution. Perhaps part of the delicate balancing act is designed to increase chances for passage of the gasoline tax measure in the final hours of the 97th Congress.

Is the manager of the bill familiar with this report?

Mr. PROXMIRE. No, I am not. This is the first I have heard it.

Frankly, I am shocked and surprised. The President has had plenty of time to study this.

It is true that we acted on the MX which affects his decision on the jobs part of it, but I am very hopeful he will sign the bill.

As the Senator will recall, he vetoed a continuing resolution in a similar situation last year.

Mr. SARBANES. Speaking of confrontation, which is what the minority leader is just referring to, I cannot think of a clearer instance of it than the apparent indication that the President and his aides are seriously considering simply holding this bill for a day or two and using it as apparently a lever on the highway gas tax bill. That is apparently what this report states.

Do the managers on the other side know anything about this?

Mr. STEVENS. I do not know. If that is true, I will say to my friend—and you are going to hear some of that later this afternoon, there are several people who are severely strained by that portion of the bill that I managed, the defense bill—I think we have done the best we could under the circumstances. But it is my understanding there are quite a few of those provisions that are being reviewed now.

You have to remember they did not even get a copy of them until just this afternoon and see the actual text of the agreements we made.

The normal enrolled bill period is 10 days. The Senator realizes that, and it usually takes 10 days for the departments to report to the President, and they are supposed to report to them by this evening.

I would say it is at least 2 days before we will know whether the President is going to sign this bill.

Mr. SARBANES. It is going to be at least 2 days?

Mr. STEVENS. That is what I believe.

Mr. SARBANES. So there is credence to this report.

Mr. STEVENS. Today and tomorrow.

I think we will not know before tomorrow evening at the earliest.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

I think the American people are entitled to know whether the President is or is not going to sign this bill. I think all of this gamesmanship, we ought to forget it. He should say so.

Mr. STEVENS. Even though I do not have the floor, with all due respect, that is not what I said.

Mr. ROBERT C. BYRD. I know that is not what the Senator said. I am saying what I am saying. It is power gamesmanship. If what the Senator from Maryland is saying is accurately reported, that is gamesmanship, and I say the time for that has stopped. The President ought to indicate whether or not he is going to veto this bill.

Mr. STEVENS. Mr. President, will the Senator yield to me?

Mr. ROBERT C. BYRD. He certainly have advisers who can tell him what is in this bill. He does not need 2 days to make that determination, and he ought to say if he is going to veto it. Let the other body prepare a slimmed out version, and if he is not going to veto it, we ought to know.

Mr. STEVENS. I will say to my good friend, and I very seldom disagree with the Senator from West Virginia, I want you to know that there is more than $380 billion here. We started some ways the administration did not request. We have eliminated programs—it is $380 billion.

Mr. PROXMIRE. I yield an additional minute to the Senator from Maryland.

Mr. STEVENS. I would be happy to take the time out of this time over here for a minute or two if you do not mind, just to let me finish this response.

I served downtown in the administration in other days, and I know how long it takes to build up enrolled bill reports. The way we did this thing so fast we are not sure that there are not errors in this bill. I think it is incumbent upon us to give the President of the United States a chance to review this bill and not to start talking about some rubber stamping because we want to get home for Christmas.

We knew what we were doing when we sent this bill down or we will when we send it down now. They do not even know what the final terms are there yet, and when it gets down there they have a right to review it, and I would be astounded if any President of the United States signed a bill of this size without some reviewing of it by the Attorney General and the departments involved.

I do not think it is posturing or leveraging. The Government is going to go on. We learned that under the last administration when we were told we had to get this thing done or the Government is going to shut down. It has happened before, and it is not going to shut down. The bill has been passed or the bill will be passed, and they have every reason to know the money is going to be provided if it is not vetoed, but they have the right to review it.

Mr. SARBANES. If I can have the attention of the majority whip, the wire report which I quoted reads as follows:

GOP aides hinted that Reagan might not make a decision for a day or two on signing the bill, perhaps part of a delicate balancing act designed to increase chances for passage of the gasoline tax measure in the final hours of the 97th Congress.

Now, putting to one side all of what the majority whip just said about reviewing the provisions of the continuing resolution and his own distinguished and commendable prior experience in the executive branch, what about this report that the President intends to hold the continuing resolution in effect hostage for a day or two pending the passage of the gasoline tax measure?

Mr. STEVENS. I would say to my friend——

Mr. SARBANES. Will you comment on that report?

Mr. STEVENS. I would say, you know, we have been involved here last evening in all this business, and I have not been near any Christmas cheer yet, but it sounds to me like someone down there has because it has nothing to do with the facts. The President had not even gotten this bill yet, received this bill yet.

When the President receives it he must have it reviewed. I want you to know I was on the committee and I am still trying to make certain that the language that is in this bill is what we agreed on last night. I have got people in the office back there right now checking it over trying to make certain.

I am fairly certain the administration is going to check it over word for word because there are some very important programs here, and if they are not the way we thought they were, I might be the one to ask him to veto it because we had some agreements, and I want to make sure they are in this bill.

Mr. SARBANES. So the majority whip is, in effect, telling us he does not expect the President, for whatever the reason may be, to decide on signing this bill before tomorrow evening at the earliest, is that correct?

Mr. STEVENS. At the absolute earliest.

The PRESIDING OFFICER. The Senator from Maryland's 1 minute has expired.

Who yields time?

Mr. STEVENS. I do not know how much time we have, but I yield 5 minutes—

The PRESIDING OFFICER. The majority has 51 minutes.

Mr. DOLE. I do not need much time.

Mr. STEVENS. I had better yield him 3 minutes then because that is what he does to me on tax bills.

Mr. DOLE. Mr. President, I will not need 3 minutes. I heard the gas tax bill mentioned and that got my attention. I had hoped we would move on with the continuing resolution. We have 4 hours, and I hope we give the President at the least the same time we give ourselves to review it. Those opposed to our gas tax can demonstrate that when we come to the gas tax. But we really believe the highway bill will be passed, should be passed, and will be signed.

It may be that we will stay in Congress 1 additional day, but not many Americans get 3 weeks off for Christmas, and we will somehow struggle along.

I hope we pass the continuing resolution and move along to the highway bill. Those who want to kill the highway bill will get their chance.

Mr. SARBANES. Mr. President, will the Senator yield for a question?

Mr. STEVENS. We do not have any time.

Mr. DOLE. My 3 minutes have not expired, just relax.

Mr. SARBANES. If the gas tax bill passes the Congress tonight, would you expect the President to sign the continuing resolution this evening so that people can go back to work in the morning?

Mr. DOLE. I have not talked to anyone about that. That is the judgment of the President. I ran and did not do very well, and he got elected, and he will make that judgment.

Mr. SARBANES. What is the Senator's expectation?

Mr. DOLE. I expect him to do the proper thing. He always has. [Laughter.]

Mr. SARBANES. You know, the Senator has developed a tremendous reputation in this country for his one-liners, and I can understand why. It

has just been demonstrated once again.

Mr. DOLE. And candor, too. [Laughter.]

Mr. PROXMIRE. Mr. President, I yield 3 minutes to the Senator from Montana.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. I thank the Senator from Wisconsin.

I might add an additional word. I, personally, find the wire report very disturbing and, if in fact the White House is using the continuing resolution as leverage with respect to the gas tax bill or the Caribbean Basin Initiative or anything else, I think that is an outrageous display of gamesmanship that the White House is undertaking. In fact, it confirms my view that the White House has been even more cynical than I thought they were.

We in the Congress did not want this lameduck session in the first place. The leadership of both Houses were opposed to this session. We are here because the President wanted us to be here.

Not only that, we are supposed to be here to pass a continuing appropriations resolution. Now the White House is pushing through the CBI and other legislation it wants and, apparently, is going to hold hostage the continuing appropriations resolution.

I think this kind of gamesmanship, as referred to by the minority leader, the Senator from Maryland, and by the Senator from Colorado, is absolutely demeaning of the Office of the President of the United States. I hope that is not what is going on.

One other matter, Mr. President, refers to action taken by the conference committee, that is the physician peer review which was cut from $25 million in the Senate bill to $15 million. I think this is very shortsighted.

Medicare costs are going up significantly in our country due, in large part, to hospital cost increases. The physician peer review system helps to put a lid on hospital costs. If we cut out the physician review, that is PSRO, in our country, medicare costs are going to continue to rise.

In addition, the administration is now talking about using a prospective reimbursement in medicare. Mr. President, if that happens, if we have prospective reimbursement in our medicare programs, hospitals will be inclined to add more patients to increase their bills on medicare. That, of course, is going to put more upward pressure on medicare.

If we do move to prospective reimbursement, we should have peer review to help keep the lid on, help keep the clamp on, and help reduce unnecessary hospital costs.

So, Mr. President, I regret that the conference has taken this action that was proposed, in large part, by the other body. I think it is very shortsighted.

The conferees agreed to lower the appropriation for physician peer review from $25 million, which was agreed to in the Senate Appropriations Committee, to $15 million. The House bill would have funded peer review at just over $24 million, the current rate of funding. However, the conferees chose to lower the appropriation, put forward by both Houses, by almost half.

If this provision is not changed, the medicare trust funds, already financially strapped, will be paying for health care that is not necessary or appropriate. If this provision is not changed, America's 25 million elderly and disabled will not be guaranteed that the care they receive is of high quality. If this provision is not changed, physicians who protect the Nation's investment in health care through local peer review organizations will be arbitrarily terminated as grantees by an administration that has never hidden its hostility to them.

Mr. President, we should not take the irresponsible fiscal step called for in this continuing resolution. If peer review is funded at $15 million, instead of $25 million, it appears that between one-third and one-half of the existing physician organizations will have to be terminated.

And who will decide which peer review organization will be terminated? The continuing resolution says that the Department of Health and Human Services shall terminate ineffective and inefficient peer review organization—the HHS Department which is opposed to physician peer review; which has, for 2 years, tried to zero-fund this program; which has conducted an evaluation of peer review organizations which GAO says is unfair and discriminatory.

So we have a situation where peer review organizations, which save the Government money, will not be funded. Many will have to be terminated. But the decisions about who will be terminated will be made by those in HHS who want to eliminate this program. And these HHS officials can use an evaluation methodology discredited by the GAO.

Mr. President, the Finance Committee is convinced that peer review is needed. The Finance Committee this year rewrote the peer review legislation. The Finance Committee sees the need for strong peer review organizations as we develop a new prospective reimbursenemt system for medicare.

It is worth noting that members of the House Ways and Means Committee and the House Commerce Committed accepted, without objection, the peer review legislation prepared by the Finance Committee. It is apparent that the committees with substantive programs know the merit of peer review.

The action taken this past weekend to reduce peer review funding is, I think, shortsighted. But, to be perfectly candid, I see little that can be done to remedy the error that was made. The appropriations process is not the place to legislate. Medicare beneficiaries will suffer by the action taken on peer review. The medicare trust funds will be less secure. I can only hope that remedial action will be taken early in the next Congress to shore up the peer review system.

I thank the Senator from Wisconsin for yielding.

The PRESIDING OFFICER. Who yields time?

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum and ask that the time be taken out of my time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Alaska has 49 minutes and 2 seconds remaining and the Senator from Wisconsin has 53 minutes and 54 seconds remaining.

Mr. STEVENS. Mr. President, I yield to the Senator from New Hampshire such time as he may need.

Mr. RUDMAN. Mr. President, I rise, not to support the conference report on the continuing resolution, which I do, but to discuss the conference committee's action in relation to the Senate amendment on Federal Trade Commission jurisdiction over the professions and their professional associations.

Mr. President, the issue of FTC jurisdiction over the professions has been one of the most heavily lobbied and thoroughly debated issues before the 97th Congress. It was considered by the House Energy and Commerce Committee, the Senate Commerce Committee, the Senate Appropriations Committee on two occasions, the full House, and the full Senate.

As frequently happens in matters of this kind, a compromise proposal was developed and adopted by the full Senate on a vote of 59–37 early Friday morning. The compromise, which I had initially offered in the Senate Appropriations Committee, eliminated the FTC's authority to invalidate any State laws relating to requirements for licensure and professionals' scope of practice, but retained the FTC's authority to bring antitrust and consumer protection cases. It differed

from the compromise which had previously been defeated in the House by 195-208 in that the House version contained a "pre-exemption override" which effectively allowed the FTC to make its own determinations as to which State laws it could not preempt. Many Members of Congress, in both Houses, were concerned that this created a loophole that the FTC could exploit to make the restriction meaningless. The Senate version of the compromise would have surely been approved by the House, and I believe it properly reflected the will of both Houses of Congress. Thus, although the House version of the continuing resolution contained no restriction, it seemed fair to assume that the House conferees would accept the Senate provision.

Mr. President, it is no secret that my preferred position on this issue was to have no restriction at all. Nonetheless, having produced a compromise position which had the support of a majority of Congress, I felt an obligation to see it enacted into law and to hopefully permanently dispose of this issue.

Through a series of discussions on Friday, all the many organizations opposing a complete exemption for professionals from the FTC agreed to support the Senate position, although many of them did so somewhat reluctantly. In addition, two of the three organizations supporting the complete exemption, the American Dental Association and the American Optometric Association, also decided to support the compromise. Mr. President, I will ask that a copy of a letter I received from the ADA be entered into the RECORD at the conclusion of my remarks.

Thus, Mr. President, it came as some surprise to discover that the American Medical Association alone was opposing the amendment and preferred to have no restriction on the FTC rather than the compromise adopted by the Senate.

The AMA not only opposed the Senate compromise, but they actively lobbied against it. And, I found myself in the ironic position of pushing for some restrictions on the FTC's authority over professionals while the AMA was pushing for allowing the FTC to retail its full powers.

We spent a considerable amount of time on this issue in conference, more than on almost any other issue, and the Senate conferees twice voted to insist on the Senate's position. Incidentally, the only Senators who voted to recede were Senators who voted against the compromise on the floor. The chief opponent to the Senate position among the House conferees was the distinguished chairman of the House Appropriations Committee, who was an original cosponsor of the total exemption for professionals. Ultimately, the Senate conferees were forced to recede and there is currently no restriction on the FTC's authority in relation to professionals in the continuing resolution.

Mr. President, I have given this rather lengthy recital so there would be no doubt in anyone's mind why the Senate compromise was dropped. It was not because of the efforts of those who opposed any restriction—they were willing to live with the compromise. It was the result of intense lobbying by the AMA and the AMA alone.

The question arises, Mr. President, as to why the AMA would prefer no restriction to the compromise adopted by the Senate. The fact is that the entire line of argument the AMA has raised for their amendment relating to State jurisdiction and the FTC getting involved in "quality of health care" decisions is a smokescreen for their real purpose. While those are a legitimate concern to many, the AMA's real purpose is to prevent the FTC from taking actions against State and local medical associations for price-fixing charges and the like. A compromise which left that problem of theirs unresolved was simply unacceptable to them.

Mr. President, I would hope that my colleagues remember this when, during the 98th Congress, the AMA again lobbies for a complete exemption for the AMA. The issue for them is not State jurisdiction or quality of care, as it is with the dentists and optometrists. The issue is price fixing, boycotts, and restrictions on ethical advertising.

For my part, I can categorically state that, as long as I am a Member of the Senate, the AMA will not successfully exempt themselves from FTC enforcement of the same antitrust and consumer protection laws that all businesses throughout the country must comply with.

Mr. President, I ask uanimous consent that the letter I received from the American Dental Association be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AMERICAN DENTAL ASSOCIATION,
Washington, D.C., December 17, 1982.

Hon. WARREN RUDMAN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR RUDMAN: The American Dental Association believes it is extremely important that Congress take action this year clarifying FTC's jurisdiction with respect to invalidating state laws establishing training, education or other requirements for the licensure of professionals and the scope of their practice.

As you know, the Association opposed the earlier version of your amendment which would have allowed the FTC to make its own determinations with regard to which state laws could be overridden.

The language of your revised amendment which was adopted by the Senate Appropriations Committee is a significant improvement and we are therefore strongly supportive of its enactment.

We thank you for your consideration of this important matter and your efforts to resolve a substantial part of this controversial question.

Sincerely yours,

BURTON H. PRESS, D.D.S.,
President.

The PRESIDING OFFICER. Who yields time?

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum and ask that the time be taken out of my time.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, will the Senator yield me 6 minutes?

Mr. HATFIELD. I yield 6 minutes to the Senator from Alaska.

Mr. STEVENS. Mr. President, we have an extremely unusual situation in the case of the Defense Department portion of the continuing resolution. As Senators know, the House-passed resolution based defense spending authority on the provisions of the House-passed Defense appropriations bill while our version used the terms of the Senate-reported Defense appropriations bill. The conferees agreed as a realistic alternative to include the separate conference agreement on the entire Defense appropriations bill in the final report on the continuing resolution. Thus the conference report now before you does include the Defense appropriations bill in full, line for line, for the full fiscal year.

The managers for both the House and Senate thought it was important to conclude work on the Defense spending bill in this fashion for several reasons. First, the Defense appropriation is the largest of the spending bills enacted by Congress and addresses many issues critical to the Nation's security. Confining a bill of this size and complexity to a continuing resolution formula and leaving many significant issues unresolved is not a responsible solution in the final days of this Congress. Further, Mr. President, it is costly and damaging to underfund our armed forces and our national security requirement on the basis of some stopgap formula. Keep in mind that both

Houses had an opportunity to review, amend and vote on defense spending measures. Indeed, the Senate version underwent several floor revisions this past week as a part of the continuing resolution.

I call attention to the fact that we have not followed the usual formula of taking the lowest amount in the House bill and the lowest amount in the Senate bill in the continuing resolution.

We have met in conference on the Defense appropriations bill and it is covered in this bill.

Now, Mr. President, let me cover major issues in the conference agreement on Defense Department funding.

On the MX, with regard to the controversial question of MX strategic missile funding, Mr. President, it is accurate to say neither the House nor the Senate conferees are content with the final agreement. In the face of adamant House opposition, the final agreement deletes the $988 million approved by the Senate for MX Missile and basing procurement. However, the House did agree to language in the statement of the managers authorizing deployment of any missiles produced with the $2.5 billion in research and development funding once Congress has approved a permanent basing mode. That is a significant concession, Mr. President, because it permits progress on production of the MX and should preserve the 1986 initial operating capability goal established by the President. The restrictive lanaguage preventing obligation of certain R&D funds until Congress adopts a resolution approving a permanent basing mode is essentially that approved by the Senate. Finally, the R&D allowance agreed to in conference is $60 million more than approved in the Senate.

Mr. President, we would have preferred to preserve the Senate's position on the MX procurement, but this was impossible.

Let me read into the RECORD at this point to make certain that everyone understands the report language that is before the Senate on the MX missile.

MX MISSILE

The conferees agree that no further Congressional action on the $988,000,000 for MX missile and basing procurement will be taken until both houses have approved a basing mode. The conferees agree that a total of $2,509,332,000 be provided for MX and basing mode research, development, test and evaluation. The conference Committee bill restricts obligation or expenditure of $560,000,000 for full scale engineering development of a permanent basing mode until both Houses of Congress have approved a permanent basing mode. Further, no missile flight testing will be conducted until both Houses of Congress have approved a permanent basing mode.

The conferees note that the MX research and development program includes the acquisition of missiles. When both the House and the Senate have approved a permanent basing mode, missiles which have been acquired under the research and development program may be deployed in the approved permanent basing mode. The conferees intend by this action to emphasize their firm commitment to modernization of our strategic nuclear forces.

Mr. President, I think that despite all of the controversy about it, this portion of our bill is one that merits our approval.

It has been a most difficult conference because of the circumstances in which we faced the issues before us.

HIGHLIGHTS:

OPERATION AND MAINTENANCE

The conferees agreed to an allowance of $67.3 billion which is $84 million less than the Senate allowance and $384 million more than the House allowance. We feel that this fully supports the readiness aspects of the budget through funding for the pay raise, increases for real property maintenance and an enhanced flying hour program above the budgeted levels.

The conference agreement is $3.8 billion below the budget request. More than half of this reduction in the O&M budget stems from pricing adjustments for fuel and foreign currency—these reductions have no impact on readiness. Other reductions implement authorization limitations or unjustified costs which marginally affect readiness.

PROCUREMENT

The conference committee's $80.3 billion recommendation for military procurement is $9.3 billion below the President's budget and $6.1 billion under the authorized level. It exceeds the House allowance, however, by half a billion dollars, and provide $15.3 billion more than the 1982 funding level.

For the Army, this means full authorized funding for such key systems as the Apache and Black Hawk helicopters but not new procurement funds for the Pershing II intermediate range missile. Funds have been added to insure that the European deployment date for Pershing can be met. The recommendation for the M-1 tank supports increased production to 855 tanks. No procurement funding is recommended for the Viper antitank weapon as recommended by the Senate.

For the Navy, the authorized combat aircraft program is fully funded but at a level $963 million below the budget. The conferees agreed to funding less Trident C-4 missiles than the House in anticipation of an early introduction of the newer D-5 missile. The conferees recommended holding Tomahawk missile production essentially at 1982 levels in view of recent production and cost changes. Despite these and other reductions, the conference still recommended $3.6 billion for Navy missiles, torpedoes, and other weapons. This is an increase of $354 million over 1982 funding.

The largest acquisition investment is recommended for Air Force procurement of aircraft—$17.7 billion. This is only a slight reduction in the budget estimate but actually above both the House and Senate allowances. This fully supports procurement of the B-1B, F-15, F-16, and C-5B, with 10 C-130 aircraft added to the budget. Significantly, more than $6 billion is recommended for aircraft modifications, spares and repair parts.

The conferees, as you know, did not provide funding for MX procurement but, as with the Navy, did support the Tomahawk and antiradiation missiles. The missile procurement total of $4.9 billion is still more than $400 million over the 1982 budget. Significantly, full funding for the IR Maverick missile is being provided as recommended by the Senate.

Another important investment initiative recommended by the conferees as a budget addition is $125 million for equipping the Reserve and National Guard units. This had not been included in the House bill.

RESEARCH AND DEVELOPMENT

The continuing resolution provides $22.7 billion for RDT&E.

This is nearly $600 million above the House allowance, and about $70 million below the Senate position. The Senate was able to restore many House R&D cuts and maintain a sizable rate of real growth over 7 percent.

Major accomplishments in conference on the defense portions of the continuing resolution:

Sixty million dollars for the C-17 program;

Restoration of a $58 million House cut to the advanced lightweight torpedo program;

Addition of $10 million for short wavelength laser technology;

Restoration of $20 million of a House cut for the Mark 48 ADCAP torpedo program;

Restoration of a $9.2 million House, cut for over-the-horizon radar;

Restoration of $13 million of a House cut to the air launched cruise missile R&D program;

Provided $2.5 billion for MX research and development, $60 million above the Senate allowance.

Mr. President, I ask unanimous consent that a comparative statement of new budget authority be printed in the RECORD.

There being no objection, the comparative statement was ordered to be printed in the RECORD, as follows:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

	New budget authority					Conference compared with—			
	Enacted	Estimates	House	Senate	Conference	Enacted	Estimates	House bill	Senate bill
TITLE I—MILITARY PERSONNEL

[1] Includes supplemental. [2] As amended by H. Doc. 97–206 and H. Doc. 97–248. Also reflects an $109 million adjustment from O&M, Navy, to the Department of Energy budget, and adds $4,030,173,000, the amount anticipated to have been submitted for pay costs in the fiscal year 1983 pay supplemental. Note: Request includes $4,030,173,000 (budget authority) and $3,910,272,000 (outlays) for pay costs. Recommended includes $1,702,413,000 (budget authority) and $1,651,340,000 (outlays) for pay costs. These amounts are reflected in the mandatory totals.

Mr. STEVENS. Mr. President, I ask unanimous consent that there be printed in the RECORD the line item agreements for defense covered in the conference report so there can be no question about the amounts of request, the House action, the Senate action, and the final action taken by the conference.

There being no objection, the material referred to will be printed as follows:

TITLE I.—MILITARY PERSONNEL

The conferees agree to the following amounts for the military personnel accounts:

[In thousands of dollars]

	Budget	House	Senate	Conference
SUMMARY				
MILITARY PERSONNEL, ARMY	15,363,700	14,478,149	14,023,827	14,454,848
